Economic Services Legislative Committee

I am offering these comments on behalf of two of our local Chiropractors in Cut Bank and Conrad, Mt. Dr. Julie and Richard Murack are licensed to practice a form of pain relief using the Dry Needling Technique. Their success rate is high, but the the DRY NEEDLING TECHNIQUE needs to stay in their scope of practice. They serve in a 60 mile plus radius where this technique is not widely available due to low population and long distances to a clinic, in this and many other sparsely populated areas throughout Montana. Please give this your utmost consideration. They have both been very professional whenever I have had to use their chiropractic services. Nice thing, one treatment is all I normally require. Thank you. Senator Bruce Butch Gillespie
