MONTANA 10

Higher Graduation Rates

Projected **15% increase in graduation rates** means more low-income Montanans graduate with college degrees.

A Better Montana

More Montanans have degrees; the state grows its skilled workforce; and our communities are stronger.

Lower Cost Per Degree

The MUS becomes more efficient by graduating more students at a **lower cost per degree**.

On-Time Graduation

More students graduate and do so on time, saving students and institutions money. **A single student will save, on average, \$15K by graduating on-time.**
