

Questions for Criminal Justice System Stakeholders About Data Bills (HJ 31 Study)

For June 2022 LJIC meeting

The Law and Justice Interim Committee (LJIC) members requested that criminal justice system agencies and stakeholders address several questions for the LJIC's June 27 meeting. The questions were posed during the LJIC's [May 9 meeting](#) and [May 10 work session](#). The numbers in parentheses indicate the date and time of the question and the legislator who posed it.

Deadline: June 16 by 5 pm to ensure responses are available prior to the meeting.

For All Stakeholders

- What are the top 3 data pieces or projects--the low hanging fruit--that you feel could be a start of an initial data project? (May 9: 11:14:45 – Lynch)
- Where or what agency should lodge a data system/unit? (May 9: 11:36 – Esp and May 10: 10:46 – Bishop)
- Do you have suggestions of how the state could create a unique ID? (May 9: 11:29 – Lynch)

For State Stakeholders

- How much are you spending on technology? (May 9: 11:12 to 11:17 generally – Lynch)
 - What are the numbers of FTEs involved especially with data entry and analysis? (Don't need specific figures but trying to get a reasonable estimate of the costs.)
- Who are your current vendors for case management or data management systems? (May 9: 11:13:30 – Lynch and 11:34:30 – Essmann)
- Specific to the Department of Justice: How do MHP and FWP citations get placed into the DOJ systems? (May 10: 10:45:34 – Lynch)

For Local Stakeholders – (LJIC staff to coordinate with the respective associations on responses)

- How much are the counties spending on technology (ie, jail management systems, systems in law enforcement vehicles, court systems, county attorney systems). (May 9: 11:13:15 – Lynch)
- Do you have a case management or jail management system? If so, who is the vendor and approximately how much do you spend on it (installation, licenses, training, etc)?
- Do you have data entry clerks or staff? If so, how many and is there an approximate cost to provide for those? If not, who handles data entry in your office?
