

# PRESCRIPTION DRUG PRICES

## LEGISLATOR NOTICE

The Legislative Services Division is required to offer a brief history on the subject matter of a bill draft request prior to drafting. (5-4-105, MCA; [Chapter 309, Laws of 2017](#)) The history must include related legislation introduced over the last five sessions and hyperlinks to the bill, hearing information, and fiscal notes. The links below open to the page showing the status and history of bills introduced on this topic in the past. The bill text and any related fiscal notes can be accessed through the link at the top of that page.

**Legislation can be complex and this history is not intended to be exhaustive. Please contact the drafter of the requested bill for more information.**

## Background Materials and Research

**Topic Summary:** High prescription drug costs affect not only individual consumers but also state, federal, and local governments. Both the federal government and state governments pay the cost of prescription drugs provided through the Medicaid program and the state Children’s Health Insurance Program (CHIP). State and federal governments also pay for prescription drugs through the health insurance plans they offer to their employees and when they cover medical costs for people who are being held in prisons and jails. Price increases in recent years have prompted efforts at both the state and federal levels to find ways to decrease costs.

State-level efforts to lower drug prices have included measures to try to prevent price gouging, to allow drug importation from Canada, to require disclosure of certain cost information, and to cap the out-of-pocket costs for some drugs. A 2017 Maryland price-gouging law was rendered unenforceable after a U.S. circuit court determined that it was unconstitutional and the U.S. Supreme Court in 2019 declined to hear an appeal of the decision.

At the federal level, the Trump administration in 2018 released a plan for lowering drug costs and in 2020 paved the way for importation of certain drugs from Canada. The federal government continues to develop guidance on that option. Meanwhile, Congress also passed a law prohibiting companies that administer drug benefits for health insurers from putting gag clauses into their contracts with pharmacies. Gag clauses typically prevent pharmacists from telling consumers that they might pay less for a drug if they pay out of pocket than if they use their insurance and make the required copayment.
