To whom it may concern,
Another letter I must write seriously you guys are going to do whatever you want anyway. That's how it works. One of the reasons we live in the state is because we don't have sales tax. My husband is a native montanian for 61 years, he has watched this town go downhill this state go downhill. The governor says that we're doing well financially so why is it we have to now all the sudden have a sales tax? You say our property taxes will go down what a joke you know that's not true. Montana is turning into another California! This is not our way of life. Stop trying to turn us into big cities. I'm so disgusted that I have to keep writing these notes on a daily basis and you guys do whatever you want anyway. Or whatever the Democrats want! They always get their way where is our voice? I say no sales tax. It's already too expensive to live here. Family's already have to work two jobs to survive here for what because there's pretty mountains? Our property taxes are already out of control and now you want to throw this on us to. We the voters are tired of not getting our voices heard. For once do the right thing vote no!
Thank You
Jackie Wahl
