

Final Project Report on Racial Bloc Voting Analysis for the State of Montana

LEG-RFP-2022-0019NH

Prepared for:

The Montana Districting and
Apportionment Commission

May 10, 2022

Below is the amount of hours it took the Haystaq team to accomplish the work for each of the tasks.

Task 1. Compile Database of Precinct Level Election Results	20 Hours
Task 2. Determine Relevant Elections	1 Hour
Task 3. Conduct Racial Bloc Voting Analysis	56 Hours
Task 4. Deliver Written Mid-Progress Report	n/a
Task 5. Deliver Written Final Report	33 Hours
Task 6. Zoom Presentation	10 Hours
Task 7. Nine Week Timeline	n/a

A significant part of the overall task was setting up the data and programming the code for the analysis. Any future analysis in the same regions with a focus on proposed seats with a significant American Indian population would be estimated to be 10 hours of a Senior Data Analyst per map or approximately \$2,000 per map. This would assume the same elections would be used.
