\*\*\*\* Bill No. \*\*\*\*

Introduced By \*\*\*\*\*

By Request of the Energy and Telecommunications Interim Committee

A Bill for an Act entitled: "An Act requiring the public service commission to biennially review and update interconnection standards for net metering systems; amending section 69-8-604, MCA; and providing an immediate effective date."

Be it enacted by the Legislature of the State of Montana:

**Section 1.** Section 69-8-604, MCA, is amended to read:

**"69-8-604. Net metering system -- reliability and safety.**

(1) A net metering system used by a customer-generator must include, at the customer-generator's own expense, all equipment necessary to meet applicable safety, power quality, and interconnection requirements established by the national electrical code, national electrical safety code, institute of electrical and electronic engineers, and underwriters laboratories.

(2) The commission, after appropriate notice and opportunity for comment, may adopt by rule additional safety, power quality, and interconnection requirements for customer-generators that the commission ~~or the local governing body~~ determines are necessary to protect public safety and net metering system reliability.

(3) The commission shall biennially review and update, if

necessary, interconnection requirements and rules for customer-  
generators to ensure that the requirements and rules:

(a) comply with the most up-to-date national electrical and  
safety codes and standards; and

(b) are being properly implemented by public utilities  
subject to this part and other utilities under the commission's  
jurisdiction that administer net metering programs."
