		<p>This map is hot garbage. It is unacceptable.</p> <p>The districts on this map are set up to optimize for the optional goal of "competitiveness" at the expense of the non-optional criteria of compactness, shared communities of interest, etc.</p> <p>Several of the districts are clearly gerrymandered to optimize partisan advantage (see district 100, Bozeman, and Missoula areas, etc).</p> <p>Further, this looks like the population variations nearly invariably favor a certain party - by having their "safe" districts having fewer people, and the other parties "safe" districts having more people.</p>				
TCP1 (Public)	Dislike	Shame on the Commission for moving this map forward.	Edward Dickman	edward.dickman@gmail.com	Kalispell	MT
