A greater level of detail is provided on the following page.

Action Item: Staff is requesting Legislative Council approval of the Legislative Services Division Program biennial operating plan.

2. Statutory Appropriations

► The Branch Retirement Termination Reserve Account was established in HB 139 during the 2007 regular session with a one-time general fund transfer. The account has no ongoing funding source. Funds in the account may be expended in any of the three staff divisions for eligible termination costs of retiring employees with approval of the appropriate division director. The account is statutorily appropriated to the LSD which means program transfers are required to provide for expenditure by the Fiscal or Audit Divisions. The account balance, approximately \$132,000, is invested in the state's Short-Term Investment Pool.

Action Item: Staff is requesting Legislative Council approval to process program transfers during the 2013 biennium which meet the eligibility and director approval requirements of the account, up to the limits of the account.

► The Branch IT Reserve Account was established in HB 28 during the 2005 regular session. Deposits to the account may be made from division carryforward appropriations and feed bill reversions. The account is statutorily appropriated to the Legislative Services Division and may be expended only with the approval of the Legislative Council. The account balance, currently \$434,000, could reach \$1.18 million after fiscal year 2011 reversions. The balance is invested in the state's Short-Term Investment Pool.

A request for project funding will be brought to the Legislative Council for consideration under a separate agenda item.
