

LAWS Internet Interface –Online Source for Legislative Status and Documents.

The term "LAWS" is an acronym for Legislative Automated Workflow System. A key function of the system is the collection and timely distribution of information related to the Montana Legislature. The LAWS system contains detailed information on all bills and bill drafts prior to, during, and after the Montana legislative session.

During and after a legislative session the text of bills and bill drafts, floor agendas, journals, floor action summaries, and floor votes, for both the House and Senate are available from LAWS. Committee minutes and audio of hearings are also available from LAWS.

The public access portion of LAWS consists of an internet web server that serves information from the legislative session database. The website has links to bill text and an abundance of related information.

All session years of LAWS is easily accessible by changing the session using the dropdown located at the right-side of the header on most LAWS pages.

Note: The most current session in LAWS will have a goldish background, all others will have a greyish-blue background.
