

I support fair non-partisan legislative districts!

*One percent or less variation in the size of districts: It's not fair if one representative has to represent 9400 people, and the next one up the road only has 8600. The people in the smaller district get easier access to their government.

*No political data should be used to draw districts. Districts should be drawn to represent people, not partisan politics

*Don't keep the current districts: The current districts divide communities in two, they have wildly varying population sizes — in general they're not unbiased.
