Montana's federal Single Audit is a biennial audit that completes the reporting requirements of the Single Audit Act Amendments of 1996, and the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards. The Single Audit Report is compiled from work performed by other annual or biennial individual agency audit engagements. Individual agency audits are conducted by the Legislative Audit Division to determine if an agency's financial operations are properly conducted, the financial reports are presented fairly, and the agency has complied with applicable laws and regulations. In performing these audits, the audit staff use standards set forth by the American Institute of Certified Public Accountants and the United States Government Accountability Office.

Government Auditing Standards, the Single Audit Act Amendments of 1996, and the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards require the auditor to issue certain financial, internal control, and compliance reports. The Single Audit Report complies with these reporting requirements and is intended for distribution to federal grantor agencies. The individual agency audit reports are not intended to comply with these reporting requirements and are therefore not intended for distribution to federal grantor agencies.

Audit staff members hold degrees with an emphasis in accounting. Most staff members hold Certified Public Accountant (CPA) certificates.

March 2018

The Legislative Audit Committee
of the Montana State Legislature:

This is our Single Audit Report of the state of Montana for the two fiscal years ended June 30, 2017. The Single Audit was conducted in accordance with Government Auditing Standards and Single Audit Act Amendments of 1996 and the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). This document contains the Independent Auditor's Reports on the state of Montana's basic financial statements for the fiscal years ended June 30, 2017 (page A-3), and June 30, 2016 (page B-5). The Independent Auditor's Reports also address the reasonableness of the schedules of expenditures of federal awards in relation to the basic financial statements.

The audit disclosed certain questioned costs and deficiencies in internal control and compliance, which are summarized in the Schedule of Findings and Questioned Costs (pages C-13 through C-95). The Independent Auditor's Reports on pages A-1 and on B-1 summarize control deficiencies over financial reporting we consider to be significant deficiencies or material weaknesses. The Independent Auditor's Report on page C-1 categorizes the disclosed control deficiencies affecting compliance with federal regulations as significant deficiencies or material weaknesses.

Management at administering agencies have responded to the audit findings, and the responses are included in each finding and the Corrective Action Plan compiled by the Governor's Office of Budget and Program Planning (beginning on page D-1). The status of findings previously reported in state of Montana Single Audit Reports, for which continued reporting is required under Uniform Guidance, is included in the Summary Schedule of Prior Audit Findings (beginning on page E-1), which was also prepared by the Governor's Office of Budget and Program Planning.

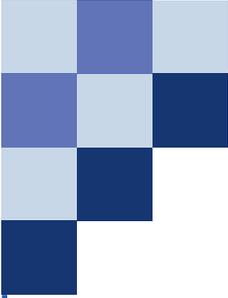

Respectfully submitted,

/s/ Angus Maciver

 MONTANA LEGISLATIVE AUDIT DIVISION

FEDERAL SINGLE AUDIT

Montana Single Audit Report

For the Two Fiscal Years Ended June 30, 2017

MARCH 2018

16-02

REPORT SUMMARY

The state of Montana reported approximately \$7.3 billion in federal funds for fiscal years 2016 and 2017. This is an increase over the prior biennium of approximately \$1.9 billion, primarily due to increased Medicaid case load and costs, including Medicaid expansion under the Affordable Care Act. We identified over \$5.7 million in costs inappropriately charged to the federal programs due to violations of federal regulations. Federal grantor agencies are responsible for resolution of these questioned costs, and have the authority to require funds be repaid.

Context

Montana's federal Single Audit is a biennial audit that completes the audit and reporting requirements of the Single Audit Act Amendments of 1996 and the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). The report contents are compiled from the work we performed during our annual and biennial agency audits. Single Audits are intended to provide federal grantor agencies with consistent and uniform evaluations of grant recipient's management of federal funds.

The federal government provides extensive requirements for recipients of federal grants. Our audits of each state agency include determining compliance with these requirements when the federal grant is determined to be a major federal program under federal audit guidelines. The state of Montana spent approximately \$3.9 billion and \$3.4 billion in federal funds in fiscal years 2017 and 2016, respectively. Programs with expenditures totaling at least \$20.2 million during the 2017 biennium and not determined to be low risk were identified

as major federal programs. The federal audit guidelines establish criteria to consider when determining when a program is determined to be low risk. Among these requirements are whether the program was audited in one of the two most recent audits and whether any issues related to internal controls, compliance, or questioned costs were identified. After this determination is made, we are required to audit an additional 25 percent, or 3 programs in this case, to replace these low risk programs with identified risky programs below the monetary threshold of \$20.2 million.

The state of Montana had 22 major federal programs during the 2017 biennium, as listed on page C-14, which are administered by 10 different state agencies. During fiscal years 2017 and 2016 approximately 75 percent of the federal funds spent were related to Montana's major federal programs. Of the 75 percent, the Medicaid Cluster and the Highway Planning and Construction Cluster makes up approximately 36 percent and 13 percent, respectively.

(continued on back)

Results

Federal audit regulations specifically require the Single Audit to report whether each major federal program complied with selected federal requirements. Out of the 22 major federal programs tested, we identified 18 that did not comply with federal requirements in all material respects and we rendered a qualified opinion on 15 programs that did not materially comply with federal requirements. We also identified over \$5.7 million of questioned costs, which are costs that resulted from a violation or possible violation of a statute, regulation, or the terms and conditions of a federal award, including funds used to match federal funds; where the costs, at the time of the audit, are not supported by adequate documentation; or where the costs incurred appear unreasonable and do not reflect the actions a prudent person would take in the circumstances.

Federal audit requirements also define varying degrees of deficiencies in internal controls. These include a control deficiency, a significant deficiency, and a material weakness, in order from least to most serious. The 33 recommendations contained in this report include 14 significant deficiencies and 11 material weaknesses.

Federal grantor agencies are the primary users of the Single Audit report, and the form of the audit report is designed to meet their oversight needs. Legislators and others may also find the report useful. In particular, the Schedules of Expenditures of Federal Awards for fiscal years 2017 and 2016, included in the report provide an overview of the state's federal grant activity, by the Catalog

of Federal Domestic Assistance number (CFDA#), and the Corrective Action Plan summarizes the efforts state agencies are taking to remediate identified noncompliance and internal control deficiencies.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

The Legislative Audit Committee
of the Montana State Legislature:

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to the financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Montana, as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the state of Montana's basic financial statements, and have issued our report thereon dated January 23, 2018. Our report includes a reference to other auditors who audited the financial statements of the Montana State University component units and the University of Montana component units, as described in our report on the state of Montana's financial statements. The financial statements of the Montana State University component units and the University of Montana component units were not audited in accordance with *Government Auditing Standards*, and accordingly, this report does not include reporting on internal control over financial reporting or instances of reportable noncompliance associated with these component units.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the state of Montana's internal control over financial reporting to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the state of Montana's internal control. Accordingly, we do not express an opinion on the effectiveness of the state of Montana's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as described below, we identified certain deficiencies in internal control that we consider to be material weaknesses and significant deficiencies.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiency described below for the financial reporting of the Board of Investment's Enterprise Fund Economic Development Bond activity to be a material weakness.

The Board of Investment's internal controls over financial reporting were not sufficient to ensure complete and accurate financial reporting, in accordance with generally accepted accounting principles. This control deficiency is associated with the Economic Development Bonds major fund, the portion of the Business-Type Activities attributed to this activity, and related note disclosures.

A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit the attention by those charged with governance. We consider the deficiency described below to be a significant deficiency.

The Board of Investment's internal controls over financial reporting were not sufficient to ensure complete and accurate financial reporting, in accordance with generally accepted accounting principles. This control deficiency is associated with the portion of the Remaining Fund Information attributed to Investment Trust Fund Activity.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the state of Montana's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*. The identified instances of noncompliance are described below:

The Montana Public Employees' Retirement Board administers eight defined benefit retirement plans and an Other Post Employment Benefit (OPEB). The Montana Constitution and state law require all retirement systems to be actuarially sound. The Game Wardens' and Peace Officers' retirement system and Highway Patrol Officers' retirement system were not actuarially sound at June 30, 2017 because they amortize in 70 years and 37 years, respectively. The maximum allowable amortization period is 30 years, as defined by state law.

State of Montana's Response to Findings

The state of Montana's response to the findings identified in this report are described in the separately issued Public Employees' Retirement Administration audit report (16-08B), Board of Investments audit report (16-04B) and on page B-1 of this report. The state of Montana's response was not subjected

to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the state of Montana's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the state of Montana's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Respectfully submitted,

/s/ Cindy Jorgenson

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

Introduction

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Montana, as of and for the year ended June 30, 2017, and the related notes which collectively comprise the state of Montana's basic financial statements, as follows:

- ◆ Statement of Net Position
- ◆ Statement of Activities
- ◆ Balance Sheet—Governmental Funds
- ◆ Reconciliation of the Balance Sheet—Governmental Funds to the Statement of Net Position
- ◆ Statement of Revenues, Expenditures, and Changes in Fund Balances—Governmental Funds
- ◆ Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances—Governmental Funds to the Statement of Activities
- ◆ Statement of Fund Net Position—Proprietary Funds
- ◆ Statement of Revenues, Expenses, and Changes in Fund Net Position—Proprietary Funds
- ◆ Statement of Cash Flows—Proprietary Funds
- ◆ Statement of Fiduciary Net Position—Fiduciary Funds
- ◆ Statement of Changes in Fiduciary Net Position—Fiduciary Funds

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this responsibility includes designing, implementing, and maintaining internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Montana State University (MSU) component units and the University of Montana (UM) component units, which represents 17.05 percent, 32.80 percent, and

15.91 percent, respectively of the assets, net position, and revenues of the aggregate discretely presented component units. Those financial statements were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for the university component units, are based solely on the reports of other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the MSU and UM component units were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the state of Montana's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the state of Montana's internal control, and accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Summary of Opinions

Opinion Unit	Type of Opinion
Governmental Activities	Unmodified
Business-Type Activities	Unmodified
General Fund	Unmodified
State Special Revenue Fund	Unmodified
Federal Special Revenue Fund	Unmodified
Land Grant	Unmodified
Coal Severance Tax	Unmodified
Unemployment Insurance	Unmodified
Economic Development Bonds	Unmodified
Aggregate Discretely Presented Component Units	Unmodified
Aggregate Remaining Fund Information	Unmodified

Unmodified Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Governmental Activities and Business-Type Activities, General Fund, State Special Revenue Fund, Federal Special Revenue Fund, Land Grant, Coal Severance Tax, Unemployment Insurance and Economic Development Bonds major funds, and the Aggregate Discretely Presented Component Units and Aggregate Remaining Fund Information of the state of Montana, as of June 30, 2017, and the respective changes in financial position and, where applicable, cash flows thereof for the fiscal year then ended in conformity with accounting principles generally accepted in the United States of America.

Emphasis of Matters

As discussed in Note 19 to the financial statements, at June 30, 2017, the Game Wardens' and Peace Officers' retirement system and Highway Patrol Officers' retirement system were not actuarially sound at June 30, 2017, as required by the Montana Constitution because they amortize in 70 years and 37 years, respectively. The maximum allowable amortization period is 30 years, as defined by state law. Our opinions are not modified with respect to this matter.

As discussed in Note 3 to the financial statements, in fiscal year 2017, the Board of Investments transitioned its internal pool structure for pension investments from five individual investment pools to a single investment pool. Our opinions are not modified with respect to this matter.

As discussed in Note 18A footnote 1, Montana State Fund (MSF) was issued a Certificate of Authority, became an authorized insurer regulated by the Montana Commission of Securities and Insurance, and is now subject to the provisions of Title 33, Montana Insurance Code. Effective January 1, 2016, MSF operates on a calendar year basis. The basic financial statements for the fiscal year ended June 30, 2016, included MSF financial information for a 6-month reporting period. This report, for the year ended June 30, 2017, includes a 12-month financial reporting period for MSF. Our opinion for the Aggregate Discretely Presented Component Units is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis, the Budgetary Comparison Schedule, the Pension Plan Information, the Other Post Employment Benefit Plan Information, and the Risk Management Trend Information, and the related notes, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an

opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the state of Montana's basic financial statements as a whole. The Schedule of Expenditures of Federal Awards, as required by Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal awards, is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Expenditures of Federal Awards is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 23, 2018, on our consideration of the state of Montana's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the state of Montana's internal control over financial reporting and compliance.

Respectfully submitted,

/s/ Cindy Jorgenson

Required Supplementary Information, and
Schedule of Expenditures of Federal Awards**

MANAGEMENT'S DISCUSSION AND ANALYSIS

INTRODUCTION

Management of the State of Montana (State) provides this *Management's Discussion and Analysis* of the State of Montana's basic financial statements included in the Comprehensive Annual Financial Report (CAFR). This narrative overview and analysis of the financial activities of the State of Montana is for the fiscal year ended June 30, 2017. We encourage readers to consider this information in conjunction with the additional information that is furnished in the State's financial statements, which follow.

FINANCIAL HIGHLIGHTS

Government-wide

The assets and deferred outflows of resources of the State exceeded its liabilities and deferred inflows of resources at the end of fiscal year 2017 by \$8.2 billion compared with \$8.1 billion at the end of fiscal year 2016, representing a 1.8% increase in net position. Component units reported net position of \$1.9 billion at the end of fiscal year 2017 compared to \$1.8 billion at the end of fiscal year 2016, representing a 7.2% increase in net position. More detail is provided in the financial statement overview below.

Fund Level

As of the close of fiscal year 2017, the State's governmental funds reported combined ending fund balances of \$3.9 billion compared with \$4.1 billion at fiscal year 2016. Of the 2017 balance, \$1.6 billion is not in spendable form, primarily as permanent fund principle. Thus, \$2.3 billion is available for spending. The fund balance in spendable form is segregated by constraint as follows: \$1.0 billion restricted, \$1.2 billion committed, \$13.5 million assigned and \$47.9 million unassigned. This represents a \$179.5 million (4.4%) decrease in total fund balance. These changes are discussed in more detail in the financial analysis of the State's major funds presented below.

The State's business-type activity funds reported net position at the close of fiscal year 2017 in the amount of \$395.0 million compared with fiscal year 2016 net position of \$372.0 million. Of the 2017 business-type activity net position, \$19.0 million was reported as net investment in capital assets. Net position of \$376.0 million was in spendable form with \$8.3 million unrestricted and \$367.7 million restricted to expenditure for a specific purpose. This represents a \$19.8 million (5.6%) increase in spendable net position from the fiscal year 2016 balance of \$356.2 million. These changes are discussed in more detail in the financial analysis of the State's major funds presented below.

Long-term Debt

The State's total governmental activity bonds and notes payable for governmental activities decreased by \$37.2 million, from \$230.6 million in fiscal year 2016 to \$193.4 million, a 16.2% decrease in fiscal year 2017.

Further detail relating to the State's long-term debt is provided in *notes to the financial statement's* Note 11.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the State of Montana's basic financial statements. The State's basic financial statements include three components: (1) *government-wide financial statements*, (2) *fund financial statements*, and (3) *notes to the financial statements*. The report also contains additional required supplementary information, which includes budgetary schedules, pension and other post employment benefits plan information, and risk management trends. These components are described below:

Basic Financial Statements

The basic financial statements include two types of financial statements that present different views of the State – the *government-wide financial statements* and the *fund financial statements*. These financial statements also include

the *notes to the financial statements*, which provide further detail and information related to the balances of the financial statements.

Government-wide Financial Statements

The *government-wide financial statements* provide a broad view of the State's operations in a manner similar to a private-sector business. The statements provide both short-term and long-term information about the State's financial position, which assists in assessing the State's economic condition at the end of the fiscal year. These are prepared using the flow of economic resources measurement focus and the accrual basis of accounting. In other words, they follow methods that are similar to those used by most businesses, including all revenues and expenses connected with the fiscal year, even if cash involved has not been received or paid. The government-wide financial statements include two statements: The *Statement of Net Position* and the *Statement of Activities*, as defined below.

The *Statement of Net Position* presents all of the government's assets, deferred outflows of resources, liabilities, deferred inflows of resources and net position. Over time, increases or decreases in the State's net position may serve as a useful indicator of whether the financial position of the State is improving or deteriorating.

The *Statement of Activities* presents information related to the government's net position changes during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods. This statement also presents a comparison between direct expenses and program revenues for each function of the State.

Both of the above financial statements have separate sections for three different types of state activities. These three types of activities are as follows:

Governmental Activities – Activities mostly supported by taxes and intergovernmental revenues, including federal grants. Most services normally associated with state government fall into this category, including education (support for both K-12 public schools and higher education), general government, health and human services, natural resources, public safety, and transportation.

Business-type Activities – Functions normally intended to recover all or a significant portion of their costs through user fees and charges to external users of goods and services. The major business-type activities of the State include the Unemployment Insurance Fund and the Economic Development Bonds Program, which assists Montana's small businesses and local governments in obtaining long-term, fixed-rate financing through private Montana lending institutions.

Discretely Presented Component Units – Operations for which the State has financial accountability, but have certain independent qualities as well. In order to be considered component units, these entities must be legally separate to the extent that they may sue, or be sued, in their own right. For the most part, these entities operate similarly to private sector businesses and the business-type activities described above. The State's component units consist of one financing authority, one housing board, one nonprofit independent public corporation and two universities.

Fund Financial Statements - Reporting the State's Major Funds

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The State, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

The fund financial statements focus on individual parts of the state government, reporting the State's operations in more detail than the government-wide statements. All of the funds can be divided into three categories. It is important to note that these fund categories use different accounting approaches and should be interpreted individually. The three categories of funds are as follows:

Governmental Funds – Most of the basic services provided by the State are financed through governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the

governmental fund financial statements focus on near-term inflows and outflows of spendable resources. They also focus on the balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the government's near-term financing requirements. This approach is known as using the flow of current financial resources measurement focus and the modified accrual basis of accounting. These statements provide a detailed short-term view of the State's finances that assists in determining whether there will be adequate financial resources available to meet the current needs of the State.

The State has five governmental funds that are considered major funds for presentation purposes. Each major fund is presented in a separate column in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances. The State's five major governmental funds are the General Fund, the State Special Revenue Fund, the Federal Special Revenue Fund, the Coal Severance Tax Fund, and the Land Grant Fund.

Proprietary Funds – When the State charges customers for the service it provides, whether to outside customers or to other agencies within the State, these services are generally reported in proprietary funds. Like the government-wide statements, proprietary fund statements utilize full accrual accounting, the same method used by private sector businesses. Enterprise funds report activities that provide supplies and services to the general public. Whereas, internal service funds report activities that provide supplies and services to the State's other programs and activities.

Fiduciary Funds – Resources held for the benefit of parties outside state government are accounted for in fiduciary funds. Fiduciary funds are not reflected in the government-wide financial statements because the resources of these funds are not available to support the State's own programs. Fiduciary fund statements use the full accrual basis of accounting.

Notes to the Financial Statements

The *notes to the financial statements* provide additional information that is essential for a full understanding of the *government-wide* and the *fund financial statements*. The *notes to the financial statements* can be found immediately following the fiduciary fund financial statements.

Required Supplementary Information

The basic financial statements are followed by a section of required supplementary information. This section contains a budgetary comparison schedule, which includes the reconciliation between the statutory fund balance for budgetary purposes and the fund balance for the General Fund and major special revenue funds, as presented in the governmental *fund financial statements*. Required supplementary information also includes pension and other post employment benefits plan information, as well as additional risk management trend data.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Montana's overall financial position increased from the last fiscal year as reflected in the \$149.2 million increase (1.8%) in net position. This improvement resulted from a continued economic recovery within the State.

Net Position

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. The State's combined net position (government and business-type activities) totaled \$8.2 billion at the end of fiscal year 2017. Net position of the both governmental and business-type activities increased by \$126.1 million (1.6%) and \$23.0 million (6.2%), respectively. These changes are explained in detail in the major fund analysis below.

A portion of the State's net position reflects its investment in capital assets such as land, buildings, equipment and infrastructure (roads, bridges, and other immovable assets) less any related debt used to acquire those assets that is still outstanding. The State uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the State's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the State's net position represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position may be used to meet the State's ongoing obligations to citizens and creditors. Internally imposed designations of resources are not presented as restricted net position.

At the end of the current fiscal year, the State reported positive balances in net investment in capital assets and restricted net position categories, along with a negative balance in the unrestricted category of net position, for both the governmental activities and the primary government as a whole. The negative unrestricted net position is primarily due to net pension liability. GASB Statements No. 68 and 71 were implemented in fiscal year 2015 and are contributing factors to the negative net position. The State also reported positive balances for all categories of net position for the business-type activities.

FINANCIAL ANALYSIS OF THE STATE'S MAJOR FUNDS

As the State completed the year, its governmental funds reported fund balances of \$3.9 billion. Of this total, \$2.3 billion (58.7%) constitutes spendable fund balance and \$1.6 billion (41.3%) is classified as non-spendable. The analysis of the following major funds, providing the majority of the fund balance for the government, follows.

General Fund Revenues and Expenditures

The General Fund is the chief operating fund of the State. For fiscal year 2017, the total fund balance of the General Fund was reported at approximately \$67.0 million. Of this balance \$7.7 million is non-spendable. The remaining \$59.3 million is spendable with \$11.4 million assigned and \$47.9 million unassigned. This represents 2.6% of the \$2.3 billion spendable governmental fund balances for all governmental funds. Of the assigned fund balance, \$11.4 million relates to outstanding encumbrances at the end of the fiscal year. Further detail on the breakdown of fund balance for the General Fund is provided in Note 14 – Major Purpose Presentation.

Total fund balance decreased by \$204.3 million when compared to the previously reported fund balance of \$271.3 million. Changes in both expenditures and revenues are discussed in detail below. The 2017 Legislative Session projected \$112.0 million General Fund unassigned fund balance for fiscal year 2017, without regard to a fund balance spend down in fiscal year 2018.

General Fund Revenues – Total General Fund revenues were \$2.1 billion for fiscal year 2017 (lower than legislative estimation), a 1.3% increase from the \$2.0 billion reported in 2016 (which were also lower than legislative estimation). Fiscal year 2017 tax revenue increased by 1.0% in total over 2016, with natural resource and corporate income tax collections up 8.9% and 11.5%, respectively. Individual income tax collections decreased slightly by 0.8%. Other noted increases in revenues included rentals / leases / royalties, contributions / premiums, and grants / contracts / donations.

General Fund Expenditures – Total General Fund expenditures for fiscal year 2017 increased by \$88.9 million (4.0%). This increase in expenditures occurred in the general government, health and human services, education and natural resources functions as follows:

- General government expenditures increased by \$10.3 million (3.0%)
- Health and human services expenditures increased by \$53.0 million (10.9%)
- Education expenditures increased by \$21.8 million (2.1%)
- Natural resources expenditures increased by \$2.7 million (7.8%)

Transfers out decreased by \$45.9 million (50.3%) to \$45.3 million in 2017, mostly attributable to the decrease in fire suppression transfers. Another noted decrease in expenditures were capital outlay.

The General Fund's actual revenues and expenditures in comparison to budgeted revenues and expenditures is provided in more depth on the Budgetary Comparison Schedule, within the Required Supplementary Information section of this report. The same level of detail used to report the actual revenues and expenditures is not readily available for all budgetary revenues and expenditures, which may cause some variances.

General Fund Expenditure Budget Reversions

Fund balances are not reserved for reverted appropriations. For fiscal year 2017, general fund appropriations that reverted to 2018 were \$25.2 million.

The Department of Administration had unspent appropriations of \$7.9 million, the vast majority of which was attributable to supplemental transfers, banking charges, budget corrections and other operational costs.

The Department of Corrections had unspent appropriations of \$4.1 million related to Medicaid savings and other operational costs.

The Office of Public Instruction had unspent appropriations of \$3.3 million related K-12 base aid and other operational costs.

The Department of Legislative Services, the Judicial Branch, Commissioner of Higher Ed, the Department of Revenue, and the Department of Public Health and Human Services had unspent appropriations of \$1.2 million, \$1.2 million, \$1.1 million, \$1.1 million, and \$1.1 million respectively, related to operational costs.

The remaining unspent appropriation of \$4.2 million was attributable to miscellaneous reversions across other agencies.

State Special Revenue Fund

The fund balance of the State Special Revenue Fund increased by \$27.4 million to \$1.6 billion. Revenues increased by \$33.4 million (3.8%) and expenditures decreased \$5.1 million (0.5%), for fiscal year 2017. The largest increases in revenues are attributable to an increase in natural resources tax collections and charges for services, whereas there was a notable decrease in investment earnings and sale of miscellaneous items. The largest decreases in expenditures are attributable to reductions in education and capital outlay related expenditures. Other financing sources related to refunding bonds were not present in the current year and transfers in and out both decreased.

Federal Special Revenue Fund

The fund balance of the Federal Special Revenue Fund increased by \$3.1 million (34.8%) to \$12.1 million. Revenues and expenditures increased by \$422.1 million (17.7%) and \$414.1 million (17.5%) respectively, for the fiscal year 2017. Revenue increases are attributable to increases in federal revenue, expenditure increases are attributable to increases in health and human services, public safety, and transportation related expenditures however offset some by a decrease in capital outlay.

Coal Severance Tax Permanent Fund

The fund balance of the Coal Severance Tax Permanent Fund decreased by \$6.4 million (0.6%) to \$1.1 billion. Revenue decreased by \$53.2 million (59.1%) to \$36.8 million, primarily due to a decrease of \$47.7 million in investment earnings. The transfers out increased by \$18.9 million (78.4%).

Land Grant Permanent Fund

The fund balance of the Land Grant Permanent Fund increased by \$15.0 million (2.1%) to \$725.5 million. Within this fund, capital asset sale proceeds increased by \$12.6 million, while rent/lease/royalties and investment earnings decreased by \$11.1 million and \$38.6 million, respectively.

Unemployment Insurance Enterprise Fund

Net position restricted for unemployment compensation increased by \$454.0 thousand (0.2%). The increase in net position reflects the continued impact of low unemployment throughout fiscal year 2017 accompanied by an increase in the taxable wage base from \$30.5 thousand to \$31.4 thousand in 2017.

Economic Development Bonds Enterprise Fund

Net position decreased by 1.8% to \$5.1 million in fiscal year 2017. Financing income revenue increased \$582.0 thousand, while expenses from interest expense increased \$621.0 thousand.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets

The State's investment in capital assets for its governmental and business-type activities, as of June 30, 2017, amounted to \$8.2 billion, with related accumulated depreciation of \$2.2 billion, leaving a net book value of \$6.0 billion. This investment in capital assets includes land, buildings, improvements, equipment, infrastructure, intangible assets, and construction in progress. Infrastructure assets are items that are normally immovable and of value only to the State, such as roads, bridges, streets and sidewalks, drainage systems, lighting systems, and similar items.

The total increase in the State's investment in capital assets for the current fiscal year was \$241.4 million or 4.2% in terms of net book value. Most increases in capital expenditures were seen in construction, or reconstruction, of roads and bridges. Additional information relating to the State's capital assets can be found in Note 5 of the *notes to the financial statements*.

Debt Administration

Montana continues to receive excellent general obligation bond ratings from Moody's Investor Service (Aa1), Standard and Poor's Corporation (AA), and Fitch Ratings (AA+), which remain unchanged from 2016.

State debt may be authorized either by a two-thirds vote of the members of each house of the Legislature, or by a favorable vote of a majority of the State's electors voting thereon. There is no constitutional limit on the amount of debt that may be incurred by the State. The Montana Constitution does, however, prohibit the incurring of debt to cover deficits caused by appropriations exceeding anticipated revenue.

The State of Montana's general obligation debt decreased from \$115.5 million at June 30, 2016, to \$98.6 million at June 30, 2017. There is cash available, of \$6.7 million at the end of fiscal year 2017, in debt service funds to service general obligation debt.

The below table contains the ratio of general obligation debt and total State debt to personal income and to the amount of debt per capita:

	Amount (in thousands)	Percentage of Personal Income (1)	State Debt Per Capita (2)
General obligation debt	\$98,625	0.22%	\$95
Total State debt	\$182,179	0.40% (3)	\$181 (3)

(1) Based on personal income for calendar year 2016.

(2) Based on estimated 2016 Montana population.

(3) Based on total of general obligations bonds, special revenue bonds, notes payable and lease/installment purchase payable for the percentage and state debt per capita

More detailed information regarding the State's long-term obligations is presented in Note 11 of the notes to the financial statements and in the statistical tables.

ECONOMIC CONDITION AND OUTLOOK

Montana's primary economic base remains concentrated in agriculture, mining, manufacturing, and nonresident travel. Per the 2016 Labor Day Report issued by the Montana Department of Labor and Industry, Montana had real wage gains of 1.6% in 2016, which was faster than the rate of inflation. Montana's unemployment rate has continued to remain lower than the national rate since the 2001 recession. Montana's annual unemployment rate of 4.1% in 2016 was the 16th lowest in the nation. Montana added roughly 6,481 jobs in 2016, for a growth rate of 1.3%. Montana had approximately 475,200 people employed in nonfarm non-adjusted jobs in August 2017, as compared to 467,600 in August 2016. Montana's personal income growth in 2016 was 2.3%. Montana's personal income growth over the past ten years is the 11th fastest among all states. A more in-depth analysis of the State's overall financial position can be found in the transmittal letter of this report.

The 2017 Legislature completed work and adjourned in late April 2017. Upon adjournment, it was anticipated that 2019 biennium General Fund revenue collections would be approximately \$4.9 billion while General Fund expenditures would be approximately \$4.8 billion. At the end of fiscal year 2019, the estimated general fund balance will be approximately \$200.0 million. During the 2017 Legislative Session Senate Bill (SB) 261 was passed. SB 261 contained various transfer and/or reductions in spending requirements based on June 30, 2017, unaudited General Fund revenue. Additionally, subsequent to fiscal year-end 2017, a special session of the Legislature was called to order to address an anticipated General Fund deficit for the budget period ended June 30, 2019. More information related to the fiscal year 2018 financial impacts of SB 261 and the special session is provided in Note 17.

The following are the major financial highlights of the 2019 biennium budget:

1. The Governor proposed and the 2017 Legislature approved a \$6.0 million one-time-only appropriation for a preschool pilot program dedicated for early education efforts for pre-k children.
2. The 2017 Legislature adopted a series of bills aimed at re-balancing the correctional and judicial systems. Specifics of the bills include increased funding to community programs to divert inmates from county jail

holds, revising criminal justice laws, and investing in additional district court judges in the State of Montana.

3. The 2017 Legislature passed House Bill (HB) 639 which levies a community benefit assessment on certain hospitals in the State of Montana. The measure is anticipated to generate \$13.1 million in General Fund revenue by fiscal year 2019.
4. The 2017 Legislature pass Senate Bill (SB) 261 which provided a short-term stabilization plan in which automatic reductions would be made to prescribed agency budgets, and transfers from the wildfire suppression fund to the General Fund would happen should revenues come in short of expectations in fiscal year 2017. SB 261 also provided for the creation of the Budget Stabilization Reserve to provide for a formal “Rainy Day” fund in the future.
5. The Montana University System received a one-time-only appropriation of \$2.0 million to serve as funds to provide for buy-outs of long-time university system employees, particularly at the University of Montana.
6. The 2017 Legislature passed SB 260 which creates the school facilities fund in the Coal Severance Tax Fund and allocates 75% of coal severance taxes in excess of the amount needed in the coal severance bond fund to school facilities.
7. The 2017 Legislature passed HB 648 which restructured payments to the Public Employees’ Retirement System and ultimately delinked these payments from coal-related revenues. This change will provide for a more stable and predictable financing structure into the future.
8. The Governor proposed and the 2017 Legislature funded a restructured appropriation for a sage grouse conservation fund, which will extend funding for sage grouse conservation through fiscal year 2021. Initial funding for this item was a major consideration in preventing listing on the endangered species list.
9. The 2019 biennium present law budget generally funds existing core services (i.e. health and human services, corrections, and education) at estimated caseload, population, and enrollment levels.

The Montana Constitution, Article VIII, Section 15 states that public retirement systems shall be funded on an actuarially sound basis. Public pension plans are considered actuarially sound if the unfunded accrued actuarial liability amortization period is less than 30 years. As of June 30, 2017, the Game Warden & Peace Officers’ Retirement System (GWORS), and the Highway Patrol Officers’ Retirement System (HPORS) plans were not in compliance and do not amortize within 30 years. The unfunded liabilities in the other state retirement systems amortize in 30 years or less as of the fiscal year ended June 30, 2017.

The actuarial condition of these retirement plans is disclosed in greater detail in Note 6 of the financial statements. The unfunded actuarial liability of these plans is long-term in nature and does not translate into an inability of the plans to meet their current obligations in the near future.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the State of Montana’s finances for all of Montana’s citizens, taxpayers, customers, investors, and creditors. The financial report seeks to demonstrate the State’s accountability for the money it receives. Questions concerning any of the information provided in this report or requests for additional information should be addressed to the State of Montana, State Accounting Bureau, Room 255 Mitchell Building, PO Box 200102, Helena, MT 59620.

**RECONCILIATION OF THE BALANCE SHEET OF GOVERNMENTAL FUNDS
TO THE STATEMENT OF NET POSITION**

JUNE 30, 2017

(amounts expressed in thousands)

Total fund balances - governmental funds	\$	3,919,584
--	----	-----------

Amounts reported for governmental activities in the Statement of Net Position are different due to:

Capital assets used in governmental activities are not current financial resources and therefore not reported in the governmental funds (Note 5):

Land and nondepreciable capital assets	\$ 1,824,514	
Depreciable capital assets and infrastructure, net	<u>4,167,450</u>	5,991,964

Deferred outflows of resources represent a consumption of net assets that will be reported as an outflow of resources in a future period and therefore are not reported in the governmental funds.		342,370
--	--	---------

Other assets not available in the current period and therefore are not reported in the governmental funds:

Net pension asset		33,852
-------------------	--	--------

Internal service funds are used by management to charge the costs of certain activities, such as insurance and central computer services, to individual governmental funds. The assets, deferred outflows of resources, liabilities and deferred inflows of resources of the internal service funds are included in the governmental activities in the Statement of Net Position, excluding internal service funds' capital assets and long-term liabilities reported in specific areas.		129,805
--	--	---------

Other liabilities that are not due and payable in the current period and are not reported in the governmental funds.		(9,293)
--	--	---------

Deferred inflows of resources represent an acquisition of net assets that will be recognized as an inflow of resources in a future period and therefore are not reported in the governmental funds.		102,206
---	--	---------

Long-term liabilities and related accrued interest are not due and payable in the current period and therefore are not reported in the governmental funds (Note 11):

Net pension liability	(1,789,810)	
OPEB implicit rate subsidy	(289,175)	
Other long-term liabilities	<u>(578,331)</u>	<u>(2,657,316)</u>

Total net position - governmental activities	\$	<u><u>7,853,172</u></u>
--	----	-------------------------

**RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE
STATEMENT OF ACTIVITIES**

FOR THE FISCAL YEAR ENDED JUNE 30, 2017

(amounts expressed in thousands)

Net change in fund balances - total governmental funds		\$ (195,943)
<p>Amounts reported for governmental activities in the Statement of Activities are different due to:</p>		
<p>Capital outlays are reported as expenditures in governmental funds. However, in the Statement of Activities, these costs are allocated as depreciation expense over the useful life of the capital asset. Capital outlays exceeded depreciation expense in the current year by the following amount (Note 5):</p>		
Capital outlay	\$ 406,953	
Depreciation expense and amortization	<u>(211,774)</u>	195,179
Miscellaneous transactions involving capital assets such as sales (gain/loss) and donations are reported in the Statement of Activities, but only proceeds from sales are reported in the governmental funds.		(5,393)
Inventories of governmental funds are recorded as expenditures when purchased. However, in the Statement of Activities, inventories are expensed when consumed.		(8,000)
Revenues reported in the Statement of Activities that do not provide current financial resources are not reported as revenues in the governmental funds.		21,301
Internal service funds are used by management to charge the costs of certain activities, such as insurance and central computer services, to individual governmental funds. Internal service funds are reported separately from governmental funds in the fund financial statements. In the government-wide statements, internal service funds are included with governmental activities.		20,470
<p>Some expenses reported in the Statement of Activities do not require the use of current financial resources and therefore are not reported as expenditures in the governmental funds. Some expenditures reported in the governmental funds either increase or decrease long-term liabilities reported in the Statement of Net Position. In the current year these amounts consisted of:</p>		
Accrued interest	2,363	
Other liabilities	(1,770)	
Capital lease financing	(184)	
Principal retirement	<u>33,889</u>	<u>34,298</u>
Change in net position - governmental activities		<u>\$ 61,912</u>

NOTES TO THE FINANCIAL STATEMENTS

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements for the State of Montana (State) have been prepared in accordance with Generally Accepted Accounting Principles (GAAP), as prescribed by the Governmental Accounting Standards Board (GASB).

A. Reporting Entity

For financial reporting purposes, the State includes funds that comprise the primary government and its component units. The component units are entities that the State is financially accountable for, or whose relationship with the State is such that exclusion would cause the State's financial statements to be misleading or incomplete. GASB has set forth criteria to be considered in determining financial accountability. This criteria includes appointing a voting majority of an organization's governing body, and (1) the ability of the State to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State.

Discretely Presented Component Units

These component units are entities that are legally separate from the State because they possess corporate powers, but are financially accountable to the State, or whose relationships with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. Complete financial statements of the individual component units, which issue separate financial statements, can be obtained from their respective administrative offices. The condensed financial statements, presented in Note 18, include the financial data of the entities listed below.

Complete financial statements for each of the individual discretely presented component units may be obtained at the following addresses:

Montana Board of Housing
301 South Park, Room 240
PO Box 200528
Helena, MT 59620-0528

Montana State Fund
855 Front Street
PO Box 4759

PO Box 200506
Helena, MT 59620-0506

Universities and Colleges
Commissioner of Higher Education
2500 Broadway Street
Helena, MT 59620-3201

Montana Board of Housing (MBOH) – MBOH, which is a legally separate entity, is governed by a quasi-judicial board appointed by the Governor. It was created in 1975 to facilitate the availability of decent, safe, and sanitary housing to persons and families of lower income. MBOH issues negotiable notes and bonds to fulfill its purposes. The total amount of notes and bonds outstanding at any time may not exceed \$1.5 billion. The discount price of bonds sold, not the face amount of the bonds, counts against this statutory ceiling. Neither the faith and credit nor taxing power of the State of Montana may be pledged for the amounts so issued. MBOH is attached to the State of Montana, Department of Commerce for administrative purposes only. MBOH is audited annually by the State's Legislative Audit Division.

Facility Finance Authority (FFA) – FFA, which is a legally separate entity, is governed by a quasi-judicial board appointed by the Governor with the advice and consent of the Senate. FFA assists eligible, nonprofit Montana health care and other community-based service providers to obtain and maintain access to the broadest range of low-cost capital financing as possible. FFA issues revenue bonds to fulfill its purposes. Neither the faith and credit or taxing power of the State of Montana may be pledged for the amounts so issued. FFA is attached to the State of Montana, Department of Commerce for administrative purposes only. Individual financial reports are issued every two years and are audited by the State's Legislative Audit Division.

Montana State Fund (MSF) – MSF is a nonprofit, independent public corporation established under Section 39-71 of the Montana Code Annotated (MCA). MSF provides Montana employers with an option for workers’ compensation and occupational disease insurance and guarantees available coverage for all employers in Montana. MSF is governed by a seven member Board of Directors appointed by the Governor. This Board has full power, authority, and jurisdiction in the administration of MSF. MSF is attached to the State of Montana, Department of Administration for administrative purposes only. MSF is reported on a calendar year basis and is audited annually by the State’s Legislative Audit Division.

MSF functions as an autonomous insurance entity supported solely from its own revenues. All assets, debts, and obligations of MSF are separate and distinct from assets, debts, and obligations of the State of Montana. If MSF is dissolved by an act of law, the assets held by MSF are subject to the disposition provided by the Legislature enacting the dissolution with due regard given to obligations incurred and existing (Section 39-71-2322, MCA).

MSF handles the administration of the claims of Montana State Fund and State of Montana (Old Fund) including: determining who a claimant is; what, if any, claims will be paid; and the amount of claims allowed to be paid. Old Fund covers workers’ compensation claims that were incurred before July 1, 1990, and is reported within the governmental activities of the primary government, on the government-wide financial statements.

Universities and Colleges – The State Board of Regents has responsibility for the following institutions: Montana State University - Bozeman and the units under it including Montana State University - Billings, Montana State University - Northern, and Great Falls College Montana State University; and University of Montana - Missoula and the units under it including Montana Tech of the University of Montana, University of Montana - Western and Helena College University of Montana. All units are funded through state appropriations, tuition, federal grants, and private donations and grants. The universities are audited annually by the State’s Legislative Audit Division.

Though the following organizations perform functions related to the Montana University System, they are not considered part of Montana's reporting entity: (1) Community Colleges which are considered part of local units of government; (2) the Montana Higher Education Student Assistance Corporation, a private nonprofit corporation; and (3) the Student Assistance Foundation of Montana, a private nonprofit corporation. Entities such as local school districts and local authorities of various kinds are considered part of local units of government and have not been included. The state and federal support of local public education systems is reported in the General Fund, the State Special Revenue Fund and Federal Special Revenue Fund.

Fiduciary Fund Component Units

Complete financial statements for each of the individual fiduciary fund component units may be obtained at the following addresses:

Teachers’ Retirement System
1500 East Sixth Avenue
PO Box 200139
Helena, MT 59620-0139

Public Employees’ Retirement Board
100 North Park, Suite 200
PO Box 200131
Helena, MT 59620-0131

Teachers’ Retirement System (Pension Trust Fund) – This retirement plan is a legally separate entity with a board appointed by the Governor. Its purpose is to provide retirement, disability, death and lump-sum payments to benefit recipients of Montana's public teaching profession. The plan is funded from employer and employee contributions, investment earnings, and the State’s General Fund. The benefit payments and administrative costs of the Teachers’ Retirement System are paid from the same funding sources. The system is audited annually by the State’s Legislative Audit Division. Further detail related to the Teachers’ Retirement System is provided in Note 6.

Public Employees’ Retirement Board (Pension and Other Employee Benefit Trust Funds) – The Public Employees’ Retirement Board (PERB) is appointed by the Governor and administers eleven separate plans for the purpose of providing retirement, disability, death, and lump-sum payments to plan members. These legally separate plans include the Public Employees’ Retirement Plan – Defined Benefit and Defined Contribution and the associated education funds; the Judges’; the Highway Patrol Officers’; the Sheriffs’; the Game Wardens’ and Peace Officers’;

the Municipal Police Officers'; the Firefighters' Unified Retirement Systems; the Volunteer Firefighters' Compensation Act; and the State of Montana Deferred Compensation Program (457 Plan) retirement plans. The board also administers an Other Post Employment Benefit (OPEB) disability plan on behalf of Public Employees' Retirement Plan-Defined Contribution members.

PERB is responsible for the eleven separate public employee plans, including the Deferred Compensation Program and Other Post Employment Benefit plan. These are reported as pension and other employee benefit trust funds. The board is audited annually by the State's Legislative Audit Division. Further detail related to the PERB is provided in Note 6 and its OPEB plan information is provided in Note 7.

B. Government-wide and Fund Financial Statements

The government-wide financial statements, Statement of Net Position and Statement of Activities, report information on all of the non-fiduciary activities of the State of Montana and its component units. For the most part, the impact of interfund activity has been removed from these statements. Governmental activities, which are normally supported by fees, taxes, and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the State of Montana is reported separately from certain legally separate component units for which the State is financially accountable.

The Statement of Activities demonstrates the degree to which the direct expenses of a function are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Certain indirect costs are included in the program expense reported for the individual functions and activities. Program revenues include (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function; and (2) grants and contributions restricted to meeting the operational or capital requirements of a particular function. Taxes and other revenues not meeting the definition of program revenues are reported as general revenues. The State does not allocate indirect expenses to functions in the Statement of Activities.

Separate fund financial statements are provided for governmental, proprietary, and fiduciary funds. Major individual governmental and major individual enterprise funds are reported as separate columns in the fund financial statements. Fiduciary fund statements are reported only in the fund financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

Government-wide, Proprietary, and Fiduciary Fund Financial Statements

The government-wide, proprietary fund, and fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are reported when earned; expenses are recorded when a liability is incurred regardless of the timing of the related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenues as soon as all of the eligibility requirements imposed by the provider are met. Agency funds report only assets and liabilities, recognizing receivables and payables using the accrual basis of accounting.

As a general rule, material interfund revenues and expenses have been eliminated from the government-wide financial statements. These have not been eliminated where their elimination would distort the direct costs and program revenues of the functions involved.

Governmental Fund Financial Statements

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when they are realizable, measurable, earned, and available. Revenue is considered realizable when it is probable the amount will be collected. Revenue is considered measurable and realizable if the precise amount is known because the transaction is completed, or if there is enough information to provide a reasonable estimate of the net realizable revenue to be received. Revenue is considered to have been earned when the exchange of goods or services has taken place. Revenue is considered to be available if it is collectible within the current period, or soon enough thereafter, to pay liabilities of the current period. For this purpose, the State considers revenue available if it is expected to be collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual

accounting. However, debt service expenditures as well as expenditures relating to compensated absences, claims, and judgments are recorded only when payment is due.

The major revenue sources considered susceptible to accrual are licenses and permits, natural resource taxes, individual income taxes, corporate income taxes, property taxes, fuel taxes, and certain federal revenues (reimbursable grants and U.S. mineral royalties). All other revenue is considered to be measurable and available when the cash is received.

Fund Financial Statements

The State uses funds to report on its financial position and the results of its operations. A fund is a separate accounting entity with a self-balancing set of accounts. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

The financial activities of the State of Montana are classified into fund categories as described below:

Governmental Funds

General Fund – To account for all governmental financial resources, except those required to be accounted for in another fund.

Special Revenue Funds – To account for the proceeds of specific revenue sources restricted to expenditure for specified purposes other than major capital projects. (1) The State Special Revenue Fund accounts for activities funded from state resources used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. Several funds are defined in statute as Permanent Funds, however per GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions* (GASB 54), these funds should be reported within the State Special Revenue Fund. The respective effect on fund balance is approximately an \$84.2 million increase. One specific fund is defined in statute as a Federal Special Revenue Fund, however per GASB 54, this fund should be reported within the State Special Revenue Fund. The respective effect on fund balance is approximately a \$20.4 million increase. (2) The Federal Special Revenue Fund accounts for activities funded from federal sources used in the operation of state government.

Debt Service Funds – To account for resources accumulated for payment of principal and interest on general long-term obligation debt.

Capital Projects Funds – To account for resources used for the acquisition or construction of major capital facilities, other than those financed by proprietary or trust funds.

Permanent Funds – To account for resources that are permanently restricted to the extent that only earnings, not principal, may be used for the purposes of supporting the government's programs. Several funds are defined in statute as Permanent Funds, however per GASB 54 these funds should be reported within the State Special Revenue Fund.

Proprietary Funds

Enterprise Funds – To account for operations: (1) financed and operated similar to private business enterprises, where the intent of the Legislature is to finance or recover costs primarily through user charges; (2) where the Legislature has decided periodic determination of revenue earned, expenses incurred, or net income is appropriate; (3) where the activity is financed solely by a pledge of the net revenues from fees and charges of the activity; or (4) when laws or regulations require that the activities' costs of providing services, including capital costs, be recovered with fees and charges rather than with taxes or similar revenues. The primary focus of fee revenues charged by enterprise funds is users outside of the primary government.

Internal Service Funds – To account for the financing of goods and services provided by one department or agency to other departments, agencies, or other governmental entities on a cost-reimbursement basis.

The State of Montana reports two employee group benefits funds. The MUS Group Insurance Fund primarily charges its fees to Montana State University and the University of Montana. The universities are reported as discretely presented component units, which the State considers to be external users, and as such, reports the MUS Group Insurance Fund as an enterprise fund. The Employee Group Benefits Fund charges its fees to funds of the primary government, and as such, is reported as an internal service fund.

Fiduciary Funds

Fiduciary Funds are used to account for assets held by the State in a trustee capacity or as an agent for individuals, private organizations, or other governments. These assets cannot be used to support the government's own programs.

Pension (and Other Employee Benefit) Trust Funds – To account for resources that are required to be held in trust for the members and beneficiaries of the State's defined benefit plans, defined contribution plans, other retirement plans and other post employment benefit plan. Plan members receive retirement, disability, death, and lump-sum payments from the fund. Further detail related to the individual plans is provided in Note 6 and Note 7.

Private-Purpose Trust Funds – To account for assets held by the State in a trustee capacity, where both the principal and earnings benefit individuals, private organizations, or other governments. Examples include the State's escheated property fund, unliquidated security bonds held on deposit from self-insured employers, environmental reclamation, and bonds held in trust.

Investment Trust Fund – To account for the receipt of monies and the distribution of related investment earnings to local government agencies by the Montana Board of Investments for investment in the Short-term Investment Pool (STIP) and Trust Fund Investment Pool (TFIP).

Agency Funds – To account for assets held by the State as an agent for individuals, private organizations, and other governments. For example, various agencies hold deposits pending compliance with performance agreements. Other examples include monies belonging to state institution residents and child support payments from parents.

Major Governmental Funds

The General Fund is the State's primary operating fund, as previously defined.

The State Special Revenue Fund accounts for activities funded from state sources, which are restricted either legally or administratively for particular costs of an agency, program, or function.

The Federal Special Revenue Fund accounts for activities funded from federal sources used in the operation of state government.

The Coal Severance Tax Permanent Fund, created by Article IX, Section 5 of the Montana State Constitution, receives 50% of all coal tax collections. The principal in this fund can be expended only upon affirmative vote of three-fourths of each house of the Legislature.

The Land Grant Permanent Fund accounts for lands granted to the State for support of public schools and state institutions.

Major Enterprise Funds

The Unemployment Insurance Fund accounts for employer contributions deposited with the Secretary of the Treasury of the United States to the credit of the State's unemployment trust fund. Unemployment benefits are paid from this fund to eligible recipients.

The Economic Development Bonds Fund (EDB) accounts for the Economic Development Bond Act (EDBA) programs and the Municipal Finance Consolidation Act (MFCA) programs. The EDBA programs provide qualifying Montana businesses access to tax-exempt funds through the issuance of conduit (no-commitment) debt. The MFCA programs provide low cost funds to eligible Montana governments to finance capital expenditures. Separately issued financial statements may be obtained by contacting the Montana Board of Investments, 2401 Colonial Drive, 3rd Floor, PO Box 200126, Helena, MT 59620-0126.

D. Proprietary Activity Accounting and Financial Reporting

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues generally result from providing services and delivering goods in connection with a proprietary fund's principal ongoing operations. Operating expenses for enterprise and internal service funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting these definitions are reported as non-operating.

E. Cash/Cash Equivalents

For all funds, cash and cash equivalents consist of amounts deposited in the State Treasurer's pooled cash account, cash deposits in checking accounts, cash invested in the Short-term Investment Pool (STIP), cash held by trustees, undeposited cash held by individual state agencies, and investments categorized as cash equivalents, which are short-term, highly liquid investments with original maturities of three months or less. Further detail related to cash and cash equivalents is provided in Note 3.

F. Receivables

This classification, net of estimated uncollectibles, consists primarily of receivables for goods sold and services provided; short-term loans and notes, interest and dividends, taxes due within 60 days of fiscal year-end, and income, withholding, and inheritance taxes that are past due. An allowance for uncollectible taxes is provided based upon historical analysis. Further detail related to receivables is provided in Note 4.

G. Inventories

Inventories of materials and supplies are reported at cost. The State allows agencies to use any generally accepted inventory pricing method, but specifies the first-in, first-out method generally to be appropriate for most agencies. Governmental funds use the "purchase method," meaning inventory purchases are recorded as expenditures. At fiscal year-end, inventory balances are shown as nonspendable, indicating they do not constitute available expendable resources. Proprietary and fiduciary funds report using the "consumption method," meaning inventories are expensed as used.

H. Restricted Net Position

Certain investments of the Economic Development Bonds Fund are classified as restricted net position on the Statement of Fund Net Position for proprietary funds because their use is limited by applicable bond indenture agreements. Net position associated with the Unemployment Insurance Fund is also classified as restricted.

I. Equity in Pooled Investments

To account for the custody of monies, the Montana Board of Investments (BOI) uses one internal investment pool and one external investment pool. The internal investment pool is the Consolidated Asset Pension Pool (CAPP). The external investment pool is the Trust Fund Investment Pool (TFIP). Current State agency participation in the pools is within the enterprise funds, permanent funds, private-purpose trust funds, investment trust funds, pension trust funds, Montana University System Units, and specific funds established within the State Special Revenue Fund. The State's nine retirement funds can only participate in CAPP. Other State agencies and qualifying local governments can participate in TFIP. The participant investments in the pools are reported at fair value in the assets within the individual funds. Further detail related to cash and cash equivalents and investments is provided in Note 3.

J. Investments

For agencies whose investment needs are not met by BOI's established investment pools, BOI provides separate investments, which are combined and reported as All Other Funds (AOF). AOF participants have direct fixed income, equity and Montana mortgage and loan investments. AOF investments are reported at fair value. Other State agencies, on a limited basis by statute, may administer other long-term investments. Certain securities including asset-backed securities, variable-rate instruments, zero-coupon bonds, preferred stocks, and mortgage-

backed securities are purchased for portfolio diversification and a competitive rate of return. Most investments are reported at fair value on the Statement of Net Position. Further detail related to investments is provided in Note 3.

K. Capital Assets

Capital asset valuation is based on actual historical cost or, in the case of donations, acquisition value. General government infrastructure capital assets are capitalized and reported on the government-wide financial statements. Infrastructure assets of proprietary funds are capitalized on the fund financial statements. Interest incurred during the construction of capital assets for proprietary funds and higher education units is capitalized. The State has chosen to use the depreciation approach for infrastructure assets and is reporting accumulated depreciation on the Statement of Net Position and depreciation expense on the Statement of Activities for these assets. Further detail related to capital assets is provided in Note 5.

Capital assets in proprietary, private-purpose trust, and pension trust funds are accounted for within their respective funds and are depreciated or amortized. Depreciation is on a straight-line basis with estimated useful lives of 25 to 60 years for buildings, 10 to 50 years for infrastructure, 7 to 20 years for building improvements and 3 to 10 years for equipment. State agencies are also required to extend or shorten the useful lives of capital assets to reflect their actual experience or industry standards when appropriate. Amortization is on a straight-line basis with estimated useful lives of 4 years for software (internally and externally generated), 30 years for land use rights, and 20 years for other intangibles.

The capitalization limit for buildings and building/land improvements is \$25,000. The capitalization threshold for infrastructure and internally-generated software is \$500,000. The capitalization threshold for intangible assets is \$100,000. The capitalization limit for other capital assets is \$5,000. Agencies are allowed to capitalize additions to collections and land acquisitions at any cost. Purchases under these thresholds are recorded as expenditures/expenses in the current period.

L. Deferred Outflows, Deferred Inflows, and Unearned Revenue

A deferred outflow of resources is a consumption of net assets by the government that is applicable to a future reporting period. A deferred inflow of resources is an acquisition of net assets by the government that is applicable to a future reporting period. Deferred outflows and inflows of resources may include financial transactions related to refunding debt, non-exchange transactions, derivative investment, and pension related components and are reported on both the government-wide and proprietary fund financial statements. Additionally, deferred inflows of resources may include financial transactions related to unavailable revenue on the governmental fund financial statements. Unavailable revenue is reported when assets are recognized, but those assets are not considered available to pay liabilities of the current period. Unearned revenue is recognized as a liability on government-wide, governmental and proprietary fund financial statements. Further detail related to deferred outflows of resources and deferred inflows of resources is provided in Note 4.

M. Long-term Obligations

Long-term obligations expected to be financed from governmental funds are reported on the government-wide financial statements. Long-term debt is recognized as a liability of a governmental fund when due, or when resources have been accumulated in the debt service fund for payment early in the following year. For other long-term obligations, only that portion expected to be financed from current expendable available financial resources is reported as a fund liability of a governmental fund on the fund financial statements. The remaining portion of such obligations is reported on the government-wide financial statements. Long-term liabilities expected to be financed from proprietary and fiduciary fund operations are accounted for in those funds. Further detail related to leases/installment purchases payable and state debt is provided in Note 10 and Note 11, respectively.

N. Capital Leases

A capital lease is a lease which transfers benefits and risks of ownership to the lessee. At the inception of a capital lease, on the government-wide, proprietary fund, and fiduciary fund financial statements, a capital asset and a capital lease liability are recorded at the present value of the future minimum lease payments. On the governmental fund financial statements no asset or liability is recorded related to assets under capital leases. Rather, on the

governmental fund financial statements, at the inception of a capital lease, capital outlay expenditures and other financing sources (inception of lease/installment contract) are recorded at the net present value of the minimum lease payments. Further detail related to capital leases is provided in Note 10.

O. Bond Discounts/Premiums/Issuance Costs

Bond premiums and discounts, as well as issuance costs, are recognized in the period they are incurred. Bond proceeds and bond premiums are reported as an other financing source, and bond discounts are reported as an other financing use. Issuance costs are reported as debt service expenditures whether or not they are withheld from the bond proceeds. Bonds payable are recorded net of any applicable premium or discount. Further detail related to long-term debt is provided in Note 11.

P. Compensated Absences

Full-time state employees earn vacation leave ranging from 15 to 24 days per year depending on the individual's years of service. Teachers employed by the State do not receive vacation leave. Vacation leave may be accumulated and carried over from one year to the next. The carryover is limited to two times the maximum number of days earned annually. Sick leave is earned at the rate of 12 days per year with no limit on accumulation. Each contribution year, an employee may contribute a maximum of 80 hours of sick or annual leave to a nonrefundable sick leave pool. Excess annual leave that is being forfeited can also be contributed, with no maximum contribution. The adjusted ending balance of the pool for June 30, 2016, was 21,533 hours. For fiscal year 2017, 718 sick leave hours, 157 annual leave hours, and 2,759 excess annual leave hours were contributed to the sick leave pool, and 2,287 hours were withdrawn, leaving a balance of 22,880 hours in the pool. The liability associated with the pool is not reported in the accompanying financial statements because these hours are nonrefundable to contributors, except by grants approved through an application process.

Vested or accumulated leave for proprietary and fiduciary funds is recorded as an expense and liability of those funds in the fund financial statements. For governmental funds, the liability is not expected to be liquidated with expendable financial resources. The expenditure and liability for the governmental funds is reported only on the government-wide financial statements. Upon retirement or termination, an employee is paid for 100% of unused vacation leave and 25% of unused sick leave. Further detail related to compensated absences is provided in Note 11.

Q. Nonexchange Financial Guarantee

BOI provides loan guarantees from the Coal Severance Tax Fund to the Facility Finance Authority (FFA). BOI exposure to bond issues, surety bonds, and designated loans of the FFA totaled \$71.4 million as of June 30, 2017. FFA is a discretely presented component unit of the State of Montana. FFA guarantee requests are submitted to BOI for review and approval. BOI's participation, either duration or any other consideration, to either purchase bonds or loans or to lend money for deposit into FFA's statutorily allowed capital reserve account is explicitly limited by statute which requires BOI to act prudently. The guarantee requests from FFA pertain to bonds issued by FFA with a term of up to 40 years. BOI and FFA have entered into an agreement detailing repayment to BOI. BOI has not had to perform on any loan guarantee in the past.

R. Fund Balance/Net Position

Fund Balance

The classifications for fund balance used for governmental funds are reported in two general classifications, nonspendable and spendable. Nonspendable represents the portion of fund balance that is legally or contractually required to remain intact or is not in spendable form such as inventories, and, in the General Fund, long-term notes and loans receivable. Spendable fund balance is further categorized as restricted, committed, assigned, and unassigned.

The restricted fund balance category includes amounts that can be spent only for the specific purposes stipulated by the State Constitution or external parties, such as the federal government, or through enabling legislation. For the

purpose of determining restricted amounts, enabling legislation does not include commitments resulting from State legislation if these constraints can be removed or changed by a similar legislative action.

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority, the State's Legislature, through legislation passed into law.

Amounts, in the assigned fund balance classification, are intended to be used by the government for specific purposes, but they do not meet the criteria to be classified as restricted or committed. Assignments of fund balance are created by the executive branch. In governmental funds other than the General Fund, assigned fund balance also represents the remaining amount that is not restricted or committed. The assigned fund balance for the General Fund are encumbrances and assignments for the portion of current General Fund balance that is projected to be used to fund expenditures and other cash outflows in excess of the expected revenues and other cash inflows in fiscal years as needed. There is not a projected spend down for fiscal year 2018, thus a related assignment of fund balance is not reported at 2017 fiscal year-end.

Unassigned fund balance is the residual classification for the General Fund and includes all spendable amounts not contained in the other classifications. In other funds, the unassigned classification should be used only to report a deficit balance resulting from overspending for specific purposes for which amounts had been restricted, committed, or assigned.

The State generally segregates restricted, committed, and assigned resources by account (sub-fund) within the governmental funds, other than the General Fund. When resources meeting more than one of these spendable classifications are commingled in an account on the State's accounting system the assumed order of spending is restricted first, committed second, and finally assigned. State statute requires non-General Fund money be spent first whenever possible so any related available unassigned balance would be spent last.

Minimum General Fund - Fund Balance

As of June 30, 2017, the State did not maintain a stabilization fund. However, statute provides a minimum fund balance amount as follows: Section 17-7-140, MCA, defines minimum ending fund balance and specifies the procedures that must be followed to make expenditure reductions if a projected ending fund balance drops below minimum statutory requirements.

If the Budget Director determines that a deficit exists, statute requires reductions that must be made to assure that the projected ending fund balance is in compliance with the minimum ending fund balance of General Fund appropriations for the biennium. Under circumstances when a deficit of this level is projected during a biennium, the Governor may direct reductions from any General Fund expenditure not exempted by Section 17-7-140, MCA, including House Bill (HB) 2 (the State's main appropriation bill), any other appropriation bills, statutory appropriations, or language appropriations. Reductions may not exceed 10% of General Fund appropriations for any single "program," as defined in HB 2. If a program has more than one appropriation, the reduction for one or more of the appropriations may exceed 10% as long as the reduction for the program as a whole does not exceed 10%.

The Legislative and Judicial branches, the Montana School for the Deaf and Blind, principal and interest on state debt, salaries of elected officials, and public school BASE funding are exempt, statutorily, from reductions. These exemptions shield approximately one-third of General Fund appropriations from reduction. Of the remaining expenditures, the Governor may not direct executive agencies headed by elected officials or the Board of Regents to reduce their expenditures by more than the average reduction percentage imposed upon all other executive branch agencies.

Net Position

In funds other than governmental, net position represents the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources. The net investment in the capital assets portion of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction, or improvement of those assets. Net position is reported as restricted when there are limitations imposed on their use either through constitutional provisions, enabling

legislation or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. The government-wide Statement of Net Position reported restricted net position of \$ 3.3 billion.

S. Property Taxes

Real property taxes are normally levied in October and are usually payable in two installments on November 30 and May 31. These taxes attach as an enforceable lien immediately if not paid when due.

Personal property tax levies are set each August, and notices are normally mailed the following March or April. Half of mobile home taxes are due in 30 days and the remaining half on September 30. Taxes on all other types of personal property are to be paid in full 30 days after receipt of the notice. Property tax payments are recognized as deferred inflows of resources if received prior to levy or availability.

Personal property taxes attach as an enforceable lien immediately if not paid when due. Property taxes are collected by each of Montana's 56 counties. The counties then remit the State's portion to the State Treasury. The majority of these taxes help fund public school systems and higher education.

T. Other Taxes

On the Statement of Activities, the revenue category "Other Taxes" consists of the following taxes (in thousands):

	General Fund	State Special Revenue	Other Governmental Funds	Business- Type Funds	Total
Accommodations	\$ 22,808	\$ 30,761	\$ -	\$ 19	\$ 53,588
Agriculture sales	-	9,099	-	-	9,099
Cigarette/tobacco	36,774	46,543	1,762	-	85,079
Car rental	3,272	1,091	-	-	4,363
Contractors gross receipts	3,078	-	-	-	3,078
Energy tax	7,465	-	-	-	7,465
Fire protection	-	3,597	-	-	3,597
Hospital benefit assessment	4,351	-	-	-	4,351
Insurance premium	75,357	30,426	-	-	105,783
Light vehicle registration	-	4,243	-	-	4,243
Liquor tax	5,432	2,194	-	27,939	35,565
Livestock	-	4,810	-	-	4,810
Other taxes	333	1,557	-	-	1,890
Public service commission	-	4,737	-	-	4,737
Railroad car companies	3,806	-	-	-	3,806
Telephone license	15,517	-	-	-	15,517
Video gaming	59,956	7	-	-	59,963
Total other taxes	\$238,149	\$139,065	\$1,762	\$27,958	\$406,934

U. Tax Abatements

In the Montana Board of Investment's (BOI) Commercial Loan Program within the AOF, by statute, the infrastructure loan program is funded by an \$80.0 million allocation. Eligible local governments request a loan for constructing or purchasing infrastructure to be used by a basic sector business. The basic sector business will pay a user fee to the local government that is pledged to BOI for the loan repayment. BOI reviews each loan and, only upon verification that the entities meet the loan requirements, is the loan approved by BOI. The local government entity must pass a resolution authorizing the acceptance of the commitment agreement. BOI indemnifies the local government regarding repayment of the loan.

To be eligible for the program, the basic sector business must create at least 15 full-time basic sector jobs. The maximum loan size is \$16.7 thousand times the number of full-time jobs created and the minimum loan size is \$250.0 thousand. The maximum loan term is 25 years. There is also up to a 2.5% interest rate reduction for job

creation. The reduction will be reflected in the user fee rate charged the basic sector business upon BOI review and approval. The basic sector business must create the required jobs within four years of the agreement. If the basic sector business does not create the required jobs within the four-year period, then the basic sector business must pay down the loan balance of the local government entity until the loan balance matches the eligible amount per the jobs created. BOI may increase the interest rate commensurate with the number of jobs eliminated if the borrower eliminates 10 or more qualifying jobs. The basic sector business must annually provide payroll documentation to BOI.

Pursuant to statute, a business that is created or expanded as the result of an Infrastructure Loan is entitled to a credit against either their State individual income taxes or corporate income taxes for the portion of the fees attributable to the use of the infrastructure. The total amount of tax credit claimed may not exceed the amount of the loan. The credit may be carried forward for seven years or carried back for three years.

During the fiscal year ended June 30, 2017, basic sector business entities made total user fee payments of \$3.2 million, representing \$2.1 million of principal and \$1.1 million in interest. During the fiscal year ended June 30, 2017, a total of \$3.4 million was claimed as a credit against State individual and corporation tax. The following table details the fiscal year 2017 credit claimed by tax type and the tax year it was applied against (in thousands):

Infrastructure Credit Claimed

	Tax Year 2016	Tax Year 2015	Total
Corporate income tax	\$229	\$ 275	\$ 504
Individual income tax	41	2,813	2,854
Total amount claimed	\$270	\$3,088	\$3,358

NOTE 2. OTHER ACCOUNTING CHANGES

A. New Accounting Guidance Implemented

For the year ended June 30, 2017, the State of Montana implemented the provisions of GASB Statement No. 77, *Tax Abatement Disclosures* (GASB 77). This Statement requires disclosure of tax abatement information about (1) a reporting government's own tax abatement agreements and (2) those that are entered into by other governments and that reduce the reporting government's tax revenues.

For the year ended June 30, 2017, the State of Montana implemented the provisions of GASB Statement No. 82, *Pension Issues—an amendment of GASB Statements No. 67, No. 68, and No. 73* (GASB 82). The objective of this Statement is to address certain issues that have been raised with respect to Statements No. 67, *Financial Reporting for Pension Plans*, No. 68, *Accounting and Financial Reporting for Pensions*, and No. 73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68*. Specifically, this Statement addresses issues regarding (1) the presentation of payroll-related measures in required supplementary information, (2) the selection of assumptions and the treatment of deviations from the guidance in an Actuarial Standard of Practice for financial reporting purposes, and (3) the classification of payments made by employers to satisfy employee (plan member) contribution requirements.

B. Adjustments to Beginning Net Position

For the year ended June 30, 2017, there was an overall increase to the General Fund's beginning fund balance. The most significant adjustments consisted of \$10.5 million related to Medicaid grant overmatching and \$6.9 million related to abandoned property.

NOTE 3. CASH/CASH EQUIVALENTS AND INVESTMENTS

This note details the following asset classifications (in thousands):

Cash/cash equivalents	\$ 3,414,078
Equity in pooled investments	\$ 12,971,407
Investments	\$ 3,281,306

Carrying amounts for the bank balance for cash deposits and fair values for the State's cash equivalents and investments are presented in Tables 1 through 4.

A. General

Outside of statutory requirements, the State does not maintain a statewide risk policy for cash/cash equivalents or investments, held outside of the Montana Board of Investments (BOI). The investment risk policy for State cash/cash equivalents and investments, including the Economic Development Bonds (EDB) deposits and investments managed by BOI, have been detailed below.

(1) **BOI** was created by the Legislature to manage the Unified Investment Program established by the State Constitution. The Unified Investment Program is comprised of state funds, including pensions, trusts, insurance, and cash. Local government entities can, by statute, only voluntarily invest in the Short Term Investment Pool (STIP). With a qualifying event, local government entities may also, by statute, invest in the long-term investment portion of the program. BOI manages the Unified Investment Program pursuant to the “Prudent Expert Principle” mandated by State law, which requires an investment manager to:

1. discharge the duties with the care, skill, prudence, and diligence, under the circumstances then prevailing, that a prudent person acting in a like capacity with the same resources and familiar with like matters exercises in the conduct of an enterprise of a like character with like aims;
2. diversify the holdings of each fund within the Unified Investment Program to minimize the risk of loss and to maximize the rate of return unless, under the circumstances, it is clearly prudent not to do so; and
3. discharge the duties solely in the interest of and for the benefit of the funds forming the Unified Investment Program.

BOI is not registered with the US Securities and Exchange Commission as an investment company. BOI’s investment program is governed by Investment Policy Statements (IPS) approved by BOI.

Currently, only the nine retirement funds through participation in the Consolidated Asset Pension Pool (CAPP) and the Montana State Fund (Workers’ Compensation) may invest in public corporate capital stock. Neither State law nor the State Constitution place restrictions on retirement fund investments. BOI approves a separate IPS for each pool and All Other Funds (AOF) participant, which provides BOI staff a broad strategic framework under which the investments are managed. The IPS’s also reflect BOI approved asset allocation ranges.

To facilitate management of the Unified Investment Program, BOI uses a combination of investment pools and specific accounts to meet the financial goals and expectations of agencies and entities which entrust these funds to BOI. The investment activity reported within BOI’s financial statements is included as part of the governmental, proprietary, and fiduciary fund financial statements within the CAFR.

State agencies and local government entities may participate in one or more pools. By investing in pools, participants are provided broad diversification. State agencies may also have direct fixed income, equity, or loan investments. These investments are combined and reported as AOF. The pools, AOF Investments Managed, and eligible State participants are shown in the following table as of June 30, 2017:

<u>Pool/Investments Managed Name</u>	<u>Creation Date</u>	<u>Eligible Participants</u>
Consolidated Asset Pension Pool (CAPP)	03/31/17	Nine Retirement Funds Only
Trust Funds Investment Pool (TFIP)	10/01/95	Various State Trust Funds
Short Term Investment Pool (STIP)	07/01/74	All State Funds and Local Governments
All Other Funds (AOF) Investments Managed	NA	Non-Pool State Agency Investments

Prior to November 2016, the asset allocation for the pension-only funds focused on five pools: The Montana Domestic Equity Pool, Montana International Equity Pool, Retirement Funds Bond Pool, Montana Private Equity Pool, and the Montana Real Estate Pool. The only participants in these pools were the pension systems. In November 2016, upon recommendation of the Chief Investment Officer, BOI’s oversight board approved that the pension asset allocation was to focus on 13 asset classes versus the five pension-only pools. On March 31, 2017, BOI converted the five pension-only pools into a single CAPP, with 13 underlying asset classes, to align BOI’s accounting and performance structure with the more detailed asset allocation formally approved in November 2016. CAPP’s underlying asset classes are as follows:

<u>Asset Classes</u>	
Domestic Equity	Broad Fixed Income
International Equity	Investment Grade
Private Equity	Mortgage Backed Securities
Real Estate	High Yield
Natural Resources	Cash
TIPS (US Treasury Inflation-Protected Securities)	Diversified Strategies (1)
US Treasury/Agency	

(1) Not funded as of June 30, 2017

Separately issued investment Pool financial statements may be obtained by contacting:

Montana Board of Investments
 2401 Colonial Drive, 3rd Floor
 PO Box 200126
 Helena, MT 59620-0126

BOI’s separately issued Unified Investment Program financial statements include the activity for Montana State Fund (MSF) within AOF on a June 30, 2017, basis. MSF, a discretely presented component of the State, by statute, prepared separately issued financial statements on a calendar year-end basis. Due to the difference in reporting periods, there will be a variance between the note disclosures and the financial statements for cash/cash equivalents, equity in pooled investments, and investments.

(a) Cash and cash equivalents consist of funds deposited by individual funds in the State Treasurer’s pooled cash account, cash deposits in checking accounts, cash invested in STIP, cash held by trustees, undeposited cash held by individual state agencies, and investments categorized as cash equivalents.

Cash deposited with the State Treasurer’s pooled cash account is invested by BOI in short-term securities and other investments. Because these funds are immediately available to the individual funds, their investment in the pooled

cash account is reported as a cash equivalent. BOI also manages STIP, which provides individual State agencies and local governments an opportunity to invest excess cash in a pool that is managed to preserve principal while providing 24-hour liquidity. Because these pooled funds are invested in short-term, highly liquid investments, the individual fund investments in the STIP are reported as a cash equivalent.

STIP investments are investments primarily in short-term, high quality, fixed income securities with a maximum maturity of 397 days or less. Variable securities shall have a maximum maturity of 2 years. STIP shall maintain a dollar-weighted average portfolio maturity of 60 days or less.

(b) Investment securities are reported by investment portfolio and type in Table 2 – Cash Equivalents, Table 3 – Equity in Pooled Investments, and Table 4 – Investments. Included in the pool and Investments Managed assets are the value of the investment portfolios, cash, receivables for securities sold but not yet settled, and dividend/interest receivables. Included in the liabilities are payables for securities purchased but not yet settled, income due to participants, and other miscellaneous payables.

Currency exposures may be hedged, in a defensive manner, at the discretion of the active managers to preserve the US dollar value of investments made. The managers are not allowed to engage in currency speculation.

The net change in fair value of investments consists of the realized gains or losses and the unrealized increase or decrease in fair value of investments during the year. Realized gains and losses on sales of investments are computed based on the difference between the sales price and the original cost of the investment sold. Interest income is recognized when earned. Dividend income is recorded on the ex-dividend date. Income due to participants is recorded on the date due to participants.

Investments are reported at fair value on a trade date basis. Quoted market prices, when available, have been used to value investments. The fair values for securities that have no quoted market prices represent estimated fair value. Alternative investment securities are valued using the most recent estimates of fair value from the investment manager. All investment portfolios presented in the Statement of Net Asset Value are at “fair” value. BOI categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles as follows:

Level 1 – Quoted prices for identical assets or liabilities in active markets.

Level 2 – Prices determined using inputs, other than quoted prices included within Level 1, that are observable for an asset or liability, either directly or indirectly.

Level 3 – Prices are determined using unobservable inputs.

CAPP invests directly in the underlying Pension Asset Classes (PAC) on behalf of the nine retirement systems within the BOI-approved asset allocation ranges. Each PAC has an underlying set of investment objectives and investment guidelines. For liquidity purposes, each PAC and external manager has a limited amount of cash/cash equivalents. With the PAC, it is invested in the State Street Short Term Investment Fund (STIF), which invests in high quality short-term securities. For external managers, it is invested per BOI established guidelines. The 13 underlying CAPP asset classes are described below.

Domestic Equity PAC - Invests primarily in US traded equity securities such as common stock. The type of portfolio structures utilized are separately managed accounts, commingled accounts, and exchange traded funds.

International Equity PAC - Invests primarily in international equity securities that trade on foreign exchanges in developed and emerging markets. The type of portfolio structures utilized are separately managed accounts, commingled accounts, and exchange traded funds.

Private Equity PAC - Invests in the entire capital structure of private companies. Investments are made through limited partnerships managed by a general partner. The limited partnerships typically have well-defined strategies such as buyout, venture, or distressed debt. Private Equity PAC investments are less liquid than other asset classes because the funds require a long holding period. Exchange traded funds are utilized to minimize the cash position.

Real Estate PAC - Invests primarily in real estate properties. Transactions are privately negotiated by a general partner through a limited partnership or an open-end fund. The funds typically have well-defined strategies such as core, value-add, or opportunistic. Private Real Estate PAC investments are less liquid than other asset classes because the funds require a long holding period. Exchange traded funds are utilized to minimize the cash position.

Natural Resource PAC - Invests primarily in energy and timber investments, but could include agriculture, water or commodity related funds. The investments are made through limited partnerships, managed by a general partner, and the funds are less liquid than other asset classes because they require a long holding period. Potential investment vehicles could include open-end funds, master limited partnerships, and exchange traded funds.

Intermediate Treasury Inflation Protected Securities (TIPS) PAC - Invests primarily in intermediate US TIPS or US Treasury securities that are indexed to inflation.

Intermediate US Treasury/Agency PAC - Invests primarily in debt obligations of the US Government including its agencies and instrumentalities.

Broad Fixed Income PAC - Invests primarily in core fixed income securities as represented in the Bloomberg Barclays US Aggregate Bond Index. The type of portfolio structures utilized are separately managed accounts, commingled accounts, and potentially exchange traded funds.

Intermediate Investment Grade PAC - Invests primarily in intermediate investment grade corporate bonds typically found in the Bloomberg Barclays US Corporate Bond Index. It includes US dollar denominated securities publicly issued by US and non-US industrial, utility, and financial users.

Mortgage Backed Securities PAC - Invests primarily in agency mortgage backed securities, asset backed securities, and commercial mortgage backed securities.

High Yield PAC - Invests primarily in US dollar denominated corporate bonds that are classified as high yield according to the major ratings agencies such as S&P, Moody's, or Fitch. The type of portfolio structures utilized are separately managed accounts and potentially commingled accounts or exchange traded funds.

Cash PAC - Invests primarily in highly liquid, money-market type securities through STIP.

Diversified Strategies PAC - Has not been funded as of June 30, 2017. Prior to future funding, BOI's Chief Investment Officer will propose the PAC Investment Objectives and Guidelines for approval by BOI.

TFIP - Invests primarily in investment grade, US dollar denominated fixed income securities. The portfolio has high yield and core real estate exposure.

(c) Security Lending - BOI is authorized by law to lend its securities and has contracted with the custodial bank, State Street Bank and Trust, "the Bank", to lend BOI's securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. The Bank is required to maintain collateral equal to 102% of the fair value of domestic securities and 105% of the fair value of international securities while the securities are on loan. On any day, including June 30, the markets may move in a positive or negative direction resulting in under or over collateralization. The Bank compensates for market movement by recalculating on the following business day to meet the collateralization requirements. BOI and the Bank split the earnings, 80/20 respectively, on security lending activities. BOI retains all rights and risks of ownership during the loan period. The Bank indemnifies BOI's credit risk exposure to the borrowers.

During fiscal year 2017, the Bank lent BOI's public securities and received as collateral: US dollar cash; US government and government sponsored agency securities; US corporate debt securities and structured securities rated AA-/Aa3 or higher; sovereign debt securities of the G10 nations; and debt securities issued by certain supranational agencies. The Bank does not have the ability to sell collateral securities unless the borrower defaults.

BOI imposed no restrictions on the amount of securities available to lend during fiscal year 2017. There were no failures by any borrowers to return loaned securities or pay distributions thereon during the period that resulted in a declaration and notice of default of the borrower. There were no losses during fiscal year 2017 resulting from a borrower default. As of June 30, 2017, no securities were recalled and not yet returned.

The cash collateral received for each loan was invested, together with the cash collateral of other qualified plan lenders, in two investment funds, the Quality D Short Term Investment Fund and the Security Lending Quality Trust. Pension funds participated in the Quality D Short Term Investment Fund and the non-pension entities participated in the Securities Lending Quality Trust. During March 2017, participation in both funds was transitioned into the Navigator Securities Lending Government Money Market portfolio.

BOI and the borrowers maintain the right to terminate all securities lending transactions on notice. Since the securities lending transactions were terminable at will, their duration did not generally match the duration of the investments made with the cash collateral received from the borrower. The average duration was 8 days and the average weighted final maturity was 49 days within the Navigator portfolio.

As of October 2016, STIP was no longer participating in the security lending program. STIP did not have securities on loan as of June 30, 2017. Security lending income and expense entries were recorded through October 2016.

(d) Investment risk disclosures are described in the following paragraphs and are identified by the specific pools or securities to which they pertain, when applicable.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligation. Except for US government securities, the pools' fixed income instruments have credit risk as measured by Nationally Recognized Statistical Rating Organizations (NRSRO). Credit risk is contemplated for each individual portfolio in the IPS. Credit risk is managed by constraining portfolio purchases around investment grade NRSRO ratings as appropriate.

The US government guarantees US government securities directly or indirectly. Obligations of the US government or obligations explicitly guaranteed by the US government are not considered to have credit risk and do not require disclosure of credit quality per GASB Statement No. 40.

Custodial Credit Risk

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, BOI may not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. Per policy, BOI's custodial institution must hold short-term and long-term credit ratings by at least one NRSRO with a minimum requirement of A1/P1 (short-term) and A3/A-1 (long-term).

Cash

Custodial risk for cash is the risk that, in the event of the failure of the custodial institution, the cash or collateral securities may not be recovered from an outside party. For any cash balances held as deposits at the custodial bank or sub-custodial bank, they are held in the name of BOI or its accounts. As of June 30, 2017, BOI recorded cash of \$2.0 million.

Investments

As of June 30, 2017, all the public securities as well as securities held by the separate public equity account managers were registered in the nominee name for BOI and held in the possession of BOI's custodial bank, State Street Bank. The Equity Index funds, securities held at the State's depository bank, real estate, mortgage and loan investments were purchased and recorded in BOI's name. Commingled fund investments are registered in the name of BOI.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributable to the magnitude of any single investment per issuer name. Investments explicitly guaranteed by the US government are excluded from the concentration of credit risk requirement. Concentration risk was within the policies as set by BOI.

CAPP

The CAPP IPS contains prescribed asset allocation ranges among the allowable asset classes and is subject to change as modifications are adopted by BOI. BOI will formally affirm or revise the asset allocation ranges for the retirement plans annually. The CAPP IPS contains investment objectives and guidelines for each underlying asset class, with a purpose of providing diversified exposure within the asset class in a prudent and cost-effective manner. Within the objective and guidelines for each underlying asset class, limits are placed on the allowable types of investments and the allowable ranges.

TFIP

The TFIP IPS provides for a 2% portfolio limit for dollar denominated debt obligations of domestic and foreign corporations (Yankee bonds) and a 3% portfolio limit in non-agency mortgage pass-through (MBS) securities.

STIP

The STIP IPS limits concentration of credit risk exposure by limiting portfolio investment types to 3% in any issuer with the exception of US Treasury and US Agency securities as well as any repurchase agreements with a financial institution.

AOF

Concentration of credit risk is contemplated by investment staff for each portfolio. Exposure to individual securities are limited with the exception of debt obligations of the US government, including its agencies and instrumentalities.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment. CAPP is the only IPS that allows for investments that can be held in non-US securities in a foreign currency. Per the CAPP IPS, the Investment Grade Credit Asset Class, Agency Mortgage Backed Securities Asset Class, and High Yield Asset Class sections have maximum restrictions that can be held. As of June 30, 2017, there were no receivable or payable balances pertaining to foreign currency forward contracts.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. BOI uses effective duration as a measure of interest rate risk for all fixed income portfolios. BOI approves both the IPS and benchmark used for each portfolio. Per the CAPP IPS, the TIPS PAC, US Treasury/Agency PAC, Investment Grade Credit PAC, and Agency Mortgage Backed PAC average duration will be maintained in a range within 20% of the benchmark duration. The Broad Fixed Income PAC and High Yield PAC average duration will be maintained in a range within 25% of the index duration. Per the TFIP IPS, the average duration will be maintained in a range within 20% of the benchmark duration. Interest rate risk for AOF is contemplated in each individual IPS and is managed by limiting the maturity of individual securities and/or matching liabilities to maturities per estimated cash flows. According to the STIP investment policy “the STIP portfolio will minimize interest rate risk by:

1. structuring the investment portfolio so securities mature to meet cash requirements for ongoing operations thereby normally avoiding the need to sell securities on the open market prior to maturity;
2. maintaining a dollar-weighted average portfolio maturity (WAM) of 60 days or less (for this purpose, the date to the next coupon reset date will be used for all floating or variable rate securities); and
3. STIP will maintain a reserve account.”

CAPP, TFIP, AOF, and STIP may hold fixed and variable rate securities. Interest payments on variable securities are based on an underlying reference rate (e.g. LIBOR).

CAPP, TFIP, and AOF investments are categorized to disclose credit and interest rate risk as of June 30, 2017. Credit risk is disclosed using the weighted credit quality rating by investment type. Interest rate risk is disclosed using weighted effective duration. If a bond investment type is unrated, the quality type is indicated by NR (not rated). The credit quality ratings have been calculated excluding non-rated investment types. NA (not applicable) indicates if duration has not been calculated. The Standard & Poor (S&P) rating service provides the credit ratings presented in the later tables. If an S&P rating is not available, an equivalent NRSRO rating is used.

STIP investments are categorized to disclose credit risk and weighted average maturity (WAM) as of June 30, 2017. Credit risk reflects the weighted security quality rating by investment type as of the June 30 report date. If a security investment type is unrated, the quality type is indicated by NR (not rated). Although the STIP investments have been rated by investment security type, STIP, as an external investment pool, has not been rated. The short-term credit ratings, provided by S&P's rating services, are presented. An A1+ rating is the highest short-term rating by the S&P rating service. STIP interest rate risk is determined using the WAM method. The WAM measure expresses investment time horizons (the time when investments are due or reset and payable in days, months or years) weighted to reflect the dollar size of the individual investments within an investment type. The WAM is calculated in days.

Other

The Federal National Mortgage Association and Federal Home Loan Mortgage Corp remain in conservatorship from September 7, 2008.

In August 2011, S&P downgraded the US AAA bond rating to AA+.

Derivative Instruments

A credit default swap is a contract to transfer credit exposure of fixed income products between parties. A foreign currency forward is a contract to purchase one currency and sell another at an agreed upon exchange rate. Fair value represents the unrealized appreciation/depreciation on foreign currency forward transactions pending as of year-end and is the difference between the execution exchange rate and the prevailing exchange rate as of the report date. Index futures long are an agreement to buy, on a stipulated future date, a specific amount of an indexed financial instrument. Rights represent a privilege granted to existing shareholders to subscribe to shares of a certain security at a specified price.

The derivative instrument disclosures are described in the following paragraphs. The fair value balances and notional amounts of CAPP derivative instruments outstanding as of June 30, 2017, classified by type, and the changes in the fair value of such derivative instruments for the year ended June 30, 2017, are as follows (in thousands):

Investment Derivatives (1)	Fair Value at June 30, 2017			Change in Fair Value	
	Classification	Fair Value Amount	Notional	Classification	Amount
Credit default swaps	Swaps	\$ -	\$ -	Investment Revenue	\$ 198
Currency forward contracts	LT debt/equity	-	-	Investment Revenue	7
Index futures long	Futures	-	3	Investment Revenue	892
Rights	Equity	31	39	Investment Revenue	62
Total Derivatives		<u>\$31</u>			<u>\$1,159</u>

- (1) A credit default swap is a contract to transfer credit exposure of fixed income products between parties. A foreign currency forward is a contract to purchase one currency and sell another at an agreed upon exchange rate. Fair value represents the unrealized appreciation/depreciation on foreign currency forward transactions pending as of year-end and is the difference between the execution exchange rate and the prevailing exchange rate as of the report date. Index futures long are an agreement to buy, on a stipulated future date, a specific amount of an indexed financial instrument. Rights represent a privilege granted to existing shareholders to subscribe to shares of a certain security at a specified price.

Counterparty Credit Risk

Counterparty credit risk is the risk that the counterparty will not fulfill its obligations. BOI was not subject to counterparty credit risk as of June 30, 2017.

STIP Reserve

In November 2007, the STIP reserve account was established. The STIP reserve account may be used to offset losses within the STIP portfolio. STIP distributes income to STIP participants based on accrued interest and discount amortization, net of fees and STIP reserve expense. The STIP reserve for the year ending June 30, 2017, is detailed as follows:

	STIP Reserve (in thousands)	
Beginning STIP Reserve		\$ 13,143
STIP reserve expense		
Other income		
Recovery from SIV related assets		7,774
Realized gains on sale of any STIP asset		19
Accrued interest		15
Daily reserve accrual		3,283
Total reserve expense		<u>\$ 11,091</u>
Ending STIP reserve		<u>\$ 24,234</u>

In the fiscal year ended June 30, 2007, BOI purchased four Structured Investment Vehicle (SIV) securities held in the STIP portfolio with a combined amortized cost of \$140.0 million, representing 5.02% of the total portfolio. These securities were purchased from two different issuers. Both issuers received the highest investment grade rating by two rating agencies at the time purchased and as of June 30, 2007. Both issuers of these SIV securities declared insolvency events in fiscal year 2008. In June and December 2009, BOI applied \$21.0 million, in total, from the STIP reserve to the outstanding debt principal balances. In May 2016, BOI wrote off the entire remaining outstanding SIV balance of \$23.6 million against STIP reserve. BOI does not make any assumptions on recovery related to the SIV assets. Any further flows of either principal or interest will be deemed as recovery monies and be applied to the STIP reserve.

(2) The EDB deposits and investments are restricted by the bond trust indentures to the following: government and agency obligations, certificates of deposits, repurchase agreements, and investment agreements. Deposits and investments must be made with Montana banks or in the STIP administered by BOI.

Credit Risk - Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligation. The EDB's US government direct-backed securities, consisting of US Treasury notes and bills, are guaranteed directly by the US government. Obligations of the US government or obligations explicitly guaranteed by the US government are not considered to have credit risk and do not require disclosure of credit quality per GASB Statement No. 40. The EDB does not have a formal investment policy addressing credit risk for permitted investments as provided in the indenture or investment in the STIP. Permitted investments, as described in the indenture, include "either (i) long term obligations of such bank, trust company or association are rated in one of the three highest investment category of the Standard & Poor's Corporation or Moody's Investor Service Inc., which investment category shall not be less than the prevailing rate on the bonds or (ii) the deposits are continuously secured as to principal, but only to the extent not insured by the Bank Insurance Fund or the Savings Association Insurance Fund, or any successor to either, of the Federal Deposit Insurance Corporation (FDIC)."

BOI's STIP investment policy statement specifies that STIP securities have a minimum of two credit ratings as provided by nationally recognized statistical rating organizations, to assist in the monitoring and management of credit risk. The purchase of STIP securities other than US government or US agency obligations are restricted to those which are pre-approved. Although the STIP investments have been rated by investment security type, STIP, as an external investment pool, it has not been rated.

Custodial Credit Risk – Custodial credit risk is the risk that, in the event of the failure of the counterparty to a transaction, BOI will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. Per policy, BOI's custodial institution must hold short-term and long-term credit rating by at least one NRSRO with a minimum requirement of A1/P1 (short-term) and A3/A-1 (long-term).

Cash – Custodial risk for cash is the risk that, in the event of the failure of the custodial financial institution, the cash or collateral securities may not be recovered from an outside party. The securities used as collateral are held by US Bank's Trust Department in the name of BOI.

Investments - As of June 30, 2017, EDB securities were recorded in book entry form in the name of US Bank National Association as Trustee for BOI by specific account. The EDB does not have a policy addressing custodial credit risk for deposits and investments, specifically, uninsured, collateralized deposits.

Concentration of Credit Risk - Concentration of credit risk is the risk of loss attributed to the magnitude of any single investment per issuer name. The EDB investments directly issued or explicitly guaranteed by the US government and investments in mutual funds are excluded from the concentration of credit risk requirement. The STIP investment policy limits concentration of credit risk by limiting portfolio investment types to 3% in any issuer with the exception of US Treasury and US Agency securities as well as any repurchase agreements with a financial institution. As of June 30, 2017, STIP concentration risk was within the policy as set by BOI.

Interest Rate Risk - Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The EDB does not have a formal investment policy addressing interest risk for permitted investments as provided in the Indenture or the cash equivalent investment in the STIP. STIP interest rate risk is determined using the WAM method. In accordance with GASB Statement No. 40, BOI has selected the effective duration method to disclose interest rate risk. According to the STIP IPS “the STIP portfolio will minimize interest rate risk by:

1. structuring the investment portfolio so securities mature to meet cash requirements for ongoing operations, thereby normally avoiding the need to sell securities on the open market prior to maturity;
2. maintaining a dollar-weighted average portfolio maturity (WAM) of 60 days or less (for this purpose, the date to the next coupon reset date will be used for all floating or variable rate securities); and
3. STIP will maintain a reserve account.”

The EDB investments are categorized to disclose credit and interest rate risk as of June 30, 2017. Credit risk is disclosed using the weighted credit quality rating by investment type. Interest rate risk is disclosed using weighted effective duration as calculated by BOI. If a bond investment type is unrated, the quality type is indicated by NR (not rated). The credit quality ratings have been calculated excluding non-rated investment types. NA (not applicable) indicates if duration has not been calculated. Both the credit quality ratings and duration have been calculated excluding cash equivalents with credit ratings of NR or NA duration calculations. There were no derivative transactions during the 2017 fiscal year for investments held by the trustee.

B. Cash/Cash Equivalents

(1) Cash Deposits – The State requires collateralization based on the average daily bank balance in the depository bank holding the main state bank account. For other depository banks, state statutes require collateralization at 50% of the bank balance. The cash deposits amount includes both primary government and component unit deposits.

Table 1 – Cash Deposit Amounts
(in thousands)

	<u>Carrying Amount</u>
Cash held by State/State's agent	\$99,122
Uninsured and uncollateralized cash	5,599
Undeposited cash	444
Cash in US Treasury	295,621
Cash in MSU component units	10,963
Cash in UM component units	19,973
Less: outstanding warrants	<u>(38,864)</u>
	<u>\$392,858</u>

As of June 30, 2017, the carrying amount of deposits for component units was \$180.3 million as included in Table 1.

(2) Cash Equivalents – consists of cash in the State Treasury invested by individual funds in the Short-term Investment Pool (STIP), the State Treasurer’s pooled cash account, and in identifiable securities and investments considered to be cash equivalents. Cash equivalents, generally, are short-term, highly liquid investments with original maturities of three months or less. Cash equivalents may be under the control of BOI or other agencies, as allowed by law. The STIP portfolio is shown at fair value.

Table 2 - Cash Equivalents
(in thousands)

	Fair Value	Credit Quality Rating(1)	WAM in Days(1)
Treasuries	\$ 194,673	A1+	80
Asset backed commercial paper	1,089,830	A1	25
Corporate commercial paper	356,122	A1	63
Corporate notes	369,751	A1+	78
Certificate of deposit	484,113	A1+	35
US government agency	419,778	A1+	24
Money market fund unrated	125,116	NR	1
Money market fund rated	148,000	A1+	1
Less: Cash in transit for STIP purchase	(9,031)	NR	NA
Less: STIP included in pooled investment balance	<u>(157,132)</u>	NR	<u>NA</u>
Total cash equivalents	<u>\$3,021,220</u>	A1	39

(1) Represents the STIP investments portion of cash equivalents only.

As of June 30, 2017, local governments had invested \$1.0 billion and component units of the State of Montana had invested \$427.7 million in STIP.

C. Equity in Pooled Investments

These securities consist of investments held by BOI in pooled investment funds. The Consolidated Asset Pension Pool (CAPP) and Trust Funds Investment Pool (TFIP) were created to allow qualifying funds to participate in diversified investment pools. Purchases are subject to the statutorily mandated “Prudent Expert Principle” (see Table 3 – Equity in Pooled Investments).

Table 3 – Equity in Pooled Investments
(in thousands)

	Book Value (1)	Fair Value (1)	Units Outstanding	Unit Value (2)
CAPP:				
Consolidated asset pension pool	\$ 9,665,249	\$10,667,096	\$103,214	\$103.058787
TFIP:				
Trust funds investment pool	2,217,207	2,327,039	21,812	107.016814
Total pooled investments	11,882,456	12,994,135		
Pool adjustments (net)	<u>(22,728)</u>	<u>(22,728)</u>		
Total equity in pooled investments	<u>\$11,859,728</u>	<u>\$12,971,407</u>		

(1) Includes cash/cash equivalents and investments.

(2) Amounts not in thousands.

As of June 30, 2017, the fair value of the underlying securities on loan was \$615.4 million. Collateral provided for the securities on loan totaled \$628.7 million consisting of \$80.6 million in cash and \$548.2 million in securities.

As of June 30, 2017, component units, both discretely presented and fiduciary funds, of the State had equity in pooled investments with a book value of \$10.4 billion and a fair value of \$10.7 billion as included in Table 3. The increase in book value was due to transitioning the plan participants out of the original five investment pools and into CAPP. As part of this transition, the investments were given a new book value which was their combined ending market value of their holdings of the five pools as of March 31, 2017.

As of June 30, 2017, local governments invested \$12.8 million in TFIP.

State of Montana investments are categorized below to disclose credit and interest rate risk as of June 30, 2017, as required for applicable pools.

(1) STIP is reported in Table 2 – Cash Equivalents

AOF data is presented below and in section D – Investments.

CAPP, STIP and AOF – Fixed income and equity investments classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities. Fixed income investments classified in Level 2 of the fair value hierarchy are valued using a matrix pricing technique. Matrix pricing is used to value securities based on the securities’ relationship to benchmark quoted prices.

CAPP – Montana Mortgages classified in Level 3 of the fair value hierarchy are present value adjusted. Direct real estate classified in Level 3 of the fair value hierarchy for the fiscal year ended June 30, 2017.

Pools and AOF – Investments measured at cost are included to account for all investments within each pool and AOF. These assets represent cash equivalents and Montana Mortgages.

The investments measured at NAV for the year ended June 30, 2017 are detailed below.

	Investments Measured at NAV (in thousands)			
	Fair Value	Unfunded Commitments	Redemption Frequency (If Currently Eligible)	Redemption Notice Period

Commingled Equity Index Funds	185,615	-	Daily	1 day
Total investments measured at NAV	<u>\$292,615</u>	-		

Commingled Equity Index Funds – This type consists of institutional investment funds that invest in domestic equities and funds that invest in international equities. The fair values of these investments use the NAV per share (or its equivalent) of the investments.

Private Equity Partnerships – This type includes investments in limited partnerships. Generally, the types of partnership strategies included in this portfolio are: venture capital, growth equity, buyouts, special situations, mezzanine, and distressed debt. These investments and are considered illiquid. Redemptions are restricted over the life of the partnership. During the life of the partnerships, distributions are received as underlying partnership investments are realized. It is expected that the underlying assets of the funds will be liquidated over 10 years. It is probable all of the investments in this type will be sold at an amount different from the NAV per share (or its equivalent) of BOI’s ownership interest in partners’ capital.

Core Real Estate – This type includes funds that invest primarily in core real estate, which makes equity investments in operating and substantially-leased institutional quality real estate in traditional property types (apartments, office, retail, industrial and hotel) through commingled funds. The primary investment objectives of these core real estate funds are to invest in real estate that will generate income from predictable sources of revenue and not to realize gains on the underlying assets. This investment type receives distributions of generated income and occasionally through the liquidation of the underlying assets of the fund. The fair values of these investments use the NAV per share (or its equivalent) of BOI’s ownership interest in the partners’ capital. Redemption of these investments is restricted based on the availability of cash flow arising from investment transactions, sales, and other fund operations occurring in the ordinary course of business. Therefore, requested redemptions from a fund will be redeemed as funds become available.

Value Added and Opportunistic – This type includes private partnership funds that primarily invest in value added and opportunistic real estate funds. These funds assume more risk than the core real estate funds in order to achieve a greater return on investment. Returns are driven both by current income and by expected capital appreciation. This investment type receives distributions of generated income and occasionally through the liquidation of the underlying assets of the fund. It is expected that the underlying assets of the funds will be liquidated over 7 to 10 years. These investments can never be redeemed with the funds. The fair values of these investments use the NAV per share (or its equivalent) of BOI's ownership interest in the partners' capital.

Timber – This type includes private partnership funds that primarily invest in timber funds. The underlying assets of these types of funds are typically made of tree farms and managed forest. Returns come from biological growth, upward product class movement, and appreciation in timber and land prices. This investment type receives distributions of generated income and occasionally through the liquidation of the underlying assets of the fund. It is expected that the underlying assets of the funds will be liquidated over 12 to 20 years. These investments can never be redeemed with the funds. The fair values of these investments use the NAV per share (or its equivalent) of BOI's ownership interest in the partners' capital.

STIP – This investment program is managed and administered under the direction of BOI as authorized by the Unified Investment Program. It is a commingled pool for investment purposes and requested redemptions from the pool are redeemed the next business day. The fair values of the investments in this category have been determined using the NAV per share (or its equivalent) of the investment. STIP, as presented in this table, represents a direct holding for CAPP and TFIP. Refer to the STIP Investments Measured at Fair Value table for the underlying investments within the fair value hierarchy.

High Yield Bond Fund – This type consists of predominantly US corporate credits, whether in the form of bonds or loans that are rated below investment grade. These assets carry a higher risk of default than investment grade securities and accordingly provide a higher level of income or yield commensurate with that risk. The fair values of these investments use the NAV per share (or its equivalent) of the investments.

As of the June 30, 2017, exchange date, BOI's foreign currency exposure by deposits and investment type are reported, in US dollars, at fair value in the table below. Excluded are the foreign investments denominated in US dollars for the American Depositary Receipts, sovereign debt and commingled index funds.

Investments in alternative equity are usually made through Limited Partnership Agreements that involve many limited partners and a general partner who is responsible for all investment decisions. The limited partners make an original commitment, after which capital is called as needed by the general partner to make investments. These Agreements will usually last for a minimum of 10 years. The table below shows the remaining BOI commitments to CAPP alternative equity managers by pension class. Further details on the balances as of June 30, 2017, as shown below, can be found in BOI's separately issued external investment pool financial statements.

Commitments to Fund Managers
(in thousands)

Pool	Original Commitment	Commitment Remaining	Carrying Value	Fair Value

D. Investments

Article VIII of Montana's Constitution, with supporting statutes, authorizes BOI to manage the State's Unified Investment Program. Long-term investments are administered by the following agencies, as allowed by state law, Section 17-6-201, MCA:

Department	Percent Administered
Board of Investments	52.56%
Universities	16.94
MPERA (Montana Public Employee Retirement Administration)	20.76
College Savings Plan	4.43
Montana Board of Housing	2.53
Other (1)	2.78
Total	100.00%

- (1) Other consists of the Commissioner of Higher Education, the Department of Administration, the Department of Commerce, the Department of Natural Resources and Conservation, the Department of Public Health and Human Services, the Department of Revenue, and State Auditor.

BOI must employ the "Prudent Expert Rule" in managing the State's investment portfolio. Investments are presented at fair value. Investment fair values for publicly traded securities are determined primarily by reference to market prices supplied to BOI's custodial bank or trustee. State investments are categorized within the fair value hierarchy established by GASB Statement No. 72.

The PERS Defined Contribution Retirement Plan and the Deferred Compensation Plan's fixed assets were administered on behalf of the plans by Pacific Investment Management Company (PIMCO) and State Street Bank Kansas City (SSKC) and a third-party synthetic Guaranteed Interest Contract (GIC) providers, Transamerica Life Insurance Company (Transamerica), Prudential Insurance Company of America (Prudential) and Voya Retirement Insurance & Annuity Company (Voya). The third party record keeper, Empower™ Retirement, tracks and reports the daily trading and valuations of all investment options, including the assets held by the individual mutual fund companies. When participants invest in the fixed investment, they are guaranteed a fixed rate of return. All money invested in the Montana Fixed Fund (stable value investment option) of the PERS-DCRP and Deferred Compensation Plan are held in a Pooled Trust. The Pooled Trust assets are invested by PIMCO based on an investment guideline schedule as agreed upon in the Pooled Trust Contract and approved by the PERB, PIMCO, and any GIC. Variable investments are held and managed in a selection of retail and institutional mutual funds, which cover all standard asset classes and categories.

Total deferred inflows	\$ 1	\$228

(1) Further detail regarding pension related deferred inflows of resources is provided in Note 6.

NOTE 5. CAPITAL ASSETS

On August 15, 2016, the Land Board approved, by vote of 5-0, a like-kind property exchange. Through the Department of Administration, the State acquired the land and existing building at 1698 A Street as part of a three-parcel land and building exchange between the State and a non-governmental entity. All three properties are located in Helena. The state-owned assets located at 1100 North Last Chance Gulch and 920 Front Street were exchanged for the 1698 A Street Property. This exchange removed two obsolete and costly buildings from the State's portfolio and replaced them with one updated building. The assets are accounted for in a governmental fund.

Changes in capital asset balances for the fiscal year ended June 30, 2017, are reflected in the following table (in thousands):

Governmental Activities	Beginning Balance	Increases (1)	Decreases (1)	Ending Balance
Capital assets not being depreciated:				
Land	\$ 670,784	\$ 24,036	\$ (784)	\$ 694,036

Prison Funds	602
West Yellowstone Airport	199
Other Enterprise Funds	55
Total depreciation expense – Business-type Activities	<u>\$1,068</u>

(2) Depreciation expenses noted above include adjustments related to prior periods and correction of errors.

NOTE 6. RETIREMENT PLANS

A. General

The funding policies for each plan provide for periodic employee, employer, and State of Montana (State) nonemployer contributions at rates specified by state law. An actuary determines the actuarial implications of the funding requirement in an annual actuarial valuation. The actuarial method used to determine the implications of the statutory funding level is the Entry Age Actuarial Cost Method, with both normal cost and amortization of the unfunded actuarial liability determined as a level percentage of payrolls. Benefits are established by state law and can only be amended by the Legislature.

Montana State Fund, a discretely presented component of the State, by statute, prepares separately issued financial statements on a calendar year-end basis. Due to the difference in reporting period, there will be a variance between the note disclosures and the financial statements for some pension related items.

Public Employees' Retirement Board

The Public Employees' Retirement Board (PERB) oversees eight defined benefit plans: Public Employees' Retirement System-Defined Benefit Retirement Plan (PERS-DBRP); Judges' Retirement System (JRS); Highway Patrol Officers' Retirement System (HPORS); Sheriffs' Retirement System (SRS); Game Wardens' and Peace Officers' Retirement System (GWPORS); Municipal Police Officers' Retirement System (MPORS); Firefighters' Unified Retirement System (FURS); and Volunteer Firefighters' Compensation Act (VFCA). The PERB also oversees two defined contribution plans: Public Employees' Retirement System-Defined Contribution Retirement Plan (PERS-DCRP) and the 457-Deferred Compensation Plan (457 Plan). All of the benefit plans, defined benefit and defined contribution, are administered by the Montana Public Employees' Retirement Administration (MPERA). Separately issued financial statements and actuarial reports can be obtained at 100 North Park, Suite 200, PO Box 200131, Helena, MT 59620-0131. The financial statements and the latest actuarial valuation may also be attained here: <http://mpera.mt.gov/>. The financial statements for the PERS-DBRP include activity for the defined benefit plan and the associated education fund. The PERS-DCRP financial statements include activity for the defined contribution plan and the associated education fund.

The PERB is an independent, seven-member board, appointed by the Governor. The members are assigned five-year, staggered terms. The PERB consists of two members at large, two active defined benefit public employees, one active defined contribution public employee, one member experienced in investments, and one retired public employee. The PERB approves the annual operating budget, developed by MPERA management, before the beginning of the fiscal year. As governed by statute, the PERB's defined benefit administrative expenses may not exceed 1.5% of the total defined benefit plan retirement benefits paid. In addition, the PERB decides legislative policy and priorities, hires the executive director, establishes the policies and procedures that govern operations at MPERA, and hear and rule on appeal matters of disabilities, retirees, and members. PERB members do not receive compensation for their service to the MPERA, but are reimbursed for necessary expenses incurred while serving.

All defined benefit pension plans provide retirement, disability, and death benefits to the plan members and their beneficiaries. The PERS-DCRP Disability OPEB Plan provides a defined benefit for disabled members of the PERS-DCRP. Beneficiaries do not receive disability benefits but may attain retirement benefits from the PERS-DCRP. A summary of the plan eligibility and benefits are found in the Summary of Benefits sections throughout Note 6. Related disclosures for the PERS-DCRP Disability Plan can be found within Note 7 of this report.

Teachers' Retirement System

The Teachers' Retirement System (TRS) is a defined benefit plan administered by the Teachers Retirement Board (TRB). The plan prepares a publicly issued comprehensive annual financial report that includes financial statements and required supplementary information for TRS. Separately issued financial statements, actuarial valuations and

experience studies can be obtained at 1500 East Sixth Avenue, PO Box 200139, Helena, MT 59620-0319; or can be found online at <https://trs.mt.gov/>.

The TRB consists of six members, all of which are appointed by the Governor. Three TRB members must be teaching professionals who, when appointed, are active members of TRS; at least one of them must be an active classroom teacher. One TRB member must be a retired teacher who was a member of TRS at the time of retirement. Two TRB members are appointed from the public at large. TRB members serve staggered five-year terms. Three TRB members constitutes a quorum.

A summary of the number of participating employer and nonemployer contributing entities as of June 30, 2017, follows:

Classification of Participant	GWPORS	PERS-DBRP	PERS-DCRP	SRS	MPORS	FURS	VFCA	TRS
Employer	7	539	300	57	33	27	244	369
Nonemployer contributing entity	-	1	-	-	1	1	1	1
Total Participants	7	540	300	57	34	28	245	370

There are approximately 700 State employees who are eligible to participate in defined benefit pension plans, other than the plans listed above.

B. Summary of Significant Accounting Policies

The MPERA prepares its financial statements using the accrual basis of accounting. For the purposes of measuring the net pension liability, deferred inflows of resources and deferred outflows of resources related to pensions, pension expense, information about the fiduciary net position, and additions to/deductions from fiduciary net position, the items have been determined on the same accrual basis as they are reported by the MPERA. For this purpose, member contributions are recognized in the period in which contributions are due. Employer contributions are recognized when due and the employer has made a formal commitment to provide the contributions. Revenues are recognized in the accounting period they are earned and become measurable. Benefit payments and refunds are recognized in the accounting period when due and payable in accordance with the benefit terms. Expenses are recognized in the period incurred. Investments are reported at fair value. The MPERA adheres to all applicable Governmental Accounting Standards Board (GASB) statements.

The TRS prepares its financial statements using the accrual basis of accounting. For the purposes of measuring the net pension liability, deferred inflows of resources and deferred outflows of resources related to pensions, pension expense, information about the fiduciary net position of the TRS, and additions to/deductions from TRS's fiduciary net position, the items have been determined on the same accrual basis as they are reported by the TRS. For this purpose, plan contributions are recognized as of employer payroll paid dates. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value. The TRS adheres to all applicable GASB statements.

The pension trust fund financial statements presented in this report are prepared using the accrual basis of accounting in the same manner as that described for the pension plan administrators above.

C. Public Employee Defined Benefit Retirement Plan

A summary of classes of members in JRS, HPORS, GWPORS, PERS-DBRP, SRS, MPORS, FURS, VFCA, TRS, PERS-DCRP, and 457-Deferred Compensation covered by benefit terms at June 30, 2017, follows:

Type of Plan for Reporting Purposes	Single-Employer Defined Benefit			Multi-Employer Defined Benefit						Multi-Employer Defined Contribution		
	Plan Designation	JRS	HPORS ¹	GWPORS	PERS-DBRP ²	SRS	MPORS ¹	FURS	VFCA	TRS	PERS-DCRP	457-DC
Classification of Member

(1) State as the Single Employer

Judges' Retirement System – The JRS, administered by the MPERA, is a single-employer defined benefit plan established in 1967, and governed by Title 19, chapters 2 & 5, MCA (Montana Code Annotated). This plan provides retirement benefits for all Montana judges of the district courts, justices of the Supreme Court, the Chief Water Judge, and the Associate Water Judge. Benefits are established by state law and can only be amended by the Legislature. The JRS provides retirement, disability, and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service and compensation. Member rights are vested after five years of service.

Summary of Benefits

Member's current salary¹ or highest average compensation (HAC)²

¹Hired prior to July 1, 1997, and non-Guaranteed Annual Benefit Adjustment (GABA) – monthly compensation at time of retirement;

²Hired on or after July 1, 1997, or electing GABA – HAC during any consecutive 36 months;

²Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's HAC.

Eligibility for benefit

Age 60, 5 years of membership service;

Any age with 5 years of membership service – involuntary termination, actuarially reduced.

Vesting

5 years of membership service.

Monthly benefit formula

3½% of current salary¹ (non-GABA) or HAC² (GABA) per year of service credit for the first 15 years of service credit, plus 1.785% per year for each year after 15 years.

Guaranteed Annual Benefit Adjustment (GABA)

Hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member's benefit increases by a maximum of 3.0% each January, inclusive of all other adjustments to the member's benefit.

Minimum benefit adjustment (non-GABA)

If hired prior to July 1, 1997, and member did not elect GABA – current salary of an active member in same position is used in the calculation of the monthly benefit each time the Legislature increases salaries for active judges.

Contributions to the Plan

Rates are specified by state law for periodic employee and employer contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system – Contributions are deducted from each member's salary and remitted by the participating employer. An individual account is established for each member's contributions and interest allocations until a retirement or refund request is processed. Plan members are required to contribute 7.0% of the member's monthly compensation.

Employer contributions to the system – As the employer, the State is required to contribute 25.81% of a member's compensation.

Actuarial Assumptions

The total pension liability/(asset) used to calculate the net pension liability/(asset) was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability/(asset) to June 30, 2016. The actuarial assumptions used in the June 30, 2016, valuation were based on the results of the last actuarial experience study dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability/(asset). Among those assumptions were the following:

- Investment Return 7.75%
- Admin Expense as a % of Payroll 0.15%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases None

- Postretirement Benefit Increases – After the member has completed 12 full months of retirement, the member’s benefit increases by the applicable percentage (provided below) each January, inclusive of other adjustments to the member’s benefit:
 - 3% for members electing GABA or hired on or after July 1, 1997
 - Current salary of an active member in the same position, if hired prior to July 1, 1997, and not electing GABA
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension asset was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members and employers will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. Based on those assumptions, the JRS’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2117. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension asset. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the JRS. The most recent analysis, performed for the period covering fiscal years 2004 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public-sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the JRS’s target asset allocation as of June 30, 2016, is summarized in the table that follows:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.60%	4.00%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.35%
Fixed Income	23.40%	1.00%
Private Equity	12.00%	7.75%
Real Estate	8.00%	4.00%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability/(asset) to changes in the discount rate, the table below presents the net pension liability/(asset) calculated using the discount rate of 7.75%, as well as what the net pension liability/(asset) would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	1.0% Decrease (6.75%)	(in thousands) Current Discount Rate	1.0% Increase (8.75%)
JRS Net Pension (Asset)	(\$29,753)	(\$33,852)	(\$39,015)

Net Pension Asset

In accordance with GASB 68, employers are required to recognize and report certain amounts associated with their participation in the JRS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension asset (NPA), pension expense, deferred inflows of resources and deferred outflows of resources associated with pensions.

(dollars presented in thousands)

	Net Pension Liability (Asset) as of 6/30/15	Net Pension Liability (Asset) as of 6/30/16	Percent of Collective NPA
Employer's Proportionate Share	(\$33,961)	(\$33,852)	100%

At June 30, 2017, the employer reported a net pension asset of \$33.9 million for its proportionate share of the net pension asset. The net pension asset was measured as of June 30, 2016, and the total pension liability used to calculate the net pension asset was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The employer's proportion of the net pension asset was based on the employer's contributions received by JRS during the measurement period July 1, 2015, through June 30, 2016, relative to the total employer contributions received from all of the JRS participating employers.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension asset and the employer's reporting date that are expected to have a significant effect on the employer's proportionate share of the collective net pension asset.

Other Items Related to and Changes in Net Pension Asset

(in thousands)

	Total Pension Liability	Plan Fiduciary Net Position	Net Pension Liability/(Asset)
Balances at 6/30/2015	\$53,146	\$87,107	(\$33,961)

Pension Expense

At June 30, 2017, the employer recognized pension expense/(income) of (\$2.1) million for the JRS.

Deferred Outflows and Inflows

At June 30, 2017, the employer recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$1.8 million.

As of the fiscal year ended June 30, 2017, remaining deferred outflows of resources and deferred inflows of resources related to the JRS are from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between projected and actual earnings on pension plan investments	-	\$1,522
Earnings on pension plan investments	\$2,807	-
Contributions paid to JRS subsequent to the measurement date – FY 2017 Contributions	1,800	-
Totals	<u>\$4,607</u>	<u>\$1,522</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the employer's contributions made subsequent to the June 30, 2016, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Highway Patrol Officers' Retirement System – The HPORS, administered by the MPERA, is a single-employer defined benefit plan established in July 1, 1945, and governed by Title 19, chapters 2 & 6, MCA. This plan provides retirement benefits to all members of the Montana Highway Patrol, including supervisory personnel. Benefits are established by state law and can only be amended by the Legislature. The HPORS provides retirement, disability, and death benefits to plan members and their statutory beneficiaries. Benefits are based on eligibility, years of service, and highest average compensation. Member rights for death and disability are vested immediately. All other member rights are vested after 5 or 10 years of service.

Section 19-6-709, MCA provides eligible members retired prior to July 1, 1991, or their survivors, an annual supplemental lump-sum payment distributed each September. This lump-sum payment is funded by a statutory appropriation requested by the PERB from the General Fund. Factors impacting eligibility include the number of years the recipient has received a service retirement or disability benefit, the recipient's age, and whether the recipient is employed in a position covered by a retirement system under Title 19, MCA.

Deferred Retirement Option Plan (DROP)

Beginning October 1, 2015, eligible members of HPORS can participate in the DROP by filing a one-time irrevocable election with the PERB. The DROP is governed by Title 19, Chapter 6, Part 10, MCA. A member must have completed at least twenty years of membership service to be eligible. They may elect to participate in the DROP for a minimum of one month and a maximum of 60 months and may only participate in the DROP once. A participant remains a member of the HPORS, but will not receive membership service or service credit in the system for the duration of the member's DROP period. During participation in the DROP, all mandatory employer contributions continue to the retirement system; mandatory employee contributions are deposited to the members DROP account. A monthly benefit is calculated based on salary and years of service to date as of the beginning of the DROP period. The monthly benefit is paid into the member's DROP account until the end of the DROP period. At the end of the DROP period, the participant may receive the balance of the DROP account in a lump-sum payment or in a direct rollover to another eligible plan, as allowed by the IRS. If the participant continues employment after the DROP period ends, they will again accrue membership service and service credit. The DROP

account cannot be distributed until employment is formally terminated. The balance held by MPERA for HPORS DROP participants as of June 30, 2017, was approximately \$680.0 thousand.

Summary of Benefits

Member's highest average compensation (HAC)

Hired prior to July 1, 2013 – HAC during any consecutive 36 months;

Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's HAC.

Eligibility for benefit

20 years of membership service, regardless of age.

Early Retirement

Hired prior to July 1, 2013 – 5 years of membership service, actuarially reduced from age 60.

Hired on or after July 1, 2013 – 10 years of membership service, actuarially reduced from age 60.

Vesting

Hired prior to July 1, 2013 – 5 years of membership service.

Hired on or after July 1, 2013 – 10 years of membership service.

Monthly benefit formula

Retire prior to July 1, 2013 – 2.5% of HAC per year of service credit.

Retire on or after July 1, 2013 – 2.6% of HAC per year of service credit.

Guaranteed Annual Benefit Adjustment (GABA)

Hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member's benefit increases by a maximum of 3.0% each January, inclusive of all other adjustments to the member's benefit.

Hired on or after July 1, 2013 – after the member has completed 36 full months of retirement, the member's benefit increase by a maximum of 1.5% each January, inclusive of all other adjustments to the member's benefit.

Minimum Monthly Benefit (non-GABA)

If hired prior to July 1, 1997, and member did not elect GABA – the minimum monthly benefit is equal to 2% of the service credit multiplied by the current base compensation of a probationary highway patrol officer. Any annual increase is limited to 5.0% over the current benefit and may not exceed 60% of the current base salary of a probationary officer.

Contributions to the Plan

Rates are specified by state law for periodic employee and employer contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system – Contributions are deducted from each member's salary and remitted by participating employer.

Hired prior to July 1, 1997, and not electing GABA – Plan members are required to contribute 13.00%.

Hired after June 30, 1997, and electing GABA – Plan members are required to contribute 13.05%.

Effective July 1, 2013, and ending July 1, 2016, all HPORS member contributions, regardless of hired date, increased 1.0% annually.

Employer contributions to the system – As the employer, the State is required to contribute 38.33% of a member's compensation. The first 28.15% is payable from the same sources used to pay a member's compensation. The remaining amount, equal to 10.18%, is payable from the General Fund through a statutory appropriation.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The actuarial assumptions used in the June 30, 2016, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Administrative Expense as a % of Payroll 0.23%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0.00% to 7.30%
- Postretirement Benefit Increases – After the member has completed 12 full months of retirement, the member’s benefit increases by the applicable percentage each January, inclusive of other adjustments to the member’s benefit:
 - If electing GABA or hired on or after July 1, 1997 – 3.00%
 - Hired on or after July 1, 2013 – 1.50%
 - Minimum Benefit Adjustment – Limited to 5% over the current benefit and may not exceed 60% of a newly confirmed officer
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members and employers will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. The State contributes 10.18% of salaries paid by employers, however, this is considered an employer contribution since HPORS is a single-employer plan and the State is the only employer. Based on those assumptions, the HPORS’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2117. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience studies prepared for the HPORS. The most recent analysis, performed for the period covering fiscal years 2004 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public-sector systems, as well as utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by an investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the HPORS’s target asset allocation as of June 30, 2016, is summarized in the table that follows:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.60%	4.00%
Domestic Equity	36.00%	4.55%

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Foreign Equity	18.00%	6.35%
Fixed Income	23.40%	1.00%
Private Equity	12.00%	7.75%
Real Estate	8.00%	4.00%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
HPORS Net Pension Liability	\$99,166	\$71,779	\$50,127

Net Pension Liability

In accordance with GASB 68, employers are required to recognize and report certain amounts associated with their participation in the HPORS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability (NPL), pension expense, deferred inflows or resources, and deferred outflows of resources associated with pensions.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/15	Net Pension Liability as of 6/30/16	Percent of Collective NPL
Employer's Proportionate Share	\$63,899	\$71,779	100%

At June 30, 2017, the employer reported a liability of \$71.8 million for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The employer's proportion of the net pension liability was based on the employer's contributions received by HPORS during the measurement period July 1, 2015, through June 30, 2016, relative to the total employer contributions received from all of the HPORS participating employers.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: Effective October 1, 2015, a member who retires with at least 20 years of service will be allowed to participate in the Deferred Retirement Option Program (DROP). While the member is participating in the DROP, they will continue to work while accumulating their retirement benefit with interest. The interest rate that the balance is accumulated at is the assumed rate of return which is 7.75% per year. Once the member terminates from active service they will begin to receive their monthly pension in addition to the accumulated DROP account. The maximum period a member can participate in the DROP is 60 months.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension liability and the employer's reporting date that are expected to have a significant effect on the employer's proportionate share of the collective net pension liability.

Other Items Related to and Changes in Net Pension Liability

Game Wardens' & Peace Officers' Retirement System – The GWPORS, administered by the MPERA, is a multi-employer, cost-sharing defined benefit plan established in 1963, and governed by Title 19, chapters 2 & 8, MCA. This plan provides retirement benefits to all persons employed as a game warden, warden supervisory personnel, or state peace officer. Benefits are established by state law and can only be amended by the Legislature. The GWPORS provides retirement, disability and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service and highest average compensation.

The State of Montana and its discretely presented component units are the only employers who participate in the GWPORS. Therefore, while the plan is considered to be a multi-employer, cost-sharing defined benefit plan for actuarial valuation purposes, in accordance with GASB 68, the plan is treated as if it were a single-employer defined benefit pension plan type for financial reporting.

Summary of Benefits

Member's highest average compensation (HAC)

Hired prior to July 1, 2011 – highest average compensation during any consecutive 36 months;

Hired on or after July 1, 2011 – highest average compensation during any consecutive 60 months;

Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's HAC.

Eligibility for benefit

Service Retirement

Age 50, 20 years of membership service.

Early Retirement (reduced benefit)

Age 55, vested members who terminate employment prior to 20 years of membership service.

Vesting

5 years of membership service.

Monthly benefit formula

2.5% of HAC per year of service credit.

Guaranteed Annual Benefit Adjustment (GABA)

After the member has completed 12 full months of retirement, the member's benefit increases by the applicable percentage (provided below) each January, inclusive of all other adjustments to the member's benefit:

- 3.0% for members hired prior to July 1, 2007
- 1.5% for members hired on or after July 1, 2007

Contributions to the Plan

Rates are specified by state law for periodic employee and employer contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system – Contributions are deducted from each member's salary and remitted by participating employers. Plan members are required to contribute 10.56% of member's compensation.

Employer contributions to the system – State agency and university employers are required to contribute 9.0% of a member's compensation.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The actuarial assumptions used in the June 30, 2016, valuation were based on the results of the last actuarial experience study,

dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Admin Expense as a % of payroll 0.17%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0.00% to 7.30%
- Postretirement Benefit Increases – After the member has completed 12 full months of retirement, the member’s benefit increases by the applicable percentage each January, inclusive of other adjustments to the member’s benefit:
 - 3.00% for members hired prior to July 1, 2007
 - 1.50% for members hired on or after July 1, 2007
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members and employers will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. Based on those assumptions, the GWPORS’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2117. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the GWPORS. The most recent analysis, performed for the period covering fiscal years 2004 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include historical rates of return, rate of return assumptions adopted by similar public-sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by an investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the GWPORS’s target asset allocation as of June 30, 2016, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.60%	4.00%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.35%
Fixed Income	23.40%	1.00%
Private Equity	12.00%	7.75%
Real Estate	8.00%	4.00%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well

as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
Primary Government GWPORS Net Pension Liability	\$57,479	\$31,055	\$9,089
Discretely Presented Component Units GWPORS Net Pension Liability	3,322	1,795	525
Total Employer GWPORS Net Pension Liability	<u>\$60,801</u>	<u>\$32,850</u>	<u>\$9,614</u>

Net Pension Liability

In accordance with GASB 68, employers are required to recognize and report certain amounts associated with their participation in the GWPORS. Statement 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability (NPL), pension expense, deferred inflows of resources and deferred outflows of resources associated with pensions.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/15	Net Pension Liability as of 6/30/16	Percent of Collective NPL
Primary Government Employer Proportionate Share	\$19,849	\$31,055	94.536685%
Discretely Presented Component Unit Share	1,162	1,795	5.463315%
Total Employer GWPORS Proportionate Share	<u>\$21,011</u>	<u>32,850</u>	<u>100%</u>

At June 30, 2017, the employer reported a total liability of \$32.9 million for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The employer's proportion of the net pension liability was based on the employer's contributions received by GWPORS during the measurement period July 1, 2015, through June 30, 2016, relative to the total employer contributions received from all of GWPORS participating employees.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms:
2015 Legislative Changes

- If a PERS member transfers employment to a GWPORS covered position and fails to elect GWPORS membership within 90 days, the default is PERS membership
- If a GWPORS member dies before retirement with more than 25 years of service credit, the survivor benefit is 2.5% of the highest average compensation.

Changes in proportionate share: Between the measurement date of the collective net pension liability and the employer's reporting date there were no changes in proportion that are expected to have a significant effect on the employer's proportionate share of the collective net pension liability.

Other Items Related to and Changes in Net Pension Liability

The State, as the primary government employer, has the following balances and changes related to the GWPORS's Net Pension Liability:

	<i>(in thousands)</i>		
	Total Pension Liability	Plan Fiduciary Net Position	Net Pension Liability
Balances at 6/30/2015	\$160,039	\$140,211	\$19,828
Service Costs	7,944	-	7,944
Interest	12,205	-	12,205

	<i>(in thousands)</i>		
	Total Pension Liability	Plan Fiduciary Net Position	Net Pension Liability
Difference between Expected and Actual Experience	2,557	-	2,557
Contributions – employer	-	4,045	(4,045)
Contributions – member	-	4,760	(4,760)

Net Changes	977	330	647
Balances at 6/30/2016	\$10,587	\$8,757	\$1,830

Pension Expense

At June 30, 2017, the employer recognized a total pension expense of \$5.9 million for its proportionate share of the GWPORS pension expense: \$5.6 million related to the primary government and \$314.1 thousand related to component units.

Deferred Outflows and Inflows

At June 30, 2017, the State, as a primary government employer, recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$4.0 million. As of the fiscal year ended June 30, 2017, remaining deferred outflows of resources and deferred inflows of resources for the primary government, as an employer, related to the GWPORS are from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 2,625	-
Difference between projected and actual earnings on pension plan investments	4,770	-
Changes in proportion and differences between employer contributions and proportionate share of contributions	159	\$120

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Contributions paid to GWPORS subsequent to the measurement date – FY 2017 Contributions	4,216	-
Totals	<u>\$11,770</u>	<u>\$120</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the employer's contributions made subsequent to the June 30, 2016, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	<i>(in thousands)</i>	
	Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense	
Year ended June 30:		
2018	\$ 889	
2019	889	
2020	2,966	
2021	2,125	
2022	526	
Thereafter	-	

The State's discretely presented component units, as employers, recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$231.6 thousand.

As of the fiscal year ended June 30, 2017, remaining deferred outflows of resources and deferred inflows of resources for the State's discretely presented component units, as employers, related to the GWPORS are from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$152	-
Difference between projected and actual earnings on pension plan investments	276	-

(2) State as an Employer and/or a Nonemployer Contributing Entity to Cost-Sharing Multiple-Employer Plans

Public Employees' Retirement System - Defined Benefit Retirement Plan – The PERS-DBRP, administered by the MPERA, is a multiple-employer, cost-sharing plan established July 1, 1945, and governed by Title 19, Chapters 2 & 3, MCA. This plan covers employees of the State and local governments, and certain employees of the Montana University System and school districts.

All new members are initially members of the PERS-DBRP and have a 12-month window during which they may choose to remain in the PERS-DBRP or join the Public Employees' Retirement System-Defined Contribution Retirement Plan (PERS-DCRP) by filing an irrevocable election. Members may not be participants of both the defined contribution and defined benefit retirement plans. All new members from the universities also have a third option to join the university system's Montana University System-Retirement Program (MUS-RP).

Effective July 1, 2013, PERS-DBRP received other contributions including 1% employer contributions for DCRP and MUS-RP participants and additional Plan Choice Rate contributions. As per the law of the 2015 Legislative Session and effective July 1, 2015, with the first fiscal year 2016 payroll pay date, the additional 1% employer contribution was directed to the Plan Choice Rate Unfunded Actuarial Liability rather than the Defined Benefit Unfunded Actuarial Liability. As of March 2016, the Plan Choice Rate Unfunded Actuarial Liability was paid in full and the additional employer contribution is now being directed to defined contribution members' accounts.

The PERS-DBRP provides retirement, disability, and death benefits to plan members and their beneficiaries. Benefits are established by state law and can only be amended by the Legislature. Benefits are based on eligibility, years of service, and highest average compensation.

Summary of Benefits

Member's highest average compensation (HAC)

Hired prior to July 1, 2011 – highest average compensation during any consecutive 36 months;

Hired on or after July 1, 2011 – highest average compensation during any consecutive 60 months;

Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's HAC.

Eligibility for benefit

Service retirement:

Hired prior to July 1, 2011 –

Age 60, 5 years of membership service;

Age 65, regardless of membership service; or

Any age, 30 years of membership service.

Hired on or after July 1, 2011 –

Age 65, 5 years of membership service;

Age 70, regardless of membership service.

Early retirement, actuarially reduced:

Hired prior to July 1, 2011 –

Age 50, 5 years of membership service; or

Any age, 25 years of membership service.

Hired on or after July 1, 2011 – Age 55, 5 years of membership service.

Second retirement (all require retuning to PERS-covered employment or PERS service):

Retire before January 1, 2016 and accumulate less than 2 years' additional service credit or retire on or after January 1, 2016 and accumulate less than 5 years' additional service credit:

- A refund of member's contributions from second employment plus regular interest (.25%);
- No service credit for second employment;
- Start the same benefit amount the month following termination; and
- GABA starts again in the January immediately following second retirement

Retire before January 1, 2016 and accumulate at least 2 years of additional service credit:

- A recalculated retirement benefit based on laws in effect at second retirement; and
- GABA starts the January after receiving recalculated benefit for 12 months

Retire on or after January 1, 2016 and accumulate 5 or more years of additional service credit:

- The same retirement benefit as prior to their return to service;
- A second retirement benefit for second period of service based on laws in effect at second retirement;
- GABA starts on both benefits in the January after receiving the original and new benefit for 12 months

Vesting

5 years of membership service

Monthly benefit formula

Members hired prior to July 1, 2011 –

Less than 25 years of membership service: 1.785% of HAC per year of service credit;
25 years of membership service or more: 2% of HAC per year of service credit.

Members hired on or after July 1, 2011 –

Less than 10 years of membership service: 1.5% of HAC per year of service credit;
10 years or more, but less than 30 years of membership service: 1.785% of HAC per year of service credit;
30 years or more of membership service: 2% of HAC per year of service credit.

Guaranteed Annual Benefit Adjustment (GABA) – After the member has completed 12 full months of retirement, the member's benefit increases by the applicable percentage (provided below) each January, inclusive of other adjustments to the member's benefit:

- 3.0% for members hired prior to July 1, 2007
- 1.5% for members hired between July 1, 2007 and June 30, 2013
- Members hired on or after July 1, 2013
 - a. 1.5% for each year PERS is funded at or above 90%;
 - b. 1.5% is reduced by 0.1% for each 2% PERS is funded below 90%; and,
 - c. 0% whenever the amortization period for PERS is 40 years or more.

Contributions to the Plan

Rates are specified by state law for periodic employee, employer, and nonemployer entity contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system: Contributions are deducted from each member's salary and remitted by participating Employers. Plan members are required to contribute 7.90% of member's compensation. The 7.90% member contribution rate is temporary and will be decreased to 6.9% on January 1 following actuary valuation results that show the amortization period has dropped below 25 years and would remain below 25 years following the reduction of both the additional Employer and additional member contribution rates.

Employer contributions to the system

State and University System employers are required to contribute 8.47% of member compensation.
 Local government entities are required to contribution 8.37% of member compensation.
 School district employers contributed 8.10% of member compensation.

Per the 2013 Legislative Session's House Bill 454, section 4, effective July 1, 2013, PERS employer contributions temporarily increased 1%. Beginning July 1, 2014, employer contributions will increase an additional 0.1% a year over 10 years, through 2024. The Employer additional contributions including the 0.27% added in 2007 and 2009, terminates on January 1 following actuary valuation results that show the amortization period of the PERS-DBRP has dropped below 25 years and would remain below 25 years following the reductions of both the additional employer and member contributions rates. On January 1, 2018, the additional contributions will not be terminated.

Effective July 1, 2013, employers are required to make contributions on working retirees' compensation. Member contributions for working retirees are not required.

The portion of employer contributions allocated to the Plan Choice Rate (PCR) are included in the employers reporting. The PCR was paid off effective March 2016 and the contributions previously directed to the PCR are now directed to member accounts.

*Non-Employer Entity Contributions**Special Funding*

The State contributes 0.1% of member compensation on behalf of local government entities.
 The State contributes 0.37% of member compensation on behalf of school district entities.

Not Special Funding

The State contributes a portion of Coal Severance Tax income and interest earnings from the Coal Trust Permanent Trust fund in accordance with Section 15-35-108, MCA.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. There were several significant assumptions and other inputs used to measure the total pension liability. The actuarial assumptions used in the June 30, 2016, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. Among those assumptions were the following:

- Investment Return 7.75%
- Admin Expense as a % of Payroll 0.27%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0.00% to 6.00%
- Postretirement Benefit Increases – After the member has completed 12 full months of retirement, the member's benefit increases by the applicable percentage each January, inclusive of all other adjustments to the member's benefit:
 - 3.00% for members hired prior to July 1, 2007
 - 1.50% for members hired between July 1, 2007 and June 30, 2013
 - Members hired on or after July 1, 2013:
 - 1.50% for each year PERS is funded at or above 90%
 - 1.50% is reduced by 0.1% for each 2% PERS is funded below 90%; and
 - 0% whenever the amortization period for PERS is 40 years or more
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.

- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members, employers, and nonemployer contributing entities will be made based on the PERB's funding policy, which establishes the contractually required rates under MCA. The State contributes 0.1% of salaries for local governments and 0.37% for school districts. In addition, the State contributes coal severance tax and interest money from the General Fund. The interest is contributed monthly and the severance tax is contributed quarterly. Based on those assumptions, the PERS-DBRP's fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2117. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the PERS-DBRP. The most recent analysis, performed for the period covering fiscal years 2004 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term expected rate of return assumption. These factors include historical rates of return, rate of return assumptions adopted by similar public-sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the PERS-DBRP's target asset allocation as of June 30, 2016, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.60%	4.00%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.35%
Fixed Income	23.40%	1.00%
Private Equity	12.00%	7.75%
Real Estate	8.00%	4.00%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability (NPL) to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	1.0% Decrease (6.75%)	(in thousands) Current Discount Rate	1.0% Increase (8.75%)
State as an Employer in PERS-DBRP – Net Pension Liability	1,315,950	\$906,880	\$554,507
State as a Nonemployer Contributing Entity to PERS-DBRP – Net Pension Liability	23,633	16,287	9,959

Net Pension Liability

In accordance with GASB 68, employers and the nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the PERS-DBRP. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net

pension liability, pension expense, deferred inflows of resources and deferred outflows of resources associated with pensions. The proportionate shares were determined based on contributions made to the plan by employers and the nonemployer contributing entity special funding. The Coal Severance Tax collection and interest amounts were not considered in determining proportionate shares as this is not a special funding situation component.

In accordance with GASB 68, the PERS-DBRP has a special funding situation where the State is legally responsible for making contributions directly to the PERS-DBRP on behalf of the employers. Due to the existence of this special funding situation, the State is required to report a proportionate share of a local government or school district’s collective net pension liability that is associated with the non-State employer.

The State also has a funding situation that is not considered a special funding situation whereby the General Fund provides contributions received from the Coal Severance Tax collections and interest accrued on the Coal Tax Permanent Trust Fund. All employers are required to report the portion of Coal Severance Tax and interest attributable to the employer as a grant revenue.

(dollars presented in thousands)

	Net Pension Liability as of 6/30/15	Net Pension Liability as of 6/30/16	Percent of Collective NPL
State’s Proportionate Share as an Employer Entity	\$749,414	\$906,880	53.241100%
State’s Proportionate Share as a Nonemployer Contributing Entity	13,365	16,287	0.956169%
State of Montana Totals	\$762,779	\$923,167	54.197269%

At June 30, 2017, the State reported a liability of \$923.2 million for its proportionate share of the net pension liability as an employer and nonemployer contributing entity. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The proportion of the net pension liability is based on the employer’s and nonemployer’s special funding contributions received by the PERS-DBRP during the measurement period of July 1, 2015, through June 30, 2016, relative to the total employer and nonemployer special funding contributions received from all PERS-DBRP participating employers.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: Between the measurement date of the collective net pension liability and the employer’s reporting date there were no changes in proportion that would have an effect on the employer’s proportionate share of the collective net pension liability.

Employer Pension Expense and Nonemployer Contributing Entity Grant Expenses

At June 30, 2017, the State as an employer recognized a pension expense of \$79.2 million for its proportionate share of the PERS-DBRP’s pension expense. The State as a nonemployer contributing entity recognized grant expense of \$1.4 million for special funding support provided by the General Fund for its proportionate share of the PERS-DBRP’s pension expense that is associated with other employer participants in the plan. Total pension related expenses at June 30, 2017, were \$80.6 million.

Support Revenue

As of the fiscal year ended June 30, 2017, the State as an employer recognized grant revenue of \$15.9 million for its proportionate share of total nonemployer entity contributions from the Coal Severance Tax and interest nonspecial funding situation.

Deferred Outflows and Inflows

At June 30, 2017, the State as an employer recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$59.1 million.

As of the fiscal year ended June 30, 2017, the State as an employer has the following proportionate shares of the PERS-DBRP's deferred outflows of resources and deferred inflows of resources from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Actual versus expected experience	\$ 4,893	\$ 3,002
Difference between projected and actual earnings on pension plan investments	85,319	-
Changes in proportion and differences between employer contributions and proportionate share of contributions	14,996	15,640
Contributions paid to PERS-DBRP subsequent to the measurement date – FY 2017 Contributions	55,526	-
Totals	<u>\$160,734</u>	<u>\$18,642</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the employer's contributions made subsequent to the June 30, 2016, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	<i>(in thousands)</i>
Year ended June 30:	Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense
2018	4,131
2019	4,131
2020	48,485
2021	30,467
2022	-
Thereafter	-

At June 30, 2017, the State as a nonemployer contributing entity recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$30.8 million.

As of the fiscal year ended June 30, 2017, the State as a nonemployer contributing entity reported its proportionate share of the PERS-DBRP's deferred outflows of resources and deferred inflows of resources from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Actual versus expected experience	\$ 88	\$ 54
Difference between projected and actual earnings on pension plan investments	1,532	-
Changes in proportion and differences between employer contributions and proportionate share of contributions	-	97
Contributions paid to PERS-DBRP subsequent to the measurement date – FY 2017 Contributions	28,763	-
Totals	<u>\$30,383</u>	<u>\$151</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the nonemployer's contributions made subsequent to the June 30, 2016, measurement date will be recognized as a reduction to its share of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in grant expense as follows:

<u>Year ended June 30:</u>	<i>(in thousands)</i> <u>Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense</u>
2018	74
2019	74
2020	871
2021	547
2022	-

Sheriffs' Retirement System – The SRS, administered by the MPERA, is a multiple-employer, cost-sharing defined benefit plan established July 1, 1974, and governed by Title 19, chapters 2 & 7, MCA. This plan provides retirement benefits to all Department of Justice criminal and gambling investigators hired after July 1, 1993, all detention officers hired after July 1, 2005, and to all Montana sheriffs. Benefits are established by state law and can only be amended by the Legislature. The SRS provides retirement, disability and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service and highest average compensation.

Summary of Benefits

Member's highest average compensation (HAC)

Hired prior to July 1, 2011 – highest average compensation during any consecutive 36 months;
Hired on or after July 1, 2011 – highest average compensation during any consecutive 60 months.
Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's HAC.

Eligibility for benefit

Service Retirement: 20 years of membership service, regardless of age.
Early Retirement: Age 50, 5 years of membership service, actuarially reduced.

Vesting

5 years of membership service

Monthly benefit formula

2.5% of HAC per year of service

Guaranteed Annual Benefit Adjustment (GABA)

After the member has completed 12 full months of retirement, the member's benefit increases by the applicable percentage (provided below) each January, inclusive of all other adjustments to the member's benefit.

- 3.0% for members hired prior to July 1, 2007
- 1.5% for members hired on or after July 1, 2007

Contributions to the Plan

Rates are specified by state law for periodic employee and employer contributions and are a percentage of the member's compensation. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system – Contributions are deducted from each member's salary and remitted by participating employers. Plan members are required to contribute 9.245% of member's compensation.

Employer contributions to the system – The employers are required to contribute 10.115% of member compensation. Effective July 1, 2013, employer contributions are required to be paid on working retiree compensation. Member contributions are not required for working retirees.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The actuarial assumptions used in the June 30, 2016, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Administrative Expense as a % of Payroll 0.17%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0.00% to 7.30%
- Postretirement Benefit Increases – After the member has completed 12 full months of retirement, the member’s benefit increases by the applicable percentage each January, inclusive of other adjustments to the member’s benefit.
 - 3.00% for members hired prior to July 1, 2007
 - 1.50% for members hired on or after July 1, 2007
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 5.93%, which is a blend of the assumed long-term expected rate of return of 7.75% on SRS’s investments and a municipal bond index rate of 3.01%. The basis for this is the June 30, 2016 Bond Buyer General Obligation 20-year Municipal Bond Index published monthly by the Board of Governors of the Federal Reserve System. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members and employers will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. Based on those assumptions, the SRS’s fiduciary net position was projected to not be adequate to make all the projected future benefit payments of current plan members after June 30, 2056. Therefore, the portion of future projected benefit payments after June 30, 2056, are discounted at the municipal bond index rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the SRS. The most recent analysis, performed for the period covering fiscal years 2004 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term expected rate of return assumption. These factors include historical rates of return, rate of return assumptions adopted by similar public-sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the SRS’s target asset allocation as of June 30, 2016, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.60%	4.00%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.35%

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Fixed Income	23.40%	1.00%
Private Equity	12.00%	7.75%
Real Estate	8.00%	4.00%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 5.93%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (4.93%) or 1.00% higher (6.93%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (4.93%)	Current Discount Rate	1.0% Increase (6.93%)
Employer's SRS Net Pension Liability	\$13,647	\$9,582	\$6,274

Net Pension Liability

In accordance with GASB 68, employers are required to recognize and report certain amounts associated with their participation in the SRS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability (NPL), pension expense, deferred inflows of resources, and deferred outflows of resources associated with pensions.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/15	Net Pension Liability as of 6/30/16	Percent of Collective NPL
Employer Proportionate Share	\$5,434	\$9,582	5.454386%

At June 30, 2017, the State as an employer reported a liability of \$9.6 million for its proportionate share of net pension liability. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The employer's proportion of the net pension liability was based on the employer's contributions received by the SRS during the measurement period, July 1, 2015, through June 30, 2016, relative to the total employer contributions received from all of SRS participating employers.

Changes in actuarial assumptions and methods: There were no changes in demographic assumptions that affected the measurement of the total pension liability. There was an adjustment in the discount rate during the measurement period.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: Between the measurement date of the collective net pension liability and the employer's reporting date there were no changes in proportion that are expected to have a significant effect on the Employer's proportionate share of the collective net pension liability.

Pension Expense

At June 30, 2017, the employer recognized a pension expense of \$1.2 million for its proportionate share of the SRS pension expense.

Deferred Outflows and Inflows

At June 30, 2017, the State as an employer recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$389 thousand.

As of the fiscal year ended June 30, 2017, the State, as an employer, reported its proportionate share of the SRS's deferred outflows of resources and deferred inflows of resources from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Actual versus expected experience	\$ 34	\$ 7
Difference between projected and actual earnings on pension plan investments	523	-
Changes of Assumptions	4,147	1,544
Changes in proportion and differences between employer contributions and proportionate share of contributions	-	87
Contributions paid to SRS subsequent to the measurement date – FY 2017 contributions	368	-
Totals	\$5,072	\$1,638

Amounts reported as deferred outflows of resources related to pensions resulting from the employer's contributions made subsequent to the measurement date of June 30, 2016, will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	<i>(in thousands)</i>
Year ended June 30:	Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense
2018	\$557
2019	557
2020	807
2021	709
2022	523
Thereafter	-

Municipal Police Officers' Retirement System – The MPORS, administered by the MPERA, is a multiple-employer, cost-sharing defined benefit plan that was established in 1974 and is governed by Title 19, chapters 2 & 9, MCA. This plan covers all municipal police officers employed by first- and second-class cities and other cities that adopt the plan. Benefits are established by state law and can only be amended by the Legislature. The MPORS provides retirement, disability, and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service, and final average compensation.

Deferred Retirement Option Plan (DROP)

Beginning July 2002, eligible members of the MPORS can participate in the DROP by filing a one-time irrevocable election with the PERB. The DROP is governed by Title 19, Chapter 9, Part 12, MCA. A member must have completed at least twenty years of membership service to be eligible. They may elect to participate in the DROP for a minimum of one month and a maximum of 60 months and may only participate in the DROP once. A participant remains a member of the MPORS, but will not receive membership service or service credit in the system for the duration of the member's DROP period. During participation in the DROP, all mandatory contributions continue to the retirement system. A monthly benefit is calculated based on salary and years of service to the date of the beginning of the DROP period. The monthly benefit is paid into the member's DROP account until the end of the DROP period. At the end of the DROP period, the participant may receive the balance of the DROP account in a lump-sum payment or in a direct rollover to another eligible plan, as allowed by the IRS. If the participant continues employment after the DROP period ends, they will again accrue membership service and service credit. The DROP account cannot be distributed until employment is formally terminated. As of June 30, 2017, there are 60 DROP participants. Since program inception, a total of 149 members have participated in the DROP. The balance held by MPERA for DROP participants as of June 30, 2017, was approximately \$9.0 million.

The State is not an employer participant in the MPORS plan. However, because the PERB is a fiduciary component unit of the State, this CAFR presents certain information to help ensure compliance with GASB 67. In addition, the State provides nonemployer entity contributions classified as special funding in accordance with GASB 68. Disclosures made in this financial report are meant to reflect the aforementioned relationships.

Summary of Benefits

Member's final average compensation (FAC)

Hired prior to July 1, 1977 – average monthly compensation of final year of service;

Hired on or after July 1, 1977 – final average compensation (FAC) for last consecutive 36 months.

Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's FAC.

Eligibility for benefit

Service Retirement: 20 years of membership service, regardless of age.

Second Retirement: Age 50, reemployed in a MPORS position

Early Retirement: Age 50, 5 years of membership service.

Vesting

Death and disability rights are vested immediately

5 years of membership service.

Monthly benefit formula

2.5% of FAC per year of service credit.

Second retirement benefit formula

Recalculated using specific criteria:

Less than 20 years of membership service, based on total MPORS service

More than 20 years of membership service, upon reemployment, receives initial benefit plus a new retirement benefit based on additional service credit and FAC

Guaranteed Annual Benefit Adjustment (GABA)

Hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member's benefit increases by a maximum of 3% each January, inclusive of all other adjustments to the member's benefit.

Minimum benefit adjustment (non-GABA) If hired before July 1, 1997, and member did not elect GABA – the monthly retirement, disability or survivor's benefit may not be less than 50% of the compensation of a newly confirmed officer in the city where the member was last employed.

Contributions to the Plan

Rates are specified by state law for periodic employee, employer, and nonemployer entity contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions – Contribution rates are dependent upon date of hire as a police officer. Contributions are deducted from each member's salary and remitted by the participating Employer. For fiscal year 2017:

- If hired prior to July 1, 1975, member contributions as a percentage of salary are 5.80%
- If hired after June 30, 1975, and prior to July 1, 1979, member contributions as a percentage of salary are 7.00%;
- If hired after June 30, 1979, and prior to July 1, 1997, member contributions as a percentage of salary are 8.50%; and,
- If hired on or after July 1, 1997, and for members electing GABA, member contributions as a percentage of salary are 9.00%.

Employer Contributions – Employers are required to contribute 14.41% of a member's compensation.

Nonemployer Entity Contributions – The State contributes 29.37% of a member’s compensation from the General Fund. These amounts are considered a special funding situation in accordance with GASB 68.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The actuarial assumptions used in the June 30, 2016, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Admin expense as a % of Payroll 0.20%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0.00% to 7.30%
- Postretirement Benefit Increases
 - GABA
 - Hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member’s benefit increases by a maximum of 3% each January, inclusive of all other adjustments to the member’s benefit
 - Minimum benefit adjustment (non-GABA)
 - If hired before July 1, 1997 and member did not elect GABA – the monthly retirement, disability or survivor’s benefit may not be less than 50% the compensation of a newly confirmed officer in the city that the member was last employed
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members, employers, and nonemployer contributing entities will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. The State contributes 29.37% of salaries paid by employers. Based on those assumptions, the MPORS’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2117. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the MPORS. The most recent analysis, performed for the period covering fiscal years 2004 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term expected rate of return assumption. These factors include historical rates of return, rate of return assumptions adopted by similar public-sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the

inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the MPORS's target asset allocation as of June 30, 2016, is summarized in the table below:

<u>Asset Class</u>	<u>Target Asset Allocation</u>	<u>Long-Term Expected Real Rate of Return</u>
Cash Equivalents	2.60%	4.00%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.35%
Fixed Income	23.40%	1.00%
Private Equity	12.00%	7.75%
Real Estate	8.00%	4.00%

Sensitivity Analysis

In accordance with GASB 68, regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	<u>1.0% Decrease (6.75%)</u>	<u>Current Discount Rate</u>	<u>1.0% Increase (8.75%)</u>
State as a Nonemployer entity Net Pension Liability	\$161,181	\$119,708	\$74,469

Net Pension Liability

In accordance with GASB 68, employers and nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the MPORS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability, pension expense, deferred inflows of resources, and deferred outflows of resources associated with pensions.

In accordance with GASB 68, the MPORS has a special funding situation in which the State is legally responsible for making contributions directly to the MPORS on behalf of the employers. Due to the existence of this special funding situation, the State is required to report a proportionate share of a local government's collective net pension liability that is associated with the non-State employer.

	<i>(dollars presented in thousands)</i>		
	<u>Net Pension Liability as of 6/30/15</u>	<u>Net Pension Liability as of 6/30/16</u>	<u>Percent of Collective NPL</u>
State as a Nonemployer Contributing Entity – Proportionate Share	\$110,756	\$119,708	66.499650%

At June 30, 2017, the State as a nonemployer contributing entity reported a liability of \$119.7 million for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The nonemployer's proportion of the net pension liability was based on the nonemployer's special funding contributions received by the MPORS during the measurement period of July 1, 2015, through June 30, 2016, relative to total contributions received from all of the MPORS's participating employers and the nonemployer contributing entity.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There were no changes in benefit terms since the previous measurement date.

Changes in proportionate share: Between the measurement date of the collective net pension liability and the employer's reporting date there were no changes in proportion that would have an effect on the employer's proportionate share of the collective net pension liability.

Grant Expense Related to Special Funding

The State recognized grant expense of \$12.8 million for special funding support provided by the General Fund for its proportionate share of the MPORS's pension expense that is associated with other employer participants in the plan.

Deferred Outflows and Inflows

At June 30, 2017, the State as a nonemployer contributing entity recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$13.8 million.

As of the fiscal year ended June 30, 2017, the State as a nonemployer reported its proportionate share of the deferred outflows of resources and deferred inflows of resources related to MPORS from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Actual versus expected experience	-	\$2,439
Difference between projected and actual earnings on pension plan investments	\$ 7,762	-
Changes in proportion and differences between employer contributions and proportionate share of contributions	-	532
Contributions paid to MPORS subsequent to the measurement date – FY 2017 Contributions	13,215	-
Totals	<u>\$20,977</u>	<u>\$2,971</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the nonemployer's contributions made subsequent to the June 30, 2016, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in grant expense as follows:

	<i>(in thousands)</i>
Year ended June 30:	Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense
2018	\$ (245)
2019	(245)
2020	3,298
2021	2,515
2022	-
Thereafter	-

Firefighters' Unified Retirement System – The FURS, administered by the MPERA, is a multiple-employer, cost-sharing defined benefit plan established in 1981, and governed by Title 19, chapters 2 & 13, MCA. This system provides retirement benefits to firefighters employed by first- and second-class cities, other cities and rural fire district departments that adopt the plan, and to firefighters hired by the Montana Air National Guard on or after October 1, 2001. Benefits are established by state law and can only be amended by the Legislature. The FURS provides retirement, disability, and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service, and compensation.

Summary of Benefits

Member's compensation

Hired prior to July 1, 1981, and not electing GABA – highest monthly compensation (HMC);

Hired after June 30, 1981, and those electing GABA – highest average compensation (HAC) during any consecutive 36 months.

Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's highest average compensation.

Eligibility for benefit

Service retirement: 20 years of membership service, regardless of age.

Early Retirement: Age 50, 5 years of membership service.

Vesting

Death and disability rights are vested immediately

5 years of membership service.

Monthly benefit formula

Members hired prior to July 1, 1981, and not electing GABA are entitled to the greater of:

2.5% of HMC per year of service; **or**

- if less than 20 years of service – 2% of HMC for each year of service;
- if more than 20 years of service – 50% of the member's HMC plus 2% of the member's HMC for each year of service over 20 years.

Members hired on or after July 1, 1981, and those electing GABA: 2.5% of HAC per year of membership service.

Guaranteed Annual Benefit Adjustment (GABA)

Hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member's benefit increases by a maximum of 3% each January, inclusive of all other adjustments to the member's benefit.

Minimum Benefit Adjustment (non-GABA)

If hired before July 1, 1997 and the member did not elect GABA, the monthly retirement, disability or survivor's benefit may not be less than 50% of the compensation of a newly confirmed firefighter employed by the city that last employed the member, provided the member has at least 10 years of membership service.

Contributions to the Plan

Rates are specified by state law for periodic employee, employer and nonemployer entity contributions. The Legislature has the authority to establish and amend contribution rates to the plan. Effective July 1, 2013, employer and state contributions are required to be paid on working retiree compensation. Member contributions are not required for working retirees.

Member contributions to the system – Contributions are deducted from each member's salary and remitted by the participating Employer. For members:

Hired prior to July 1, 1997 and not electing GABA, member contributions as a percentage of salary are 9.50%;

Hired on or after July 1, 1997 and electing GABA, member contributions as a percentage of salary are 10.70%.

Employer contributions to the system – Employers are required to contribute 14.36% of member's compensation.

Nonemployer entity contributions to the system – The State contributes 32.61% of a member's compensation from the General Fund.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The actuarial assumptions used in the June 30, 2016, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Admin Expense as a % of Payroll 0.19%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0.00% to 7.30%
- Postretirement Benefit Increases
 - GABA
 - Hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member’s benefit increases by a maximum of 3% each January, inclusive of all other adjustment to the member’s benefit.
 - Minimum Benefit Adjustment (non-GABA)
 - Hired before July 1, 1997 and member did not elect GABA – the monthly retirement, disability or survivor’s benefit may not be less than 50% the compensation of a newly confirmed firefighter employed by the city that last employed the member (provided the member has at least 10 years of membership service).
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members, employers, and nonemployer contributing entities will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. The State contributes 32.61% of salaries paid by employers. Based on those assumptions, the FURS’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2117. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the FURS. The most recent analysis, performed for the period covering fiscal years 2004 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term expected rate of return assumption. These factors include historical rates of return, rate of return assumptions adopted by similar public-sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by an investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the FURS’s target asset allocation as of June 30, 2016, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.60%	4.00%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.35%
Fixed Income	23.40%	1.00%
Private Equity	12.00%	7.75%
Real Estate	8.00%	4.00%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
State as an Employer in FURS – Net Pension Liability	\$ 4,067	\$ 2,583	\$ 1,363
State as a Nonemployer Contributing Entity to FURS – Net Pension Liability	121,948	77,448	40,858

Net Pension Liability

In accordance with GASB 68, employers and nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the FURS. GASB 68 became effective June 30, 2015, and includes requirements to record and report their proportionate share of the collective net pension liability, pension expense, deferred inflows of resources and deferred outflows of resources associated with pensions.

In accordance with GASB 68, the FURS has a special funding situation in which the State is legally responsible for making contributions directly to the FURS on behalf of the employers. Due to the existence of this special funding situation, the State is required to report a proportionate share of a local government or fire district's collective net pension liability that is associated with the non-State employer.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/15	Net Pension Liability as of 6/30/16	Percent of Collective NPL
State's Proportionate Share as an Employer Entity	\$ 2,454	\$ 2,583	2.261523%
State's Proportionate Share as a Nonemployer Contributing Entity	68,892	77,448	67.809541%
State of Montana Totals	\$71,346	\$80,031	70.071064%

At June 30, 2017, the State reported a liability of \$80.0 million for its proportionate share of the net pension liability as an employer and nonemployer contributing entity in relation to the FURS. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The proportion of the net pension liability was based on the all employer and nonemployer contributions received by the FURS during the measurement period, July 1, 2015, through June 30, 2016, relative to the total contributions received from all FURS participating employers and the nonemployer contributing entity.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: Between the measurement date of the collective net pension liability and the employer's reporting date there were no changes in proportion that may have an effect of the employer's proportionate share of the collective net pension liability.

Employer Pension Expense and Nonemployer Contributing Entity Special Funding Grant Expense

At June 30, 2017, the State as an employer recognized pension expense of \$418.5 thousand for its proportionate share of the FURS pension expense. The State also recognized grant expense of \$10.0 million for special funding support provided by the General Fund for its proportionate share of the FURS's pension expense that is associated with other employer participants in the plan. Total pension related expenses at June 30, 2017, was \$10.5 million.

Deferred Outflows and Inflows

At June 30, 2017, the State, as an employer, recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$475.0 thousand.

As of the fiscal year ended June 30, 2017, the State as an employer reported its proportionate share of deferred outflows of resources and deferred inflows of resources related to the FURS from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Actual versus expected experience	-	\$24
Difference between projected and actual earnings on pension plan investments	\$ 270	-
Changes in proportion and differences between employer contributions and proportionate share of contributions	304	-
Contributions paid to FURS subsequent to the measurement date – FY 2017 Contributions	472	-
Totals	<u>\$1,046</u>	<u>\$24</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the employer's contributions made subsequent to the measurement date of June 30, 2016, will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	<i>(in thousands)</i>
<u>Year ended June 30:</u>	<u>Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense</u>
2018	20
2019	20
2020	129
2021	83
2022	(4)
Thereafter	-

At June 30, 2017, the State recognized a beginning deferred outflow of resources as a nonemployer contributing entity for fiscal year 2016 contributions of \$13.6 million.

As of the fiscal year ended June 30, 2017, the State as a nonemployer contributing entity reported its proportionate share of deferred outflows of resources and deferred inflows of resources related to FURS from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Actual versus expected experience	-	\$729
Difference between projected and actual earnings on pension plan investments	\$ 8,108	-
Changes in proportion and differences between employer contributions and proportionate share of contributions	-	96

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Contributions paid to FURS subsequent to the measurement date – FY 2017 Contributions	14,042	-
Totals	<u>\$22,150</u>	<u>\$825</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the nonemployer’s contributions made subsequent to the June 30, 2016, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in grant expense as follows:

	<i>(in thousands)</i>
Year ended June 30:	Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense
2018	588
2019	588
2020	3,875
2021	2,457
2022	(131)
Thereafter	-

Volunteer Firefighters’ Compensation Act – The VFCA, administered by the MPERA, is a statewide retirement and disability plan established in 1965, and governed by Title 19, chapter 17, MCA. All members are unpaid volunteers and the State is the only contributor to the plan. Benefits are established by state law and can only be amended by the Legislature. The VFCA provides pension, disability, and survivorship benefits for all eligible volunteer firefighters who are members of qualified volunteer fire companies in unincorporated areas, towns or villages, and includes volunteer fire departments, fire districts, and fire service areas under the laws of the State. Benefits are based on eligibility and years of service. Member rights are vested after ten years of credited service. The VFCA also provides limited benefits for death or injuries incurred in the line of duty. A member who chooses to retire and draw a pension benefit may return to service with a volunteer fire department without loss of benefits. However, a returning retired member may not be considered an active member accruing credit for service.

Summary of Benefits

Eligibility for benefit

- Age 55, 20 years of credited service;
- Age 60, 10 years of credited service.

Effective July 1, 2011, members who retire on or after July 1, 2011, and have greater than 30 years of credited service will receive \$7.50 per month for each additional year of credited service over 30 years if the pension trust fund is actuarially sound, amortizing any unfunded liabilities in 20 years or less. This determination will be made annually and a member’s benefit will be capped at \$250 a month (30 years of credited service) if the amortization period grows to greater than 20 years.

Vesting

10 years of credited service.

Monthly benefit formula (effective January 1, 2016)

- \$8.75 per year of credited service up to 20 years;
- \$7.50 per year of credited service after 20 years

Contributions to the Plan

The State, as a nonemployer contributing entity, is the only contributor to the VFCA. Contributions are 5% of fire insurance premium taxes collected on certain fire risks. This requires the plan to be treated as a special funding

situation in accordance with GASB 68. The State Auditor makes annual payments from the General Fund to the VFCA fund. Rates are specified by state law for contributions to the VFCA plan. The State legislature has the authority to establish and amend contribution rates to the plan.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. There were several significant assumptions and other inputs used to measure the total pension liability. The actuarial assumptions used in the June 30, 2016, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. Among those assumptions were the following:

- Investment Return 7.75%
- Inflation at 3.00%
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

For VFCA the average dollar amount of recurring expense over the last three years was \$63,440, adjusted for the inflation assumption. This dollar amount is added to normal cost for valuation purposes.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from the nonemployer contributing entity will be made based on the PERB's funding policy, which establishes the contractually required rates under MCA. The State contributes 5% of fire insurance premium taxes paid on certain fire risks. Based on those assumptions, the VFCA's fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2117. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. No municipal bond rate was incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience studies prepared for the VFCA. The most recent analysis, performed for the period covering fiscal years 2004 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public-sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the VFCA's target asset allocation as of June 30, 2016, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.60%	4.00%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.35%
Fixed Income	23.40%	1.00%

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Private Equity	12.00%	7.75%
Real Estate	8.00%	4.00%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the above table presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
State as a Nonemployer entity Net Pension Liability	\$14,818	\$10,599	\$7,004

Net Pension Liability

In accordance with GASB 68, employers and nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the VFCA. GASB 68 became effective June 30, 2015, and includes requirements to record and report proportionate shares of the collective net pension liability, pension expense, deferred inflows of resources, and deferred outflows of resources associated with pensions.

In accordance with GASB 68, the VFCA has a special funding situation in which the State is legally responsible for making contributions directly to the VFCA on behalf of volunteer employers. Due to the existence of this special funding situation, the State is required to report a proportionate share of a volunteer fire company's collective net pension liability that is associated with the non-State volunteer employer.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/15	Net Pension Liability as of 6/30/16	Percent of Collective NPL
State as a Nonemployer Proportionate Share	\$10,504	\$10,599	100%

At June 30, 2017, the State reported a liability of \$10.6 million for its proportionate share of the net pension liability. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2015, with update procedures used to roll forward the total pension liability to June 30, 2016. The nonemployer's proportion of the net pension liability was based on the nonemployer's contributions received by the VFCA during the measurement period, July 1, 2015, through June 30, 2016, relative to total contributions received.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension liability and the nonemployer's reporting date that are expected to have a significant effect on the nonemployer's proportionate share of the collective net pension liability.

Grant Expense Related to Special Funding

The State as a nonemployer contributing entity recognized grant expense of \$688.6 thousand for special funding support provided by a portion of fire tax premiums paid to the State and transferred to MPERA for its proportionate share of the VFCA pension expense that is associated with other employer participants in the plan.

Deferred Outflows and Inflows

At June 30, 2017, the State as a nonemployer contributing entity recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$2.0 million.

As of the fiscal year ended June 30, 2017, the State as a nonemployer contributing entity reported its proportionate share of deferred outflows of resources and deferred inflows of resources related to VFCA from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	-	\$761
Difference between projected and actual earnings on pension plan investments	\$1,201	-
Contributions paid to VFCA subsequent to the measurement date – FY 2017 Contributions	2,054	-
Totals	<u>\$3,255</u>	<u>\$761</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the State's contributions made subsequent to the June 30, 2016, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred outflows and deferred inflows of resources related to pensions will be recognized in grant expense as follows:

	<i>(in thousands)</i>
Year ended June 30:	Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense
2018	(285)
2019	(285)
2020	613
2021	397
2022	-
Thereafter	-

Teachers' Retirement System – The TRS is administered by the Teachers' Retirement Board (TRB), which is the governing body of a mandatory multiple-employer cost-sharing defined benefit pension plan that provides retirement services to persons in Montana employed as teachers or professional staff of any public elementary or secondary school, community college, or unit of the university system. The TRS as an employer does not participate in the plan and acts only as the administrator of the plan.

The TRB is the governing body of the TRS and the TRS's staff administer the TRS in conformity with the laws set forth in Title 19, chapter 20, MCA, and administrative rules set forth in Title 2, chapter 44 of the Administrative Rules of Montana.

Summary of Benefits

Through June 30, 2013, all members enrolled in TRS participated in a single-tiered plan ("Tier One"). Employees with a minimum of 25 years of service or who have reached age 60 with 5 years of service are eligible to receive an annual retirement benefit equal to creditable service years divided by 60 times the average final compensation. Final compensation is the average of the highest three consecutive years of earned compensation. Benefits fully vest after 5 years of creditable service. Vested employees may retire at or after age 50 and receive reduced retirement benefits. Benefits are established by state law and can only be amended by the Legislature.

Beginning July 1, 2013, new members in TRS participate in a second benefit tier ("Tier Two"), which differs from Tier One as follows:

- Tier Two uses a 5-year average final compensation (as opposed to 3-year AFC in Tier One)
- Tier Two provides for unreduced service retirement benefits at age 60 with 5 years of creditable service or at age 55 with at least 30 years of creditable service (rather than at age 60 with 5 years of service or at any age with creditable service in 25 years in Tier One)
- Tier Two provides for early retirement benefits with 5 years of creditable service at age 55 (rather than age 50 in Tier One)
- Tier Two has a one percent higher normal employee contribution rate (though a temporary 1% supplemental employee contribution rate is also now currently in place for Tier One members), and
- Tier Two provides for an enhanced benefit calculation—1.85% of the AFC multiplied by the years of creditable service—for members retiring with at least 30 years of creditable service and at least 60 years of age (rather than $1.6667 \times \text{AFC} \times \text{years of creditable service}$)

A guaranteed annual benefit adjustment (GABA) is payable on January 1 of each calendar year for each retiree who has received at least 36 monthly retirement benefit payments prior to that date. The GABA is applicable to both Tier One and Tier Two members. The GABA for Tier 1 members is 1.5% of the benefit payable as of January 1. For Tier Two members the GABA each year may vary from 0.5% to 1.5% based on the retirement system's funding status and the period required to amortize any unfunded accrued actuarial liability as determined in the prior actuarial valuation.

Contributions to the System

All active employees in the TRS, regardless of employer type, are required to provide a contribution equal to 8.15% of their compensation.

All State and University employers are required to contribute 11.15% of compensation provided to an active, nonreemployed member. All school district and other employers are required to contribute 8.77% of an active, nonreemployed, member's compensation to the System.

Section 19-20-605, MCA, requires each employer to contribute 9.85% of total compensation paid to all reemployed TRS retirees employed in a TRS reportable position. Pursuant to Section 19-20-609, MCA, this amount shall increase by 1.00% for fiscal year 2014 and increase by 0.10% each fiscal year through 2024 until the total employer contribution is equal to 11.85% of reemployed retiree compensation.

The TRS receives a portion of the total required statutory contributions directly from the State for all employers. The employers are considered to be in a special funding situation and the State is treated as a nonemployer contributing entity in the TRS. The System receives 0.11% of reportable compensation from the General Fund for all TRS members. The TRS also receives 2.38% of reportable compensation from the General Fund for school districts and other employers. Finally, the State is also required to contribute \$25 million in perpetuity payable July 1 of each year. The Legislature has the authority to establish and amend contribution rates to the plan.

Actuarial Assumptions

The total pension liability as of June 30, 2016, is based on the results of an actuarial valuation date of July 1, 2016. There were several significant assumptions and other inputs used to measure the total pension liability. The actuarial assumptions used in the July 1, 2016, valuation were based on the results of the last actuarial experience study, dated May 1, 2014. Among those assumptions were the following:

- Total wage increases 4.00% to 8.51% for non-university members
(includes 4% general wage increase assumption) 5.00% for university members
- Investment Return 7.75%
- Price Inflation 3.25%
- Postretirement Benefit Increases (starting three years after retirement)
 - Tier One members: If the retiree has received benefits for at least three years, the retirement allowance will be increased by 1.5% on January 1.
 - Tier Two members: The retirement allowance will be increased by an amount equal to or greater than .5% but no more than 1.5% if the most recent actuarial valuation shows the TRS to be at least 90% funded and the provisions of the increase is not projected to cause the funded ratio to be less than 85%.

- Mortality among contributing members, service retired members, and beneficiaries
 - For Males: 1992 base rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 base rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back four years, with mortality improvements projected by Scale BB to 2018.
 - For Females: 1992 base rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 base rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back two years, with mortality improvements projected by Scale BB to 2018.
- Mortality among disabled members
 - For Males: RP 2000 Disabled Mortality Table for Males, set forward one year, with mortality improvements projected by Scale BB to 2018.
 - For Females: RP 2000 Disabled Mortality Table for Females, set forward five years, with mortality improvements projected by Scale BB to 2018.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating TRS members, employers, and nonemployer contributing entities will be made based on the TRB's funding policy, which establishes the contractually required rates under MCA. In addition to these contributions, the State General Fund will contribute \$25 million annually to the TRS payable July 1 of each year. Based on those assumptions, the TRS's fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2122. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. No municipal bond rate was incorporated in the discount rate.

Target Allocations

The assumed long-term expected return on pension plan assets is reviewed as part of the regular experience studies prepared for the TRS. The most recent analysis, performed for the period covering fiscal years 2009 through 2013, is outlined in a report dated May 1, 2014. Several factors are considered in evaluating the long-term rate of return assumption including long-term historical data, estimates inherent in current market data, and a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected return, net of investment expense and inflation) were developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The capital market assumptions developed by the investment consultant are intended for use over a 10-year horizon and may not be useful in setting the long-term rate of return for funding pension plans which covers a longer timeframe. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates of arithmetic real rates of return for each major asset class included in the TRS's target asset allocation as of June 30, 2016, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Broad US Equity	36.00%	4.80%
Broad International Equity	18.00%	6.05%
Private Equity	12.00%	8.50%
Intermediate Bonds	23.40%	1.50%
Core Real Estate	4.00%	4.50%
High Yield Bonds	2.60%	3.25%
Non-Core Real Estate	4.00%	7.50%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
State as an Employer in TRS – Net Pension Liability	\$76,500	\$57,016	\$40,613
State as a Nonemployer Contributing Entity to TRS – Net Pension Liability	949,304	707,527	503,977

Net Pension Liability

In accordance with GASB 68, employers and nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the TRS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability, pension expense, deferred inflows of resources, and deferred outflows of resources associated with pensions. In accordance with GASB 68, the TRS has a special funding situation in which the State is legally responsible for making contributions directly to TRS that are used to provide pension benefits to the retired members of the TRS. Due to the existence of this special funding situation, the State is required to report a proportionate share of a local government or school district's collective net pension liability that is associated with the non-State employer.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/15	Net Pension Liability as of 6/30/16	Percent of Collective NPL
State's as an Employer Entity	\$ 56,230	\$ 57,016	3.121008%
State's as a Nonemployer Entity	647,092	707,527	38.729473%
State of Montana Totals	<u>\$703,322</u>	<u>764,543</u>	<u>41.850481%</u>

At June 30, 2017, the State reported a liability of \$764.5 million for its proportionate share of the net pension liability as an employer and nonemployer contributing entity. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of July 1, 2016. The employer's proportion of the net pension liability was based on the State's contributions received by the TRS during the measurement period, July 1, 2015, through June 30, 2016, relative to the all contributions received from the TRS's participating employers and the nonemployer contributing entity.

Changes in actuarial assumptions and methods: Since the previous measurement date the normal cost method has been updated to align the calculation of the projected compensation and the total present value of plan benefits so that the normal costs rate reflects the most appropriate allocation of plan costs over future compensation.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension liability and the employer's reporting date that are expected to have a significant effect on the employer's proportionate share of the collective net pension liability.

Employer Pension Expense and Nonemployer Contributing Entity Special Funding Grant Expense

At June 30, 2017, the State as an employer recognized a pension expense of \$10.5 million for its proportionate share of the collective TRS pension expense. The State as a nonemployer contributing entity also recognized grant expense of \$41.7 million for special funding support provided by the State's General Fund for its proportionate share of the collective TRS pension expense that is associated with other employer participants in the TRS. Total pension related expenses for fiscal year 2017 was \$52.2 million.

Deferred Outflows and Inflows

At June 30, 2017, the State as an employer recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$16.9 million.

As of the fiscal year ended June 30, 2017, the State as an employer reported its proportionate share of deferred outflows of resources and deferred inflows of resources related to the TRS from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 305	\$ 121
Difference between projected and actual earnings on pension plan investments	3,672	-
Change of assumptions	363	358
Changes in proportion and differences between employer contributions and proportionate share of contributions	12,205	1,173
Contributions paid to TRS subsequent to the measurement date – FY 2017 Contributions	17,396	-
Totals	<u>\$33,941</u>	<u>\$1,652</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the employer's contributions made subsequent to the June 30, 2016, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred outflows of resources and inflows of resources related to pensions will be recognized in pension expense as follows:

	<i>(in thousands)</i>
Year ended June 30:	Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense
2018	\$6,706
2019	3,525
2020	3,344
2021	1,318
2022	-
Thereafter	-

At June 30, 2017, the State as a nonemployer contributing entity recognized a beginning deferred outflow of resources for fiscal year 2016 contributions of \$42.4 million.

As of the fiscal year ended June 30, 2017, the State as a nonemployer contributing entity reported its proportionate share of deferred outflows of resources and deferred inflows of resources from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 3,783	\$ 1,504

	(in thousands)	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between projected and actual earnings on pension plan investments	45,561	-
Changes of assumptions	4,503	4,447
Changes in proportion and differences between employer contributions and proportionate share of contributions	6,529	32,074
Contributions paid to TRS subsequent to the measurement date – FY 2017 Contributions	43,028	-
Totals	<u>\$103,404</u>	<u>\$38,025</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the nonemployer's contributions subsequent to the June 30, 2016, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2018.

Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in grant expense as follows:

Year ended June 30:	(in thousands)
	Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense
2018	\$(5,756)
2019	(7,726)
2020	19,478
2021	16,355
2022	-
Thereafter	-

D. Legal Actuarial Status of Plans

The Montana Constitution, Article VIII, Section 15, states that public retirement systems shall be funded on an actuarially sound basis. To maintain a fund on an actuarially sound basis, the rate of contributions should fund the normal cost, in addition to amortizing the unfunded liability over a period not to exceed 30 years.

The statutory funding rate is tested in the valuation of each public retirement plan to determine if it is sufficient to cover the normal cost rate plus an amortization payment of the unfunded actuarial liability, if any, within 30 years. As of June 30, 2017, the Game Warden & Peace Officers' Retirement System (GWPORS) and the Highway Patrol Officers' Retirement System (HPORS) were not in compliance and do not amortize within 30 years.

E. Public Employee Defined Contribution Retirement Plans

Public Employees' Retirement System-Defined Contribution Retirement Plan – The Public Employees' Retirement System - Defined Contribution Retirement Plan (PERS-DCRP) is a multiple Employer plan established July 1, 2002, and governed by Title 19, Chapters 2 & 3, MCA. This plan is available to eligible employees of the State, Montana University System, local governments, and school districts. All new PERS members are initially members of the PERS-DBRP and have a 12-month window during which they may choose to transfer to the PERS-DCRP, or remain in the PERS-DBRP, by filing an irrevocable election. If an election is not filed, the member remains in the PERS-DBRP. Members may not be members of both the defined contribution and defined benefit retirement plans. The PERS-DBRC provides retirement, disability and death benefits to plan members and their beneficiaries.

Member and Employer contribution rates are established by state law and may be amended only by the Legislature. Employees contribute at a rate of 7.90% of their compensation. Contributions made to the plan by an employee remain 100% vested in their interest. Members who achieve 5 years of employment are vested in the plan. Should

they terminate prior to this 5-year period, all employer contributions are forfeited to the plan. Amounts forfeited are held in a separate plan forfeiture account and can only be used to pay the administrative expenses, including startup costs, of the plan. Total pension expense for the State as a PERS-DCRP employer for the year ended June 30, 2017, is \$6.3 million and contribution forfeitures were \$230.7 thousand.

Local government entities contribute 8.37% of member compensation. School district employers contributed 8.10% of member compensation. The State contributes 0.10% of member compensation on behalf of local government entities and 0.37% of member compensation on behalf of school district entities. Each State agency and University employer contributed 8.47% of member compensation.

The total contribution rate of 8.47%, referenced in the preceding paragraph, is allocated as follows: 8.13% to the member's retirement account; 0.04% to the defined contribution education fund; and 0.30% to the defined contribution Other Post Employment Benefit (OPEB) disability plan.

The PERS-DCRP also administers an OPEB disability plan. See Note 7 for additional information related to this portion of the plan.

457-Deferred Compensation Plan – The 457-Deferred Compensation Plan (457-Plan) is a voluntary supplemental retirement savings plan established in 1974. The Deferred Compensation Plan is governed by Title 19, Chapter 50, MCA, in accordance with Internal Revenue Code (IRC) Section 457. This plan is available to all employees of the State, Montana University System, and contracting political subdivisions. The State and 43 non-state entity employers participate in the 457-Plan.

Assets of the Deferred Compensation Plan are required to be held in trusts, custodial accounts or insurance company contracts for the exclusive benefit of participants and their beneficiaries. Empower Retirement™ is the record keeper for the plan. Participants elect to defer a portion of their salary, within IRC limits. The deferred salary is not available to employees until separation from service, retirement, death, or upon an unforeseeable emergency while still employed, provided IRS-specified criteria are met.

F. Montana University System Retirement Program

Montana University System-Retirement Program (MUS-RP) – This system was established in January 1988 and is underwritten by the Teachers Insurance and Annuity Association-College Retirement Equities Fund (TIAA-CREF). Effective July 1, 1993, MUS-RP was made the mandatory retirement plan for new faculty and administrative staff with contracts under the authority of the Board of Regents, previously referred to as the Optional Retirement Program (ORP). The MUS-RP is a defined contribution retirement plan governed by Title 19, Chapter 21 of the MCA. Combined contributions to the faculty and professional staff plan cannot exceed 13% of the participant's compensation per 19-21-203, MCA. Combined contributions to the classified staff plan are 16.47% per 19-3-316, MCA.

The benefits at retirement depend upon the amount of contributions, amount of investment gains and losses, and the employee life expectancy at retirement. Under the MUS-RP, each employee enters into an individual contract with TIAA-CREF. Individuals are immediately vested with all contributions. The Montana University System records employee/employer contributions, and remits monies to TIAA-CREF. Total contributions made to the plan by the employer were \$15.8 million and the total employee contributions were \$18.7 million for the fiscal year ended June 30, 2017.

G. Method Used to Value Investments

The Montana Board of Investments (BOI) manages the investments, as authorized by state law, for the defined benefit retirement plans in two investment pools, the Consolidated Asset Pension Pool (CAPP) and the Short-Term Investment Pool (STIP). CAPP is an internal investment pool and STIP is an external investment pool. Each retirement plan's ownership in the pools is based on the funds contributed. Individual investments in the pools are not specifically identified to the respective retirement plan. Investments are reported at fair value. Mortgages are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. The fair value of direct real estate investments is based on appraised value. Investments that do

not have an established market are reported at estimated fair value. These values are based on market prices supplied to the BOI by its custodial bank, State Street Bank, and various brokerage services. Further detail related to investments is provided in Note 3.

H. Long-term Contracts for Contributions

The Montana Legislature enacted a provision of the Employee Protection Act (EPA) (Title 19, Chapter 2, Part 706, MCA) allowing state and university system employees who are eligible for a service retirement and whose positions have been eliminated to have their Employer pay a portion of the total cost of purchasing up to three years of “1-for-5” additional service. In fiscal year 2017, there were 245 employees participating in the program.

The Employer has up to ten years to complete payment for the service purchases and is charged the actuarially required rate of return as established by the Montana Public Employee Retirement Administration (MPERA) on the unpaid balance. Total contributions received (including interest) during fiscal year 2017 totaled \$70.3 thousand. The outstanding balance at June 30, 2017, totaled \$25.6 thousand.

I. Litigation

Tadman, et al. v. State. A retired member of the Sheriffs' Retirement System filed a class action against the State of Montana on October 6, 2015, alleging the inappropriate payment of state and federal income tax on certain line-of-duty disability benefits. The plaintiff is represented by Lawrence A. Anderson, an attorney located in Great Falls, Montana. The State was served with the Complaint on November 25, 2015, and is represented by Eric Biehl and Hanna Warhank from Church, Harris, Johnson & Williams PC, in Great Falls, Montana and MPERA legal counsel. The State responded and filed an amended answer to the complaint before filing a motion and brief to change venue and/or to dismiss the matter for lack of subject matter jurisdiction. Following a hearing on June 1, 2017, the State's motions were denied. Discovery requests and responses have been served by both parties. The plaintiff's motion for class certification was filed October 31, 2017.

J. Subsequent Events

The PERB approved a reduction in the assumed rate of return, effective July 1, 2017, from 7.75% to 7.65%.

During the Legislative Special Session, held November 13 through 16, 2017, Senate Bill 1 was passed and signed into law. The change in statute terminated employer contributions to the Judges' Retirement System as of the first full pay period which begins after January 1, 2018. On the first full pay period commencing after June 30, 2019, employer contributions will return to their prior amount. The dollar effect is included in the total amount of reduced spending disclosed in Note 17.

NOTE 7. OTHER POSTEMPLOYMENT BENEFITS (OPEB)

A. General

The State of Montana and the Montana University System (MUS) provide optional postemployment healthcare benefits in accordance with Section 2-18-704, MCA to the following employees and dependents who elect to continue coverage and pay administratively established contributions: (1) employees and dependents who retire under applicable retirement provisions, and (2) surviving dependents of deceased employees. Medical, dental, and vision benefits are available through this plan. Retirement eligibility criteria differ by retirement plan. Further detail on Retirement Plans is provided in Note 6.

In accordance with Section 2-18-704, MCA, the MUS provides post-retirement health insurance benefits to employees who are eligible, to receive retirement benefits from the Teachers Retirement System (TRS), the Public Employees' Retirement System (PERS), or an annuity under the MUS-RP, and have been employed by MUS for at least five years, are age 50, or have worked 25 years with MUS. Spouses, unmarried dependent children, and surviving spouses are also eligible.

Section 19-3-2141, MCA, establishes a long-term disability plan trust fund (PERS-DCRP Disability) for all State of Montana Employees that participate in the Public Employee Retirement System-Defined Contribution Retirement Plan (PERS-DCRP). All new PERS members are initially members of the Public Employee Retirement System-Defined Benefit Retirement Plan (PERS-DBRP) and have a 12-month window during which they may choose to transfer to the PERS-DCRP or remain in the PERS-DBRP by filing an irrevocable election. If an election is not filed, the member remains in the PERS-DBRP. Members may not be members of both the defined contribution and defined benefit retirement plans. Only those participants that choose the PERS-DCRP are covered by the PERS-DCRP Disability plan.

Montana State Fund, a discretely presented component of the State, by statute, prepares separately issued financial statements on a calendar year-end basis. Due to the difference in reporting period, there will be a variance between the note disclosures and the financial statements for the OPEB implicit rate subsidy.

B. Plan Descriptions

Both healthcare OPEB plans for the State of Montana and MUS are agent multiple employer plans. In addition to the primary government, the participating employers under the State Plan are Facility Finance Authority, Montana Board of Housing, Public Employees' Retirement System, Montana State Fund, and Teachers' Retirement System. The participating employers under the MUS plan are Dawson Community College (Dawson CC), Flathead Valley Community College (Flathead CC), Miles Community College (Miles CC), Office of Commissioner on Higher Education (OCHE), Montana State University – Billings (MSU-Billings), Montana State University – Bozeman (MSU-Bozeman), Great Falls College MSU, Montana State University – Northern (MSU-Northern), University of Montana – Montana Tech (UM-MT Tech), Helena College UM, University of Montana – Missoula (UM-Missoula), and University of Montana – Western (UM-Western). Each participating employer is required to disclose additional information regarding funding policy, the employer's annual OPEB cost and contributions made, the funded status and funding progress of the employer's individual plan, and actuarial methods and assumptions used.

The healthcare OPEB plans allow retirees to participate, as a group, at a rate that does not cover all of the related costs. This results in the reporting of an "implied rate" subsidy in the related financial statements and note disclosures. While this liability is disclosed for financial statement purposes, it does not represent a legal liability of the State or any of its component units. Accordingly, reported contributions are not a result of direct funding to the plans or for associated liabilities, but are a measure of the difference in retiree payments into the plans and actual medical costs associated with those individuals paid for by the plans.

The healthcare OPEB plans are reported as agency funds. There are no assets or liabilities as only contributions collected and distributions made are reflected in these funds.

The PERS-DCRP Disability is a multiple-employer cost sharing plan that covers employees of the State, local governments, and certain employees of the university system and school districts, who are not covered by a separate retirement system governed by Title 19, MCA. The PERS-DCRP Disability plan provides disability benefits to PERS-DCRP plan members who are vested in the plan and are currently ineligible for retirement.

A separate trust has been established for purposes of providing disability benefits to PERS-DCRP Disability plan members and it is accounted for as a fiduciary fund. The assets are held in a trust capacity for the beneficiaries. The Public Employee Retirement System issues publicly available annual reports which include financial statements and required supplemental information for the plan. Those reports may be obtained online (<http://mpera.mt.gov>) or by contacting the following:

Public Employees’ Retirement Board
 100 North Park, Suite 200
 P.O. Box 200131
 Helena, MT 59620-0131

Further details on the funding policies are provided in Section D of this note.

C. Basis of Accounting

OPEB liability is reported on an accrual basis on the proprietary and fiduciary fund financial statements, the government-wide financial statements and the component unit financial statements. OPEB is not reported on the governmental fund financial statements, as OPEB liability is considered a long-term liability. Plan member contributions are recognized in the period in which the contributions are made. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan.

The healthcare OPEB plan document states “an employee enrolled in the State Plan who (a) at least meets the early retirement criteria defined by Montana Public Employees’ Retirement Administration (MPERA); and (b) makes arrangements with the Health Care and Benefits Division (HCBD) within 60 days of the date active employee coverage ends to continue post-retirement coverage, may continue with the State Plan on a self-pay basis, retroactive back to the date active employee coverage was lost.” Therefore, the plan does not include terminated employees who have accumulated benefits but are not yet receiving them. There have been no significant changes in the number covered or the type of coverage as of June 30, 2017.

The number of State Plan participants as of December 31, 2016, follows:

State Plan Participants							
Enrollment	State	Facility Finance Authority	Montana Board of Housing	Public Employee Retirement Board	Montana State Fund	Teachers Retirement System	Total
Active employees	11,393	3	32	41	297	16	11,782
Retired employees, spouses, and surviving spouses (1)	3,100	-	3	1	17	7	3,128
Total	14,493	3	35	42	314	23	14,910

(1) Due to the inability to determine, without considerable effort, the last place an employee worked before retiring, the bulk of retirees are listed as State regardless of their last place of employment. Since we are unable to account for all retired employees last place of employment cumulatively, an allocation method was used based on the accrued liability and ARC for active employees by entity for the determination of the inactive liability by entity.

The number of MUS Plan participants as of June 30, 2017, follows:

Enrollment	MSU- Billings	MSU- Bozeman	GFC- MSU	MSU- Northern	OCHE	HC- UM	UM- Missoula	UM- MT Tech	UM- Western	Other	Total
Active employees	454	2,964	121	120	72	98	2,425	448	193	345	7,240
Retired employees, spouses, and surviving spouses	102	381	7	30	15	10	385	69	47	47	1,093
Total	556	3,345	128	150	87	108	2,810	517	240	392	8,333

PERS-DCRP participants who are 100% vested in the plan, and become disabled, are entitled benefits as defined in Section 19-3-2141, MCA. There have been no significant changes in the number of participants or the type of coverage as of June 30, 2017.

The number of PERS-DCRP Disability Plan participants as of June 30, 2017, follows:

Enrollment	Active	Disabled	Retirees and Beneficiaries	Terminated Vested Members	Terminated Non- Vested Members	Total
Participant counts used for valuation	2,541	3	-	-	-	2,544

D. Funding Policies

The State of Montana and MUS pay for postemployment healthcare benefits on a pay-as-you-go basis. Section 2-18-8, MCA gives authority for establishing and amending the funding policy to the Department of Administration for the State group health insurance plan. Section 20-25-13, MCA gives authority for establishing and amending the funding policy to the Board of Regents for the MUS group health insurance plan.

As of June 2017, the State Plan's administratively established retiree medical contributions vary between \$439 and \$1,633 per month depending on the medical plan selected, family coverage, and Medicare eligibility. Administratively established dental contributions vary between \$41.10 and \$70 and vision hardware contributions vary between \$7.64 and \$22.26 depending on the coverage selected.

As of June 2017, the MUS plan's administratively established retiree medical premiums vary between \$394 and \$2,244 per month. Retiree dental premiums vary between \$52 and \$156 per month while vision premiums vary from \$8.05 to \$23.45 depending on the types and number of dependents enrolled. The plan provides different coinsurance amounts and deductibles depending on whether members use in-network or out-of-network providers. The plan automatically reduces claim reimbursement for members eligible for Medicare, even if the member is not enrolled in Medicare.

The PERS-DCRP Disability plan is funded through a portion of the statutorily required employer contributions in Section 19-3-2117, MCA. An amount equal to 0.3% of a PERS-DCRP members' compensation is contributed to this trust fund by each participating employer.

E. Annual Other Postemployment Benefit Cost and Contributions

The annual required contribution (ARC), an actuarially determined rate in accordance with the parameters of *GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions* (GASB 45) represents a level of funding that, if paid on an ongoing basis, is projected to cover the normal cost each year and amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The current State's ARC of \$34.1 million is 5.46% of annual covered payroll. The State's annual covered payroll is \$624.4

million. The current MUS's ARC of \$9.7 million is 2.26% of annual covered payroll. The MUS's annual covered payroll is \$429.5 million.

There are no long-term contracts for contributions to either plan. Contributions refer to payments made in relation to the ARC. Since the State and MUS do not fund their plans, contributions disclosed as being made herein are an implicit rate subsidy provided through the difference of retiree payments provided to the healthcare plan and claims paid by the plan on a retiree's behalf.

The following table presents the OPEB cost for the year, the amount contributed, and changes in the OPEB plan for fiscal year 2017 (in thousands):

	State	MUS
Annual required contribution/OPEB cost	\$ 34,107	\$ 9,526
Interest on net OPEB obligation	11,605	4,892
Amortization factor	(9,102)	(3,837)
Annual OPEB cost	36,610	10,581
Retiree claims paid	(9,007)	(3,532)
Increase in net OPEB obligation	27,603	7,049
Net OPEB obligation – beginning of year	273,047	115,096
Net OPEB obligation – end of year	<u>\$300,650</u>	<u>\$122,145</u>

Note that the amounts in the State and MUS Annual OPEB Cost table above include component unit and community college portions and therefore, they will not match the Statement of Net Position.

The State and MUS annual healthcare OPEB cost, the percentage of annual implicit contributions toward the OPEB cost through retiree claims paid on their behalf, and the net OPEB obligation for fiscal years 2017 through 2014 was as follows (in thousands):

	Fiscal Year Ended	Annual OPEB Cost	Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
State	6/30/2017	\$36,610	24.6%	\$300,650
	6/30/2016	36,221	24.8%	273,047
	6/30/2015	37,205	28.2%	246,643
	6/30/2014	36,823	19.1%	219,109
MUS	6/30/2017	\$10,581	33.4%	\$122,145
	6/30/2016	10,654	28.7%	115,096
	6/30/2015	10,624	31.3%	107,498
	6/30/2014	10,671	15.9%	99,891

The disability OPEB plan administered for defined contribution pension plan participants has an annual covered payroll, statutorily required contribution amount, and percentage of required contributions paid into the plan for fiscal years 2017 through 2014 as follows for the State and University system plan participants (in thousands):

	Fiscal Year Ended	Covered Payroll	Statutorily Required Contribution Amount	Percentage of Statutorily Required Contribution Funded
State	6/30/2017	\$70,896	\$213	100%
	6/30/2016	66,224	199	100%
	6/30/2015	55,339	166	100%
	6/30/2014	50,083	150	100%
MUS	6/30/2017	\$4,801	\$14	100%
	6/30/2016	4,612	14	100%
	6/30/2015	4,057	12	100%
	6/30/2014	4,115	12	100%

F. Actuarial Methods and Assumptions

As of January 1, 2015, the State's actuarially accrued liability (AAL) for benefits was \$347.9 million, with no actuarial value of assets, resulting in an unfunded actuarial accrued liability (UAAL) of \$347.9 million, and the ratio of the UAAL to the covered payroll was 53.87%. The UAAL is being amortized as a level dollar amount over an open basis for 30 years.

In the December 31, 2015, actuarial valuation, the projected unit cost funding method was used for the State. The actuarial assumptions included a 4.25% discount rate and a 2.50% payroll growth rate. The projected annual healthcare cost trend rate is initially 3.4% for medical and 10.8% for prescription drugs. The decrease to the medical costs trend rate in plan year 2015 is based on actual trend data instead of estimated trend rates. The medical rate increases to an actuarially determined 9.5% in 2016. Both medical costs and prescription drugs are reduced by decrements to a rate of 5.0%, medical costs after eleven years and prescription drugs after six years.

As of July 1, 2015, the MUS actuarially accrued liability (AAL) for benefits was \$110.5 million, with no actuarial value of assets, resulting in an unfunded actuarial accrued liability (UAAL) of \$110.5 million, and the ratio of the UAAL to the covered payroll was 26.5%. The UAAL is being amortized as a level dollar amount over an open basis for 30 years.

In the June 30, 2016, actuarial valuation, the projected unit cost funding method was used for MUS. The actuarial assumptions included a 4.25% discount rate and a 2.50% payroll growth rate. The projected annual healthcare cost trend rate is 20.6% for both medical and prescription drugs, initially. The increase to medical and prescriptions drug cost trend rates in plan year 2015 is based on groups cumulative rate increase instead of estimate trend rates. Both medical costs and prescriptions drugs are reduced by decrements to a rate of 4.5% after eight years.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Actuarially determined amounts are subject to continual revisions being actual results are compared with past expectations and new estimates are made about the future. Actuarial calculations reflect a long-term perspective. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, is designed to present multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial liabilities for benefits.

Projections of benefits for financial reporting progress are based on the substantive plan (*the plan as understood by the employer and the plan members*). This includes the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point.

The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations on the pattern of cost sharing between the employer and plan members in the future.

Additional information as of the latest actuarial valuation for the State Plan follows:

Other Postemployment Benefits State Agent Multiple-Employer Plan		
	Retiree/Surviving Spouse	Spouse
Contributions (in thousands):		
Before Medicare eligibility	\$11,172	\$4,267
After Medicare eligibility	4,454	3,545
Actuarial valuation date	1/1/2015 (ARC calculated through December 31, 2015)	
Actuarial cost method	Projected unit cost funding	
Amortization method	Level percent of payroll, open	
Remaining amortization period	30 years	
Asset valuation method	Not applicable since no assets meet the definition of plan assets under GASB 45	
Actuarial assumptions:		
Discount rate	4.25%	
Projected payroll increases	2.50%	
Participation:		
Future retirees	55.00%	
Future eligible spouses	60.00%	
Marital status at retirement	70.00%	

Additional information as of the latest actuarial valuation for MUS Plan follows:

Other Postemployment Benefits MUS Agent Multiple-Employer Plan		
	Retiree/Surviving Spouse	Spouse
Contributions (in thousands):		
Before Medicare eligibility	\$8,392	\$3,866
After Medicare eligibility	3,624	2,753
Actuarial valuation date	7/1/2015 (ARC Calculated through June 30, 2016)	
Actuarial cost method	Projected unit cost funding	
Amortization method	Level percent of payroll, open

Projected payroll increases	2.50%	
Participation:		
Future retirees	50.00%	
Future eligible spouses	60.00%	
Marital status at retirement	70.00%	

G. Termination Benefits

During the year ended June 30, 2017, the State made the following termination benefit arrangements: continued coverage of group health insurance benefits for seven employees provided for up to twelve months, one-time lump-sum incentive payments for thirty-two employees, and paid administrative leave for four employees. In determining the termination benefit liability related to the continued coverage of group health insurance benefits, it was assumed that these benefits would be paid for the entire period of the arrangement.

During the year ended June 30, 2017, component units of the State made the following termination benefit arrangements: continued coverage of health insurance benefits and/or one-time incentive payments for twenty employees.

During the year ended June 30, 2017, the cost of termination benefits for the fiscal year was \$533.4 thousand and \$637.2 thousand for the State and its component units, respectively.

NOTE 8. RISK MANAGEMENT

There are three primary government public entity risk pools and one claims-servicing pool that are reported within the enterprise funds. These pools include Hail Insurance, the Montana University System (MUS) Group Insurance Plan, the MUS Workers Compensation Program, and the Subsequent Injury claims-servicing pool. The State of Montana (Old Fund) provides risk financing as an entity other than a public entity risk pool. The liability and payment of the workers compensation claims for incidents occurring before July 1, 1990, are reported in the government-wide financial statements within the primary government. Unpaid claims and claim adjustment expenses are estimated based on the ultimate cost of settling the claims including the effects of inflation and other societal/economic factors. Additionally, the primary government reports its own risk management activity within two internal service funds: Employees Group Benefits Plans and Administration Insurance Plans. In all of these funds, there are no significant reductions in insurance coverage from the prior year. These funds use the accrual basis of accounting. By statute, these funds cannot invest in common stock. Investments are recorded at fair value. Premiums and discounts are amortized using the straight-line method over the life of the securities.

A. Public Entity Risk Pools

(1) Hail Insurance – Any Montana producer engaged in growing crops subject to destruction or damage by hail may participate in the Hail Insurance program. The Hail Insurance program issued 654 policies during the 2017 growing season. This fund accounts for premium assessments paid by producers for crop acreage insured, investment and interest earnings, administrative costs, and claims paid for hail damage. Depending upon the actuarial soundness of the reserve fund and the damage in a season, producers may receive a premium refund. Anticipated investment income is considered in computing a premium deficiency, of which there is none.

A claim must be submitted to the State Board of Hail Insurance within 14 days of a loss occurrence. The claim must indicate whether the grain is stemming, in the boot, heading out, in the milk, in the stiff dough, ready to bind, or combine. If beans, peas, or other crops are damaged, the growth-stage must also be indicated. Inspection of a crop will occur as promptly as possible after claim receipt. The liability on all insured crops expires after October 1. The insurance only covers loss or damage to growing grain that exceeds 5% destruction by hail.

To reduce its exposure to large losses, the fund purchased Crop Hail Quota Share Reinsurance for the 2017 growing season, with a 90% share of premiums and losses allotted to the Reinsurer and a 10% share of each allotted to the State Hail Insurance. The fund recorded a liability of \$2.3 thousand which is 10% of the estimated claims (\$19.1 thousand) plus adjustment expenses through June 30, 2017. The amount deducted from the estimated claims as of June 30, 2017, for reinsurance was \$17.2 thousand (90% of estimated claims). The premiums ceded to the reinsurer through June 30, 2017, were \$1.1 million which was 90% of total premiums of \$1.2 million.

Any crop insurance liability is paid to the producers within one year of occurrence; therefore, liabilities are not discounted. The fund has no excess insurance or annuity contracts.

(2) Montana University System (MUS) Group Insurance Plan –This plan is authorized by the Regents and in Section 20-25-13, MCA. The Plan's purpose is to provide medical, dental, prescription drug, and related group benefits coverage to employees of the Montana University System and affiliates, as well as their dependents, retirees, and COBRA members. The MUS Group Benefits Plan is fully self-insured, except for life insurance, long-term care, long-term disability, and accidental death and dismemberment insurance. Delta Dental administers the dental plan, Blue Cross and Blue Shield of Montana administers the vision plan, and MedImpact is the administrator for the prescription drug program. Allegiance Benefit Plan Management, Blue Cross and Blue Shield of Montana, and Pacific Source are the three third-party claims administrators for the self-insured managed care plan. Allegiance Benefit Plan Management, Blue Cross and Blue Shield of Montana, and Pacific Source have contracts for utilization management. The utilization management program consists of hospital pre-authorization and medical necessity review as well as large case management. Premiums are collected from employees through payroll deductions and recorded in the MUS Group Insurance enterprise fund. The claims liability is calculated by Actuaries Northwest and estimated to be \$10.0 million as of June 30, 2017, based on prior year experience. A liability is reported in the accompanying financial statements for these estimated claims.

(3) Montana University System (MUS) Workers' Compensation Program – This plan was formed to provide self-insured workers compensation coverage for employees of the MUS. The MUS Board of Regents provides workers' compensation coverage under Compensation Plan Number One (Section 39-7-2101, MCA). The program is self-insured for workers' compensation claims with losses in excess of \$750.0 thousand per occurrence (\$500.0 thousand for claims occurring prior to July 1, 2013) and \$1.0 million per aircraft occurrence covered by reinsurance with a commercial carrier. Employer's liability claims are covered to a maximum of \$1.0 million above the self-insured amount of \$750.0 thousand (\$500.0 thousand for claims occurring prior to July 1, 2013). During fiscal year 2017, the program ceded \$314.3 thousand in premiums to reinsurers.

Premium rates for all participating campuses are established by the MUS Workers' Compensation Program Committee based on actuarial calculations of premium need and composite premium rate. Premium rates are adjusted periodically based on inflation, claims experience, and other factors. Premiums are recorded as revenue in the MUS Workers' Compensation Program in the period for which coverage is provided. Members may be subject to supplemental assessments in the event of deficiencies. The program considers anticipated investment income in determining if a premium deficiency exists.

The fund recorded a liability of \$7.3 million for estimated claims at June 30, 2017. The liability is based on the estimated ultimate cost of settling the reported and unreported claims, claims reserve development including the effects of inflation, and other societal and economic factors. Estimated amounts of subrogation and reinsurance recoverable on unpaid claims are deducted from the liability for unpaid claims. Estimated claims liabilities are recomputed periodically based on current review of claims information, experience with similar claims, and other factors. Adjustments to estimated claims liabilities are recorded as an increase or decrease in claims expense in the period the adjustments are made.

(4) Subsequent Injury – The purpose of the Subsequent Injury Fund (SIF) is to assist individuals with a permanent impairment that may create an obstacle to employment by offering a financial incentive to employers to hire SIF-certified individuals. The program is funded through an annual assessment on Montana self-insured employers and a surcharge on premium for private insured and Montana State Fund policyholders.

The assessment and surcharge rates are set by the Employment Relations Division of the Department of Labor and Industry annually. The rates are based on the total amount of paid losses reimbursed by SIF in the preceding calendar year, plus the expenses of administration, less other income earned. Employers covered by Plans 1, 2 and 3 share in the reimbursement of SIF based on the percentage of the compensation and medical benefits paid in Montana by their insurers in the preceding calendar year.

The SIF program reduces the liability of the employer (if self-insured) or insurer by placing a limit of 104 weeks on the amount an employer (if self-insured), or the employer's insurer, will have to pay for medical and wage loss benefits in the event a worker who is SIF-certified becomes injured or re-injured on the job. SIF will assume liability for the claim when the 104 weeks is reached. The benefit to an insured employer is that the insurer's liability is limited to 104 weeks on the claim. This can favorably impact the employer's modification factor, which in turn can keep premiums lower than would otherwise be the case without SIF. For a self-insured employer, it provides a direct recovery of expenses paid for a workers' compensation claim. If a certified worker does become injured on the job, the worker remains entitled to all benefits due under the Workers' Compensation Act.

An estimated liability is recorded based on a projected cost analysis and total population of registered SIF participants. As of June 30, 2017, the amount of this liability was estimated to be \$2.9 million.

(5) Changes in Claims Liabilities for the Past Two Years – As indicated above, these funds establish liabilities for both reported and unreported insured events including estimates of future payments of losses and related claim adjustment expenses. The following tables present changes (in thousands) in those aggregate liabilities during the past two years. All information in these tables is presented at face value and has not been discounted.

	<u>Hail Insurance</u>		<u>MUS Group Insurance Plan</u>		<u>MUS Workers Compensation</u>	
	2017	2016	2017	2016	2017	2016
Unpaid claims and claim adjustment expenses at beginning of year	\$ 134	\$ 17	\$ 9,100	\$ 7,300	\$ 7,764	\$ 8,289
Incurred claims and claim adjustment expenses:						
provision for insured events of the current year	819	324	84,186	90,131	3,096	3,157
Less excess insurance reimbursement	-	-	-	-	-	(62)
Increase (decrease) in provision for insured events of prior years	434	79	-	-	(1,368)	(1,655)
Total incurred claims and claim adjustment expenses	1,253	403	84,186	90,131	1,728	1,440
Payments:						
Claims and claim adjustment expenses attributable to insured events of the current year	(817)	(189)	(83,286)	(88,331)	(940)	(598)
Claims and claim adjustment expenses attributable to insured events of prior years	(568)	(97)	-	-	(1,254)	(1,367)
Total payments	(1,385)	(286)	(83,286)	(88,331)	(2,194)	(1,965)
Total unpaid claims and claim adjustment expenses at end of year	\$ 2	\$ 134	\$ 10,000	\$ 9,100	\$ 7,298	\$ 7,764

B. Entities Other Than Pools

(1) Administration Insurance Plans – This self-insurance plan provides coverage for general liability, automobile liability, automobile physical damage, foster care liability, and state-administered foreclosure of housing units. The State self-insures the \$2.0 million deductible per occurrence for most property insurance, as well as various deductible amounts for other State property. The State also self-insures against losses of property below \$2.0 million of value, with state agencies paying the first \$1.0 thousand. Commercial property insurance protects approximately \$5.4 billion of state-owned buildings and contents. The State's property insurance includes separate earthquake and flood protection coverage, with deductibles of \$2.0 million for earthquake and \$2.0 million for flood per occurrence. Premiums are collected from all state agencies, including component units, and recorded as revenue in the Administration Insurance Fund.

An annual actuarial study, prepared by Towers Watson Company, and issued for the accident period July 1, 2007, through June 30, 2017, is the basis for estimating the liability for unpaid claims and is supported by historical loss data. As of June 30, 2017, estimated claims liability was \$16.1 million.

(2) Employee Group Benefits Plans – The medical and dental health plans provided by the State are fully self-insured with the State assuming the risk for claims incurred by employees of the State, elected officials, retirees, former employees covered by COBRA benefits, and their dependents. The State contracted with Allegiance as the third-party administrator for medical coverage. Delta Dental is the administrator for dental coverage. MedImpact was the administrator for the pharmacy program for the first six months of the fiscal year. The plan operates on a calendar year and the contract expired on December 31, 2016. Navitus replaced MedImpact as the administrator on January 1, 2017. Contributions are collected through payroll deductions, deductions through the Public Employees Retirement Administration, the Legislative Branch, and self-payments. The contributions are recorded as revenue in the Employee Group Benefits internal service fund. As of June 30, 2017, estimates for claims liabilities, which include both incurred but not reported claims and grandfathered claims resulting from a 1998 change in period for which the benefit coverage is available, as well as other actuarially determined liabilities, were \$17.7 million as provided by

Actuaries Northwest, a consulting actuarial firm. In fiscal year 2018, \$17.5 million of these claims liabilities are estimated to be paid.

(3) State of Montana (Old Fund) – State of Montana (Old Fund) covers workers’ compensation claims that were incurred before July 1, 1990. Old Fund is a risk financing insurance entity; however, the participants within the pool are individuals outside of governmental entities.

An actuarial study prepared by Towers Watson, as of June 30, 2017, estimated the cost of settling claims that have been reported, but not settled, and claims that have been incurred, but not reported. At June 30, 2017, \$32.2 million of unpaid claims and claim adjustment expenses were reported at face value.

(4) Changes in Claims Liabilities for the Past Two Years – These funds establish liabilities for both reported and incurred, but not reported, claims. Grandfathered claims are not included as they relate to future claims not yet incurred. The following table presents changes in the balances of claims liabilities during the past two fiscal years (in thousands).

	<u>Administration Insurance Plans</u>		<u>Employers Group Benefits Plan</u>		<u>State of Montana Old Fund</u>	
	2017	2016	2017	2016	2017	2016
Amount of claims liabilities at the beginning of each fiscal year	\$ 15,444	\$ 16,953	\$ 17,873	\$ 18,028	\$ 38,410	\$ 41,597
Incurred claims:						
Provision for insured events of the current year	4,786	5,343	159,835	163,115	-	-
Increase (decrease) in provision for insured events of prior years	17,592	(167)	518	(4,035)	1,554	5,707
Total incurred claims	22,378	5,176	160,353	159,080	1,554	5,707
Payments:						
Claims attributable to insured events of the current year	(1,681)	(1,737)	(142,173)	(145,572)	-	-
Claims attributable to insured events of prior years	(20,087)	(4,948)	(18,357)	(13,663)	(7,752)	(8,894)
Total payments	(21,768)	(6,685)	(160,530)	(159,235)	(7,752)	(8,894)
Total claims liability at end of each fiscal year	\$ 16,054	\$ 15,444	\$ 17,696	\$ 17,873	\$ 32,212	\$ 38,410

NOTE 9. COMMITMENTS

A. Highway Construction

At June 30, 2017, the Department of Transportation had contractual commitments of approximately \$204.2 million for construction of various highway projects. Funding for these highway projects is to be provided from federal grants and matched with state special revenue funds.

B. Capital Construction

At June 30, 2017, the Department of Administration, Architecture & Engineering Division, had commitments of approximately \$45.3 million for capital projects construction. The primary government will fund \$9.9 million of these projects, with the remaining \$35.4 million funding coming from the Montana University System.

At June 30, 2017, Fish, Wildlife, and Parks (FWP) had contractual commitments of approximately \$1.8 million for engineering and construction of various capital projects. The majority of the funding for these projects is to be provided by federal grants and state special revenue funds.

C. Loan and Mortgage Commitments

The Montana Board of Investments (BOI) makes firm commitments to fund commercial loans and Veterans' Home Loan Mortgages (VHLM) from the Coal Severance Tax Fund. These commitments have expiration dates and may be extended according to BOI policies. As of June 30, 2017, BOI had committed, but not yet purchased, \$33.2 million in loans from Montana lenders. In addition to the above commitments, lenders had reserved \$828.0 thousand for loans as of June 30, 2017. As of June 30, 2017, \$656.0 thousand represented lender reservations for the VHLM residential mortgage purchases with no purchase commitments.

BOI makes reservations to fund mortgages from the State's pension funds. As of June 30, 2017, there were no mortgage reservations. All BOI residential mortgage purchases are processed by the Montana Board of Housing (MBOH). MBOH does not differentiate between a mortgage reservation and a funding commitment.

BOI makes firm commitments to fund loans from the INTERCAP loan program. BOI's outstanding commitments to eligible Montana governments, as of June 30, 2017, totaled \$30.0 million.

D. Department of Corrections Bond Commitments

At June 30, 2017, the outstanding tax-exempt bonds issued by the Facility Finance Authority were issued in the amount of \$17.5 million of which \$2.3 million in principal payments are scheduled to be paid by June 30, 2018. These bonds have been issued to facilities operating treatment and prerelease centers. The Department of Corrections agrees to provide payment on behalf of the contractors for the total principal and interest regarding these outstanding bonds.

E. Proprietary Fund Commitments

Budgets are administratively established in the enterprise and internal service funds, excluding depreciation, compensated absences, and bad debt expense. Appropriations may be committed for goods/services that are not received as of fiscal year-end. These executory commitments are included in unrestricted net position in the accompanying financial statements as follows (in thousands):

<u>Enterprise Funds</u>	<u>Amount</u>
Liquor Warehouse	\$ 99
Prison Industries	58
West Yellowstone Air	144
Subtotal – Enterprise funds	<u>\$301</u>

<u>Internal Service Funds</u>	
Buildings & Grounds	\$ 2
Information Technology Services	50
Labor Central Services	228
Prison Industries	274
Subtotal – Internal Service funds	<u>\$554</u>

F. Encumbrances

As of June 30, 2017, the State of Montana encumbered expenditures as presented in the table below (in thousands):

	<u>Federal Special Revenue Fund</u>	<u>General Fund</u>	<u>Nonmajor Governmental Funds</u>	<u>State Special Revenue Fund</u>	<u>Total</u>
Encumbrances	\$28,579	\$11,355	\$272	\$59,635	\$99,841

NOTE 10. LEASES/INSTALLMENT PURCHASES PAYABLE

The State has entered into various capital and operating leases for land, buildings, equipment, and computer software. Lease contracts are required by law to contain a clause indicating continuation of the lease is subject to funding by the Legislature. It is expected, in the normal course of operations, that most of these leases will be replaced by similar leases.

A. Capital Leases/Installment Purchases

Obligations under capital leases/installment purchases at June 30, 2017, were as follows (in thousands):

Fiscal Year Ending June 30	Governmental Activities	Business-Type Activities
2018	\$1,901	\$209
2019	1,622	208
2020	1,382	18
2021	1,019	-
2022	512	-
2023-2027	446	-
Total minimum payments	6,882	435
Less: interest	(345)	(20)
Present value of minimum payments	<u>\$6,537</u>	<u>\$415</u>

Assets acquired under capital leases for the primary government by asset class were as follows (in thousands):

Asset Class	
Buildings	\$ 1,596
Equipment	11,524
Less: Accum Depreciation	<u>(4,771)</u>
Net Book Value	<u>\$ 8,349</u>

B. Operating Leases

Primary government rental payments for operating leases in fiscal year 2017 totaled \$28.5 million. Future rental payments under operating leases are as follows (in thousands):

Fiscal Year Ending June 30	Governmental Activities	Business-Type Activities
2018	\$ 26,428	\$ 936
2019	22,763	937
2020	18,049	588
2021	13,208	338
2022	12,402	319
2023-2027	40,827	1,389
2028-2032	18,866	-
Thereafter	11,196	-
Total future rental payments	<u>\$163,739</u>	<u>\$4,507</u>

NOTE 11. STATE DEBT**A. General Information**

The State has no constitutional limit on its power to issue obligations or incur debt, other than a provision that no debt may be created to cover deficits incurred because appropriations exceeded anticipated revenues. No State debt shall be created unless authorized by a two-thirds vote of the members of each house of the Legislature or a majority of the electors voting thereon. The Board of Examiners (consisting of the Governor, Secretary of State, and Attorney General) is authorized, pursuant to various enabling acts, to issue bonds and notes of the State.

B. Short-term Debt

The Board of Examiners, upon recommendation of the Department of Administration, may issue notes in anticipation of the receipt of taxes and revenues. Notes may not be issued to refund outstanding notes.

During fiscal year 2017, the State issued one bond anticipation note. The proceeds of Coal Severance Tax - 2016E will be used to fund water and wastewater system improvements and rehabilitation. As of June 30, 2017, three bond anticipation notes; Drinking Water - 2016D, Water/Wastewater - 2017B, and Drinking Water - 2017C have been authorized, but not issued and no funds have been drawn. The State issued two bond anticipation notes during fiscal year 2015, and one bond anticipation note during fiscal year 2016, all of which were paid off during fiscal year 2017. Three bond anticipation notes that were issued in fiscal year 2016 are still active at the end of fiscal year 2017. The following schedule summarizes the activity for the year ended June 30, 2017 (in thousands):

	Beginning Balance	Additions	Reductions	Ending Balance
BANS				
Coal Severance Tax – 2014A (1)	\$ 300	\$ -	\$ 300	\$ -
Drinking Water – 2014A	1,065	-	1,065	-
Coal Severance Tax – 2015A (2)	2,605	495	1,850	1,250
Drinking Water – 2015B	900	1,100	460	1,540
Water/Wastewater – 2016C (3)	-	2,000	1,175	825
Coal Severance Tax – 2016E (3)	-	1,034	-	1,034
Coal Tax Trust Fund – 2016	1,207	7,272	8,479	-

- (1) Listed as Water / Wastewater – 2014A in prior fiscal year.
(2) Listed as Water / Wastewater – 2015A in prior fiscal year.
(3) These bond anticipation notes have not been fully drawn at fiscal year-end.

The Board of Investments (BOI) of the State is authorized to issue Intermediate Term Capital (INTERCAP) bonds under the Municipal Finance Consolidation Act. These bonds may not aggregate more than \$190.0 million as amended by the 2007 Legislature. The purpose of the bonds is to provide funds for BOI to make loans to eligible government units. The bonds are not a debt or liability of the State. The bonds are limited obligations of BOI, payable solely from (1) repayments of principal and interest on loans made by BOI to participating eligible governmental units, (2) investment income under the indenture, and (3) an irrevocable pledge by BOI. BOI has no taxing power. The bonds may be redeemed, at the bondholder's option, any March 1, prior to maturity. BOI did not enter into an arms-length financing agreement to convert the bonds "put," or tender, and were not resold into some other form of long-term obligation. Accordingly, these bonds, considered demand bonds, are included in short-term debt. The amounts issued and outstanding at June 30, 2017, were as follows (in thousands):

Series	Amount Issued	Balance June 30, 2017
1998	12,500	\$ 2,600
2000	15,000	14,255
2003	15,000	14,330
2004	18,500	18,000
2007	15,000	14,725
2010	12,000	11,975
2013	12,000	11,995
2017	20,000	20,000
		\$107,880

The following schedule summarizes the activity relating to the demand bonds during the year ended June 30, 2017 (in thousands):

	Beginning Balance	Additions	Reductions	Ending Balance
Demand bonds	\$97,340	\$20,000	\$9,460	\$107,880

C. Long-term Debt

The full faith, credit, and taxing powers of the State are pledged for the payment of all general obligation debt. Revenue and mortgage bonds are secured by a pledge from the facilities to which they relate and by certain other revenues, fees, and assets of the State and the various colleges and universities. Primary government bonds and notes outstanding at June 30, 2017, were as follows (in thousands):

Governmental Activities	Series	Amount Issued	Interest Range (%) (1)	Principal Payments		Balance June 30, 2017
				Fiscal Year 2018	In Year of Maturity (2)

- (1) The interest range is over the life of the obligation.
- (2) Year of maturity refers to fiscal year.
- (3) These bonds provide matching funds to enable the State to obtain capitalization grants from the U.S Environmental Protection Agency for water system development loans to state political subdivisions.
- (4) The general obligation Renewable Resource Program Bonds are secured additionally by a pledge of, and payable from, certain coal severance taxes. The bonds are also secured by a pledge of loan repayments from loans made from the bond proceeds.
- (5) Bonds issued for financing the design, construction, and installation of energy conservation projects at various state buildings.
- (6) The CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act) Program Bonds were issued for the purpose of financing the costs of State of Montana participation in the remedial actions under Section 104 of the CERCLA 42 United States Code Sections 9601-9657, and State of Montana costs for maintenance of sites under CERCLA. The CERCLA Bonds are secured additionally by a pledge of monies received by the State as cost recovery payments and revenues derived from the resource indemnity and groundwater assessment tax in the event cost recovery payments are insufficient.
- (7) Facility Finance Authority loan to the Department of Public Health and Human Services for the Montana State Hospital Project.
- (8) Issued by the Department of Natural Resources and Conservation and backed by a pledge of coal severance taxes and project revenues.
- (9) The U.S. Highway 93 GARVEES (Grant Anticipation Revenue Vehicles) Bonds were issued for the purpose of improving a 44.8-mile stretch of U.S. Highway 93. Repayment of the bonds is secured by a pledge of certain federal aid revenues.
- (10) U.S. Bureau of Reclamation loan to the Department of Natural Resources & Conservation.
- (11) Northern Cheyenne Tribe loan to the Department of Natural Resources & Conservation. The loan will not accrue interest and will be repaid over 39 years. Loan repayment is secured by the issuance of a coal severance tax bond to the tribe.

D. Debt Service Requirements

Primary government debt service requirements at June 30, 2017, were as follows (in thousands):

Year Ended June 30	<u>Governmental Activities</u>					
	General Obligation Bonds		Special Revenue Bonds		Notes Payable	
	Principal	Interest	Principal	Interest	Principal	Interest
2018	\$ 14,000	\$ 3,783	\$ 17,115	\$ 2,875	\$ 1,681	\$ 79
2019	10,145	3,367	16,195	2,234	872	45
2020	9,170	3,034	16,915	1,595	382	41
2021	8,120	2,735	6,160	947	385	41
2022	7,320	2,424	6,445	738	389	41
2023-2027	29,475	7,975	8,735	1,199	2,016	205
2028-2032	13,465	3,196	1,985	145	2,155	205
2033-2037	6,930	714	-	-	1,834	82
2038-2042	-	-	-	-	290	-
Total	<u>\$ 98,625</u>	<u>\$ 27,228</u>	<u>\$ 73,550</u>	<u>\$ 9,733</u>	<u>\$ 10,004</u>	<u>\$ 739</u>

E. Summary of Changes in Long-term Liabilities

Primary government long-term liability activities for the year ended June 30, 2017, were as follows (in thousands):

	Beginning Balance	Additions	Reductions	Ending Balance	Amounts Due Within One Year	Amounts Due In More Than One Year
<u>Governmental activities</u>						
Bonds/notes payable						
General obligation bonds	\$ 115,500	\$ -	\$ 16,875	\$ 98,625	\$ 14,000	\$ 84,625
Special revenue bonds	89,840	-	16,290	73,550	17,115	56,435
Notes payable	11,643	-	1,639	10,004	1,681	8,323
	216,983	-	34,804	182,179	32,796	149,383
Unamortized discount	(11)	2	-	(9)	-	(9)
Unamortized premium	13,645	-	2,443	11,202	-	11,202
Total bonds/notes payable (3)	230,617	2	37,247	193,372	32,796	160,576
Other liabilities						
Lease/installment purchase payable	3,170	5,206	1,839	6,537	1,767	4,770
Operating lease rent holiday	46	-	19	27	9	18
Pension benefits payable	4	-	-	4	2	2
Compensated absences payable (1)	102,568	57,206	56,209	103,565	55,899	47,666
Arbitrage rebate tax payable (1)	83	-	-	83	-	83
Estimated insurance claims (1)	71,727	184,285	190,050	65,962	29,044	36,918
Pollution remediation	242,989	-	34,208	208,781	23,859	184,922
Net pension liability	1,558,463	231,520	173	1,789,810	-	1,789,810
OPEB implicit rate subsidy (2)	262,599	35,215	8,639	289,175	-	289,175
Total other liabilities	2,241,649	513,432	291,137	2,463,944	110,580	2,353,364
Total governmental activities long-term liabilities	\$ 2,472,266	\$ 513,434	\$ 328,384	\$ 2,657,316	\$ 143,376	\$ 2,513,940
<u>Business-type activities</u>						
Lease/installment purchase payable	600	1	186	415	195	220
Compensated absences payable	2,075	1,021	1,049	2,047	1,044	1,003
Arbitrage rebate tax payable	17	6	-	23	3	20
Estimated insurance claims	20,347	87,167	87,272	20,242	13,658	6,584
Net pension liability	10,750	3,556	13	14,293	-	14,293
OPEB implicit rate subsidy (2)	4,650	641	159	5,132	-	5,132
Total business-type activities long-term liabilities	\$ 38,439	\$ 92,392	\$ 88,679	\$ 42,152	\$ 14,900	\$ 27,252

- (1) The compensated absences liability attributable to the governmental activities will be liquidated by several of the governmental and internal service funds. The arbitrage rebate tax payable will be liquidated by debt service funds. The Employee Group Benefits and Administration Insurance internal service funds will liquidate the estimated insurance claims liability.
- (2) The OPEB plan allows retirees to participate, as a group, at a rate that does not cover all the related costs. This results in the reporting of an "implicit rate" subsidy on the related financial statements. While this liability is disclosed for financial purposes, it does not represent a legal liability of the State, or any of its component units. The OPEB beginning balance was restated due to correction of an error.
- (3) Deferred outflows, including those related to bonds payable, are reported separately on the Statement of Net Position based on GASB Statement No. 65.

F. Refunded and Early Retired Debt

Prepayments

The Department of Natural Resources and Conservation (DNRC) used current available resources to make three prepayments: \$155.0 thousand on Series 2006D resulting in a payoff, \$900.0 thousand on Series 2010C resulting in a payoff, and \$45.0 thousand on Series 2010H general obligation bonds.

G. No-Commitment Debt

Information is presented below for financing authorities participating in debt issues. The related debt issued does not constitute a debt, liability, obligation, or pledge of faith and credit of the State. Accordingly, these bonds and notes are not reflected on the accompanying financial statements.

Montana Board of Investments (BOI)

BOI is authorized to issue Qualified Zone Academy Bonds (QZAB) under the Municipal Finance Consolidation Act, as conduit (no commitment) debt. The revenues, and in some cases, the taxing power of the borrower are pledged to repay the bonds. At June 30, 2017, QZAB debt outstanding aggregated \$6.4 million.

BOI is also authorized to issue Qualified School Construction Bonds (QSCB) under the Municipal Finance Consolidation Act, as conduit (no commitment) debt. The revenues of the borrower are pledged to repay the bonds. At June 30, 2017, QSCB debt outstanding aggregated \$5.6 million.

Beginning Farm Loan Program

The Department of Agriculture is authorized to request issuance of bonds by BOI to finance projects for beginning farmers within the state, if it appears, after a properly noticed public hearing, that the project is in the public interest of the state. These non-recourse, industrial development revenue bonds do not constitute a debt, liability, or obligation of the State. The amount issued and outstanding at June 30, 2017, was as follows: Hershberger Project, outstanding \$38.4 thousand.

H. Estimated Pollution Remediation Obligation

Estimated pollution remediation obligations are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities such as site assessments and cleanups. The estimates are derived using the expected cash flows method as well as technical estimates from record of decisions, consent decrees and/or settlement agreements. There may be factors influencing the estimates that are not known at this time. Prospective recoveries from other responsible parties may reduce the State's obligation.

The State's estimated pollution remediation liability as of June 30, 2017, was \$208.8 million. Of this liability, \$13.5 million resulted in settlement agreements to provide restoration of natural resources, water supplies and natural resource-based recreational opportunities up to the settlement amount; \$188.2 million is based on decrees or settlements for remediation activities. Other estimated liabilities have been recorded for soil and PCB contamination, as well as removal of asbestos contamination. The estimated pollution remediation liability was recorded in compliance with accounting and reporting standards and does not constitute the State's total acceptance of the liability or responsibility on these matters.

I. Nonexchange Financial Guarantee

BOI provides loan guarantees from the Coal Severance Tax Fund to the Facility Finance Authority (FFA). BOI exposure to bond issues, surety bonds, and designated loans of the FFA totaled \$71.4 million as of June 30, 2017. FFA is a discretely presented component unit of the State of Montana. FFA guarantee requests are submitted to BOI for review and approval. BOI's participation, either duration or any other consideration, to either purchase bonds or loans or to lend money for deposit into FFA's statutorily allowed capital reserve account is explicitly limited by statute which requires BOI to act prudently. The guarantee requests from FFA pertain to bonds issued by FFA with a term

of up to 40 years. BOI and FFA have entered into an agreement detailing repayment to BOI. BOI has not had to perform on any loan guarantee in the past.

The following schedule summarizes the activity related to the non-exchange financial guarantee during the year ended June 30, 2017 (in thousands):

Beginning Balance	Additions	Reductions	Ending Balance
\$79,875	\$32,905	\$41,364	\$71,416

NOTE 12. INTERFUND BALANCES AND TRANSFERS

A. Balances Due From/To Other Funds

Balances due from/to other funds arise when there is a time lag between the dates that reimbursable expenditures and interfund services provided/used are recorded in the accounting system, and the dates on which payments are made. Balances also arise when there is a time lag between the dates that transfers between funds are recorded, and the dates on which payments are made. Balances due from/to other funds also include the current portion of balances related to amounts loaned by the Economic Development Bonds Fund to other funds, under the Board of Investments INTERCAP loan program. Balances due from/to other funds are expected to be repaid within one year from origination.

Balances due from/to other funds at June 30, 2017, consisted of the following (in thousands):

	Due to Other Funds							Total
	Coal Severance Tax	Federal Special Revenue	General Fund	Internal Service Funds	Nonmajor Enterprise Funds (3)	Nonmajor Governmental Funds	State Special Revenue	
Due from Other Funds								
Coal Severance Tax	\$ -	\$ -	\$ -	\$ -	\$ -	\$ 13	\$ -	\$ 13
Economic Development Bonds	-	-	-	1,806	-	103	608	2,517
Federal Special Revenue	-	-	3	-	-	-	72	75
General Fund	-	2,613	-	23	13,230	-	12,889	28,755
Internal Service Funds	32	-	-	-	-	-	-	32
Nonmajor Governmental (1)	-	-	190	-	-	-	88	278
State Special Revenue (2)	-	11,805	76	3	-	486	-	12,370
Total	\$ 32	\$14,418	\$ 269	\$1,832	\$13,230	\$ 602	\$13,657	\$44,040

- (1) Total due from other funds to the non-major governmental funds on the financial statements is reported as \$1.8 million. The difference of \$1.5 million between the amount reported above of \$278 thousand and the amount reported in the fund financial statements relates to long-term receivables. The receivables are reported on the fund financial statement and the long-term liabilities are reported on the government-wide statement.
- (2) Total due from other funds to the state special revenue fund on the fund financial statement is reported as \$20.9 million. The difference of \$8.5 million between the amount reported above of \$12.4 million and the amount reported in the fund financial statement relates to long-term receivables. The receivables are reported on the fund financial statement and the long-term liabilities are reported on the government-wide statement.
- (3) Total due to other funds from the non-major enterprise funds on the fund financial statement is reported as \$13.5 million. The difference of \$313.3 thousand between the amount reported above of \$13.2 million and the amount reported on the fund financial statement relates to loans payable. The receivables are reported on the government-wide and the liabilities are reported on the fund financial statement.

B. Interfund Loans Receivable/Payable

Montana statutes include a provision for interfund loans when the expenditure of an appropriation is necessary and the cash balance in the account from which the appropriation was made is insufficient to pay the expenditure. Interfund loans receivable/payable are expected to be repaid within one year from the date of origination.

Interfund loans receivable/payable at June 30, 2017, consisted of the following (in thousands):

	Interfund Loans Payable						Total
	Coal Severance Tax	Federal Special Revenue	Internal Service Funds	Nonmajor Governmental Funds	State Special Revenue	Unemployment Insurance	
Interfund Loans Receivable							
General Fund	\$1,677	\$109,466	\$ -	\$277	\$11,624	\$ -	\$123,044
Internal Service Funds	-	211	-	-	-	-	211
State Special Revenue	-	54,695	3	-	-	75	54,773
Total	\$1,677	\$164,372	\$ 3	\$277	\$11,624	\$75	\$178,028

C. Advances To/From Other Funds

Advances to/from other funds represent the portion of interfund loans that are not expected to be repaid within one year from the date of origination. Advances to/from other funds also include the noncurrent portion of balances related to amounts loaned by the Economic Development Bonds Fund to other funds, under the Board of Investments INTERCAP loan program. For more information on the INTERCAP loan program, refer to Note 11.

Advances to/from other funds at June 30, 2017, consisted of the following (in thousands):

	Advances from Other Funds				Total
	Federal Special Revenue	Internal Service Funds	Nonmajor Governmental Funds	State Special Revenue	
Advances to Other Funds					
Coal Severance Tax	\$ -	\$ -	\$ 3,996	\$ -	\$ 3,996
Economic Development Bonds	-	5,897	4,649	-	10,546
General Fund	275	-	-	251	526
Nonmajor Governmental Funds	-	-	-	9,767	9,767
State Special Revenue	17,536	-	5,231	-	22,767
Total	\$17,811	\$5,897	\$13,876	\$10,018	\$47,602

Additional detail for certain advance balances at June 30, 2017, follows (in thousands):

Advances from the Economic Development Bonds Fund under the INTERCAP Loan Program	
Department	Balance
Natural Resources and Conservation	\$ 4,649
Transportation	5,897
Total	\$10,546

D. Interfund Transfers

Routine transfers between funds are recorded to (1) transfer revenues from the fund legally required to receive the revenue to the fund authorized to expend the revenue, (2) transfer resources from the General Fund and special revenue funds to debt service funds to support principal and interest payments, (3) transfer resources from enterprise funds to the General Fund to finance general government expenditures, and (4) provide operating subsidies.

Interfund transfers for the year ended June 30, 2017, consisted of the following (in thousands):

	Transfers In								Total
	Coal Severance Tax	Federal Special Revenue	General Fund	Internal Service Funds	Land Grant	Nonmajor Enterprise Funds	Nonmajor Governmental Funds	State Special Revenue	
Transfers Out									
Coal Severance Tax	\$ -	\$ -	\$19,799	\$ -	\$-	\$ -	\$ 1,164	\$ 22,050	\$ 43,013
Federal Special Revenue	-	-	157	-	-	-	15,684	13,088	28,929
General Fund	-	22	-	1,053	-	-	12,621	31,641	45,337
Internal Service Funds (1)	-	-	-	296	-	65	160	22	543
Land Grant	-	-	6	-	-	-	1,504	60,168	61,678
Nonmajor Enterprise Funds (2)	-	1	42,497	-	-	-	-	6,664	49,162
Nonmajor Governmental Funds	10	-	67	-	-	-	5,907	23,442	29,426
State Special Revenue	-	1,656	11,361	437	8	286	13,306	-	27,054
Total	\$10	\$1,679	\$73,887	\$1,786	\$8	\$351	\$50,346	\$157,075	\$285,142

- (1) Total transfers-out for internal service funds on the fund financial statements is reported as \$1.0 million. The difference of \$463.2 thousand between the amount reported above of \$543.0 thousand and the amount reported on the fund financial statements relates to the transfer of capital assets between a governmental fund type and the internal service fund type. When capital assets are transferred between these fund types, the transferring fund reports the net book value of the capital asset as a transfer-out, and the receiving fund reports the net book value of the capital asset as a capital contribution.
- (2) Total transfers-out for nonmajor enterprise funds on the fund financial statements is reported as \$49.2 million. The difference of \$6.4 thousand between the amount reported above of \$49.2 million and the amount reported on the fund financial statements relates to the transfer of capital assets between a governmental fund type and the nonmajor enterprise fund type. When capital assets are transferred between these fund types, the transferring fund reports the net book value of the capital asset as a transfer-out, and the receiving fund reports the net book value of the capital asset as a capital contribution.

NOTE 13. FUND EQUITY DEFICITS

The following funds have a deficit net position remaining at June 30, 2017, as follows (in thousands):

<u>Fund Type/Fund</u>	<u>Deficit (1)</u>
Internal Service Funds	
Information Tech Services	\$(12,527)
Admin Insurance	(1,890)
Print & Mail Services	(452)
Building and Grounds	(582)
Admin Central Services	(1,792)
Labor Central Services	(6,457)
Commerce Central Services	(1,648)
OPI Central Services	(1,790)
DEQ Indirect Cost Pool	(4,239)
Payroll Processing	(2,293)
Investment Division	(2,186)
Aircraft Operation	(1,150)
Justice Legal Services	(503)
Personnel Training	(285)
Debt Collection	(61)
Other Internal Services	(389)
Enterprise Fund	
State Lottery	\$ (2,390)
Subsequent Injury	(1,605)
Secretary of State Business Services	(482)
Local Government Audits	(37)

- (1) The allocation of net pension and OPEB liabilities is a significant factor in creating these deficits. For more detail related to these liabilities, see Notes 6 and 7 respectively.

NOTE 14. MAJOR PURPOSE PRESENTATION

Special Revenue and Fund Balances Classifications by Purpose – In the governmental fund financial statements, classifications of special revenue fund revenues and fund balances are presented in the aggregate. The tables presented below further display the special revenue fund revenues and fund balances by major purpose for the year ending June 30, 2017.

	State Special Revenue By Source (in thousands)						Total
	General Government	Public Safety	Transportation	Health and Human Services	Education	Natural Resources	
Licenses/permits	\$ 67,136	\$30,997	\$ 21,363	\$ 1,363	\$ 166	\$ 78,961	\$ 199,986
Taxes	204,878	4,250	231,301	-	(13)	17,505	457,921

Unassigned	47,933	-	-	-	-	-	47,933
Total fund balance	<u>\$66,984</u>	<u>\$1,581,457</u>	<u>\$12,078</u>	<u>\$1,094,251</u>	<u>\$725,458</u>	<u>\$439,356</u>	<u>\$3,919,584</u>

(1) The 2017 Legislature projected \$112.0 million of unassigned fund balance for fiscal year 2017.

NOTE 15. RELATED PARTY TRANSACTIONS

The Montana Board of Regents, which governs the Montana Guaranteed Student Loan Program (MGSLP), guarantees loans owned by the Montana Higher Education Student Assistance Corporation (MHESAC), a nonprofit corporation operating exclusively for the purpose of acquiring student loans. MHESAC has no employees. Its business operations are managed by the Student Assistance Foundation (SAF). Approximately 68.36%, or \$745.5 million of MGSLP's outstanding loan volume is held by MHESAC. A Board of Regents board member is also on the board of MHESAC.

The Department of Administration transitioned from a full member to an associate member of the Montana Association of Health Care Purchasers (MAHCP) effective January 1, 2016. This membership expired on December 31, 2016. Associate membership does not require a membership fee, but no longer provides a seat on the board. DOA also paid \$0.71 per pharmacy script to MAHCP for administration of the URx program, which includes the Ask-A-Pharmacist Program, for the period July 1, 2016, through December 31, 2016. The relationship with MAHCP was terminated as of January 1, 2017.

The Montana School for the Deaf and Blind is associated with a foundation, which is a nonprofit organization outside of state government. The school's foundation is governed by a board of directors that yearly approves a budget for the financial support to be provided to the school. This budget defines the allowable expense categories for the year. A school employee is the person approving the expenses to be paid by the foundation based on its budget. The employee submits the approved invoices to the foundation's bookkeeper, who then prepares the checks and submits them to a board member who reviews backup documentation and signs the checks.

The Department of Labor and Industry Workforce Services Division rents space in Libby, MT from Mineral Plaza, LLC, in which one of the owners is Johnette Watkins, a local job service manager. The term of the lease is four years beginning July 1, 2013, and ending June 30, 2017. The annual lease amount is currently set at \$21,330.

NOTE 16. CONTINGENCIES

Litigation

The State is party to legal proceedings, which normally occur in government operations. The legal proceedings are not, in the opinion of the State's legal counsel and the Department of Administration, likely to have a material adverse impact on the State's financial position, except where listed below.

In State of Montana v. Philip Morris, Inc., No. CDV 97-306 (Mont. 1st Jud. Dist. Lewis & Clark County), the State of Montana filed various claims against six tobacco manufacturers seeking recovery of an unspecified amount of damages, penalties, and attorney's fees. The lawsuit was resolved eventually through two settlements. The State first settled its claims against one of the manufacturers, Liggett & Meyers, Inc., for \$1 million to be paid over a 20-year period. Next, Montana was among the Settling States that signed onto the 1998 Master Settlement Agreement (MSA) and settled its claims against the remaining manufacturers for a base settlement amount of \$832 million payable over 26 years. The base amount was augmented by \$90 million in 1999, with the additional amount to be paid in equal installments over a 10-year period beginning in 2007 and ending in 2017.

The settlement provides that the cigarette manufacturers may offset, against their payment in any year, certain amounts of money if it is found that the original settling manufacturers (known as OPMs) have lost more than 2% of their national market share to non-settling manufacturers (known as NPMs), and that the disadvantages imposed by the settlement were a "significant factor" in the market share loss. The settlement further provides that the offset, known as the "NPM adjustment," may not be taken against the payments to any state that has enacted a "qualifying statute" and diligently enforced the statute during the year in question. Montana enacted such a qualifying statute in 1999, Section 16-11-401 to -404, MCA, and complimentary legislation in 2003, Section 16-11-501 to -512, MCA.

In March 2006, a determination was made (pursuant to the settlement) that the OPMs had lost sufficient market share in 2003 to trigger an NPM adjustment analysis, and that disadvantages caused by the settlement were a significant factor in the market share loss. Similar findings have been made or agreed to for years 2004 through 2017. The State filed a motion in the Montana lawsuit seeking a declaration that it diligently enforced its qualifying statute during 2003. The OPMs moved to compel arbitration of the question. The First Judicial District Court ordered arbitration, but was overruled on appeal to the Montana Supreme Court. Virtually all of the other Settling States filed similar motions or new actions in their various court systems preferring to litigate their diligent enforcement disputes in court rather than in the tobacco companies' proposed nationwide arbitration. Montana was the only state to prevail on its argument against arbitration before its highest state court. Montana then successfully defended the favorable ruling from a petition for rehearing in Montana and ultimately a *certiorari* petition to the U.S. Supreme Court filed by tobacco companies which the Court rejected.

Simultaneously, arbitration between the other Settling States and the tobacco companies commenced and proceeded to discovery. After the U.S. Supreme Court denied *cert* regarding Montana's participation in the arbitration, the tobacco companies sought and received a stay of Montana's litigation pending completion of the nationwide arbitration, effectively shutting Montana out of any opportunity for input or influence over standards for determining what constitutes "diligent enforcement," and potentially subjecting Montana to whatever standards may ultimately result from the ongoing nationwide arbitration for lack of any alternative interpretative precedent. Thereafter, the Montana Supreme Court granted Montana's writ for supervisory control, overturned the stay, and allowed the State's district court action to proceed to discovery.

The Montana litigation ended with entry of a stipulated consent decree on June 25, 2012, reflecting the tobacco companies' determination after initial discovery that they would not contest Montana's diligent enforcement during 2003. In the nationwide arbitration, and as applied to Montana's consent decree, a "no contest" determination for an individual state means that state would not participate in the NPM Adjustment for 2003, (*i.e.*, as a "no contest" state Montana had no reduction to its annual OPM settlement payments for 2003).

However, the "no contest" for 2003 has no precedential effect in any subsequent year for Montana or any other state's case. Accordingly, Montana was not subject to the 2003 NPM Adjustment, but the consent decree specifically

articulated that Defendants' consent to its terms "is not a factual concession that Montana, in fact, did or did not diligently enforce the Montana Qualifying Statute in 2003 or any other year."

Despite Montana's successful defense of its 2003 enforcement actions, no precedential protections exist, and the State remains vulnerable to further expected, litigation regarding its diligent enforcement in 2004-2017, for which years the OPMs have already received a determination that MSA terms were a "substantial factor" reducing their market share and triggering an NPM Adjustment analysis with the potential to reduce annual payments for those Settling States which failed to diligently enforce their statutes.

Factual arguments exist to show that Montana enacted a qualifying statute within the meaning of the MSA, which was in full force and effect and diligently enforced during 2004-2016 and thereafter to date. However, legal and procedural uncertainties exist that make an adverse determination possible. An adverse determination on the diligent enforcement issue could result in the loss of some or all of the MSA annual payments to the State for years 2004-2017, which would be recouped through an offset of payments due to Montana in future years. The OPMs will assert claims for NPM adjustments for future years as well. The outcome of these claims is also uncertain.

In 2015, certain Settling States and certain tobacco product manufacturers commenced multi-state arbitration of the issue of diligent enforcement for calendar year 2004. Montana is not a party to this arbitration. Montana filed a Declaratory Judgement action in March 2017, in the same docket in the First Judicial District, to determine the State's diligent enforcement for calendar year 2004. Trial is currently set for June 2018.

PPL v. Montana involves ownership of sections of riverbed on the Missouri, Clark Fork and Madison rivers. The case originated in 2003, when a group of parents of school age children sued PPL in Federal Court alleging that the company must pay rent for the use of state owned riverbeds to generate hydroelectric power. After the Federal Court dismissed the case for lack of jurisdiction, PPL filed an action in state district court seeking a declaration that the state could not charge them rent for use of the riverbeds at issue. The state intervened in the case and counterclaimed for a declaration that PPL and its co-plaintiffs unlawfully occupied state lands and must compensate the State land trust on behalf of its public beneficiaries for the use of those lands. The legal test for ownership of the riverbeds is whether the rivers at issue were navigable at the time of statehood. Based upon the historical record, the District Court granted the State summary judgment on the question of navigability and the case proceeded to trial on the issue of compensation for use of trust lands. In June of 2008, the Court issued its ruling and ordered that PPL owed the state almost \$41 million for past use of the riverbeds.

PPL appealed the decision to the Montana Supreme Court. The case was briefed and argued before the Court, and in March of 2010, the Montana Supreme Court issued a decision upholding the district court's finding of navigability and determination of compensation.

PPL appealed the case to the United States Supreme Court. The case was briefed and argued, and in February of 2012, the Court reversed the Montana Supreme Court's decision. The United States Supreme Court concluded that the Montana courts had applied an incorrect legal standard for determining a river's navigability. The Court clarified that navigability had to be determined on a segment-by-segment basis. The Court remanded the case for further proceedings, and the case currently is pending in the Montana First Judicial District, Lewis and Clark County, Judge Michael McMahon presiding. The cause number is CDV 2004-846. Additional detail is provided below as the case has been remanded to the United States District Court, District of Montana, Helena Division.

The most obvious impact of the Supreme Court's decision is that the State is no longer entitled to the \$41 million judgment. The monetary amount that the State may be entitled to depends on the navigability of the rivers, which will have to be determined under the Supreme Court's segment-by-segment approach. Going forward, the litigation will focus on applying the Supreme Court's segmentation approach to determine the navigable reaches of the Madison, Clark Fork, and Missouri Rivers. At this stage, it is difficult to predict an outcome on this litigation.

A less obvious financial impact is the bill of costs that PPL submitted to the district court following the remand. PPL requested that the district court tax the State of Montana with \$1.2 million for PPL's costs relating to the appellate proceedings. All but approximately \$31,000 relate to premiums that PPL paid for a supersedeas bond in support of staying the \$41 million judgment. In May 2012, the State filed its response to PPL's bill of costs and agreed to costs for \$31,263. However, the State moved the court to deny PPL's request for costs related to the supersedeas bond. The

parties stipulated to hold this issue in abeyance until the court is able to rule on all remaining matters in the case. Counsel for the State has agreed to release the supersedeas bond. In the opinion of counsel, there are good legal arguments that support the State's position that it should not be required to pay the supersedeas bond premiums; however, legal and procedural uncertainties exist that make an adverse determination reasonably possible.

This case, also known as State of Montana v. Talen Montana, LLC et al. (Cause No. CV 16-35-H-DLC-JCL), was remanded to the United States District Court, District of Montana, Helena Division, and carries on with the Honorable Dana L. Christensen, United State Judge, assigned to further proceedings and entry of judgement. Several procedural motions have taken place since the prior fiscal year-end, but none that require the State to revise its earlier held opinion that no further potential liability to the State is expected relative to this action and no additional updates are necessary in regard to the outstanding litigation.

Spoklie v. Montana Department of Fish, Wildlife and Parks (Spoklie), Sheridan County Docket No. 11013, is the final pending case challenging the constitutionality of Initiative Measure 143 (I-143), which banned the issuance of new licenses for game farms in Montana, prohibited the transfer of existing licenses, and prohibited game farm licenses from allowing the shooting of game farm animals on a game farm for a fee or other remuneration. The State moved for summary judgment and that motion is still pending. In the opinion of counsel, good defenses exist to all claims, and the possibility of an outcome adverse to the state is very remote.

Spoklie is the last in a long line of cases that were filed after passage of I-143. The following cases have been concluded in favor of the state: Kafka v. Montana Department of Fish Wildlife, and Parks, Hill County Docket No. DV-02-059, Buhmann et al. v. State of Montana et al., Lewis and Clark Docket No. DV-2002-555, Royal Tine Ranch v. State, Flathead County Docket No. DV-02-606C, and Mesaros v. Department of Fish, Wildlife and Parks, Cascade County Docket No. BDV 03-0119. Wallace v. State of Montana, Ravalli County Docket No. 02-254, and Bowman v. Montana Fish, Wildlife and Parks, Fergus County Docket No. DV-2002-02, were previously dismissed without prejudice and have not been refiled. No other updates in relation to this pending action are known at this time.

Diaz et al. v. Blue Cross and Blue Shield of Montana et al. (Diaz), was a lawsuit filed in the Montana First Judicial District Court, Lewis and Clark County, Cause No. BVD-2008-956, in October 2008, by plaintiffs Jeanette Diaz, Leah Hoffman-Bernhardt, and Rachel Laudon, individually, and on behalf of others similarly situated, naming Blue Cross and Blue Shield of Montana (BCBS), New West Health Services (New West), Montana Comprehensive Health Association, State of Montana (State) as defendants. The complaint alleges that the defendants have violated the made-whole laws of Montana and illegally given themselves subrogation rights.

On June 12, 2009, Plaintiffs filed with the District court a motion for class certification. The District Court Judge denied Plaintiffs' motion for class certification on December 16, 2009. Plaintiffs appealed this decision to the Montana Supreme Court. As part of the review of the underlying decision denying class certification, the Montana Supreme Court remanded the case to the District Court to determine the question of whether the made-whole laws, codified in Section 2-18-902 and 33-30-1102, MCA, apply to the various types of third-party administrators (TPAs) at issue in Diaz. The District Court held that these laws do not apply to TPAs. Plaintiffs appealed this decision.

On December 21, 2011 the Supreme Court issued its decision, holding that the District Court abused its discretion in denying a class action and that BCBS and New West, as TPAs of the State's health plan, are not subject to the made-whole laws as "insurers" under Section 2-18-901 to -902, MCA, or under a third party beneficiary theory.

On June 20, 2012, the District Court ruled on the State's summary judgment motion seeking an order from the court that the State has not violated the made-whole laws in the administration of its health plan. The court denied the State's motion, ruling that the State is an insurer for the purposes of the made-whole laws and that it must conduct a made-whole analysis before exercising and subrogation/coordination of benefits rights. The State filed with the District Court a motion requesting that the court certify its decision to the Montana Supreme Court. The District Court granted the motion, and the Montana Supreme Court, over Plaintiffs' objection, ultimately agreed in a November 27, 2012, Order to hear this issue. The Plaintiffs also appealed to the Montana Supreme Court the District Court's definition of the class action.

On August 6, 2013, the Montana Supreme Court issued its opinion, affirming the Montana First Judicial District Court's decision defining the class action to include only those State benefit plan members who had timely filed claims for covered benefits within eight years before the filing of the Plaintiffs' complaint.

On November 6, 2013, the Montana Supreme Court issued its opinion, affirming the District Court's June 20, 2012, decision that the applicable made-whole laws apply to the State benefit plan.

On September 8, 2014, the District Court issued an order ruling on several motions that the parties had filed. The principal rulings were: (i) the Court authorized Plaintiffs to proceed with additional discovery to determine if the class definition should be altered or amended; (ii) given its order to allow additional discovery, the Court held in abeyance its decision on the State's Motion for Summary Judgment requesting that the class be limited to those who timely filed claims within the one-year filing restriction contained in the State's policy; (iii) the Court granted the Plaintiffs' motions asking the Court to require the State conform its health plans, procedures, notices and practices to comply with the Montana Supreme Court's rulings in this case and to pay covered medical expenses, await the resolution of claims against liability carriers, and then conduct a made-whole determination before it can exercise subrogation or accept reimbursements from its members or providers; and (iv) the Court ordered the parties to develop a class notice to be sent to past and current plan members dated back to eight years before this suit was filed. The State and Plaintiffs' counsel are currently working on the notice.

On April 13, 2015, the District Court issued an Order on Interest to Be Paid, requiring the State to include in the payments ultimately made to class members' interest at the rate of 10% per annum. For claims arising before December 24, 2009, interest will begin 30 days following the Montana Supreme Court's decision in Blue Cross and Blue Shield of Montana, Inc. v. Montana State Auditor. For any claims arising after December 24, 2009, interest will begin starting on the day the underlying medical expenses were incurred.

On October 5, 2015, the Plaintiffs filed with the District Court a motion directing the State to pay attorney fees arising from the class action suit. On November 9, 2015, the District Court issued an order denying Plaintiffs' motion for attorney fees.

On December 14, 2015, the District Court issued an order certifying that its orders concerning interest and attorney fees were final for purposes of an appeal to the Montana Supreme Court. On January 12, 2016, the Plaintiffs filed a Notice of Appeal with the Montana Supreme Court, appealing the interest and attorney fee orders.

Pursuant to the Montana Supreme Court's mandatory mediation process, the parties reached a settlement on attorney fee payments; however, the parties did not reach agreement on the interest issue. On October 25, 2016, the Montana Supreme Court issued its ruling on the interest issue, finding that November 14, 2009, is the date that interest commences; and, for claims arising after November 14, 2009, interest will begin starting on the day the underlying medical expenses were incurred.

As of June 30, 2016, the State booked an accrual of approximately \$1.5 million, which includes a base payment plus interest consistent with the District Court's April 13, 2015, order. Interest will be recalculated based on the Supreme Court's October 25, 2016, decision.

On April 28, 2017, the District Court appointed a Special Master to consider and resolve issues regarding expanding the class to persons with unsubmitted claims; whether to include claims after 2009; whether the State must identify members from third party administrators other than Blue Cross/Blue Shield; whether, if at all, the State must reform its systematic practices; supervising the payment and notice process; which party or parties should pay the Special Master for her time and expenses; whether the District Court should approve a partial payment of attorney fees; setting a time frame for making claims; setting a time for ending the class action; determining payment of residual funds; and any other issues as necessary to facilitate the swift and equitable resolution of the case. The Special Master has held several hearings regarding these issues and a recommended decision is expected to be issued in early 2018.

As of June 30, 2017, the State paid Plaintiffs \$1.4 million in base payments plus interest. Since the case is ongoing, the State does not have sufficient information to determine the ultimate cost to the State.

Kohoutek, Inc. v. Montana involves a class action constitutional challenge to the state's statute governing compensation for mandatory case-lot sales of liquor. Agency liquor stores are required by statute to provide an 8% discount to liquor licensees for sales of unbroken case-lots. Section 16-2-101(2)(b)(ii)(B), MCA, provides for a weighted average discount ratio to offset for some or all of this mandatory case lot discount. The weighted average discount ratio is based on fiscal year 1994 sales. Plaintiffs contend that this provision, rooted in 1994 rather than based on actual sales, violates their rights to substantive due process and equal protection, and constitutes a taking.

Plaintiffs filed a Complaint for Declaratory, Injunctive, and Class Relief on March 25, 2014, before the Eighth Judicial District Court, ADV-14-181. The District Court for the Eighth Judicial District granted class certification by Order dated August 21, 2014. The case has been bifurcated into two parts: constitutionality and damages. The Court heard oral argument on the Plaintiffs' Motion for Partial Summary Judgment, addressing its constitutional claims, on January 20, 2015, and will decide on that issue in the near future.

On May 28, 2015, the District Court determined that Section 16-2-101(2)(b)(ii)(B), MCA, violated the plaintiffs' rights to substantive due process and to equal protection of the law because the state has continued to use 1994 sales information to reimburse agency liquor stores for the mandatory case lot discounts.

On August 2, 2016, District Judge Greg Pinski ruled the damages due to the class is \$14.7 million. Further proceedings were held on December 2, 2016, to determine whether interest and attorney fees are due to the plaintiffs; as of this action, it was determined that \$8.7 million would be awarded in attorney's fees and \$2.8 million in interest. Total judgement against the State is \$26.2 million, but this amount has been stayed pending appeal to the Montana Supreme Court.

Langford v. Bullock (Cause # 93-CV-46) is a civil rights case over conditions of confinement at Montana State Prison (MSP) in Deer Lodge, MT. The court imposed a consent decree against the department in 1994, with continued monitoring by the court until the Department is in full compliance. The consent decree obligates the State to come into full compliance with the Americans with Disabilities Act. Since about 2014, the department has assumed the additional responsibility to pay attorney's fees for Plaintiffs' counsel (ACLU), which have not been submitted since 2008. Currently, the parties reached a Class Action Settlement signed February 14, 2017, which includes the Department's agreement to pay attorney's fees. During settlement negotiations, the Class attorneys indicated they would be seeking in the neighborhood of \$1.1 million in attorney's fees for a period spanning from 2008 until close. The Department will contest that amount before the Court. That projected sum does not include the anticipated two-year monitoring period as well. At this time, the department cannot specify an anticipated amount of financial obligation.

Disability Rights Montana v. Batista (Cause # CV-15-22) is a civil rights case filed by the ACLU of Montana on behalf of Plaintiff, alleging deliberate indifference in the provision of mental health care to seriously mentally ill inmates at MSP. The district court dismissed the case for failure to state a claim, which order has been appealed by Plaintiffs to the Ninth Circuit Court of Appeals. The department has exchanged settlement proposals and has met with the Plaintiffs and their counsel to discuss potential settlement. The Plaintiff's chances of success are fair, given the current political climate. Plaintiffs have made a number of unreasonable demands that would cost the Department millions of dollars and at least \$800.0 thousand in attorney's fees and undisclosed expert witness fees. At this time the department cannot specify an anticipated amount of financial obligation.

Fisk v. Montana Department of Corrections, (Cause # ADV-2016-962): An employment case filed by a current employee at Montana State Prison, alleging discrimination by gender and military status. This matter is currently set for trial to begin January 19, 2018. The plaintiff is seeking over \$800.0 thousand in monetary damages; if successful, a court would likely order an award of attorneys' fees as well. The plaintiff's chances of success are: poor to fair.

The Public Employee Retirement Board (PERB) has one item of outstanding litigation in relation to the Sheriffs' Retirement System (SRS). Refer to Note 6, section I for additional disclosure in relation to this legal proceeding.

The Montana State Fund, a discretely presented component unit of the State, has two items of litigation in relation to their operations and underlying statutory authority governing the program. Refer to Note 18, section O for additional disclosure in relation to these legal proceedings.

Federal Contingencies

Food Distribution Program – The amount reported for Food Distribution programs (CFDA #10.555, #10.565, #10.567, #10.569, and #10.570) represents the dollar value of food commodities distributed to eligible recipients during the year. The U.S. Department of Agriculture provides the current value of the commodities used by the State to compute the amount reported. The amount of funds received to administer the program is also included in the reported amount. The State also distributes food commodities to other states in the western region of the United States, the value of which is excluded from the reported amounts. During fiscal year 2017, the State distributed \$1.2 million of food commodities under CFDA #10.567 to other states.

The State of Montana distributed \$10.6 million in commodities in fiscal year 2017. The value at June 30, 2017, of commodities stored at the State’s warehouse is \$1.7 million for which the State is liable in the event of loss. The State has insurance to cover this liability.

Miscellaneous Contingencies

Loan Enhancements – As of June 30, 2017, the Board of Investments (BOI) had provided loan guarantees from the Coal Severance Tax Permanent Fund to the Economic Development Bonds Fund and the Facility Finance Authority (a component unit of the State of Montana), totaling \$179.3 million. The BOI’s exposure to bond issues of the Economic Development Bonds Fund was \$107.9 million, while exposure to bond issues, surety bonds, and designated loans of the Facility Finance Authority was \$71.4 million. The BOI has not been held responsible on any loan guarantee in the past.

Gain Contingencies – Certain natural resource and corporate tax assessments are not reported on the State’s financial statements because they are being protested administratively. As of June 30, 2017, the following assessments (by fund type) were outstanding (in thousands):

Taxes	General Fund
Corporate Tax	<u>\$37,071</u>

Collectability of these contingencies is dependent upon the decisions of the court, other authorities, or agreed upon settlements. The corporate tax assessments include material estimates that could result in a significant reduction of the tax assessed once actual numbers are provided. Interest related to corporate tax assessments is distributed to the General Fund and is included in the assessment total above.

Loss Contingencies – Certain corporations have requested refunds that are not reported on the State’s financial statements as of June 30, 2017. The corporations have appealed the department’s decision to deny or adjust the refund. As of June 30, 2017, these include \$6.5 million of General Fund corporate tax refunds.

Certain companies have protested property taxes that have been included as revenue on the State’s financial statements as of June 30, 2017. As of June 30, 2017, these include \$3.6 million of protested property taxes recorded in the General Fund and \$4.1 million recorded in the State Special Revenue Fund. In addition, certain companies have appealed an additional \$5.6 million in regular property taxes recorded in the General Fund on the State’s financial statements.

NOTE 17. SUBSEQUENT EVENTS**Investment Related Issues**

During fiscal year 2017, Board of Investments (BOI) requested a 100% redemption in the amount of \$174.0 million from one manager, pertaining to investments from Consolidated Asset Pension Pool (CAPP), Trust Funds Investment Pool (TFIP), and All Other Funds (AOF). Since June 30, 2017, redemptions in the amount of \$67.6 million have been received. BOI is confident and it is understood that the full redemption would be received over a reasonable time period.

Since June 30, 2017, BOI made additional commitments to fund loans from the INTERCAP loan program in the amount of \$10.0 million.

Since June 30, 2017, BOI has received recovery payments associated with the Structured Investment Vehicle (SIV) related assets in the amount of \$1.7 million, representing \$1.1 million of principal and \$600.0 thousand of interest.

Since June 30, 2017, BOI has committed an additional \$490.0 million to alternative equity partnerships within CAPP, with allocations of \$145.0 million within the Private Equity Asset Class, \$145.0 million within the Natural Resource Asset Class and \$200.0 million within the Real Estate Asset Class of CAPP.

On August 1, 2017, BOI reallocated assets held within a small cap domestic equity fund to four of BOI's existing small cap domestic equity managers. The transfer of securities and cash occurred within the Domestic Equity Asset Class of the CAPP. The approximate market value of the transition was \$120.0 million.

On August 22, 2017, BOI approved two Qualified Zone Academy Bonds (QZAB) loans in the amount of \$1.4 million.

As of August 22, 2017, BOI had approved an additional loan guarantees from the Coal Severance Tax Fund to Facility Finance Authority (FFA) totaling \$15.0 million. BOI also approved an increase of \$4.0 million to a previously approved \$10.0 million commercial loan commitment. Since June 30, 2017, the BOI has received an additional \$28.8 million in loan reservations from Montana lenders.

On August 30, 2017, BOI terminated one manager in the Domestic Equity Asset Class with the CAPP. A transition manager was hired to liquidate the portfolio and cash was transferred to BOI's Cash Asset Class within the CAPP, which in turn purchased STIP. The approximate market value of the transition was \$179.0 million.

In November 2017, BOI reallocated assets held within an international small cap fund to three of BOI's existing international small cap equity managers. The transfer of securities and cash occurred within the International Equity Pension Asset Class of CAPP. The approximate market value of the transition was \$150.0 million.

In November 2017, the Governor called the Montana legislature into special session to address a significant budget shortfall in the State's General Fund. Senate Bill 4 was passed into law and directs BOI to apply a 3% charge against the average total investments of the State Fund in excess of \$1.0 billion providing certain conditions are met. BOI is directed to transfer money from this charge on or before April 1, 2018, and April 1, 2019, to the State's Fire Suppression Fund. BOI is not providing additional investment services in making the transfer as required by the Act. Additional information about the special session is provided below.

In December 2017, two new managers were hired in the High Yield Pension Asset Class. Each manager was funded with \$50.0 million.

Other Subsequent Events

On July 23, 2017 and August 11, 2017, Governor Bullock declared a fire emergency in the state. The governor issued an executive order announcing Montana to be in a state of disaster on September 1, 2017. As of October 26, 2017, State's estimated fire costs for the calendar year fire season was approximately \$71.7 million.

Senate Bill 261 (SB 261), passed during the 2017 Legislative Session, contained requirements for the Department of Administration to determine, by August 15, 2017, the unaudited revenue for the General Fund and compare this to estimates approved by the Legislature. The bill also cut spending authority for fiscal year 2018 should the unaudited revenue balance fall below \$2.216 billion at five different intervals. As General Fund revenue was less than any threshold provided within the legislation, cuts and transfers to the General Fund totaling \$97.0 million were implemented. Additionally, SB 261 created the Budget Stabilization Reserve Fund, Montana's first formal "Rainy Day" fund. Although, due to actual revenues being less than estimated by the 65th Legislature, for the fiscal year ended June 30, 2017, no deposits were made to the Budget Stabilization Reserve Fund.

On September 18, 2017, the Board of Examiners approved the issuance of a \$1.0 million General Obligation Renewable Resource Program Bond, Taxable Series 2017A, \$3.4 million General Obligation Bond Anticipation Notes, Taxable Series 2018B, for the Drinking Water Revolving Fund Program, and \$3.1 million in General Obligation Bond Anticipation Notes, Taxable Series 2018C, for the Water Pollution Control State Revolving Fund Program.

Effective October 1, 2017 the loan servicing portion of the Montana Guaranteed Student Loan Program (MGSLP) was transferred to a federally approved national education loan servicing provider. This transfer was approved by the Montana Board of Regents in May 2017. The program will continue to offer other student financial aid-related activities for the benefit of Montana students as determined by the Montana Board of Regents. After the transfer of the loan servicing portion, MGSLP will be required to return the Federal Student Loan Reserve Fund to the US Department of Education. As of September 30, 2017, the amount of the return was \$6.6 million.

On October 24, 2017, Galen Hollenbaugh was appointed as the new Commissioner of the Department of Labor and Industry.

On November 6, 2017, Governor Bullock called for a special session of the Legislature to address an anticipated \$228.2 million General Fund deficit balance for the budget period ended June 30, 2019. The session was held from November 13 through 16, 2017. The Legislature approved revenue proposals estimated to generate an additional \$44.7 million in revenue and \$95.2 million in fund transfers and other legislation. In coordination with this, on November 14, 2017, the Governor enacted \$76.7 million in expenditure cuts under the authority granted by 17-7-140, MCA.

On January 22, 2018, a group of Montana State Fund (MSF) policyholders filed suit against the State, MSF and the Board of Investments (BOI), in Lake County District Court, in an effort to prevent BOI from charging a 3% management fee on any single investor whose average portfolio balance held by BOI is greater than \$1.0 billion. This fee was implemented as part of the revenue enhancements passed during the Legislative Special Session disclosed above.

NOTE 18. COMPONENT UNITS**A. Condensed Financial Statements**

Below are the condensed financial statements of the component units for the State of Montana as of June 30, 2017 (in thousands):

**Condensed Statement of Net Position
Component Units**

	Montana Board of Housing	Facility Finance Authority	Montana State Fund (1)	Montana State University	University of Montana	Total Component Units
Assets:						
Cash, investments and other assets	\$609,471	\$5,582	\$1,650,567	\$614,260	\$504,086	\$3,383,966
Due from primary government	-	-	-	640	1,042	1,682

(1) Includes non-employer pension revenue and payments for services provided.

(2) Montana State Fund reports their financial statements on a calendar-year basis. The information provided is for the year ended December 31, 2016.

B. Cash/Cash Equivalents and Investments

Due to the integration of funds and combined financial information, component unit cash and cash equivalents, equity in pooled investments and investments are included with the primary government in Note 3.

C. Capital Assets

The following table summarizes net capital assets reported by the discretely presented component units (in thousands). All component units, other than higher education units, are included under the "Other" caption for this schedule:

	Montana State University	University of Montana	Other	Total
Capital assets not being depreciated:				
Land	\$ 8,650	\$ 8,226	\$ 1,139	\$ 18,015

D. Other Postemployment Benefits (OPEB)

Non-university component units are included in the State of Montana benefit plan, whereas the Office of the Commissioner of Higher Education (included in the primary government otherwise) is included in the Montana University System benefit plan. For these reasons component unit OPEB information is included in Note 7.

E. Risk Management

Montana State Fund (MSF or New Fund) is the only component unit risk pool. Unpaid claims and claim adjustment expenses are estimated based on the ultimate cost of settling the claims including the effects of inflation and other societal/economic factors. There are no significant reductions in insurance coverage from the prior year, nor any insurance settlements exceeding insurance coverage for the last three years for MSF. This fund uses the accrual basis of accounting. Montana State Fund investments are recorded at fair value, and the premiums and discounts are amortized using the scientific interest method over the life of the securities.

(1) Montana State Fund (MSF) – This fund provides liability coverage to employers for injured employees who are insured under the Workers Compensation and Occupational Disease Acts of Montana and workers compensation claims occurring on or after July 1, 1990. MSF is a self-supporting, competitive State fund, and functions as the guaranteed market. At December 31, 2016, approximately 24,200 employers were insured with MSF. Anticipated investment income is considered for computing a premium deficiency, and employers must pay premiums to MSF within specified time frames.

An actuarial study prepared by Willis Towers Watson, as of December 31, 2016, estimated the cost of settling claims that have been reported but not settled, and claims that have been incurred but not reported. Due to the fact that actual claim costs depend on such complex factors as inflation and changes in the law, claim liabilities are recomputed periodically using a variety of actuarial and statistical techniques in order to produce current estimates that reflect recent settlements, claim frequency, and other economic and societal factors.

A provision for inflation is implicit in the calculation of estimated future claim costs because reliance is placed both on actual historical data that reflect past inflation and on other factors that are considered to be appropriate modifiers of past experience. As of December 31, 2016, \$921.5 million of unpaid claims and claim adjustment expenses were presented at face value.

Section 39-71-2311, MCA, requires MSF to set premiums, at least annually, at a level sufficient to insure adequate funding of the insurance program during the period the rates will be in effect. It also requires MSF to establish a minimum surplus above risk-based capital requirements to support MSF against risks inherent in the business of insurance.

For the year ended December 31, 2016, MSF ceded premiums to other reinsurance companies to limit the exposure arising from large losses. These arrangements consist of excess of loss contracts that protect against individual occurrences over stipulated amounts, and an aggregate stop loss contract which protects MSF against the potential that aggregate losses will exceed expected levels expressed as a percentage of premium. The excess of loss contract provides coverage up to \$100.0 million in which MSF retains the first \$5.0 million for the first layer of reinsurance coverage. The excess of loss protection applies to an individual occurrence with the maximum of \$5.0 million on any one life.

The term of the current aggregate stop loss contract was July 1, 2014 through December 31, 2016. The contract provides coverage based on MSF's premium levels not to exceed 15% of the subject net earned premium. In the event reinsurers are unable to meet their obligations, under either the excess of loss contracts or the aggregate stop loss contract, MSF would remain liable for all losses, as the reinsurance agreements do not discharge MSF from its primary liability to the policyholders.

Premium revenue was reduced by premiums paid for reinsurance coverage of \$10.4 million during the year ended December 31, 2016.

Estimated claim reserves were reduced by \$5.1 million as of December 31, 2016, for the amount of reinsurance estimated to be ultimately recoverable on incurred losses due to the excess of loss reinsurance contract and an additional \$13.1 million for the amount of reinsurance estimated to be ultimately recoverable on incurred losses due to the aggregate stop loss contract.

(2) Changes in Claims Liabilities – As indicated above, this fund establishes liabilities for both reported and unreported insured events including estimates of future payments of losses and related claim adjustment expenses. The following table presents changes (in thousands) in the aggregate liabilities for Montana State Fund net of estimated reinsurance recoverable. The information presented is at face value and has not been discounted.

	Year Ended December 31, 2016
Unpaid claims and claim adjustments expenses at beginning of year	\$ 900,296
Incurred claims and claim adjustment expenses:	
Provision for insured events of the current year	147,194
Increase (decrease) in provision for insured events of prior years	(64)
Total incurred claims and claim adjustment expenses	147,130
Payments:	
Claims and claim adjustment expenses attributable to insured events of the current year	(31,040)
Claims and claim adjustment expenses attributable to insured events of prior years	(94,854)
Total payments	(125,894)
Total unpaid claims and claim adjustment expenses at end of year	\$ 921,532

F. Capital Leases/Installment Purchases

Obligations under capital leases/installment purchases at June 30, 2017, were as follows (in thousands):

Fiscal Year Ending June 30	Discretely Presented Component Units
2018	\$216
2019	142
2020	93
2021	45
2022	9
Total minimum payments	505
Less: interest	(49)
Present value of minimum payments	\$456

G. Operating Leases

Future rental payments under operating leases at June 30, 2017, are as follows (in thousands):

Fiscal Year Ending June 30	Discretely Presented Component Units
2018	\$ 4,324
2019	2,870
2020	2,450
2021	1,457
2022	1,066
2023-2027	2,297
Total future rental payments	<u>\$14,464</u>

H. Debt Service Requirements

Debt service requirements of discretely presented component units at June 30, 2017, were as follows (in thousands):

Year Ended June 30	Montana Board of Housing		Montana State University		University of Montana	
	Principal	Interest	Principal	Interest	Principal	Interest
2018	\$ 14,860	\$ 14,842	\$ 10,354	\$ 5,965	\$ 8,506	\$ 3,293
2019	15,355	14,544	11,841	5,721	8,825	2,964
2020	15,745	14,194	9,349	5,401	9,220	2,611
2021	16,240	13,798	9,372	5,086	9,565	2,227
2022	16,655	13,350	9,727	4,761	10,031	1,828
2023-2027	94,515	58,314	32,564	19,488	34,939	4,122
2028-2032	101,360	40,781	24,935	13,251	8,585	911
2033-2037	87,080	22,603	23,213	8,063	960	38
2038-2042	61,759	8,873	16,747	4,026	-	-
2043-2047	17,350	1,219	8,799	462	-	-
2048-2052	130	3	-	-	-	-
Total	<u>\$ 441,049</u>	<u>\$ 202,521</u>	<u>\$ 156,901</u>	<u>\$ 72,224</u>	<u>\$ 90,631</u>	<u>\$ 17,994</u>

I. Summary of Changes in Long-term Liabilities Payable

Long-term liability activity of discretely presented component units for the year ended June 30, 2017, was as follows (in thousands):

	Beginning Balance (3)	Additions	Reductions	Ending Balance	Amounts Due Within One Year	Amounts Due In More Than One Year
<u>Discretely presented component units</u>						
Bonds/notes payable						
Montana Board of Housing	\$ 477,014	\$ 42,643	\$ 73,040	\$ 446,617	\$ 14,860	\$ 431,757
Montana State University (MSU)	163,939	7,253	11,025	160,167	10,328	149,839
University of Montana (UM)	100,386	-	8,340	92,046	8,540	83,506
Total bonds/notes payable (1)	741,339	49,896	92,405	698,830	33,728	665,102
Other liabilities						
Lease/installment purchase payable	550	156	250	456	192	264
Compensated absences payable	61,764	32,297	30,193	63,868	31,969	31,899
Arbitrage rebate tax payable	761	217	417	561	304	257
Estimated insurance claims	900,296	147,129	125,894	921,531	128,265	793,266
Due to federal government	32,501	318	310	32,509	-	32,509
Derivative instrument liability	6,097	-	1,909	4,188	-	4,188
Reinsurance funds withheld	89,571	-	13,832	75,739	-	75,739
Unearned compensation	391	-	-	391	-	391
Net pension liability	178,700	42,099	14,153	206,646	-	206,646
OPEB implicit rate subsidy (2)	114,894	10,899	3,548	122,245	-	122,245
Total other liabilities	1,385,525	233,115	190,506	1,428,134	160,730	1,267,404
	<u>\$2,126,864</u>	<u>\$283,011</u>	<u>\$282,911</u>	<u>\$2,126,964</u>	194,458	1,932,506
Long-term liabilities of Montana University System component units (4)					(105)	2,595
Total discretely presented component units' long-term liabilities					<u>\$194,353</u>	<u>\$1,935,101</u>

- (1) When applicable, this amount includes unamortized discounts and unamortized premiums.
- (2) The OPEB plan allows retirees to participate, as a group, at a rate that does not cover all the related costs. This results in the reporting of an "implicit rate" subsidy in the related financial statements. While this liability is disclosed for financial purposes, it does not represent a legal liability of the State, or any of its component units.
- (3) Beginning balances are taken from component unit financial statements.
- (4) Interentity transaction eliminations between Montana University System component units for debt shown in the component unit information can cause negative balances in component unit information.

J. Refunded and Early Retired Debt

Defeased Debt Outstanding

The University of Montana has defeased certain bond issues by placing proceeds of new bonds in an irrevocable trust. The proceeds, together with interest earned thereon, will be sufficient for future debt service payments on the refunded issues. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the University's consolidated financial statements. As of June 30, 2017, \$98.3 million of bonds outstanding were considered defeased.

K. No-Commitment Debt

Information is presented below for financing authorities participating in debt issues. The State has no obligation for this debt. Accordingly, these bonds and notes are not reflected in the accompanying financial statements.

Facility Finance Authority (FFA)

FFA is authorized to issue bonds and notes to finance projects for qualifying health care and other community-based service providers. The revenue bonds are payable solely from loan repayments to be made by eligible facilities pursuant to loan agreements, and further, from the funds created by the indentures and investment earnings thereon. The notes are payable solely from loan repayments pursuant to loan agreements. The revenue bonds and notes payable issued by FFA do not constitute a debt, liability, obligation, or pledge of faith and credit of the State of Montana, with the exception of the Montana State Hospital Project included in Note 11. At June 30, 2017, revenue bonds and notes outstanding aggregated \$947.0 million.

The Board of Investments and FFA have entered into a capital reserve account agreement for certain bond issues. See Note 16 for more information.

Montana Board of Housing (MBOH)

MBOH is authorized to issue bonds and make mortgage loans in order to finance affordable housing for Montana residents. The bonds are special limited obligations, payable solely from pledged revenues and assets of the borrower, not general obligations of MBOH. These bonds issued by MBOH do not constitute a debt, liability, obligation, or pledge of faith and credit of the State of Montana. At June 30, 2017, bonds outstanding aggregated \$36.6 million.

L. Non-Exchange Financial Guarantee

BOI provides loan guarantees from the Coal Severance Tax Fund to the Facility Finance Authority (FFA). BOI exposure to bond issues, surety bonds, and designated loans of the FFA totaled \$71.4 million as of June 30, 2017. FFA is a discretely presented component unit of the State of Montana. FFA guarantee requests are submitted to BOI for review and approval. BOI's participation, either duration or any other consideration, to either purchase bonds or loans or to lend money for deposit into FFA's statutorily allowed capital reserve account is explicitly limited by statute which requires BOI to act prudently. The guarantee requests from FFA pertain to bonds issued by FFA with a term of up to 40 years. BOI and FFA have entered into an agreement detailing repayment to BOI. BOI has not had to perform on any loan guarantee in the past.

The following schedule summarizes the activity related to the non-exchange financial guarantee during the year ended June 30, 2017 (in thousands):

Beginning Balance	Additions	Reductions	Ending Balance
\$79,875	\$32,905	\$41,364	\$71,416

M. Derivative Transactions Related to Long-term Debt

Montana State University (MSU) has two interest rate swaps as of June 30, 2017. Interest rate swaps are classified as hedging derivative instruments if the instruments meet the criteria of paragraphs 27 (a) and (b) of GASB Statement No. 53 – *Accounting and Financial Reporting for Derivative Instruments* (GASB 53), or as investment derivative instruments if they do not.

Derivative Description	Trade Date	Effective Date	Termination Date	Terms	Counterparty
\$25.75 million fixed payer swap	3/10/2005	7/21/2005	11/15/2035	Pay 3.953%, Receive SIFMA	Deutsche Bank AG
\$25.25 million basis swap	12/19/2006	11/15/2007	11/15/2035	Pay SIFMA, Receive 86.8% of 10-year SIFMA	Morgan Stanley Capital Services Inc.

As of June 30, 2017, the fixed payer swap is classified as a hedging derivative instrument under GASB 53, whereas the basis swap is an investment derivative instrument because there is no identified financial risk being hedged by the basis swap that can be expressed in terms of exposure to adverse changes in cash flows or fair values. GASB 53 includes four methods for evaluating hedge effectiveness; a governmental entity may use any of the evaluation methods outlined in GASB 53 and is not limited to using the same method from period to period. The four methods

described in GASB 53 are: consistent critical terms, synthetic instrument, dollar-offset, and regression analysis. In addition, GASB 53 permits a governmental entity to use other quantitative methods that are based on “established principles of financial economic theory.” The fixed payer swap passes the established criteria using the regression analysis methodology.

The fair values of the interest rate swaps were estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on the date of each future net settlement on the swaps. To measure non-performance risk for a derivative liability, credit spreads implied by the credit rating for debt issues by entities with similar credit characteristics were used. This is the best method available under current market conditions since MSU has no credit default swaps that actively trade in the marketplace. For a derivative asset, the adjustment for non-performance risk of counterparties was determined by analyzing counterparty-specific credit default swaps, if available. If not available, credit default swaps in the market for entities of similar type and rating were used, along with information found in various public and private information services. This analysis is used to construct a credit curve that is applied to the discount curve on the net settlement payments of the derivative.

The counterparty to the fixed payer swap had the right to terminate the swap at \$0 on December 14, 2016 (a European option); this option was not exercised. As of the trade date, the option’s value included intrinsic value and time value. The option’s intrinsic value (calculated as the difference between the at-market rate of 4.11% and the off-market rate of 3.953%) is accounted for as a loan receivable and is repaid by the off-market portion of each swap payment. On September 10, 2010, the Series J bonds were converted to index bonds. While in index mode the interest rate is reset weekly at a rate of the Securities Industry and Financial Markets Association (SIFMA) rate plus a fixed spread. The spread is based on the long-term, unenhanced rating assigned to the issuer; the current spread as of June 30, 2017, was 0.65%. The dependent variable in the regression is the interest rates of the hedged cash flows; the independent variable is the floating rates due under the hedging derivative.

The fair value of the fixed payer swap liability as of June 30, 2017, is at fair value level 2, and was based on forward SIFMA rates using the three month Libor Zero Curve, and the BMA Swaption Volatility on the AA Rated Muni Revenue Curve. The fair value of the nonhedging derivative investment is also at level 2, and was based on forward SIFMA rates using the 10-year forward BMA constant maturity swap using the three month Libor Zero Curve, and the BMA Swaption Volatility on the counterparty’s credit default swap.

The following table summarizes the reported balances as of, and the derivative instrument activity during, the year ended June 30, 2017 (in thousands):

Cash flow hedges:	Notional	Activity During 2017		Fair Values at June 30, 2017	
		Classification	Amount	Classification	Amount
Cash flow hedge –					
Pay fixed interest rate swap	\$20,475	Interest expense	\$ 18	Loan receivable	<u>\$ 250</u>
		Investment income	-	Derivative liability	<u>4,189</u>
		Deferred outflow	(1,909)		
Investment derivative –					
Basis swap	\$20,475	Investment loss	\$808	Investment (excluding interest accrued)	<u>\$ 463</u>

The objective and terms of MSU’s hedging derivative outstanding as of June 30, 2017, is as follows (in thousands):

Type	Objective	Notional amount	Effective Date	Termination Date	Cash (Paid)/Received	Terms
Pay fixed, cancelable interest rate swap	Hedge interest rate risk on Series J 2005 Bonds	\$20,475	7/21/2005	11/15/2035	-	Pay 3.953% Receive SIFMA

Credit Risk

It is MSU's policy to enter into derivative agreements with highly rated counterparties. As of June 30, 2017, counterparty ratings were A3 and Baa2 by Moody's and A- and BBB+ by Standard and Poor's (S&P). MSU manages credit risk by requiring its counterparties to post collateral in certain events. MSU is entitled to collateral from its fixed payer swap counterparty if the interest rate swap's fair value is greater than \$5.0 million and the counterparty is rated A+ or A, by S&P, or A1 or A2 by Moody's. If the counterparty to the fixed payer swap is rated A- or below, by S&P, or A3 or below by Moody's, MSU is entitled to collateral up to 100% of the swap's fair value. MSU is not required to post collateral. MSU will continue to monitor counterparty credit risk.

MSU enters into derivative agreements with multiple counterparties to limit concentration of credit risk. Currently, MSU has interest rate swaps with two different counterparties and each counterparty accounts for approximately 50% of outstanding notional. MSU monitors counterparty credit risk on an ongoing basis.

Interest Rate Risk

Interest payments on variable rate debt will typically increase as interest rates increase. MSU believes it has significantly reduced interest rate risk by entering into a pay-fixed, receive floating interest rate swap. As interest rates increase, net swap payments decrease so that changes in hedged variable-rate debt interest payments, attributable to SIFMA, are largely offset by the net swap payments.

Basis Risk

The variable-rate cash flows being hedged by the pay-fixed swap will increase or decrease as SIFMA rates increase or decrease. Because the hedged cash flows are SIFMA based and the floating receipts of the pay-fixed swap are SIFMA based, there is no basis risk.

Termination Risk

MSU or its counterparties may terminate a derivative instrument if the other party fails to perform under the terms of the contract. In addition, MSU's fixed payer swap counterparty has the right to terminate the derivative if the credit rating of MSU's unenhanced long-term revenue bond rating is withdrawn, suspended or reduced below BBB-, in the case of S&P, or below Baa3 in the case of Moody's. If such an event occurs, MSU could be forced to terminate the fixed payer swap in a liability position. As of June 30, 2017, MSU's unenhanced long-term revenue bond rating was Aa3 by Moody's and A+ by S&P.

Foreign Currency Risk

All hedging derivatives are denominated in US Dollars and therefore MSU is not exposed to foreign currency risk.

Market Access Risk

Market access risk is the risk that MSU will not be able to enter credit markets or that credit will become more costly. For example, to complete a derivative instrument's objective, an issuance of refunding bonds may be planned in the future. If at that time MSU is unable to enter credit market, expected cost savings may not be realized.

N. Related Party Transactions

Private nonprofit organizations with relations to the University of Montana (UM) include the Alumni Association, the Montana Technology Enterprise Center (MonTEC), the Montana Tech Booster Club and the Montana Tech Alumni Association.

The associations and booster club operate exclusively for the purpose of encouraging, promoting and supporting educational programs, research, scholarly pursuits and athletics at, or in connection with UM. For the years ended June 30, 2017, \$283.2 thousand was transferred from or expended by the Montana Tech Booster Club for scholarships and construction projects. In exchange, UM provides the associations and booster club with office space, staff and some related office expenses.

MonTEC was established as a nonprofit 501(C) 3 corporation in fiscal year 2001 as a result of an agreement between UM and the Missoula Area Economic Development Foundation (MAEDF). MonTEC provides low cost lease space

and business consulting to local “start-up” companies. The corporation’s board of directors is comprised equally of members appointed by MAEDF and UM.

Private nonprofit organizations affiliated with Montana State University (MSU) include the MSU-Bozeman Bookstore, Friends of KUSM, and Friends of KEMC. Friends of Montana Public Television provided \$988.9 thousand during 2017 and Friends of KEMC Public Radio provided \$802.6 thousand during 2017 in support of MSU’s television and radio stations.

O. Litigation Contingencies

Susan Hensley v. Montana State Fund Montana State Fund received a Petition for Hearing that was filed before the Workers’ Compensation Court in October 2013. The matter is Susan Hensley vs. Montana State Fund, WCC No. 2013-3235. Under House Bill 334, as passed by the legislature in 2011 and codified in section 39-71-703 (2), MCA, when a claimant receives a Class I impairment, it is not payable unless the claimant has an actual wage loss as a result of the compensable injury or occupational disease. The law was effective July 1, 2011, and applicable to claims that occurred on or after that date. The petitioner in this matter is challenging the constitutionality of section 39-71-703 (2), MCA. State Fund anticipates the chances are remote, but as with any litigated matter there is the possibility of an adverse decision. Should the statute be held unconstitutional, determined to be applicable to other claims and also determined to be retroactively applicable, potential liability is estimated to be at least \$2.2 million per year, as based on NCCI initial pricing, and current estimated business volumes. However, based on experience, costs may be substantially higher than the estimate of \$2.2 million per year.

Montana State Fund received another Petition for Hearing that was filed before the Workers’ Compensation Court. The matter is Steven Hanson vs. Montana State Fund, WCC No. 2014-3398. This is a companion case to Susan Hensley v. Montana State Fund and has been held in abeyance pending a decision in Hensley.

P. Subsequent Events

Subsequent to Montana State Fund’s (MSF) fiscal year ended December 31, 2016, the Board of Investments (BOI) decided to divest its investment in the TIAA-CREF US Cities Fund LP. Sales of the investments took place throughout calendar year 2017 and proceeds from the sales were used to repurchase similar investments. No value impairment is considered to have happened and therefore, adjustments to the investment values are not considered necessary.

In response to declining enrollment, the University of Montana’s (UM) Missoula campus implemented voluntary termination plans to reduce the percentage of its budget spent on personnel costs.

Voluntary Employment Retirement Incentive Program (VERIP)

The first of two VERIP offerings was announced in May 2017. In order to participate in the plan, faculty members had to meet the following eligibility requirements:

- Be full-time tenured faculty,
- Be age 65 years of age or older as of May 12, 2017, and,
- Be eligible to retire under Montana Teacher’s Retirement System or the Montana University System-Retirement Plan (MUS-RP) as of May 12, 2017.

Eligible faculty members who accepted the offer by July 17, 2017, received a lump sum payment equal to 50% of their FY2016-2017 general fund contract base salary.

The second VERIP offering was announced in June 2017. In order to participate in the plan, faculty members had to meet the following eligibility requirements:

- Be full-time tenured faculty,
- Be age 60-64 years of age as of May 12, 2017, and,
- Be eligible to retire under Montana Teacher’s Retirement System or the MUS-RP as of May 12, 2017.

Eligible faculty members who accepted the offer by July 28, 2017, could elect to receive either of the following:

- A lump sum payment equal to 50% of their fiscal year 2016 through fiscal year 2017 general fund contract base salary, or,
- The lump sum payment outlined above, less any deductions for premiums paid for coverage in the UM retiree health insurance plan until their 65th birthday.

Faculty members who accepted the May or June 2017 VERIP offering were terminated on July 17, 2017, or July 28, 2017, respectively. The total cost to the UM for the 14-tenured faculty who accepted the VERIP was approximately \$1.6 million.

Voluntary Severance Option (VSO)

UM announced the VSO in October 2017, which was extended to currently employed, full-time (1.0 FTE) classified staff, contract professionals, and contract administrators, whose positions are funded by the General Fund and had an initial employment date no later than October 17, 2015. The offer extended to December 6, 2017, and employees who accepted the VSO were terminated on December 31, 2017. The VSO provided for the employee to be paid an equivalent of six months of wages, at their stated salary level as of December 6, 2017, as severance in January 2018.

In addition:

- The employee retains medical and dental coverage until December 31, 2018; or,
- The employee may elect to receive a lump sum payment of \$12.6 thousand (the value of 12 months of health insurance), plus their severance payment, in lieu of remaining on the health insurance plan.

The VSO offer was accepted by 84 employees and the UM expects the cost of the plan to be approximately \$3.8 million, to be paid primarily in fiscal year 2018.

In July 2017, the Montana State University (MSU) received authorization to enter into a long-term space lease at a cost of up to \$1.7 million per year for ten years. The lessor is the MSU Innovation Campus, a subsidiary of the Montana State University Alumni Foundation. The leased facility is not yet constructed, and will be designed to meet requirements necessary to conduct classified research on the Bozeman campus. The capacity to perform classified research will qualify MSU to perform additional types of research funded by governmental grants. At the expiration of the lease term MSU will have the right of first refusal to purchase or continue leasing the property at no cost (other than operations and maintenance).

On July 12, 2017, Montana State University (MSU) issued \$21.0 million in Series 2017D bonds to refund all of the Series 2006 bonds with stated maturities in the years 2017 and thereafter and to refund all of the Series 2011M bonds with stated maturities in the years 2022 and thereafter. The refunded principal amount for Series 2006K and Series 2011M is \$8.5 million and \$12.9 million respectively. The refunding resulted in an economic gain to MSU of \$1.3 million.

On July 24, 2017, the University of Montana (UM) issued \$14.1 million of Series O 2017 Private Placement Revenue Bonds. The proceeds of the issue provide funds to construct a Living Learning Center (LLC) on the UM Tech campus in Butte.

UM will record \$14.1 million of the Series O bonds payable in fiscal year 2018. The interest rate on the revenue bonds is 3.390% over the 20-Year Term of the bonds.

The LLC is a three-story new construction building. The first two floors make up a new residential hall for Montana Tech student residents. The third floor of the new space is known as the Student Success Center. This new space will service all students on the Butte campus. Additional operation and maintenance costs for the residential hall living space are forecasted at \$320.8 thousand annually; beginning Fall 2019. All O&M costs for the residential hall and dining space will be paid from Auxiliary funds.

The \$14.1 million Series O revenue bond will be re-paid from new net revenue (both residence life and dining) generated by the LLC. Debt Service payments for the new facility are estimated at \$1.0 million per year for 20 years. Revenue committed toward the payment of debt are currently generating funds in excess of recurring operating and debt service requirements. This situation allows for the re-direction of these funds to the new Series O debt. The existing debt is fully paid in fiscal year 2024 providing additional revenues to commit to the \$14.1 million debt.

On August 29, 2017, approximately \$21.5 million in Master Loan Program Revenue Refunding Bonds, Series 2017, were issued by the Facility Finance Authority (FFA) for the benefit of Glendive Medical Center to advance refund bonds issued in 2008.

In August 2017, MSU entered into an off-campus lease for space to accommodate university support functions, which will make available approximately 35,000 square feet in the core of the Bozeman campus for academic and student support services. The lessor is a subsidiary of the MSU Alumni Foundation. The lease terms began September 1, 2017, and is for an initial ten-year period, with up to four renewals of five years each. Discounted rent is charged while MSU performs leasehold improvements and transitions its staff into the building, and full rent of \$25.0 thousand per month begins in May 2018. Annual escalators of 2% are included for the initial ten-year lease term.

On August 31, 2017, a Direct Loan for \$141.6 thousand Direct Loan was made by the FFA to Northern Rockies Medical Center to finance the purchase of a new telemetry unit.

On September 7, 2017, the Board of Housing issued a contract for the purchase, sale, and delivery of \$42.6 million in bonds closing on October 18, 2017. Of this, \$11.9 million of the funds will be used to refund previous issues, \$30.3 million will be used to purchase eligible Montana home loans, and the remaining \$400.0 thousand will be used to pay issuance costs.

On September 15, 2017, MSF's board declared a dividend of \$40.0 million to be distributed to approximately 23,000 employers.

Effective October 1, 2017, a space lease for property near the MSU Bozeman campus was renewed at a cost of \$104.0 thousand per year for an initial three-year term, with two one-year renewal options.

On October 5, 2017, a Direct Loan for \$300.0 thousand was made by the FFA to Intermountain Children's Services to finance the purchase of a new electronic health records system.

In November 2017, the Board of Regents approved the issuance of bonds to construct a new residence hall on the MSU Bozeman campus. Construction proceeds of \$50.0 million, plus costs of issuance, a debt service reserve fund, and capitalized interest (if needed), were authorized for a borrowing term of up to 30 years.

In November 2017, the Board of Regents authorized the issuance of up to \$4.5 million in InterCap debt to fund the construction of a student activity complex on the MSU Bozeman campus that includes a turf field, lighting, and restrooms. A new student fee had previously been approved to service the debt.

Subsequent to June 30, 2017, MSU drew the remaining \$6.0 million on its Series C bonds, bringing the total outstanding as of January 8, 2018, to \$16.5 million. No further draws will be made.

NOTE 19. MATERIAL VIOLATIONS OF FINANCE-RELATED LEGAL PROVISIONS**Constitutionality of Retirement Plan Funding**

The Montana Constitution, Article VIII, Section 15, states that public retirement systems shall be funded on an actuarially sound basis. Public pension plans are considered actuarially sound if the unfunded accrued actuarial liability amortization period is within 30 years. As of June 30, 2017, the Game Warden & Peace Officers' Retirement System (GWPORS), and the Highway Patrol Officers' Retirement System (HPORS) plans were not in compliance and do not amortize within 30 years. The unfunded liabilities in the other state retirement systems amortize in 30 years or less as of the fiscal year ended June 30, 2017.

NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION

NOTE RSI – 1. BUDGETARY REPORTING

A. State Budget Process

The Montana Legislature meets in the odd-numbered years to prepare annual budgets for the next biennium. The Constitution requires that legislative appropriations not exceed available revenues. The Legislature uses revenue estimates in the budgetary process to establish appropriation levels. Expenditures may not legally exceed budget appropriations at the fund level. In addition, the State Constitution prohibits borrowing to cover deficits incurred because appropriations exceeded anticipated revenues. State law requires an appropriation for disbursements from the general, special revenue and capital projects funds, except for those special revenue funds from non-state and non-federal sources restricted by law or by the terms of an agreement. The level of budgetary control is established by fund type, except capital project funds, which are at project level. Budgets may be established in other funds for administrative purposes.

Agency budget requests are submitted to the Governor, and the Legislative Fiscal Division receives a copy. The Office of Budget and Program Planning (OBPP) and the Governor analyze the requests, establish priorities, and develop the requests into the executive budget request submitted to the Legislature. Joint appropriations subcommittee hearings are held, and an omnibus appropriation bill is reported in the House and subsequently sent to the Senate. The Legislature generally enacts one bill to establish the majority of appropriations for the next two fiscal years. OBPP establishes appropriations for each program by accounting entity (fund) within an agency. The Legislature enacts other appropriations, but only within the available revenue. Agencies must prepare and submit to the budget director operational plans showing the allocation of operating budgets by expenditure category (i.e., personal services, operating expenses, equipment, etc.). The budget director or other statutorily designated approving authority may authorize changes among expenditure categories and transfers between program appropriations.

Appropriations may not be increased by amendment in the General Fund. However, a department, institution, or agency of the executive branch desiring authorization to make expenditures from the General Fund during the first fiscal year of the biennium from appropriations for the second fiscal year of the biennium may apply for authorization from the Governor through the budget director. In the second year of the biennium, during the legislative session, the Legislature may authorize supplemental appropriations. The Governor, or designee, may approve budget amendments for non-general fund monies not available for consideration by the Legislature and for emergencies. In the accompanying financial schedule, original and final budget amounts are reported. There were no expenditures in excess of total authorized appropriations in the State's budgeted funds for the fiscal year.

Appropriations for debt service activities are continuing through statutory authority until the obligation is extinguished. Because these non-operating budgets primarily serve a management control purpose, and related appropriations are continuing in nature, no comparison between budgeted and actual amounts for funds budgeted on this basis is provided.

Appropriations for capital projects funds are not made on an annual basis, but are adopted on a project-length basis. Because these non-operating budgets primarily serve a management control purpose, and related appropriations are continuing in nature, no comparison between budgeted and actual amounts for funds budgeted on this basis is provided.

Appropriations may be continued into the next fiscal year when authorized by the Legislature or the Governor's Office. After fiscal year-end, appropriations that are not continued are reverted. The reverted appropriations remain available for one fiscal year for expenditures that exceed the amount accrued or encumbered. Fund balances are not reserved for reverted appropriations. For fiscal year 2017, reverted governmental fund appropriations were as follows: General Fund - \$25.2 million, State Special Revenue Fund - \$242.6 million, and Federal Special Revenue Fund - \$354.0 million. Agencies are allowed to carry forward 30% of their reverted operating appropriations into the next two fiscal years. This amount can be used for new expenditures at the request of the agency and upon approval of OBPP.

B. Budget Basis

The Legislature's legal authorization ("appropriations") to incur obligations is enacted on a basis inconsistent with Generally Accepted Accounting Principles (GAAP). The budget basis differs from GAAP for encumbrances outstanding at fiscal year-end, compensated absences, capital assets and inventories purchased in proprietary funds, certain loans from governmental funds, and other miscellaneous nonbudgeted activity.

Notes to Required Supplementary Information
For the Year Ended June 30, 2017

Method and assumptions used in calculations of contractually determined contributions: The contractually required contribution rates are determined on an annual basis for the fiscal year beginning July 1, 2016, determined as of June 30, 2016.

The following key methods and assumptions were used to determine the contractual contribution rates reported in that schedule:

Timing	ADCs are determined on the valuation date payable in the fiscal year beginning immediately following the valuation date
Actuarial cost method	Entry age Normal
Amortization method	Level percentage of payroll, open
Remaining amortization period	0 years
Asset valuation method	4-year smoothed market
Wage inflation	4.00%
Salary increases	4.00%
Inflation	3.00%
Investment rate of return	7.75%, net of pension plan investment expense, including inflation
Mortality (healthy)	RP-2000 combined employee and annuitant mortality table projected to 2015 using scale AA
Mortality (disabled)	RP-2000 combined employee and annuitant mortality table

Changes of assumptions: No changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date.

Firefighters' Unified Retirement System
Notes to Required Supplementary Information
For the Year Ended June 30, 2017

Method and assumptions used in calculations of statutorily determined contributions: The statutorily determined contribution rates are set forth by the Legislature and are contained within the Montana Code Annotated (MCA). The amounts used for the valuation as of the year ended June 30, 2016, are as follows:

The State contributes 32.61% of member compensation on behalf of all employer entities per Section 19-13-604, MCA.

Changes of assumptions: No changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date.

**Teachers' Retirement System
Notes to Required Supplementary Information
For the Year Ended June 30, 2017**

Changes of assumptions: The following changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date:

- The normal cost method has been updated to align the calculation of the projected compensation and the total present value of plan benefits so that the normal cost rate reflects the most appropriate allocation of plan costs over future compensation.

Method and assumptions used in calculations of actuarially determined contributions: The actuarially determined contribution rates are determined on an annual basis for the fiscal year beginning July 1, 2016, determined as of June 30, 2016.

The following actuarial methods and assumptions were used to determine actuarial contribution rates reported in that schedule:

Actuarial cost method	Entry age
Amortization method	Level percentage of pay, open
Remaining amortization period	24 years
Asset valuation method	4-year smoothed market
Inflation	3.25%
Salary increase	4.00% to 8.51%, including inflation for non-University Members and 5.00% for University Members
Investment rate of return	7.75%, net of pension plan investment expense, and including inflation

Notes to Required Supplementary Information
For the Year Ended June 30, 2017**

Method and assumptions used in calculations of contractually determined contributions: The contractually required contribution rates are set forth by the Legislature and are contained within the Montana Code Annotated (MCA). The amounts used for the valuation as of the year ended June 30, 2016, are as follows:

The State contributes 0.11% of the compensation of members participating per Section 19-20-604, MCA.

The State contributes 2.38% of member compensation on behalf of school district and community college entities per Section 19-20-607, MCA.

The State contributes a \$25 million payment from the General Fund per Section 19-20-607, MCA.

Changes of assumptions: No changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date.

REQUIRED SUPPLEMENTARY INFORMATION

NOTE RSI – 3. OTHER POSTEMPLOYMENT BENEFITS PLAN INFORMATION (OPEB)

The State of Montana and MUS OPEB plans allow retirees to participate, as a group, at a rate that does not cover all of the related costs. This results in the reporting of an “implied rate” subsidy in the related financial statements and footnotes. While this liability is disclosed for financial statement purposes, it does not represent a legal liability of the State or any of its component units.

In accordance with GASB Statement No. 45, the following information is presented to reflect the funding progress of the Other Postemployment Benefits Plans.

Other Postemployment Benefits Plan Information
Schedule of Funding Progress

REQUIRED SUPPLEMENTARY INFORMATION

NOTE RSI – 4. RISK MANAGEMENT TREND INFORMATION

The following tables present risk management trend information for the Hail Insurance Fund and the MUS Group Benefits Fund. The Hail Insurance Fund pays claims within a calendar year cycle that parallels the growing season from spring planting to fall harvesting; therefore, it has no development cycle. The MUS Group Benefits Fund has a three to five-year development cycle.

The tables illustrate how the earned revenues (net of reinsurance) of the funds and their investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the funds as of the end of the fiscal year (in thousands). Section 3 shows the funds' incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred. Section 4 shows the cumulative amounts paid as of the end of successive years for each policy year. Section 6 shows how each policy year's incurred claims increased or decreased as of the end of successive years. This annual re-estimation results from new information received on known claims, reevaluation of existing information on known claims, as well as emergence of new claims not previously known. Section 7 compares the latest re-estimated incurred claims amount to the amount originally established (Section 3) and shows whether this latest estimate of claims cost is greater or less than originally thought. As data for individual policy years mature, the correlation between original estimates and re-estimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years. This table will be revised as data for successive policy years develops.

**STATE OF MONTANA
NOTES TO THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
FOR THE FISCAL YEAR ENDED JUNE 30, 2017**

Note 1. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying Schedule of Expenditures of Federal Awards includes the federal award activity of the state of Montana under programs of the federal government for the fiscal year ended June 30, 2017. The information in this schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (referred to as the "Uniform Guidance"), and where applicable, Office of Management and Budget Circular A-133 requirements.

Because this schedule presents only a selected portion of the operations of the state of Montana, it is not intended to, and does not present, the financial positions, change in net assets, or, where applicable, its cash flows for the fiscal year ended June 30, 2017.

Significant Accounting Policies

Expenditures shown on the Schedule of Expenditures of Federal Awards are reported on the modified accrual basis of accounting, except as noted below. Under the modified accrual basis of accounting, expenditures are generally recorded in the accounting period in which the liability is incurred. However, there are some payments, such as compensated absences, that are only recorded when the payment is due.

Such expenditures are recognized following the cost principles contained in the Uniform Guidance, OMB Circular A-87, or other costs circulars wherein certain types of expenditures are not allowed or are limited as to reimbursement. Negative amounts shown on the schedule represent adjustments or credits made in the normal course of business to amounts reported as expenditures in prior years.

The Montana University System uses full accrual accounting to report campus federal expenditure activity. The Unemployment Insurance, Section 8 Voucher, and Section 8 Project-Based programs are accounted for as enterprise fund activity. Enterprise funds also use the full accrual basis of accounting. Under the full accrual basis of accounting, expenditures are recorded when a liability is incurred, regardless of the timing of the related cash flows.

Loan and Loan Guarantees (Note 2), Federal Excess Personal Property (Note 7), and the Department of Defense Firefighting Property (Note 8) are presented on the basis of accounting described in each note. The Books for the Blind and Physically Handicapped Program (Note 9) is not presented on the Schedule of Expenditures of

Federal Awards but is provided as additional information regarding the types of donations received by the state as part of this federal program.

The state of Montana did not elect to use the 10% de minimis indirect cost rate allowed under the Uniform Guidance.

Food Distribution Program

The amount reported for Food Distribution programs (CFDA #10.555, #10.565, #10.567, #10.569, and #93.053) represents the dollar value of food commodities distributed to eligible recipients during the year. The U.S. Department of Agriculture provides the current value of the commodities used by the state to compute the amount reported. The amount of funds received to administer the program is also included in the reported amount. Montana also distributes food commodities to other states in the western region of the United States. During fiscal year 2017, Montana distributed \$1,170,048 of food commodities under CFDA #10.567 to other states.

The state of Montana distributed \$10,604,874 in commodities in fiscal year 2017. The value at June 30, 2017 of commodities stored at the state's warehouse is \$1,743,598, for which the state is liable in the event of loss. The state has insurance to cover this liability.

Minority Health and Health Disparities Research

The amount reported for the Minority Health and Health Disparities Research Program (CFDA #93.307) includes endowment funds of \$9,375,000, along with interest earned on the endowment. The entire endowment amount is reported as expended each year, as the funds are restricted for the life of the endowment.

Immunization Cooperative Agreements

The amount reported for the Immunization Cooperative Agreements (CFDA #93.268) includes the dollar value of vaccine doses received during fiscal year 2017. The state used the Centers for Disease Control's price list to calculate the value of doses received. During fiscal year 2017, Montana received 204,179 vaccine doses valued at \$10,708,009.

Note 2. Loan and Loan Guarantee Programs

The following loan and loan guarantee programs are reported on the Schedule of Expenditures of Federal Awards at their July 1, 2016 beginning loan balance plus the amount of any interest subsidy, cash, or administrative cost allowance received during fiscal year 2017:

CFDA #	Federal Loan/Loan Guarantee Program State Revolving Loans	FY 2017 Ending Balance
66.458	Capitalization Grants for Clean Water State Revolving Funds	\$ 271,203,638
66.468	Capitalization Grants for Drinking Water State Revolving Funds	\$ 141,411,906
	Total State Revolving Loan Programs	\$ 412,615,544

CFDA #	Federal Loan/Loan Guarantee Program Student Financial Assistance	FY 2017 Ending Balance
84.032	Federal Family Education Loans	\$59,296,580
84.038	Federal Perkins Loan Program	\$32,183,084
93.364	Nursing Student Loans	\$2,194,776
93.264	Nurse Faculty Loan Program	\$14,471
93.342	Health Professions Student Loans	\$176,650
	Total Student Financial Assistance Programs	\$93,865,561

Federal Family Education Loans

The Montana Guaranteed Student Loan Program (MGSLP) guaranteed no new loans for the Federal Family Education Loans Program (CFDA #84.032) during fiscal year 2017. The outstanding loan balance (including principal, accrued interest and collection cost) of loans guaranteed in previous years, for which the federal government has imposed continuing compliance requirements, was \$59,296,580 at June 30, 2017.

Effective October 1, 2017, the loan servicing portion of the MGSLP was transferred to a federally approved national education loan servicing provider. The amount transferred at September 30, 2017 was \$64,643,273, which included \$53,516,103 in principal and interest and \$11,127,170 in borrower collection costs. Also refer to Note 14.

Economic Adjustment Assistance Program

The Economic Adjustment Assistance Program (CFDA #11.307) consists of two separate awards which are reported on the Schedule of Expenditures of Federal Awards at their June 30, 2017 ending loan balances. The amount of loans outstanding as of June 30, 2017 is \$382,846 for award number 05-19-02445 and \$2,794,264 for award number 05-79-73005.

The calculation for each of these loan balances is as follows:

Award Number: 05-19-02445		
State Name = EDA Revolving Loan		
Federal Grantor = US Department of Commerce		
Federal Program Name = Title IX SSED Revolving Loan Fund		
Federal Catalog Number = 11.307		
RLF Loan Balance FYE 2017		\$ 409,369
Cash & Investments FYE 2017		\$ 94,375
FY 2017 Admin paid out of RLF Income		\$ 35,476
Unpaid Principal of loans written of during FY		\$ -
		\$ 539,220
Federal Percentage		71%
Federal Share of Revolving Loan Fund		\$ 382,846
Award Number: 05-79-73005		
State Name = EDA Revolving Loan		
Federal Grantor = US Department of Commerce		
Federal Program Name = Economic Adjustment Assistance		
Federal Catalog Number = 11.307		
RLF Loan Balance FYE 2017		\$ 3,875,356
Cash & Investments FYE 2017		\$ 1,308,025
FY 2017 Admin paid out of RLF Income		\$ 405,146
Unpaid Principal of loans written of during FY		\$ -
		\$ 5,588,527
Federal Percentage		50%
Federal Share of Revolving Loan Fund		\$ 2,794,264

Other Federal Loans

The following loans, originally funded through federal programs, do not have any continuing federal compliance requirements imposed on the state, other than the loan repayments. These loans are not reported on the Schedule of Expenditures of Federal Awards:

Tongue River –Northern Cheyenne Tribal Loan

The Northern Cheyenne Tribe and the Department of Natural Resources and Conservation entered into an agreement on July 1, 1994 in which the tribe agreed to loan the state of Montana \$11,300,000 of federal funds appropriated as part of the Northern Cheyenne Indian Reserved Water Rights Settlement. The loan is to assist the state in financing costs of the Tongue River Dam project. No expenditures of tribal loan funds were incurred on project costs during fiscal year 2017. The amount of the loan outstanding as of June 30, 2017 is \$6,084,615.

Middle Creek Dam Rehabilitation Project Loan

The Department of Natural Resources and Conservation and the U.S Department of the Interior, Bureau of Reclamation (BOR), entered into an agreement on September 21, 1990. The BOR agreed to loan the state of Montana "...a sum of money not to exceed the lesser of (1) \$3,023,925 plus reimbursable interest during construction, or (2) the actual cost of the project, including reimbursable interest during construction..." The total loan repayable is \$2,990,129, and reimbursable interest during construction is \$281,857. As of June 30, 2017, the loan outstanding is \$1,942,789, and reimbursable interest during construction is \$175,890.

Note 3. Type A Federal Programs

The State of Montana issues a biennial single audit report. The Montana Single Audit report for the two fiscal years ended June 30, 2017 will be issued by March 31, 2018.

The Type A program threshold will be determined based on actual expenditures incurred during the two fiscal years ended June 30, 2017.

Note 4. CFDA Number

The CFDA number assigned for each federal program listed in the Schedule of Expenditures of Federal Awards is based upon agency agreements with the federal government and the Catalog of Federal Domestic Assistance in effect during the audit period.

The complete CFDA number is a five-digit number, where the first two digits represent the federal agency and the second three digits represent the program. Programs not assigned a CFDA number in the Catalog of Federal Domestic Assistance were assigned a CFDA number in the format **.UXX or **.RD. Also refer to Note 13.

Note 5. Program Clusters

As defined by 2 CFR section 200.17, a cluster of programs is a grouping of closely related programs that share common compliance requirements. Except for the Student Financial Assistance Cluster, clusters of programs are presented on the Schedule of Expenditures of Federal Awards either within their respective federal agency (for non-research and development programs) or by federal agency and major subdivision (for research and development programs).

Student Financial Assistance Cluster

Amounts reported for the Student Financial Assistance Cluster include programs administered by both the Department of Education and the Department of Health and Human Services. These clusters are shown separately, within their respective federal agencies, on the Schedule of Expenditures of Federal Awards.

The combined Student Financial Assistance Cluster includes the following programs:

CFDA #'	Student Financial Assistance Cluster	FY 17 Expenditures
84.007	Federal Supplemental Educational Opportunity Grants	\$1,350,227
84.033	Federal Work-Study Program	\$2,266,664
84.038	Federal Perkins Loan Program - Federal Capital Contributions	\$36,718,849
84.063	Federal Pell Grant Program	\$46,861,495
84.268	Federal Direct Student Loans	\$178,026,666
84.379	Teacher Education Assistance for College and Higher Education Grants (TEACH Grants)	\$5,122
93.264	Nurse Faculty Loan Program (NFLP)	\$21,729
93.342	Health Professions Student Loans, Including Primary Care Loans/Loans for Disadvantaged Students	\$199,042
93.364	Nursing Student Loans	\$2,709,657
	Total Student Financial Assistance Cluster	\$268,159,451

Note 6. Research and Development Grants

Research and Development includes all research activities, both basic and applied, and all development activities that are performed by a non-federal entity. Research is defined as a systematic study directed toward fuller scientific knowledge or understanding of the subject studied. The term research also includes activities involving the training of individuals in research techniques, where such activities utilize the same facilities as other research and development activities, and where such activities are not included in the instruction function.

Development is the systematic use of knowledge and understanding gained from research directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes. Federal awards that meet the research and development criteria are listed in the Research and Development Cluster.

Note 7. Federal Excess Personal Property

The state of Montana receives Federal Excess Personal Property (FEPP). The title to this property remains with the federal agency. In accordance with General Services Administration guidelines, the amounts are presented at fair market value at the time of receipt by the state, which is determined to be 22.47% of the original acquisition cost of the property.

Property received under CFDA #81.RD, Miscellaneous Research and Development, is shown at its fair market value at the time of receipt.

The following is a list of the FEPP received by the state of Montana during fiscal year 2017. The negative amount reflects property sold (title transferred at public sale) or other disposition.

CFDA #	Program	FY 17 Amount	FY 17 Ending Inventory
10.203	Agricultural Experiment Stations	\$1,821	\$125,057
10.500	Cooperative Extension Service	\$0	\$3,039
10.664	Cooperative Forestry Assistance	(\$61,513)	\$4,689,634
10.UXX	Agriculture Miscellaneous – Non-major	\$0	\$131,341
39.003	General Services Administration	(\$26,404)	\$51,775
81.RD	Miscellaneous Research and Development	\$0	\$5,150
43.UXX	NASA Miscellaneous – Non-major	\$0	\$640,395
47.UXX	NSF Miscellaneous – Non-major	(\$6,672)	\$177,967

Note 8. Department of Defense Firefighting Property

The Department of Natural Resources and Conservation (DNRC) receives Department of Defense Firefighting Property (FFP). The title to this property is transferred to the DNRC. In accordance with General Services Administration guidelines, the amounts are presented at fair market value at the time of receipt by DNRC, which is determined to be 22.47% of the original acquisition cost of the property. The following is the value of FFP received by the state of Montana during fiscal year 2017:

CFDA #	Program	FY 17 Amount	FY 17 Ending Inventory
12.UXX	DOD Firefighter Program	\$303,448	\$2,645,260

Note 9. Books for the Blind and Physically Handicapped

The Montana State Library receives “talking book” machines, cassette books, accessories, and magazines from the federal government under the Books for the Blind and Physically Handicapped Program (CFDA #42.001). These items are then distributed to provide library services to blind and physically handicapped individuals. The federal government retains title to these items. The approximate value of the items in inventory (not distributed to individuals) at June 30, 2017 was \$963,142.

Since this program is considered a federal “use of equipment” agreement, the accompanying Schedule of Expenditures of Federal Awards does not include this amount.

Note 10. Unemployment Benefits

The unemployment compensation system is a federal-state partnership. State unemployment insurance laws must conform to certain provisions of the federal law. Federal funds are expended for administrative costs. State unemployment taxes must be deposited into a state account in the Federal Unemployment Trust Fund and are used only to pay benefits. State Unemployment Insurance (UI) funds, as well as federal funds, are included on the Schedule of Expenditures of Federal Awards.

The following schedule provides a breakdown of the state and federal portions of the total expenditures recorded for the Unemployment Insurance Program (CFDA #17.225).

State UI Expenditures	\$108,262,192
Federal UI Expenditures	<u>19,443,479</u>
Total	\$127,705,671

Note 11. Subgrants to State Agencies

Federal assistance transferred from one Montana state agency to another Montana state agency is shown only once on the Schedule of Expenditures of Federal Awards.

Federal assistance received from non-state sources, which are considered subgrants by the awarding agency, are treated as pass-through grants to the state. These pass-through awards are listed below the direct federal awards reported on the Schedule of Expenditures of Federal Awards. Pass-through grant numbers are included for those awards that were assigned an identifying number.

Note 12. Subgrants to Non-State Agencies

Federal assistance transferred from a Montana state agency or university to a non-state agency, such as a city, county, tribal government, or nonprofit organization, is identified in the Amount to Subrecipients column shown in the Schedule of Expenditures of Federal Awards. These amounts are included in the expenditure totals shown on the report.

The Amounts to Subrecipients also includes federal assistance transferred from a Montana state agency or university that was originally received as a subgrant from another Montana state agency. These amounts are not included in the expenditure totals shown on the report, since the original award is only shown once on the Schedule of Expenditures of Federal Awards, as described in Note 11 above.

A summary of amounts that were subgranted to a non-state agency, such as a city, county, tribal government, or nonprofit organization, which were made from awards originally received from another Montana state agency, is shown below:

CFDA #	Federal Program	Amount to Subrecipients
Non Research and Development		
10.025	Plant and Animal Disease, Pest Control, and Animal Care	\$45,000
84.048	Career and Technical Education -- Basic Grants to States	\$2,431,727
84.126	Rehabilitation Services _ Vocational Rehabilitation Grants to States	\$31,138
84.334	Gaining Early Awareness and Readiness for Undergraduate Programs	\$61,546
84.419	Preschool Development Grants	\$1,347,918
93.236	Grants to States to Support Oral Health Workforce Activities	\$25,061
93.262	Occupational Safety and Health Program	\$3,531
93.464	ACL Assistive Technology	\$60,000
Total - Non Research and Development		\$4,005,921
TANF Cluster		
93.558	Temporary Assistance for Needy Families	\$763,430
Total TANF Cluster		\$763,430
Research and Development Cluster		
20.205	Highway Planning and Construction	\$36,054
47.079	Office of International Science and Engineering	\$32,888
93.859	Biomedical Research and Research Training	\$6,828
Total Research and Development Cluster		\$75,770

Note 13. Federal Awards not having a CFDA Number

The following schedules contain contract or grant numbers associated with awards that did not have a CFDA number and were assigned either a **.UXX or **.RD number in the Schedule of Expenditures of Federal Awards. Not all **.UXX or **.RD awards reported on the SEFA had a grant or contract number. Also refer to Note 4.

Note 14. Subsequent Event

Effective October 1, 2017, the loan servicing portion of the Montana Guaranteed Student Loan Program was transferred to a federally approved national education loan servicing. The value of principle, interest, and borrower collection costs transferred at September 30, 2017 was \$64,643,273. Also refer to Note 2.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL SCHEDULES PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Legislative Audit Committee

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to the financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Montana, as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the state of Montana's basic financial statements, and have issued our report thereon dated January 30, 2017. Our report includes a reference to other auditors who audited the financial statements of the Montana State University component units and the University of Montana component units, as described in our report on the state of Montana's financial statements. The financial statements of the Montana State University component units and the University of Montana component units were not audited in accordance with *Government Auditing Standards*, and accordingly, this report does not include reporting on internal control over financial reporting or instances of reportable noncompliance associated with these component units.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the state of Montana's internal control over financial reporting to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the state of Montana's internal control. Accordingly, we do not express an opinion on the effectiveness of the state of Montana's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit the attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the state of Montana's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*. The identified instances of noncompliance are described below:

- ◆ The Montana Public Employees' Retirement Board administers eight defined benefit retirement plans and an Other Post Employment Benefit (OPEB). The Montana Constitution and state law require all retirement systems to be actuarially sound. The actuarial valuations as of June 30, 2016, indicated the Sheriffs', and Game Wardens' and Peace Officers' retirement plans, and the Public Employees' Retirement System-Defined Contribution Retirement Plan Disability OPEB are not actuarially sound because they do not amortize. The maximum allowable amortization period is 30 years, as defined by state law.

State of Montana's Response to Findings

The state of Montana's response to the findings identified in our audit are described in the separately issued Public Employees' Retirement Administration audit report (16-08A) and on page B-1 of this report. The state of Montana's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the state of Montana's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the state of Montana's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Respectfully submitted,

INDEPENDENT AUDITOR'S REPORT

The Legislative Audit Committee
of the Montana State Legislature:

Introduction

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the state of Montana, as of and for the year ended June 30, 2016, and the related notes which collectively comprise the state of Montana's basic financial statements, as follows:

- ◆ Statement of Net Position
- ◆ Statement of Activities
- ◆ Balance Sheet – Governmental Funds
- ◆ Reconciliation of the Balance Sheet – Governmental Funds to the Statement of Net Position
- ◆ Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds
- ◆ Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities
- ◆ Statement of Fund Net Position – Proprietary Funds
- ◆ Statement of Revenues, Expenses, and Changes in Fund Net Position – Proprietary Funds
- ◆ Statement of Cash Flows – Proprietary Funds
- ◆ Statement of Fiduciary Net Position – Fiduciary Funds
- ◆ Statement of Changes in Fiduciary Net Position – Fiduciary Funds

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this responsibility includes designing, implementing, and maintaining internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We did not audit the financial statements of the Montana State University (MSU) component units and the

University of Montana (UM) component units, which represents 15.12 percent, 29.94 percent, and 6.73 percent, respectively of the assets, net position, and revenues of the aggregate discretely presented component units. Those financial statements were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for the university component units, are based solely on the reports of other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the MSU and UM component units were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the state of Montana's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the state of Montana's internal control, and accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Summary of Opinions

Opinion Unit	Type of Opinion
Governmental Activities	Unmodified
Business-Type Activities	Unmodified
Aggregate Discretely Presented Component Units	Unmodified
Aggregate Remaining Fund Information	Unmodified
General Fund	Unmodified
State Special Revenue Fund	Unmodified
Federal Special Revenue Fund	Unmodified
Land Grant	Unmodified
Coal Severance Tax	Unmodified
Unemployment Insurance	Unmodified
Economic Development Bonds	Unmodified

Unmodified Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Governmental Activities and Business-Type Activities, General Fund, State Special Revenue Fund, Federal Special Revenue Fund, Land Grant, Coal Severance Tax, Unemployment Insurance and Economic Development Bonds major funds, and the Aggregate Discretely Presented Component Units and Aggregate Remaining Fund Information of the state of Montana, as of June 30, 2016, and the respective changes in financial position and, where applicable, cash flows thereof for the fiscal year then ended in conformity with accounting principles generally accepted in the United States of America.

Emphasis of Matters

As discussed in Note 19 to the financial statements, at June 30, 2016, the Game Wardens' and Peace Officers', and Sheriffs' retirement plans, and the Public Employees' Retirement System-Defined Contribution Retirement Plan Disability Other Post Employment Benefit (DCRP Disability OPEB) are not actuarially sound because they do not amortize. The maximum allowable amortization period is 30 years, as defined by state law. Our opinions are not modified with respect to this matter.

As discussed in Note 2B to the financial statements, beginning in fiscal year 2016, the state of Montana elected to report the Short-Term Investment Pool assets at fair value instead of amortized cost, as previously reported. Our opinions are not modified with respect to this matter.

As discussed in Note 2A to the financial statements, in fiscal year 2016, the state of Montana adopted new accounting guidance contained in Governmental Accounting Standards Board Statement No. 72, *Fair Value Measurement and Application*. Our opinions are not modified with respect to this matter.

As discussed in Note 2B, Montana State Fund (MSF) was issued a Certificate of Authority, became an authorized insurer regulated by the Montana Commission of Securities and Insurance, and is now subject to the provisions of Title 33, Montana Insurance Code. As a result, MSF's reporting period changed from a June 30 fiscal year-end to a calendar year-end. This report, for the year ended June 30, 2016, includes a 6-month financial reporting period for MSF. Our opinion for the Aggregate Discretely Presented Component Units is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis, the Budgetary Comparison Schedule, the Pension Plan Information, the Other Post Employment Benefit Plan Information, and the Risk Management Trend Information, and the related notes, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries

of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the state of Montana's basic financial statements. The Schedule of Expenditures of Federal Awards, as required by Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal awards, is presented for purposes of additional analysis and is not a required part of the financial statements.

The Schedule of Expenditures of Federal Awards is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Expenditures and Federal Awards is fairly stated in all material respects in relation to the financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 30, 2017, on our consideration of the state of Montana's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the state of Montana's internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

INTRODUCTION

Management of the State of Montana (State) provides this *Management's Discussion and Analysis* of the State of Montana's basic financial statements included in the Comprehensive Annual Financial Report (CAFR). This narrative overview and analysis of the financial activities of the State of Montana is for the fiscal year ended June 30, 2016. We encourage readers to consider this information in conjunction with the additional information that is furnished in the State's financial statements, which follow.

FINANCIAL HIGHLIGHTS

Government-wide

The assets and deferred outflows of resources of the State exceeded its liabilities and deferred inflows of resources at the end of fiscal year 2016 by \$8.1 billion compared with \$7.8 billion at the end of fiscal year 2015, representing a 4% increase in net position. Component units reported net position of \$1.8 billion at the end of fiscal year 2016 compared to \$1.7 billion at the end of fiscal year 2015, representing a 4% increase in net position. More detail is provided in the financial statement overview below.

Fund Level

As of the close of fiscal year 2016, the State's governmental funds reported combined ending fund balances of \$4.1 billion compared with \$4.2 billion at fiscal year 2015. Of the 2016 balance, \$1.6 billion is not in spendable form, primarily as permanent fund principle. Thus, \$2.5 billion is available for spending. The fund balance in spendable form is segregated by constraint as follows: \$1.0 billion restricted, \$1.2 billion committed, \$149.2 million assigned and \$126.5 million unassigned. This represents a \$88.4 million (2%) decrease in total fund balance. These changes are discussed in more detail in the financial analysis of the State's major funds presented below.

The State's business-type activity funds reported net position at the close of fiscal year 2016 in the amount of \$372.0 million compared with fiscal year 2015 net position of \$356.3 million. Of the 2016 business-type activity net position, \$15.8 million was reported as net investment in capital assets. Net position of \$356.2 million was in spendable form with \$8.4 million unrestricted and \$347.8 million restricted to expenditure for a specific purpose. This represents a \$14.6 million (4%) increase in spendable net position from the fiscal year 2015 balance of \$341.7 million. These changes are discussed in more detail in the financial analysis of the State's major funds presented below.

Long-term Debt

The State's total governmental activity bonds and notes payable for governmental activities decreased by \$38.1 million, from \$268.7 million in fiscal year 2015 to \$230.6 million, a 14% decrease in fiscal year 2016.

Further detail relating to the State's long-term debt is provided in notes to the financial statement's Note 11.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the State of Montana's basic financial statements. The State's basic financial statements include three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. The report also contains additional required supplementary information, which includes budgetary schedules, pension and other post employment benefits plan information, and risk management trends. These components are described below:

Basic Financial Statements

The basic financial statements include two types of financial statements that present different views of the State – the *government-wide financial statements* and the *fund financial statements*. These financial statements also include

the *notes to the financial statements*, which provide further detail and information related to the balances of the financial statements.

Government-wide Financial Statements

The *government-wide financial statements* provide a broad view of the State's operations in a manner similar to a private-sector business. The statements provide both short-term and long-term information about the State's financial position, which assists in assessing the State's economic condition at the end of the fiscal year. These are prepared using the flow of economic resources measurement focus and the accrual basis of accounting. In other words, they follow methods that are similar to those used by most businesses, including all revenues and expenses connected with the fiscal year, even if cash involved has not been received or paid. The government-wide financial statements include two statements: the Statement of Net Position and the Statement of Activities, as defined below.

The *Statement of Net Position* presents all of the government's assets, deferred outflows of resources, liabilities, deferred inflows of resources and net position. Over time, increases or decreases in the State's net position may serve as a useful indicator of whether the financial position of the State is improving or deteriorating.

The *Statement of Activities* presents information related to the government's net position changes during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods. This statement also presents a comparison between direct expenses and program revenues for each function of the State.

Both of the above financial statements have separate sections for three different types of state activities. These three types of activities are as follows:

Governmental Activities – Activities mostly supported by taxes and intergovernmental revenues, including federal grants. Most services normally associated with state government fall into this category, including education (support for both K-12 public schools and higher education), general government, health and human services, natural resources, public safety, and transportation.

Business-type Activities – Functions normally intended to recover all or a significant portion of their costs through user fees and charges to external users of goods and services. The major business-type activities of the State include the Unemployment Insurance Fund and the Economic Development Bonds Program, which assists Montana's small businesses and local governments in obtaining long-term, fixed-rate financing through private Montana lending institutions.

Discretely Presented Component Units – Operations for which the State has financial accountability, but have certain independent qualities as well. In order to be considered component units, these entities must be legally separate to the extent that they may sue, or be sued, in their own right. For the most part, these entities operate similarly to private sector businesses and the business-type activities described above. The State's component units consist of one financing authority, one housing board, one nonprofit independent public corporation and two universities.

Fund Financial Statements - Reporting the State's Major Funds

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The State, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

The fund financial statements focus on individual parts of the state government, reporting the State's operations in more detail than the government-wide statements. All of the funds can be divided into three categories. It is important to note that these fund categories use different accounting approaches and should be interpreted individually. The three categories of funds are as follows:

Governmental Funds – Most of the basic services provided by the State are financed through governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the

governmental fund financial statements focus on near-term inflows and outflows of spendable resources. They also focus on the balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the government's near-term financing requirements. This approach is known as using the flow of current financial resources measurement focus and the modified accrual basis of accounting. These statements provide a detailed short-term view of the State's finances that assists in determining whether there will be adequate financial resources available to meet the current needs of the State.

The State has five governmental funds that are considered major funds for presentation purposes. Each major fund is presented in a separate column in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances. The State's five major governmental funds are the General Fund, the State Special Revenue Fund, the Federal Special Revenue Fund, the Coal Severance Tax Fund, and the Land Grant Fund.

Proprietary Funds – When the State charges customers for the service it provides, whether to outside customers or to other agencies within the State, these services are generally reported in proprietary funds. Like the government-wide statements, proprietary fund statements utilize full accrual accounting, the same method used by private sector businesses. Enterprise funds report activities that provide supplies and services to the general public. Whereas, internal service funds report activities that provide supplies and services for the State's other programs and activities.

Fiduciary Funds – Resources held for the benefit of parties outside state government are accounted for in fiduciary funds. Fiduciary funds are not reflected in the government-wide financial statements because the resources of these funds are not available to support the State's own programs. Fiduciary fund statements use the full accrual basis of accounting.

Notes to the Financial Statements

The notes to the financial statements provide additional information that is essential for a full understanding of the government-wide and the fund financial statements. The notes to the financial statements can be found immediately following the fiduciary fund financial statements.

Required Supplementary Information

The basic financial statements are followed by a section of required supplementary information. This section contains a budgetary comparison schedule, which includes the reconciliation between the statutory fund balance for budgetary purposes and the fund balance for the General Fund and major special revenue funds, as presented in the governmental fund financial statements. Required supplementary information also includes pension and other post employment benefits plan information, as well as additional risk management trend data.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Montana's overall financial position increased from the last fiscal year as reflected in the \$288.2 million increase (4%) in net position. This improvement resulted from a continued economic recovery within the State.

Net Position

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. The State's combined net position (government and business-type activities) totaled \$8.1 billion at the end of fiscal year 2016. Net position of the both governmental and business-type activities increased by \$272.5 million (4%) and \$15.7 million (4%), respectively. These changes are explained in detail in the major fund analysis below.

A portion of the State's net position reflects its investment in capital assets such as land, buildings, equipment and infrastructure (roads, bridges, and other immovable assets) less any related debt used to acquire those assets that is still outstanding. The State uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the State's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the State’s net position represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position may be used to meet the State’s ongoing obligations to citizens and creditors. Internally imposed designations of resources are not presented as restricted net position.

At the end of the current fiscal year, the State reported positive balances in net investment in capital assets and restricted net position categories, along with a negative balance in the unrestricted category of net position, for both the governmental activities and the primary government as a whole. The negative unrestricted net position is primarily due to net pension liability established in fiscal year 2016. GASB Statements No. 68 and 71 were implemented in fiscal year 2015 and are contributing factors to the negative net position. The State also reported positive balances for all categories of net position for the business-type activities.

FINANCIAL ANALYSIS OF THE STATE'S MAJOR FUNDS

As the State completed the year, its governmental funds reported fund balances of \$4.1 billion. Of this total, \$2.5 billion (62%) constitutes spendable fund balance and \$1.6 billion (38%) is classified as non-spendable. The analysis of the following major funds, providing the majority of the fund balance for the government, follows.

General Fund Revenues and Expenditures

The General Fund is the chief operating fund of the State. For fiscal year 2016, the total fund balance of the General Fund was reported at approximately \$271.3 million. Of this balance \$4.5 million is non-spendable. The remaining \$266.8 million is spendable with \$140.3 million assigned and \$126.5 million unassigned. This represents 11% of the \$2.5 billion spendable governmental fund balances for all governmental funds. Of the assigned fund balance, \$130.0 million pertains to the projected general fund spend down of fund balance in fiscal year 2017 and \$10.3 million relates to outstanding encumbrances at the end of the fiscal year. Further detail on the breakdown of fund balance for the General Fund is provided in Note 14 – Major Purpose Presentation.

Total fund balance decreased by \$200.0 million when compared to the previously reported fund balance of \$471.3 million. Changes in both expenditures and revenues are discussed in detail below. The 2015 legislative session projected \$319 million of unassigned fund balance for fiscal year 2016, without regard to an additional fund balance amount reported regarding the projected spend down in fiscal year 2017.

Lower General Fund Revenues – Total General Fund revenues were \$2.0 billion for fiscal year 2016 (lower than legislative estimation), a 4% decrease from the \$2.1 billion reported in 2015 (which were higher than legislative estimation). Fiscal year 2016 tax revenue decreased by 4% in total over 2015, with natural resource and corporate income tax collections down 44% and 31%, respectively. Individual income and property tax collections were up slightly by 1% and 5%, respectively.

Higher General Fund Expenditures – Total General Fund expenditures for fiscal year 2016 increased by \$117.1 million (6%). This increase in expenditures occurred in the public safety, health and human services, education and natural resources functions as follows:

- Public safety expenditures increased by \$25.0 million (9%)
- Health and human services expenditures increased by \$39.2 million (9%)
- Education expenditures increased by \$51.7 million (5%)
- Natural resources expenditures increased by \$2.4 million (7%)

Transfers out increased by \$30.9 million (51%) to \$91.2 million in 2016, mostly attributable to the fire suppression transfers.

The General Fund's actual revenues and expenditures in comparison to budgeted revenues and expenditures is provided in more depth on the Budgetary Comparison Schedule, within the Required Supplementary Information section of this report. The same level of detail used to report the actual revenues and expenditures is not readily available for all budgetary revenues and expenditures, which may cause some variances.

General Fund Expenditure Budget Reversions

Fund balances are not reserved for reverted appropriations. For fiscal year 2016, general fund appropriations that reverted to 2017 were \$26.3 million.

The Department of Public Health and Human Services had unspent appropriations of \$15.8 million, the vast majority of which was attributable to Medicaid and other benefits.

The Department of Corrections had unspent appropriations of \$2.1 million related to Medicaid savings and other operational costs.

The Department of Natural Resources and Conservation, the Judiciary Branch and the Department of Revenue had unspent appropriations of \$1.6 million, \$1.5 million and \$1.3 million, respectively, related to operational costs.

The remaining unspent appropriation of \$4.0 million was attributable to miscellaneous reversions across other agencies.

State Special Revenue Fund

The fund balance of the State Special Revenue Fund increased by \$3.6 million to \$1.6 billion. Revenues and expenditures decreased by \$22.1 million (2%) and \$50.9 million (5%), respectively, for fiscal year 2016. The largest decrease in revenues is attributable to a reduction in natural resources tax collections. The largest decreases in expenditures is attributable to reductions in general government and education related expenditures.

Federal Special Revenue Fund

The fund balance of the Federal Special Revenue Fund decreased by \$2.2 million (20%) to \$9.0 million. Revenues and expenditures increased by \$168.5 million (8%) and \$197.6 million (9%) respectively for the fiscal year 2016. Revenue increases are attributable to increases in federal revenue and expenditure increases are attributable to increases in health and human services related expenditures. Transfers out decreased by \$21.4 million (42%) for the fiscal year 2016, primarily due to timing differences among federally funded natural resource transfers.

Coal Severance Tax Permanent Fund

The fund balance of the Coal Severance Tax Permanent Fund increased by \$65.8 million (6%) to \$1.1 billion. Revenue increased by \$27.3 million (44%) to \$89.9 million, primarily due to an increase of \$28.9 million in investment earnings.

Land Grant Permanent Fund

The fund balance of the Land Grant Permanent Fund increased by \$42.7 million (6%) to \$710.5 million. Within this fund, investment earnings increased by \$24.6 million, while rent/lease/royalties and sales income decreased by \$12.7 million.

Unemployment Insurance Enterprise Fund

Net position restricted for unemployment compensation increased by \$15.9 million (6%). The increase in net position reflects the continued impact of low unemployment throughout fiscal year 2016 accompanied by an increase in the taxable wage base from \$29.5 thousand to \$30.5 thousand in 2016.

Economic Development Bonds Enterprise Fund

Net position increased by 1% to \$5.2 million in fiscal year 2016. Revenues from financing increased \$239 thousand, while interest expense increased \$125 thousand.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets

The State's investment in capital assets for its governmental and business-type activities, as of June 30, 2016, amounted to \$8.0 billion, with related accumulated depreciation of \$2.2 billion, leaving a net book value of \$5.8 billion. This investment in capital assets includes land, buildings, improvements, equipment, infrastructure, and construction in progress. Infrastructure assets are items that are normally immovable and of value only to the State, such as roads, bridges, streets and sidewalks, drainage systems, lighting systems, and similar items.

The total increase in the State's investment in capital assets for the current fiscal year was \$262.3 million or 5% in terms of net book value. Most increases in capital expenditures were seen in construction, or reconstruction, of roads and bridges. Additional information relating to the State's capital assets can be found in Note 5 of the notes to the financial statements.

Debt Administration

Montana continues to receive excellent general obligation bond ratings from Moody's Investor Service (Aa1), Standard and Poor's Corporation (AA) and Fitch Ratings (AA+), which remain unchanged from 2015.

State debt may be authorized either by a two-thirds vote of the members of each house of the Legislature, or by a favorable vote of a majority of the State's electors voting thereon. There is no constitutional limit on the amount of debt

that may be incurred by the State. The Montana Constitution does, however, prohibit the incurring of debt to cover deficits caused by appropriations exceeding anticipated revenue.

The State of Montana’s general obligation debt decreased from \$134.8 million at June 30, 2015 to \$115.5 million at June 30, 2016. There is cash available, of \$4.3 million at the end of fiscal year 2016, in debt service funds to service general obligation debt.

The below table contains the ratio of general obligation debt and total State debt to personal income and to the amount of debt per capita:

	Amount (in thousands)	Percentage of Personal Income (1)	State Debt Per Capita (2)
General obligation debt	\$115,500	0.23%	\$96
Total State debt	\$216,983	0.50%	\$221

- (1) Based on personal income for calendar year 2015.
- (2) Based on estimated 2016 Montana population.

More detailed information regarding the State’s long-term obligations is presented in Note 11 of the notes to the financial statements and in the statistical tables.

ECONOMIC CONDITION AND OUTLOOK

Montana’s primary economic base remains concentrated in agriculture, mining, manufacturing, and nonresident travel. Montana had the 16th fastest personal income growth among states in 2015, at a rate of 4%. Additionally, Montana had real wage gains of 3% in 2015, which is the fastest gain in real wages since 1990. Montana’s unemployment rate (4%) has continued to remain lower than the national rate. Montana added roughly 9.2 thousand jobs in 2015, for a growth rate of 2%. A more in-depth analysis of the State’s overall financial position can be found in the transmittal letter of this report.

The 64th Legislative Session adjourned in late April 2015. Upon adjournment, it was anticipated that 2017 biennium general fund revenue collections would be approximately \$4.6 billion while general fund expenditures would be approximately \$4.7 billion. At the end of fiscal year 2017, the estimated general fund balance would be approximately \$315 million.

The 2017 biennium budget seeks to leave sufficient reserves in fund balance and achieve structural balance for the general fund budget.

The following are the major financial highlights of the 2017 biennium budget:

1. Governor Bullock proposed, and the 2015 Legislature adopted, legislation to fund a Montana-made solution to Medicaid Expansion under the provisions of the Affordable Care Act (ACA). Montana’s expansion model will contract with a third party administrator to manage and secure a healthcare network to provide health services to eligible Montana citizens. Medicaid expansion in Montana was approved by the Centers for Medicare and Medicaid Services and was implemented effective January 1, 2016. Federal funding will finance the majority of the expansion effort for the entirety of the 2017 biennium.
2. Governor Bullock proposed, and the 2015 Legislature funded, a 2% rate increase per year for most private and community-based providers of health care and corrections-based services on behalf of the State of Montana.
3. Governor Bullock negotiated with the Montana University System, and the Montana Legislature passed, funding to secure a tuition freeze for Montana resident students attending institutions of higher education in Montana. Additionally, the Montana University System received a one-time-only appropriation of \$15 million to serve as funds to leverage university-based research into strategic investments for Montana’s economy.

4. The 2015 Legislature passed Senate Bill (SB) 157, which changes the reappraisal of class 3 and class 4 property from a six-year reappraisal cycle to a two-year reappraisal cycle.
5. The Governor proposed, and the 2015 Legislature passed SB 262, which ratifies water rights between the state and the Confederated Salish and Kootenai Tribes of the Flathead Reservation. If ratified by the US Congress, the State contribution is estimated to be \$55 million, payable over several fiscal years.
6. The Governor proposed, and the 2015 Legislature funded, a one-time-only appropriation for a sage grouse conservation fund at \$10 million for the 2017 biennium that was a major consideration in preventing listing on the endangered species list.
7. The 2017 biennium present law budget generally funds existing core services (i.e. health and human services, corrections, and education) at estimated caseload, population, and enrollment levels.

The Montana Constitution, Article VIII, Section 15 states that public retirement systems shall be funded on an actuarially sound basis. Public pension plans are considered actuarially sound if the unfunded accrued actuarial liability amortization period is less than 30 years. As of June 30, 2016, the Sheriffs' Retirement System (SRS), the Game Warden & Peace Officers' Retirement System (GWPORS), and the Public Employees' Retirement System-Defined Contribution Retirement Plan Disability Other Post Employment Benefit (PERS-DCRP Disability) plans were not in compliance and do not amortize. The unfunded liabilities in the other state retirement systems amortize in less than 30 years as of fiscal year-end 2016.

The actuarial condition of these retirement plans is disclosed in greater detail in Note 6 of the financial statements. The unfunded actuarial liability of these plans is long-term in nature and does not translate into an inability of the plans to meet their current obligations in the near future.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the State of Montana's finances for all of Montana's citizens, taxpayers, customers, investors, and creditors. The financial report seeks to demonstrate the State's accountability for the money it receives. Questions concerning any of the information provided in this report or requests for additional information should be addressed to the State of Montana, State Accounting Bureau, Room 255 Mitchell Building, PO Box 200102, Helena, MT 59620.

The notes to the financial statements are an integral part of this statement.

**Differences between the Balance Sheet-Governmental Funds and the Statement of
Net Position Governmental Activities**

- (A) Internal Services Fund: Management uses Internal Services funds (ISF) to report the charges for goods and services sold both by and to state agencies, as well as the related costs of providing these goods and services. Since the sales are made primarily to Governmental Funds, the assets, deferred outflows of resources, liabilities, deferred inflows of resources, and the net position of the ISF are included in the Governmental Activities on Statement of Net Position.
- (B) Capital Asset Related: Capital assets used in governmental activities are not financial resources, and therefore, they are not reported on the Balance Sheet-Governmental Funds. However, capital assets are economic resources and are reported on the Statement of Net Position.
- (C) Long-term Liability Related, examples: Net pension liability, OPEB implicit rate subsidy, bonds, notes, leases, mortgages, and certificate of participation (including accrued interest) are not due and payable in the current period; therefore, they are not reported on the Balance Sheet-Governmental Funds. From an economic perspective however, these liabilities reduce net position and are reported on the Statement of Net Position. The portion reported as current in the reconciliation is payable within the following fiscal year.
- (D) Other Measurement Focus, examples: Long-term assets and long-term taxes receivable are not available to pay for current period expenditures; therefore, the related revenue is reported as unavailable revenue within the deferred inflows of resources on the Balance Sheet-Governmental Funds. From an economic perspective, this revenue is earned and available and the related unavailable revenue is removed from the Statement of Net Position when the revenue is recognized on the Statement of Activities.
- (E) Internal Balances Related: Interfund activities such as interfund loan receivable/payables, due from/due to and advances to/from other fund balances shown on the Balance Sheet-Governmental Funds are reported as internal balances on the Statement of Net Position. In order to minimize the “grossing up” effect on assets and liabilities within the same government, balances in these accounts are eliminated from the Statement of Net Position.

The notes to the financial statements are an integral part of this statement.

**Differences between the Statement of Revenues, Expenditures, and Changes in Fund Balances -
Governmental Funds and the Statement of Activities Governmental Activities**

- (A) Internal Service Fund: Management uses the Internal Services funds (ISF) to report charges for goods and services sold both by and to state agencies, as well as the related costs of providing these goods and services. ISF are intended to operate on the cost reimbursement basis and should break even each period. Since the revenue is primarily the cost of services purchased from ISF, operating net revenue/expense of each ISF is allocated to the programs that purchased the services. Nonoperating revenue/expense, such as gain/loss of sale of capital assets, capital contributions, and transfers of the ISF are not allocated to the programs, but are reported as general revenues.
- (B) Capital Asset Related, reconciling examples:
- Capital assets, received as donations, are not reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances–Governmental Funds as they are not current financial resources. However, such donations increase net position and are reported on both the Statement of Net Position and Statement of Activities.
 - Depreciation is not reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances-Governmental Funds, but it is reported for the economic perspective on which the Statement of Activities is presented.
 - Expenditures reported for capital outlay on the Statement of Revenues, Expenditures and changes in Fund Balances-Governmental Funds are generally reported as a conversion of cash to a capital asset on the Statement of Net Position. They are not reported as expenses on the Statement of Activities.
 - On the Statement of Revenues, Expenditures, and Changes in Fund Balance-Governmental Funds all cash received on disposal of capital assets is reported as a gain on sale of capital assets. On the Statement of Activities the reported gain or loss on sale is based on the carrying value of the assets as well as the cash received.
- (C) Long-term Liability Related, reconciling examples:
- Payments on principal and debt refunding payments are reported as expenditures and other financing uses, respectively, on the Statement of Revenues, Expenditures, and Changes in Fund Balances–Governmental Funds. These payments are reported as reduction of lease, bonds and other debt liability balances on the Statement of Net Position and are not reported on the Statement of Activities.
 - Amortization of debt premium/discount and gain/loss on refunding debts are not reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances-Governmental Funds, but are reported on the Statement of Activities.
 - Lease proceeds, issuance of debt, and debt refunding proceeds are reported as other financing sources at the Statement of Revenues, Expenditures, and Changes in Fund Balances-Governmental Funds. From an economic perspective lease proceeds, debt issuances, and debt refunding proceeds reported as liabilities on the Statement of Net Position and are not reported on the Statement of Activities.
- (D) Other Measurement Focus, reconciling examples:
- Long-term taxes receivable and certain other long-term assets are offset by unavailable revenue and are not part of fund balance on the Balance Sheet-Governmental Funds; however, from a full accrual perspective, changes in the unavailable revenue balances result in adjustments to revenue that are recognized and reported on the Statement of Activities.
 - Expenditures that primarily benefit the present period are classified as current expenditures. On the Statement of Revenues, Expenditures, and Changes in Fund Balances-Governmental Funds, capital outlays are included as part of the current expenditures for each functional activity within that fund.

NOTES TO THE FINANCIAL STATEMENTS

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements for the State of Montana (State) have been prepared in accordance with Generally Accepted Accounting Principles (GAAP), as prescribed by the Governmental Accounting Standards Board (GASB).

A. Reporting Entity

For financial reporting purposes, the State includes funds that comprise the primary government and its component units. The component units are entities that the State is financially accountable for, or whose relationship with the State is such that exclusion would cause the State's financial statements to be misleading or incomplete. The GASB has set forth criteria to be considered in determining financial accountability. This criteria includes appointing a voting majority of an organization's governing body, and (1) the ability of the State to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State.

Discretely Presented Component Units

These component units are entities that are legally separate from the State because they possess corporate powers, but are financially accountable to the State, or whose relationships with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. Complete financial statements of the individual component units, which issue separate financial statements, can be obtained from their respective administrative offices. The condensed financial statements, presented in Note 18, include the financial data of the entities listed below.

Complete financial statements for each of the individual discretely presented component units may be obtained at the following addresses:

Montana Board of Housing
301 South Park, Room 240

Universities and Colleges
Commissioner of Higher Education
2500 Broadway Street
Helena, MT 59620-3201

Montana Board of Housing (MBOH) – MBOH, which is a legally separate entity, is governed by a quasi-judicial board appointed by the Governor. It was created in 1975 to facilitate the availability of decent, safe, and sanitary housing to persons and families of lower income. The MBOH issues negotiable notes and bonds to fulfill its purposes. The total amount of notes and bonds outstanding at any time may not exceed \$1.5 billion. The discount price of bonds sold, not the face amount of the bonds, counts against this statutory ceiling. Neither the faith and credit nor taxing power of the State of Montana may be pledged for the amounts so issued. MBOH is attached to the State of Montana, Department of Commerce for administrative purposes only. The MBOH is audited annually by the State's Legislative Audit Division.

Facilities Finance Authority (FFA) – FFA, which is a legally separate entity, is governed by a quasi-judicial board appointed by the Governor with the advice and consent of the Senate. The FFA assists eligible, nonprofit Montana health care and other community-based service providers to obtain and maintain access to the broadest range of low-cost capital financing as possible. The FFA issues revenue bonds to fulfill its purposes. Neither the faith and credit nor taxing power of the State of Montana may be pledged for the amounts so issued. The FFA is attached to the State of Montana, Department of Commerce for administrative purposes only. Individual financial reports are issued every two years and are audited by the State's Legislative Audit Division.

Montana State Fund (MSF) – MSF is a nonprofit, independent public corporation established under Section 39-71 of the Montana Code Annotated (MCA). MSF provides Montana employers with an option for workers' compensation and occupational disease insurance and guarantees available coverage for all employers in Montana. MSF is governed by a

seven member Board of Directors appointed by the Governor. This Board has full power, authority, and jurisdiction in the administration of MSF. MSF is attached to the State of Montana, Department of Administration for administrative purposes only. MSF is reported on a calendar year basis and is audited annually by the State’s Legislative Audit Division.

MSF functions as an autonomous insurance entity supported solely from its own revenues. All assets, debts, and obligations of MSF are separate and distinct from assets, debts, and obligations of the State of Montana. If MSF is dissolved by an act of law, the assets held by MSF are subject to the disposition provided by the Legislature enacting the dissolution with due regard given to obligations incurred and existing (Section 39-71-2322, MCA).

MSF handles the administration of the claims of Montana State Fund and State of Montana (Old Fund) including: determining who a claimant is; what, if any, claims will be paid; and the amount of claims allowed to be paid. Old Fund covers workers’ compensation claims that were incurred before July 1, 1990, and is reported within the governmental activities of the primary government, on the government-wide financial statements.

Universities and Colleges – The State Board of Regents has responsibility for the following institutions: Montana State University - Bozeman and the units under it including Montana State University - Billings, Montana State University - Northern, and Great Falls College Montana State University; and University of Montana - Missoula and the units under it including Montana Tech of the University of Montana, University of Montana - Western and Helena College University of Montana. All units are funded through state appropriations, tuition, federal grants, and private donations and grants. The universities are audited annually by the State’s Legislative Audit Division.

Though the following organizations perform functions related to the Montana University System, they are not considered part of Montana’s reporting entity: (1) Community Colleges which are considered part of local units of government; (2) the Montana Higher Education Student Assistance Corporation, a private nonprofit corporation; and (3) the Student Assistance Foundation of Montana, a private nonprofit corporation. Entities such as local school districts and local authorities of various kinds are considered part of local units of government and have not been included. The state and federal support of local public education systems is reported in the General Fund, the State Special Revenue Fund and Federal Special Revenue Fund.

Fiduciary Fund Component Units

Complete financial statements for each of the individual fiduciary fund component units may be obtained at the following addresses:

Teachers Retirement System
1500 East Sixth Avenue
PO Box 200139
Helena, MT 59620-0139

Public Employees’ Retirement Board
100 North Park, Suite 200
PO Box 200131
Helena, MT 59620-0131

Teachers Retirement System (Pension Trust Fund) – This retirement plan is a legally separate entity with a board appointed by the Governor. Its purpose is to provide retirement, disability, death and lump-sum payments to benefit recipients of Montana’s public teaching profession. The plan is funded from employer and employee contributions, investment earnings, and the State’s General Fund. The benefit payments and administrative costs of the Teachers’ Retirement System are paid from the same funding sources. The system is audited annually by the State’s Legislative Audit Division. Further detail related to the Teachers Retirement System is provided in Note 6.

Public Employees’ Retirement Board (Pension and Other Employee Benefit Trust Funds) – The Public Employees’ Retirement Board (PERB) is appointed by the Governor and administers eleven separate plans for the purpose of providing retirement, disability, death, and lump-sum payments to plan members. These legally separate plans include the Public Employees’ Retirement Plan – Defined Benefit and Defined Contribution and the associated education funds; the Judges’; the Highway Patrol Officers’; the Sheriffs’; the Game Wardens’ and Peace Officers’; the Municipal Police Officers’; the Firefighters’ Unified Retirement Systems; the Volunteer Firefighters’ Compensation Act; and the State of Montana Deferred Compensation Program (457 Plan) retirement plans. The board also administers an Other Post Employment Benefit (OPEB) disability plan on behalf of Public Employees’ Retirement Plan-Defined Contribution members.

The PERB is responsible for the eleven separate public employee plans, including the Deferred Compensation Program and Other Post Employment Benefit plan. These are reported as pension and other employee benefit trust funds. The board is audited annually by the State's Legislative Audit Division. Further detail related to the PERB is provided in Note 6 and its OPEB plan information can be found in Note 7.

B. Government-wide and Fund Financial Statements

The government-wide financial statements, Statement of Net Position and Statement of Activities, report information on all of the non-fiduciary activities of the State of Montana and its component units. For the most part, the impact of interfund activity has been removed from these statements. Governmental activities, which are normally supported by fees, taxes, and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the State of Montana is reported separately from certain legally separate component units for which the State is financially accountable.

The Statement of Activities demonstrates the degree to which the direct expenses of a function are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Certain indirect costs are included in the program expense reported for the individual functions and activities. Program revenues include (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function; and (2) grants and contributions restricted to meeting the operational or capital requirements of a particular function. Taxes and other revenues not meeting the definition of program revenues are reported as general revenues. The State does not allocate indirect expenses to functions in the Statement of Activities.

Separate fund financial statements are provided for governmental, proprietary, and fiduciary funds. Major individual governmental and major individual enterprise funds are reported as separate columns in the fund financial statements. Fiduciary fund statements are reported only in the fund financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

Government-wide, Proprietary, and Fiduciary Fund Financial Statements

The government-wide, proprietary fund, and fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are reported when earned; expenses are recorded when a liability is incurred regardless of the timing of the related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenues as soon as all of the eligibility requirements imposed by the provider are met. Agency funds report only assets and liabilities, recognizing receivables and payables using the accrual basis of accounting.

As a general rule, material interfund revenues and expenses have been eliminated from the government-wide financial statements. These have not been eliminated where their elimination would distort the direct costs and program revenues of the functions involved.

Governmental Fund Financial Statements

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when they are realizable, measurable, earned, and available. Revenue is considered realizable when it is probable the amount will be collected. Revenue is considered measurable and realizable if the precise amount is known because the transaction is completed, or if there is enough information to provide a reasonable estimate of the net realizable revenue to be received. Revenue is considered to have been earned when the exchange of goods or services has taken place. Revenue is considered to be available if it is collectible within the current period, or soon enough thereafter, to pay liabilities of the current period. For this purpose, the State considers revenue available if it is expected to be collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures as well as expenditures relating to compensated absences, claims, and judgments are recorded only when payment is due.

The major revenue sources considered susceptible to accrual are licenses and permits, natural resource taxes, individual income taxes, corporate income taxes, property taxes, fuel taxes, and certain federal revenues (reimbursable grants and U.S. mineral royalties). All other revenue is considered to be measurable and available when the cash is received.

Fund Financial Statements

The State uses funds to report on its financial position and the results of its operations. A fund is a separate accounting entity with a self-balancing set of accounts. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

The financial activities of the State of Montana are classified into fund categories as described below:

Governmental Funds

General Fund – To account for all governmental financial resources, except those required to be accounted for in another fund.

Special Revenue Funds – To account for the proceeds of specific revenue sources restricted to expenditure for specified purposes other than major capital projects. (1) The State Special Revenue Fund accounts funded from state resources are used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. Several funds are defined in statute as Permanent Funds, however per GASB Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions (GASB 54), these funds should be reported within the State Special Revenue Fund. The respective effect on fund balance is approximately a \$84 million increase. One specific fund is defined in statute as a Federal Special Revenue Fund, however per GASB 54, this fund should be reported within the State Special Revenue Fund. The respective effect on fund balance is approximately a \$18 million increase. (2) The Federal Special Revenue Fund accounts for activities funded from federal sources used in the operation of state government.

Debt Service Funds – To account for resources accumulated for payment of principal and interest on general long-term obligation debt.

Capital Projects Funds – To account for resources used for the acquisition or construction of major capital facilities, other than those financed by proprietary or trust funds.

Permanent Funds – To account for resources that are permanently restricted to the extent that only earnings, not principal, may be used for the purposes of supporting the government's programs. Several funds are defined in statute as Permanent Funds, however per GASB 54 these funds should be reported within the State Special Revenue Fund.

Proprietary Funds

Enterprise Funds – To account for operations: (1) financed and operated similar to private business enterprises, where the intent of the Legislature is to finance or recover costs primarily through user charges; (2) where the Legislature has decided periodic determination of revenue earned, expenses incurred, or net income is appropriate; (3) where the activity is financed solely by a pledge of the net revenues from fees and charges of the activity; or (4) when laws or regulations require that the activities' costs of providing services, including capital costs, be recovered with fees and charges rather than with taxes or similar revenues. The primary focus of fee revenues charged by enterprise funds is users outside of the primary government.

Internal Service Funds – To account for the financing of goods and services provided by one department or agency to other departments, agencies, or other governmental entities on a cost-reimbursement basis.

The State of Montana reports two employee group benefits funds. The MUS Group Insurance Fund primarily charges its fees to Montana State University and the University of Montana. The universities are reported as discretely presented component units, which the State considers to be external users, and as such, reports the MUS Group Insurance Fund as an enterprise fund. The Employee Group Benefits Fund charges its fees to funds of the primary government, and as such, is reported as an internal service fund.

Fiduciary Funds

Fiduciary Funds are used to account for assets held by the State in a trustee capacity or as an agent for individuals, private organizations, or other governments. These assets cannot be used to support the government's own programs.

Pension (and Other Employee Benefit) Trust Funds – To account for resources that are required to be held in trust for the members and beneficiaries of the State’s defined benefit plans, defined contribution plans, other retirement plans and other post employment benefit plan. Plan members receive retirement, disability, death, and lump-sum payments from the fund. Further detail related to the individual plans is provided in Note 6 and Note 7.

Private-Purpose Trust Funds –To account for assets held by the State in a trustee capacity, where both the principal and earnings benefit individuals, private organizations, or other governments. Examples include the State’s escheated property fund, unliquidated security bonds held on deposit from self-insured employers, environmental reclamation, and bonds held in trust.

Investment Trust Fund – To account for the receipt of monies and the distribution of related investment earnings to local government agencies by the Montana Board of Investments for investment in the Short-term Investment Pool (STIP) and Trust Fund Investment Pool (TFIP).

Agency Funds – To account for assets held by the State as an agent for individuals, private organizations, and other governments. For example, various agencies hold deposits pending compliance with performance agreements. Other examples include monies belonging to state institution residents and child support payments from parents.

Major Governmental Funds

The General Fund is the State’s primary operating fund, as previously defined.

The State Special Revenue Fund accounts for activities funded from state sources, which are restricted either legally or administratively for particular costs of an agency, program, or function.

The Federal Special Revenue Fund accounts for activities funded from federal sources used in the operation of state government.

The Coal Severance Tax Permanent Fund, created by Article IX, Section 5 of the Montana State Constitution, receives 50% of all coal tax collections. The principal in this fund can be expended only upon affirmative vote of three-fourths of each house of the Legislature.

The Land Grant Permanent Fund accounts for lands granted to the State for support of public schools and state institutions.

Major Enterprise Funds

The Unemployment Insurance Fund accounts for employer contributions deposited with the Secretary of the Treasury of the United States to the credit of the State’s unemployment trust fund. Unemployment benefits are paid from this fund to eligible recipients.

The Economic Development Bonds Fund (EDB) accounts for the Economic Development Bond Act (EDBA) programs and the Municipal Finance Consolidation Act (MFCA) programs. The EDBA programs provide qualifying Montana businesses access to tax-exempt funds through the issuance of conduit (no-commitment) debt. The MFCA programs provide low cost funds to eligible Montana governments to finance capital expenditures. Separately issued financial statements may be obtained by contacting the Montana Board of Investments, 2401 Colonial Drive, 3rd Floor, PO Box 200126, Helena, MT 59620-0126.

D. Proprietary Activity Accounting and Financial Reporting

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues generally result from providing services and delivering goods in connection with a proprietary fund’s principal ongoing operations. Operating expenses for enterprise and internal service funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting these definitions are reported as non-operating.

E. Cash/Cash Equivalents

For all funds, cash and cash equivalents consist of amounts deposited in the State Treasurer's pooled cash account, cash deposits in checking accounts, cash invested in the Short-term Investment Pool (STIP), cash held by trustees, undeposited cash held by individual state agencies, and investments categorized as cash equivalents, which are short-term, highly liquid investments with original maturities of three months or less. Further detail related to Cash and Cash Equivalents is provided in Note 3.

F. Receivables

This classification, net of estimated uncollectibles, consists primarily of receivables for goods sold and services provided; short-term loans and notes, interest and dividends, taxes due within 60 days of fiscal year-end, and income, withholding, and inheritance taxes that are past due. An allowance for uncollectible taxes is provided based upon historical analysis. Further detail relating to receivables is provided in Note 4.

G. Inventories

Inventories of materials and supplies are reported at cost. The State allows agencies to use any generally accepted inventory pricing method, but specifies the first-in, first-out method generally to be appropriate for most agencies. Governmental funds use the "purchase method," meaning inventory purchases are recorded as expenditures. At fiscal year-end, significant amounts of inventory are shown as nonspendable, indicating they do not constitute available expendable resources. Proprietary and fiduciary funds report using the "consumption method," meaning inventories are expensed as used.

H. Restricted Net Position

Certain investments of the Economic Development Bonds Fund are classified as restricted net position on the Statement of Fund Net Position for proprietary funds because their use is limited by applicable bond indenture agreements. Net position associated with the Unemployment Insurance Fund is also classified as restricted.

I. Equity in Pooled Investments

To account for the custody of monies by the Montana Board of Investment for the investment in five internal investment pools and one external investment pool. The internal investment pools are the Retirement Funds Bond Pool (RFBP), Montana Domestic Equity Pool (MDEP), Montana International Pool (MTIP), Montana Private Equity Pool (MPEP) and Montana Real Estate Pool (MTRP). The external investment pool is the Trust Fund Investment Pool (TFIP). Current state agency participation in the pools is within the enterprise funds, permanent funds, private-purpose trust funds, investment trust funds, pension trust funds, Montana University System Units, and specific funds established within the State Special Revenue Fund. The state's nine retirement funds can only participate in RFBP, MDEP, MTIP, MPEP and MTRP. Other state agencies and qualifying local governments can participate in the TFIP. The participant investments in the pools are reported at fair value in the assets within the individual funds. Further detail related to Cash and Cash Equivalents and Investments is provided in Note 3.

J. Investments

In accordance with the Montana Constitution and the statutorily mandated "Prudent Expert Rule," the State of Montana invests in various types of securities for each portfolio it manages. Certain securities including asset-backed securities, variable-rate instruments, zero-coupon bonds, preferred stocks, and mortgage-backed securities are purchased for portfolio diversification and a competitive rate of return. Most investments are reported at fair value on the Statement of Net Position. Further detail related to Investments is provided in Note 3.

K. Capital Assets

Capital asset valuation is based on actual historical cost or, in the case of donations, acquisition value. General government infrastructure capital assets are capitalized and reported on the government-wide financial statements. Infrastructure assets of proprietary funds are capitalized on the fund financial statements. Interest incurred during the construction of capital assets for proprietary funds and higher education units is capitalized. The State has chosen to use

the depreciation approach for infrastructure assets and is reporting accumulated depreciation on the Statement of Net Position and depreciation expense on the Statement of Activities for these assets. Further detail related to Capital Assets is provided in Note 5.

Capital assets in proprietary, private-purpose trust, and pension trust funds are accounted for within their respective funds and are depreciated or amortized. Depreciation is on a straight-line basis with estimated useful lives of 25 to 60 years for buildings, 10 to 50 years for infrastructure, 7 to 20 years for building improvements and 3 to 10 years for equipment. State agencies are also required to extend or shorten the useful lives of capital assets to reflect their actual experience or industry standards when appropriate. Amortization is on a straight-line basis with estimated useful lives of 4 years for software (internally and externally generated), 30 years for land use rights, and 20 years for other intangibles.

The capitalization limit for buildings and building/land improvements is \$25,000. The capitalization threshold for infrastructure and internally-generated software is \$500,000. The capitalization threshold for intangible assets is \$100,000. The capitalization limit for other capital assets is set at \$5,000. Agencies are allowed to capitalize additions to collections and land acquisitions at any cost. Purchases under these thresholds are recorded as expenditures/expenses in the current period.

L. Deferred Outflows, Deferred Inflows, and Unearned Revenue

A deferred outflow of resources is a consumption of net assets by the government that is applicable to a future reporting period. A deferred inflow of resources is an acquisition of net assets by the government that is applicable to a future reporting period. Deferred outflows and inflows of resources may include financial transactions related to refunding debt, non-exchange transactions, derivative investment, and pension related components and are reported on both the government-wide and proprietary fund financial statements. Additionally, deferred inflows of resources may include financial transactions related to unavailable revenue on the governmental fund financial statements. Unavailable revenue is reported when assets are recognized, but those assets are not considered available to pay liabilities of the current period. Unearned revenue is recognized as a liability on government-wide, governmental and proprietary fund financial statements. Further detail related to Deferred Outflows of Resources and Deferred Inflows of Resources is provided in Note 4.

M. Long-term Obligations

Long-term obligations expected to be financed from governmental funds are reported on the government-wide financial statements. Long-term debt is recognized as a liability of a governmental fund when due, or when resources have been accumulated in the debt service fund for payment early in the following year. For other long-term obligations, only that portion expected to be financed from current expendable available financial resources is reported as a fund liability of a governmental fund on the fund financial statements. The remaining portion of such obligations is reported on the government-wide financial statements. Long-term liabilities expected to be financed from proprietary and fiduciary fund operations are accounted for in those funds. Further detail related to Leases/Installment Purchases Payable and State Debt is provided in Note 10 and Note 11, respectively.

N. Capital Leases

A capital lease is a lease which transfers benefits and risks of ownership to the lessee. At the inception of a capital lease, on the government-wide, proprietary fund, and fiduciary fund financial statements, a capital asset and a capital lease liability are recorded at the present value of the future minimum lease payments. On the governmental fund financial statements no asset or liability is recorded related to assets under capital leases. Rather, on the governmental fund financial statements, at the inception of a capital lease, capital outlay expenditures and other financing sources (inception of lease/installment contract) are recorded at the net present value of the minimum lease payments. Further detail related to Capital Leases is provided in Note 10.

O. Bond Discounts/Premiums/Issuance Costs

Bond premiums and discounts, as well as issuance costs, are recognized in the period they are incurred. Bond proceeds and bond premiums are reported as an other financing source, and bond discounts are reported as an other financing use. Issuance costs are reported as debt service expenditures whether or not they are withheld from the bond proceeds. Bonds

payable are recorded net of any applicable premium or discount. Further detail related to Long-term Debt is provided in Note 11.

P. Compensated Absences

Full-time state employees earn vacation leave ranging from 15 to 24 days per year depending on the individual's years of service. Teachers employed by the State do not receive vacation leave. Vacation leave may be accumulated and carried over from one year to the next. The carryover is limited to two times the maximum number of days earned annually. Sick leave is earned at the rate of 12 days per year with no limit on accumulation. Each contribution year, an employee may contribute a maximum of 80 hours of sick or annual leave to a nonrefundable sick leave pool. Excess annual leave that is being forfeited can also be contributed, with no maximum contribution. The adjusted ending balance of the pool for June 30, 2015, was 21,497 hours. For fiscal year 2016, 648 sick leave hours, 357 annual leave hours, and 2,666 excess annual leave hours were contributed to the sick leave pool, and 3,635 hours were withdrawn, leaving a balance of 21,533 hours in the pool. The liability associated with the pool is not reported in the accompanying financial statements because these hours are nonrefundable to contributors, except by grants approved through an application process.

Vested or accumulated leave for proprietary and fiduciary funds is recorded as an expense and liability of those funds in the fund financial statements. For governmental funds, the liability is not expected to be liquidated with expendable financial resources. The expenditure and liability for the governmental funds is reported only on the government-wide financial statements. Upon retirement or termination, an employee is paid for 100% of unused vacation leave and 25% of unused sick leave. Further detail related to Compensated Absences is provided in Note 11.

Q. Fund Balance/Net Position

Fund Balance

The classifications for fund balance used for governmental funds are reported in two general classifications, nonspendable and spendable. Nonspendable represents the portion of fund balance that is legally or contractually required to remain intact or is not in spendable form such as inventories, and, in the General Fund, long-term notes and loans receivable. Spendable fund balance is further categorized as restricted, committed, assigned, and unassigned.

The restricted fund balance category includes amounts that can be spent only for the specific purposes stipulated by the State Constitution and external parties, such as the federal government, or through enabling legislation. For the purpose of determining restricted amounts, enabling legislation does not include commitments resulting from State legislation if these constraints can be removed or changed by a similar legislative action.

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority, the State's Legislature, through legislation passed into law.

Amounts, in the assigned fund balance classification, are intended to be used by the government for specific purposes, but they do not meet the criteria to be classified as restricted or committed. Assignments of fund balance are created by the executive branch. An example of an assignment is money deposited into an account within the State Special Revenue fund by management and later appropriated by the Legislature. The revenue source is not restricted or committed by legislation but is assigned by executive branch management and later appropriated by the Legislature for a specific purpose. In governmental funds other than the General Fund, assigned fund balance also represents the remaining amount that is not restricted or committed. The assigned fund balance for the General Fund are encumbrances and assignments for the portion of current General Fund balance that is projected to be used to fund expenditures and other cash outflows in excess of the expected revenues and other cash inflows in fiscal years as needed. Based on the Governor's budget proposal, for the fiscal year ending June 30, 2016, the General Fund balance will be spent down by \$130.0 million when comparing the fiscal year 2016 actual to fiscal year 2017 enacted/proposed budget. This represents management's intention to fund supplemental and other one-time-only expenditures.

Unassigned fund balance is the residual classification for the General Fund and includes all spendable amounts not contained in the other classifications. In other funds, the unassigned classification should be used only to report a deficit balance resulting from overspending for specific purposes for which amounts had been restricted, committed, or assigned.

The State generally segregates restricted, committed, and assigned resources by account (sub-fund) within the governmental funds, other than the General Fund. When resources meeting more than one of these spendable classifications are commingled in an account on the State's accounting system the assumed order of spending is restricted first, committed second, and finally assigned. State statute requires non-General Fund money be spent first whenever possible so any related available unassigned balance would be spent last.

Minimum General Fund - Fund Balance

The State does not maintain a stabilization fund. However, statute provides a minimum fund balance amount as follows: Section 17-7-140, MCA, defines minimum ending fund balance and specifies the procedures that must be followed to make expenditure reductions if a projected ending fund balance drops below minimum statutory requirements.

If the Budget Director determines that a deficit exists, statute requires reductions that must be made to assure that the projected ending fund balance is in compliance with the minimum ending fund balance of General Fund appropriations for the biennium. Under circumstances when a deficit of this level is projected during a biennium, the Governor may direct reductions from any General Fund expenditure not exempted by Section 17-7-140, MCA, including House Bill (HB) 2 (the State's main appropriation bill), any other appropriation bills, statutory appropriations, or language appropriations. Reductions may not exceed 10% of General Fund appropriations for any single "program," as defined in HB 2. If a program has more than one appropriation, the reduction for one or more of the appropriations may exceed 10% as long as the reduction for the program as a whole does not exceed 10%.

The Legislative and Judicial branches, the Montana School for the Deaf and Blind, principal and interest on state debt, salaries of elected officials, and public school BASE funding are exempt, statutorily, from reductions. These exemptions shield approximately one-third of General Fund appropriations from reduction. Of the remaining expenditures, the Governor may not direct executive agencies headed by elected officials or the Board of Regents to reduce their expenditures by more than the average reduction percentage imposed upon all other executive branch agencies.

Net Position

In funds other than governmental, net position represents the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources. The net investment in the capital assets portion of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction, or improvement of those assets. Net position is reported as restricted when there are limitations imposed on their use either through constitutional provisions, enabling legislation or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. The government-wide Statement of Net Position reported restricted net position of \$3.2 billion.

R. Property Taxes

Real property taxes are normally levied in October and are usually payable in two installments on November 30 and May 31. These taxes attach as an enforceable lien immediately if not paid when due.

Personal property tax levies are set each August, and notices are normally mailed the following March or April. Half of mobile home taxes are due in 30 days and the remaining half on September 30. Taxes on all other types of personal property are to be paid in full 30 days after receipt of the notice. Property tax payments are recognized as deferred inflows of resources if received prior to levy or availability.

Personal property taxes attach as an enforceable lien immediately if not paid when due. Property taxes are collected by each of Montana's 56 counties. The counties then remit the State's portion to the State Treasury. The majority of these taxes help fund public school systems and higher education.

S. Other Taxes

On the Statement of Activities, the revenue category “Other Taxes” consists of the following taxes (in thousands):

	General Fund	State Special Revenue	Other Governmental Funds	Business- Type Funds	Total
Accommodations	\$ 21,592	\$ 27,927	\$ -	\$ 18	\$ 49,537
Agriculture sales	-	7,297	-	-	7,297
Cigarette/tobacco	37,427	47,175	1,798	-	86,400
Contractors gross receipts	2,397	-	-	-	2,397
Energy tax	7,930	-	-	-	7,930
Fire protection	-	3,682	-	-	3,682
Insurance premium	69,223	29,369	-	-	98,592
Liquor tax	5,405	2,177	-	27,060	34,642
Livestock	-	4,524	-	-	4,524
Other taxes	7,583	5,859	-	-	13,442
Public service commission	-	2,917	-	-	2,917
Telephone license	17,059	-	-	-	17,059
Video gaming	60,554	6	-	-	60,560
Total other taxes	\$229,170	\$130,933	\$1,798	\$27,078	\$388,979

NOTE 2. OTHER ACCOUNTING CHANGES**A. New Accounting Guidance Implemented**

For the year ended June 30, 2016, the State of Montana implemented the provisions of GASB Statement No. 72, Fair Value Measurement and Application (GASB 72). This Statement addresses accounting and financial reporting issues related to fair value measurements. The definition of fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This Statement provides guidance for determining a fair value measurement for financial reporting purposes. This Statement also provides guidance for applying fair value to certain investments and disclosures related to all fair value measurements. The requirements of this Statement will enhance comparability of financial statements among governments by requiring measurement of certain assets and liabilities at fair value using a consistent and more detailed definition of fair value and accepted valuation techniques. This Statement also will enhance fair value application guidance and related disclosures in order to provide information to financial statement users about the impact of fair value measurements on a government's financial position.

For the year ended June 30, 2016, the State of Montana implemented portions of the provisions of GASB Statement No. 73, Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68 (GASB 73). The Statement has two different implementation dates. The State is in compliance with the portion of the Statement associated with an effective date for fiscal years beginning after June 30, 2015. The Statement includes clarifying amendments to Statements 67 and 68 that apply to all employers and non-employer contributing entities.

For the year ended June 30, 2016, the State of Montana implemented the provisions of GASB Statement No. 76, The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments (GASB 76). The Statement prioritizes guidance governments follow when preparing GAAP financial statements. The Statement reduces authoritative GAAP hierarchy from four categories to two and lists order of priority for pronouncements to which a government should look for guidance.

B. Other Accounting Changes

The 2015 legislature passed Senate Bill (SB) 123, which changed the regulatory oversight of Montana State Fund (MSF) effective January 1, 2016. MSF was issued a Certificate of Authority, became an authorized insurer regulated by the Montana Commission of Securities and Insurance, and is subject to the provisions of Title 33, Montana Insurance Code. With the approval of SB 123, MSF's reporting period changed from a June 30 fiscal year-end to a calendar year-end. This report, for the year ended June 30, 2016, includes a 6-month financial reporting period for MSF. Further detail related to MSF is provided in Note 18.

The proposal for GASB Statement No. 79, Certain External Investment Pools and Pool Participants, required BOI to elect between accounting for STIP assets in one of the two allowable methods: either to continue to account for securities within the STIP pool at an amortized cost basis or change to a fair value basis. In October 2015, BOI decided that for financial reporting purposes, the STIP portfolio would be measured on a fair value basis, following the guidance of GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools, and GASB 72. Further detail related to STIP is provided in Note 3.

C. Adjustments to Beginning Net Position

For the year ended June 30, 2016, there were no material adjustments to beginning net position.

NOTE 3. CASH/CASH EQUIVALENTS AND INVESTMENTS

This note details the following asset classifications (in thousands):

Cash/cash equivalents	\$ 3,418,574
Equity in pooled investments	\$ 12,076,439
Investments	\$ 3,135,544

Carrying amounts for the bank balance for cash deposits and fair values for the State's cash equivalents and investments are presented in Tables 1 through 4.

A. General

Outside of statutory requirements, the State does not maintain a statewide risk policy for cash/cash equivalents or investments, held outside of the Montana Board of Investments (BOI). The investment risk policy for State cash/cash equivalents and investments, including the Economic Development Bonds (EDB) deposits and investments managed by BOI, have been detailed below.

(1) **BOI** was created by the Legislature to manage the Unified Investment Program established by the State Constitution. The Unified Investment Program is comprised of State funds, including pensions, trusts, insurance, and cash. Local government entities can, by statute, only voluntarily invest in the Short Term Investment Pool (STIP). With a qualifying event, local government entities may also, by statute, invest in the long-term investment portion of the program. BOI manages the Unified Investment Program pursuant to the “Prudent Expert Principle” mandated by State law, which requires an investment manager to:

1. discharge the duties with the care, skill, prudence, and diligence, under the circumstances then prevailing, that a prudent person acting in a like capacity with the same resources and familiar with like matters exercises in the conduct of an enterprise of a like character with like aims;
2. diversify the holdings of each fund within the Unified Investment Program to minimize the risk of loss and to maximize the rate of return unless, under the circumstances, it is clearly prudent not to do so; and
3. discharge the duties solely in the interest of and for the benefit of the funds forming the Unified Investment Program.

Currently, only nine of the retirement funds and the Montana State Fund (Workers’ Compensation) may invest in public corporate capital stock. All other state funds must be invested in fixed-income type investments. Neither State law nor the State Constitution place restrictions on retirement fund investments. The funds are invested solely at the discretion of BOI pursuant to the “Prudent Expert Principle.”

To facilitate management of the Unified Investment Program, BOI created seven investment pools (Pools) that operate similar to mutual funds. All State agencies and many local government entities participate in one or more Pools. By investing in large Pools with other participants, the smaller participants are provided broad diversification not otherwise possible. Some Pools are dedicated solely to the State’s nine retirement funds, while others are open to other State and local government funds. State agencies, ineligible to participate in a long-term investment pool, have direct fixed income, equity and loan investments. These investments are combined and reported as All Other Funds (AOF) Investments Managed. The Pools, AOF Investments Managed, Pool creation date and eligible state participants are shown in the following table as of June 30, 2016:

<u>Pool/Investments Managed Name</u>	<u>Creation Date</u>	<u>Eligible Participants</u>
Retirement Funds Bond Pool (RFBP)	04/01/95	Nine Retirement Funds Only
Trust Funds Investment Pool (TFIP)	10/01/95	Various State Trust Funds
Montana Domestic Equity Pool (MDEP)	07/01/80	Nine Retirement Funds Only
Montana International Equity Pool (MTIP)	06/01/96	Nine Retirement Funds Only
Montana Private Equity Pool (MPEP)	05/01/02	Nine Retirement Funds Only
Montana Real Estate Pool (MTRP)	06/01/06	Nine Retirement Funds Only
Short Term Investment Pool (STIP)	07/01/74	All State Funds and Local Governments
All Other Funds (AOF) Investments Managed	NA	Non-Pool State Agency Investments

During fiscal year 2016, the MDEP small trusts were moved into either the TFIP or the STIP.

Separately issued investment Pool financial statements may be obtained by contacting:

Montana Board of Investments
2401 Colonial Drive, 3rd Floor
PO Box 200126
Helena, MT 59620-0126

BOI's financial statements include the activity for Montana State Fund (MSF) within AOF on a June 30, 2016, basis. MSF, a discretely presented component of the State, by statute, prepared separately issued financial statements on a calendar year-end basis. Due to the difference in reporting period, there will be a variance between the note disclosures and the financial statements for cash/cash equivalents, equity in pooled investments, and investments.

(a) Cash and cash equivalents consist of funds deposited by individual funds in the State Treasurer's pooled cash account, cash deposits in checking accounts, cash invested in STIP, cash held by trustees, un-deposited cash held by individual state agencies, and investments categorized as cash equivalents.

Cash deposited with the State Treasurer's pooled cash account is invested by BOI in short-term securities and other investments. Because these funds are immediately available to the individual funds, their investment in the pooled cash account is reported as a cash equivalent. In addition to the State Treasurer's pooled cash account, there is the STIP maintained by the BOI. This investment fund provides individual State agencies and local governments an opportunity to invest excess cash in a pool that is managed to preserve principal while providing 24-hour liquidity. Because these pooled funds are invested in short-term, highly liquid investments, the individual fund investments in the STIP are reported as a cash equivalent.

STIP investments and the income are owned by the participants and are managed on their behalf by BOI. STIP is presented at fair value. The portfolio may include asset-backed securities, commercial paper, corporate, US Government direct obligations, US Government agency securities, repurchase agreements, institutional money market funds, certificates of deposit, and variable-rate (floating-rate) instruments. Investments must have a maximum maturity of 397 days or less unless they are a variable rate security.

State agencies that are allowed to retain their interest earnings within their funds are required to invest in STIP. Local government participation in STIP is voluntary.

(b) Investment securities are reported by investment portfolio and type in Table 2 – Cash Equivalents, Table 3 – Equity in Pooled Investments, and Table 4 – Investments. The public equity Pools may include common stock, equity index shares, preferred stock, convertible equity securities, American Depositary Receipts (ADR), equity derivatives, and commingled funds. The MDEP portfolio is limited to domestic stock investments, while the MTIP portfolio includes holdings of securities of foreign-based corporations listed on legal and recognized foreign exchanges as well as domestic exchanges as depositary receipts. The MTIP portfolio invests in both developed and emerging markets. The MPEP portfolio includes venture capital, leveraged buyout, mezzanine, distressed debt,

special situation, and secondary investments. The MTRP portfolio includes investments in private core, value-added, and opportunistic real estate.

The value of stocks and bonds are recorded at both “book” and “fair” value. The book or carrying value of a stock is the average cost of the shares held. If the same stock has been purchased several times, the average of the purchase prices is the book value. The book value of bonds is the “amortized” cost, which represents the original cost, adjusted for premium and discount amortization where applicable. If bonds are purchased at more than the par value, the difference is called a premium. If they are purchased for less than par value, the difference is called discount. Premiums and discounts are amortized/accreted using the straight-line or scientific method to the call, average life, or maturity date of the securities. The fair value of publicly traded stocks and bonds is determined by reference to market prices supplied by State Street Bank (the custodial bank). Because a public market does not exist for private equity and real estate investments, the fair value of these investments is the value reported in the most recent external managers’ valuation reports. The book or carrying value of these private investments is the capital invested less capital returned. All investment portfolios presented in the Statement of Net Asset Value are at “fair” value. BOI categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles as follows:

- Level 1 – Quoted prices for identical assets or liabilities in active markets.
- Level 2 – Prices determined using inputs, other than quoted prices included within Level 1, that are observable for an asset or liability, either directly or indirectly.
- Level 3 – Prices are determined using unobservable inputs.

Common stock owners may vote on director selection and other important matters and receive dividends if the company pays dividends. Equity index investments are comprised of shares in institutional commingled funds with equity portfolios that match a broad based index or specific industry composite. Preferred stocks pay dividends at a specified rate and have preference in the payment of dividends and liquidation of assets. Preferred stock holders do not usually have voting rights.

Convertible securities permit the holder to exchange or “convert” the instrument for other securities of the issuer or of another issuer. This definition most often applies to preferred stocks or corporate bonds carrying the right to exchange for a fixed number of shares of the issuer’s common stock. ADR investments are receipts issued by a US depositary bank representing shares of a foreign stock or bonds held abroad by the foreign sub-custodian of the American depositary bank. Equity derivatives, such as futures and options, “derive” their value from underlying equity instruments. An institutional commingled fund combines assets from several institutional investors that are blended or pooled together to reduce management and administration costs. The investor buys shares in the fund.

MPEP investments are made via limited partnership agreements in which BOI and other institutional investors invest as limited partners in funds managed by a general partner. These investments are less liquid than other types of investments because the funds are usually committed for at least ten years. Because of the risk and illiquidity, these investments are limited to sophisticated investors only.

Real estate core investments are the least risky with the lowest return and are usually managed in commingled accounts in which the investor purchases shares. Value-added and opportunistic real estate investments provide more risk and return and are less liquid than core investments. These investments are usually made through limited partnership agreements.

Asset-backed securities represent debt securities collateralized by a pool of mortgage and non-mortgage assets such as trade and loan receivables, equipment leases, credit cards, etc. Commercial paper is unsecured short-term debt with maturities ranging from 2 to 270 days. US Government direct-backed securities include direct obligations of the US Treasury and obligations explicitly guaranteed by the US Government. US Government indirect-backed obligations include US Government agency securities. Repurchase agreements (REPO) represent an agreement between a seller and a buyer, usually of US Government securities, whereby the seller agrees to repurchase the securities at an agreed upon price and stated time. Variable-rate securities pay a variable rate of interest until maturity. The STIP portfolio’s variable-rate securities reset to LIBOR (London Interbank Offered Rate).

BOI is authorized by law to lend its securities and has contracted with the custodial bank, State Street Bank and Trust, “the Bank”, to lend BOI’s securities to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. The Bank is required to maintain collateral equal to 102% of the fair value of domestic securities and 105% of the fair value of international securities while the securities are on loan. On any day, including June 30, the markets may move in a positive or negative direction resulting in under or over collateralization. The Bank compensates for market movement by recalculating on the following business day to meet the collateralization requirements. BOI and the Bank split the earnings, 80/20 respectively, on security lending activities. BOI retains all rights and risks of ownership during the loan period.

During fiscal year 2016, the Bank lent BOI public securities and received as collateral: US dollar cash; US Government and government sponsored agency securities; US corporate debt securities and structured securities rated AA-/Aa3 or higher; sovereign debt securities of the G10 nations; and debt securities issued by certain supranational agencies. The Bank does not have the ability to sell collateral securities unless the borrower defaults.

BOI imposed no restrictions on the amount of securities available to lend during fiscal year 2016. There were no failures by any borrowers to return loaned securities or pay distributions thereon during the period that resulted in a declaration and notice of default of the borrower. There were no losses during fiscal year 2016 resulting from a borrower default. As of June 30, 2016, RFBP securities in the amount of \$4 million were recalled and not yet returned.

During fiscal year 2016, BOI and the borrowers maintained the right to terminate all securities lending transactions on notice. The cash collateral received for each loan was invested, together with the cash collateral of other qualified plan lenders, in two investment funds: Quality D Short Term Investment Fund and the Securities Lending Quality Trust. Each is comprised of a liquidity pool. Pension funds participate in the Quality D Short Term Investment Fund and non-pension entities participate in the Security Lending Quality Trust. Security lending income offset the entire amount of the loss within each investment fund. Because the securities lending transactions were terminable at will, their duration did not generally match the duration of the investments made with the cash collateral received from the borrower. At fiscal year-end 2016, State Street Bank indemnified BOI’s credit risk exposure to borrowers. The private equity and real estate pools do not participate in securities lending.

Average Duration and Average Weighted Final Maturity

<u>Liquidity Pool</u>	Quality D ST Investment Fund	Security Lending Quality Trust
Average Duration	43 days	32 days
Average Weighted Final Maturity	83 days	92 days

(c) Investment risk disclosures are described in the following paragraphs and are identified by the specific pools or securities to which they pertain, when applicable.

Credit Risk

Credit risk is defined as the risk that an issuer or other counterparty to an investment will not fulfill its obligation. In regard to BOI, with the exception of US Government securities, the Pools’ fixed income instruments have credit risk as measured by major credit rating services. For all retirement Pools, only approved cash investment vehicles are permitted. These include the custodian’s STIF vehicle, STIP, or any SEC-registered money market fund, all of which specifically address credit risk in their respective investment guidelines. BOI’s policy requires TFIP fixed income investments to be invested in investment grade securities (Baa3/BBB- or higher) with the exception of non-rated securities issued or guaranteed by agencies or instrumentalities of the US Government. BOI’s STIP investment policy specifies that STIP securities have a minimum of two separate credit ratings as provided by Standard and Poor’s, Moody’s, or Fitch that meet the minimum as stated in the STIP investment policy depending on the type of investment.

The US Government guarantees US Government securities directly or indirectly. Obligations of the US Government or obligations explicitly guaranteed by the US Government are not considered to have credit risk and do not require disclosure of credit quality per GASB Statement No. 40.

Of the 18 individual Investment Policy Statements for the funds categorized as the AOF, 16 funds have specific policies associated with credit risk. The remaining two funds are not required to have a policy addressing credit risk, as they do not have exposure to debt securities. One fund requires corporate securities be rated A3/A- or higher by NRSRO to qualify for purchase. One fund requires fixed income investments, at the time of purchase, to be rated investment grade as defined either by Moody's or by NRSRO. This fund's investment policy states "the maximum fixed income credit risk will be limited to 2% of the total securities portfolio in any one name." Five funds require, at the time of purchase, "the quality rating of any corporate bond shall be in the top of the single-A rating classification or better at the time of purchase (e.g. A1/A+ or higher) and have at least two ratings. Exposure to the securities of any one US Agency is limited to 5% and in no event will an agency security be purchased if it carries a rating that is less than top-rated (AAA) at the time of purchase." Two funds require "fixed income securities must be rated at least A- or A3 at the time of purchase." A portion of one fund's portfolio may have modest credit risk while the remainder has a low tolerance for credit risk. Two funds assume some risk of loss of principal to provide a return sufficient to fund objectives. Four funds may assume low risk of principal loss.

Asset-backed securities held in the bond Pools, AOF and STIP portfolios are based on the cash flows from principal and interest payments emanating from a trust containing a pool of underlying auto loan, credit card or other receivables. These securities, while sensitive to prepayments due to interest rate changes, generally have less credit risk than unsecured bonds. Their credit risk is based on the structure itself rather than balance sheet risk. This includes such factors as default rates, overcollateralization, and quality of collateral.

Custodial Credit Risk

Per policy, BOI's custodial institution must hold short-term and long-term credit ratings by at least one NRSRO with a minimum requirement of A1/P1 (short-term) and A3/A-1 (long-term).

Cash

Custodial risk for cash is the risk that, in the event of the failure of the custodial institution, the cash or collateral securities may not be recovered from an outside party. For any cash balances held as deposits of the custodial bank or sub-custodial bank, they are held in the name of BOI or its accounts. As of June 30, 2016, BOI recorded cash of \$9.7 million.

Investments

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, BOI may not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. As of June 30, 2016, all the public securities as well as securities held by the separate public equity account managers were registered in the nominee name for the Montana Board of Investments and held in the possession of BOI's custodial bank, State Street Bank. The Equity Index funds, US Bank repurchase agreement, real estate, mortgage and loan investments were purchased and recorded in BOI's name. Commingled fund investments are registered in the name of the Montana Board of Investments.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributable to the magnitude of any single investment per issuer name. Investments explicitly guaranteed by the US Government are excluded from the concentration of credit risk requirement. The US Government extended the explicit guarantee to certain government agencies such as Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (FHLMC-Freddie Mac). Given the explicit guarantee extension, BOI had no concentration of credit risk exposure to Fannie Mae and Freddie Mac in either the bond Pools or STIP.

Bond Pools

Both the RFBP Core Internal Bond Portfolios and TFIP Investment Policy Statements (IPS) provide for a 2% portfolio limit for dollar denominated debt obligations of domestic and foreign corporations (Yankee bonds) and a 3% portfolio limit in non-agency Mortgage Pass-through (MBS) securities. The four RFBP external managers are limited to debt obligations of domestic and foreign corporations up to 3% of portfolio assets per issuer.

STIP

The STIP Investment Policy specifies concentration of credit risk exposure by limiting portfolio investment types to 3% in any issuer with the exception of US Treasury and US Agency securities, as well as any repurchase agreements with a financial institution. Concentration risk was within the policy as set by BOI.

AOF

With the exception of nine funds, the 18 investment policy statements for various AOF state agencies do not address concentration of credit risk. One fund provides for a concentration limitation pertaining to repurchase obligations. The policy for another fund states, “the fixed income holdings rated lower than A3 or A- are limited to 25% of the fixed income portfolio at the time of purchase.” This same fund is limited to stock investments not to exceed 12% of the book value of its total invested assets. In addition, this fund’s, and another fund’s, IPS provides for a “2% portfolio limit for dollar denominated debt obligations of domestic and foreign corporations (Yankee bonds) and a 3% portfolio limit in non-agency Mortgage Pass-through (MBS) securities.” One fund’s corporate risk is limited to investing 3% in any one name. The policy for five funds sets “investment limits to reduce the risk of loss on individual corporate bonds, investment purchases in any one credit will be limited to 1% of the market value of the fund at the date of purchase or 2% of the lowest projected fund balance before the securities mature, whichever is lower.” Limits are also set by corporate bond sector for these five funds. Investments by various governmental agencies, pooled as AOF, are excluded from the concentration of credit risk requirement. There was no concentration of credit risk exceeding these policy guidelines as of June 30, 2016.

This concentration of credit risk includes the rated securities from Table 2 – Cash Equivalents and Table 4 – Investments.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment. Although the MTIP, RFBP and MTRP do not have a formal policy to limit foreign currency risk, the MTIP policy provides for the “external managers to hedge currency in a defensive manner. The managers are not allowed to engage in currency speculation, such as over-hedging, reverse hedging, cross-hedging or other trading activity not specifically aimed at minimizing risk versus their benchmark or preserving the US dollar value of investments. The Managers’ Investment Guidelines provide for currency hedging and emerging market limitations. At the Pool level, MTIP will be managed on an un-hedged basis.” The MPEP policy does not address foreign currency risk, but identifies “country risk as including all of the risks associated with international alternative investments along with the political, economic and currency risks associated with investing outside of the United States.” As of the June 30, 2016, exchange date, BOI’s foreign currency exposure by forward contracts, deposits and investment type are reported, in US dollars, at fair value in the tables in section C of this note excluding the foreign investments denominated in US dollars for the American Depositary Receipts (ADRs), sovereign debt and commingled index funds.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. In accordance with GASB Statement No. 40, BOI uses effective duration as a measure of interest rate risk for the Bond Pool and AOF portfolios. BOI’s analytic software uses “an option-adjusted measure of a bond’s (or portfolio’s) sensitivity to changes in interest rates. Duration is the average percentage change in a bond’s price for a given change in interest rates. Prices move inversely to interest rates. The effective duration method incorporates the effect of embedded options for bonds and changes in prepayments for mortgage-backed securities (including pass-through securities, Collateralized Mortgage Obligation, and Adjustable Rate Mortgage securities).” Per policy, the TFIP and CIBP’s duration are to remain within 20% of the established Index duration. Duration for two fixed income external managers must be within 25% of the established Index duration. MDEP domestic equity managers are allowed to maintain up to 5% of assets in short-term investments and index domestic equity managers are allowed to maintain up to 3% of assets in short-term investments and individual securities. MTIP international equity managers are allowed to maintain up to 5% of assets in short-term investments. With the exception of three funds, the AOFs’ investment policies do not formally address interest rate risk. One fund limits securities to three years to maturity and repurchase agreements seven days to maturity. A second fund’s policy sets an average duration range of 2-5 years for fixed income securities except in extraordinary circumstances where a shorter duration may be advisable. A third fund’s policy limits securities to 1-5 year US Treasury/Agency securities tolerating modest interest rate risk.

Eight funds have the “ability to assume interest rate risk.” According to the STIP investment policy “the STIP portfolio will minimize interest rate risk by:

1. structuring the investment portfolio so securities mature to meet cash requirements for ongoing operations thereby normally avoiding the need to sell securities on the open market prior to maturity;
2. maintaining a dollar-weighted average portfolio maturity (WAM) of 60 days or less (for this purpose, the date to the next coupon reset date will be used for all floating or variable rate securities); and
3. STIP will maintain a reserve account.”

The fixed coupon holdings in the Bond Pools and AOF accounts pay a fixed rate of interest until maturity while floating rate securities pay a variable rate of interest until maturity. As of June 30, 2016, these three portfolios and the STIP portfolio held certain variable rate issues. Interest payments on these securities are based on an underlying reference rate, e.g., LIBOR.

RFBP, TFIP, and AOF investments are categorized to disclose credit and interest rate risk as of June 30, 2016. Credit risk is disclosed using the weighted credit quality rating by investment type. Interest rate risk is disclosed using weighted effective duration. If a bond investment type is unrated, the quality type is indicated by NR (not rated). The credit quality ratings have been calculated excluding non-rated investment types. NA (not applicable) indicates if duration has not been calculated. The Standard & Poor (S&P) rating service provides the credit ratings presented in the later tables. If an S&P rating is not available, a NRSRO rating is used.

STIP investments are categorized to disclose credit risk and weighted average maturity (WAM) as of June 30, 2016. Credit risk reflects the weighted security quality rating by investment type as of the June 30 report date. If a security investment type is unrated, the quality type is indicated by NR (not rated). Although the STIP investments have been rated by investment security type, STIP, as an external investment pool, has not been rated. The short-term credit ratings, provided by S&P’s rating services, are presented. An A1+ rating is the highest short-term rating by the S&P rating service. STIP interest rate risk is determined using the WAM method. The WAM measure expresses investment time horizons – the time when investments are due or reset and payable in days, months or years – weighted to reflect the dollar size of the individual investments within an investment type. The WAM is calculated in days.

Legal and Credit Risk

STIP

In January 2007, BOI purchased a \$25 million par issue of Orion Finance USA. In April 2007, BOI purchased two issues of Axon Financial Funding totaling \$90 million par and another \$25 million par issue of Orion Finance USA. As of June 30, 2007, these Structured Investment Vehicle (SIV) securities held in the STIP portfolio carried a combined amortized cost of \$140 million representing 5.02% of the total portfolio. At the time of purchase and as of June 30, 2007, these four issues received the highest investment grade rating of AAA by S&P and Aaa by Moody’s. Since June 30, 2008, and through June 30, 2010, these issues carried a D rating by S&P. On November 20, 2007, Axon Financial Funding declared an insolvency event. Orion Finance USA declared an insolvency event on January 14, 2008. On the January and April 2008 maturity dates, these securities matured at their amortized cost of \$140 million.

BOI determined it to be in the best interest of the STIP to hold these securities in the investment portfolio. In May 2016, BOI wrote-off the entire outstanding SIV balance of \$23.6 million against the STIP reserve. Any further flows of either principal or interest will be deemed as recovery monies and be applied to the STIP reserve. From May 31, 2016 until June 30, 2016, \$4.4 million was recorded as recovery monies and applied to the STIP reserve.

Axon Financial Funding payments totaled \$27.5 million from November 2008 to October 2011. On July 6, 2010, Axon Financial Funding foreclosed with the issuance of a promissory note for \$66.8 million from AFF Financing LLC with a July 5, 2011, maturity date. BOI, with the majority of other holders, elected on June 3, 2015 to extend the AFF Financing LLC promissory note maturity date to July 2, 2016. Similar one-year extensions have been granted since 2011. In June and December 2009, BOI applied \$13.5 million, in total, from the STIP reserve to the outstanding principal for the Axon Financial Funding securities. Fiscal year 2016 payments through May 30, 2016

from AFF Financing LLC totaled \$3.2 million consisting of \$3.1 million in principal and \$71 thousand in interest. As of June 30, 2016, the AFF Financing LLC, classified as an Other Asset-Backed security, had no outstanding amortized cost balances. Refer to Note 17 – Subsequent Events for additional information.

On October 14, 2009, BOI received its initial payment from Orion Finance USA. From this date through November 2010, payments from Orion Finance USA included principal of \$13.4 million and interest compensation of \$1.8 million in excess of the \$904 thousand accrued interest receivable for a total of \$16.1 million. In November 2010, Orion Finance Corporation “granted a security interest in substantially all of its assets (the Collateral) to the Bank of New York Mellon, as Security Trustee.” On December 8, 2010, the Security Trustee conducted “a public sale of 60 structured credit and 7 financial securities including but not limited to asset-backed securities, collateralized debt obligations, collateralized loan obligations and residential mortgage backed securities included within the Collateral.” BOI participated in the sale and collectively holds these individual securities as Orion Finance. In June and December 2009, BOI applied \$7.5 million, in total, from the STIP reserve to the outstanding principal for the Orion Finance USA securities. From December 2010 through May 31, 2016, BOI received principal and interest payments of \$17.0 million and \$2.9 million, respectively. As of June 30, 2016, the Orion Finance collective holding, classified as Other Asset-Backed, had no outstanding amortized cost balance. Refer to Note 17–Subsequent Events for additional information.

STIP, Bond Pool and AOF

The Federal National Mortgage Association and Federal Home Loan Mortgage Corp. remain in conservatorship from September 7, 2008.

Bond Pool and AOF

On September 14, 2008, Lehman Brothers filed for Chapter 11 bankruptcy. The Bond Pool and AOF portfolios held a \$15 million position in a Lehman Brothers Holdings, Inc., variable rate security with a May 25, 2010, maturity. The AOF portfolio also includes a \$5 million position in Lehman Brothers Holdings, Inc., 5% rate, and January 14, 2011, maturity. As of September 30, 2008, the book value of these bond positions was written down to 80% of par. On October 30, 2008, the book value of these bonds was further written down to 65% of par. Four additional write downs occurred during fiscal year 2009. In May 2009, BOI sold a \$5 million position in Lehman Brothers Holdings, Inc., variable rate security, held by the RFBP internally managed bond portfolio. This holding, written down to \$1 million, was sold at a loss of \$313 thousand. As of June 30, 2011, the book value of the remaining bonds represented 20% of par. BOI sold the \$5 million AOF position in Lehman Brothers Holdings, Inc. 5% rate, January 14, 2011, maturity at a price of \$26 on December 6, 2011. Because the bonds were previously written down to a price of \$20, this sale generated a gain of \$322 thousand.

For the remaining \$10 million variable rate position in Lehman Brothers Holdings, Inc. held in the TFIP and AOF portfolios, BOI applied \$519 thousand in principal from the October 2013 bankruptcy payment resulting in a book value of \$1 each as of June 30, 2014. These positions were sold in June 2016 for \$765 thousand. Because these bonds were previously written down to \$1, this sale generated a gain of \$765 thousand. For fiscal year ending June 30, 2016, BOI recorded a \$238 thousand dollar October 2015 payment and a \$68 thousand March 2016 payment to gain.

In August 2011, S&P downgraded the US AAA bond rating to AA+.

Derivative Instruments

A credit default swap is a contract to transfer credit exposure of fixed income products between parties. A foreign currency forward is a contract to purchase one currency and sell another at an agreed upon exchange rate. Fair value represents the unrealized appreciation/depreciation on foreign currency forward transactions pending as of year-end and is the difference between the execution exchange rate and the prevailing exchange rate as of the report date. Index futures long are an agreement to buy, on a stipulated future date, a specific amount of an indexed financial instrument. Rights represent a privilege granted to existing shareholders to subscribe to shares of a certain security at a specified price.

Counterparty Credit Risk

Counterparty credit risk is the risk that the counterparty will not fulfill its obligations.

STIP Reserve

In November 2007, the STIP reserve account was established. The STIP reserve account may be used to offset losses within the STIP portfolio. STIP distributes income to STIP participants based on accrued interest and discount amortization, net of fees and STIP reserve expense. The STIP reserve expense is detailed as follows:

STIP Reserve Expense	
(in thousands)	
Other income	
Accrued interest received on SIV related assets (7/1/2015 – 5/31/2016)	\$ 535
Recovery from sale of SIV related assets	4,097
Recovery from SIV related assets (6/1/2016 – 6/30/2016)	320
Realized gains on sale of any STIP asset	257
Daily reserve accrual	2,928
Total reserve expense	<u>\$ 8,137</u>
SIV write off	(23,585)
Change in STIP Reserve	<u>\$ (15,448)</u>

In May 2016, BOI wrote-off the entire outstanding SIV balance of \$23.6 million against the STIP reserve. Any further flows of either principal or interest will be deemed as recovery monies and be applied to the STIP reserve. The STIP reserve balance was \$13.1 million as of June 30, 2016.

(2) The EDB deposits and investments are restricted by the bond trust indentures to the following: government and agency obligations, certificates of deposits, repurchase agreements, and investment agreements. Deposits and investments must be made with Montana banks or in the STIP administered by BOI.

Credit Risk - Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligation. The EDB's US government direct-backed securities, consisting of US Treasury notes and bills, are guaranteed directly by the US government. Obligations of the US government or obligations explicitly guaranteed by the US government are not considered to have credit risk and do not require disclosure of credit quality per GASB Statement No. 40. The credit ratings are provided by the S&P rating service. If an S&P rating is not available, a Nationally Recognized Securities Rating Organization (NRSRO) rating is used. The EDB does not have a formal investment policy addressing credit risk for Permitted Investments as provided in the Indenture or investment in the STIP. Permitted Investments, as described in the Indenture, include "either (i) long term obligations of such bank, trust company or association are rated in one of the three highest investment category of the Standard & Poor's Corporation or Moody's Investor Service Inc., which investment category shall not be less than the prevailing rate on the Bonds or (ii) the deposits are continuously secured as to principal, but only to the extent not insured by the Bank Insurance Fund or the Savings Association Insurance Fund, or any successor to either, of the Federal Deposit Insurance Corporation (FDIC)." BOI's STIP investment policy specifies that STIP securities have a minimum of two credit ratings as provided by Standard and Poor's, Moody's, or Fitch that meet the minimum as stated in the STIP policy depending on the type of investment.

Custodial Credit Risk – Custodial credit risk is the risk that, in the event of the failure of the counterparty to a transaction, BOI will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party.

Cash – Custodial risk for cash is the risk that, in the event of the failure of the custodial financial institution, the cash or collateral securities may not be recovered from an outside party. The securities used as collateral are held by US Bank's Trust Department in the name of BOI.

Investments - As of June 30, 2016, EDB securities were recorded in book entry form in the name of US Bank National Association as Trustee for BOI by specific account. The EDB does not have a policy addressing custodial credit risk for deposits and investments, specifically, uninsured, collateralized deposits.

Concentration of Credit Risk - Concentration of credit risk is the risk of loss attributed to the magnitude of any single investment per issuer name. The EDB investments directly issued or explicitly guaranteed by the US

government and investments in mutual funds are excluded from the concentration of credit risk requirement. The STIP Investment Policy limits concentration of credit risk by limiting portfolio investment types to 3% in any issuer with the exception of US Treasury and US Agency securities as well as any repurchase agreements with a financial institution. As of June 30, 2016, STIP concentration risk was within the policy as set by BOI.

Interest Rate Risk - Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The EDB does not have a formal investment policy addressing interest risk for Permitted Investments as provided in the Indenture or the cash equivalent investment in the STIP. The EDB’s Bond Indenture does not address interest rate risk. In accordance with GASB Statement No. 40, BOI has selected the effective duration method to disclose interest rate risk.

According to the STIP Investment Policy “the STIP portfolio will minimize interest rate risk by:

1. structuring the investment portfolio so securities mature to meet cash requirements for ongoing operations thereby normally avoiding the need to sell securities on the open market prior to maturity;
2. maintaining a dollar-weighted average portfolio maturity (WAM) of 60 days or less (for this purpose, the date to the next coupon reset date will be used for all floating or variable rate securities); and
3. STIP will maintain a reserve account.”

The EDB investments are categorized to disclose credit and interest rate risk as of June 30, 2016. Credit risk is disclosed using the weighted credit quality rating by investment type. Interest rate risk is disclosed using weighted effective duration as calculated by BOI. If a bond investment type is unrated, the quality type is indicated by NR (not rated). The credit quality ratings have been calculated excluding non-rated investment types. NA (not applicable) indicates if duration has not been calculated. Both the credit quality ratings and duration have been calculated excluding cash equivalents with credit ratings of NR or NA duration calculations. There were no derivative transactions during the 2016 fiscal year for investments held by the trustee.

B. Cash/Cash Equivalents

(1) Cash Deposits – The State requires collateralization based on the average daily bank balance in the depository bank holding the main state bank account. For other depository banks, state statutes require collateralization at 50% of the bank balance. The cash deposits amount includes both primary government and component unit deposits.

Table 1 – Cash Deposit Amounts
(in thousands)

	<u>Carrying Amount</u>
Cash held by State/State's agent	\$109,412
Uninsured and uncollateralized cash	7,316
Undeposited cash	627
Cash in US Treasury	296,156
Cash in MSU component units	8,503
Cash in UM component units	13,854
Less: outstanding warrants	<u>(33,622)</u>
	<u>\$402,246</u>

As of June 30, 2016, the carrying amount of deposits for component units was \$224.4 million as included in Table 1.

(2) Cash Equivalents – consists of cash in the State Treasury invested by individual funds in the Short-term Investment Pool (STIP), the State Treasurer’s pooled cash account, and in identifiable securities and investments considered to be cash equivalents. Cash equivalents, generally, are short-term, highly liquid investments with original maturities of three months or less. Cash equivalents may be under the control of BOI or other agencies, as allowed by law. Beginning with the period of June 30, 2016, the STIP portfolio is shown at fair value.

Table 2 - Cash Equivalents
(in thousands)

	Fair Value	Credit Quality Rating	WAM in Days
Asset backed commercial paper	\$ 786,486	A1	22
Corporate commercial paper	262,021	A1	82

US government direct obligations	60,189	0	NA
Less: STIP included in pooled investment balance	(94,265)	NR	NA
Total cash equivalents (3)	<u>\$3,016,328</u>		<u>41</u>
Securities lending collateral investment pool (2)	<u>\$ 11,844</u>	NR	32

- (1) As of June 30, 2016, the US Bank sweep repurchase agreement was collateralized at 102% for \$8.0 million by a Federal Loan Mortgage Corporation Gold securities maturing November 1, 2024 and July 1, 2024. The security carries an AA+ credit quality rating. At June 30, 2016, The State Street Bank Repurchase Agreement was collateralized at 102% for \$5.2 million by a US Treasury security maturing October 31, 2017. This security carries AA+ quality rating.
- (2) As of June 30, 2016, the fair value of the cash equivalents was \$12.6 million. Collateral provided for the cash equivalents totaled \$11.8 million in cash. See also the Table 4 disclosed in Note 3 D – Investments.
- (3) As of June 30, 2016, local governments had invested \$889.8 million and component units of the State of Montana had invested \$464.3 million in STIP.

C. Equity in Pooled Investments

These securities consist of investments held by BOI in pooled investment funds. The Montana Domestic Equity Pool (MDEP), Trust Funds Investment Pool (TFIP), Retirement Funds Bond Pool (RFBP), Montana International Equity Pool (MTIP), Montana Private Equity Pool (MPEP), and Montana Real Estate Pool (MTRP) were created to allow qualifying funds to participate in diversified investment pools. Purchases are subject to the statutorily mandated “Prudent Expert Principle” (see Table 3 – Equity in Pooled Investments).

Table 3 – Equity in Pooled Investments
(in thousands)

	Carrying Amount	Fair Value
RFBP:		
Retirement Funds Bond Pool	\$ 2,279,159	\$ 2,372,717
TFIP:

Total pooled investments	10,213,214	12,081,205
Pool adjustments (net)	(4,766)	(4,766)
Total equity in pooled investments	<u>\$10,208,448</u>	<u>\$12,076,439</u>

As of June 30, 2016, the fair value of the underlying securities on loan was \$815.4 million. Collateral provided for the securities on loan totaled \$834.2 million consisting of \$305.0 million in cash and \$529.2 million in securities.

As of June 30, 2016, component units of the State of Montana had equity in pooled investments with a book value of \$5.0 billion and a fair value of \$9.8 billion as included in Table 3.

As of June 30, 2016, local governments invested \$13.1 million in TFIP.

State of Montana investments are categorized below to disclose credit and interest rate risk as of June 30, 2016, as required for applicable pools. Credit risk reflects the bond quality rating, by investment type, as of June 30 report date. Interest rate risk is disclosed using effective duration. If a bond investment type is unrated, the quality type is indicated by NR (not rated). The credit quality ratings have been calculated excluding non-rated investment types. If duration has not been calculated, duration is indicated by NA (not applicable).

State of Montana investments are measured at fair value and categorized within the fair value hierarchy established by GASB Statement No. 72 – Fair Value Measurement and Application, as defined below. Each of the investment pools has the following recurring fair value measurements as of June 30, 2016.

Level 1 – Quoted prices for identical assets or liabilities in active markets.

Level 2 – Prices determined using inputs, other than quoted prices included within Level 1 that are observable for an asset or liability, either directly or indirectly.

Level 3 – Prices are determined using unobservable inputs.

(1) STIP is reported in Table 2 – Cash Equivalents

RFBP, MDEP, MTIP, STIP and AOF - Fixed income investments classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities. Fixed income investments classified in Level 2 of the fair value hierarchy are valued using a matrix pricing technique. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices.

RFBP – Montana Mortgages classified in Level 3 of the fair value hierarchy are present value adjusted.

MTRP – Direct real estate classified in Level 3 of the fair value hierarchy for the fiscal year ended June 30, 2016.

Pools and AOF – Investments measured at cost are included to account for all investments within each pool and AOF.

The investments measured at NAV for the year ended June 30, 2016 are detailed below.

	Investments Measured at NAV (in thousands)

Commingled equity index funds	156,693	-	Daily	1 day
Total investments measured at NAV	\$ 247,005	\$ -		

STIP – This investment program is managed and administered under the direction of BOI as authorized by the Unified Investment Program. It is a commingled pool for investment purposes and requested redemptions from the pool are redeemed the next business day. The fair values of the investments in this category have been determined

using the NAV per share (or its equivalent) of the investment. For the fiscal year ended June 30, 2016, refer to the STIP Investments Measured at Fair Value table.

Commingled Equity Index Funds – This type consists of institutional investment funds that invest in domestic equities and funds that invest in international equities. The fair values of these investments use the NAV per share (or its equivalent) of the investments.

High Yield Bond Fund - This type consists of predominantly US corporate credits, whether in the form of bonds or loans that are rated below investment grade. These assets carry a higher risk of default than investment grade securities and accordingly provide a higher level of income or yield commensurate with that risk. The fair values of these investments use the NAV per share (or its equivalent) of the investments.

Core Real Estate - This type includes funds that invest primarily in core real estate, which makes equity investments in operating and substantially-leased institutional quality real estate in traditional property types (apartments, office, retail, industrial and hotel) via commingled funds. The primary investment objectives of these core real estate funds are to invest in real estate that will generate income from predictable sources of revenue and not to realize gains on the underlying assets. This investment type receives distributions of generated income and occasionally through the liquidation of the underlying assets of the fund. The fair values of these investments use the NAV per share (or its equivalent) of BOI's ownership interest in the partners' capital. Redemption of these investments is restricted based on the availability of cash flow arising from investment transactions, sales, and other fund operations occurring in the ordinary course of business. Therefore, requested redemptions from a fund will be redeemed as funds become available.

Value Added and Opportunistic - This type includes private partnership funds that primarily invest in value added and opportunistic real estate funds. These funds assume more risk than the core real estate funds in order to achieve a greater return on investment. Returns are driven both by current income and by expected capital appreciation. This investment type receives distributions of generated income and occasionally through the liquidation of the underlying assets of the fund. It is expected that the underlying assets of the funds will be liquidated over 7 to 10 years. These investments can never be redeemed with the funds. The fair values of these investments use the NAV per share (or its equivalent) of BOI's ownership interest in the partners' capital.

Timber - This type includes private partnership funds that primarily invest in timber funds. The underlying assets of these types of funds are typically made of tree farms and managed forest. Returns come from biological growth, upward product class movement, and appreciation in timber and land prices. This investment type receives distributions of generated income and occasionally through the liquidation of the underlying assets of the fund. It is expected that the underlying assets of the funds will be liquidated over 12 to 20 years. These investments can never be redeemed with the funds. The fair values of these investments use the NAV per share (or its equivalent) of BOI's ownership interest in the partners' capital.

Private Equity Partnerships - This type includes investments in limited partnerships. Generally speaking, the types of partnership strategies included in this portfolio: venture capital, growth equity, buyouts, special situations, mezzanine, and distressed debt. These investments and are considered illiquid. Redemptions are restricted over the life of the partnership. During the life of the partnerships, distributions are received as underlying partnership investments are realized. It is expected that the underlying assets of the funds will be liquidated over 10 years. It is probable all of the investments in this type will be sold at an amount different from the NAV per share (or its equivalent) of BOI's ownership interest in partners' capital.

The derivative instrument disclosures are described in the following paragraphs. The fair value balances and notional amounts of derivative instruments outstanding as of June 30, 2016, classified by type, and the changes in the fair value of such derivative instruments for the year ended June 30, 2016, are as follows (in thousands):

Investment Derivatives (1)	Change in Fair Value		Fair Value at June 30, 2016		
	Classification	Amount	Classification	Fair Value Amount	Notional
Credit default swaps	Investment Revenue	\$ 323	Swaps	\$ 131	4,320
Currency forward contracts	Investment Revenue	309	LT debt/equity	-	-
Index futures long	Investment Revenue	205	Futures	-	2
Rights	Investment Revenue	50	Equity	19	27
Total Derivatives		<u>\$ 887</u>		<u>\$ 150</u>	

- (1) A credit default swap is a contract to transfer credit exposure of fixed income products between parties. A foreign currency forward is a contract to purchase one currency and sell another at an agreed upon exchange rate. Fair value represents the unrealized appreciation/depreciation on foreign currency forward transactions pending as of year-end and is the difference between the execution exchange rate and the prevailing exchange rate as of the report date. Index futures long are an agreement to buy, on a stipulated future date, a specific amount of an indexed financial instrument. Rights represent a privilege granted to existing shareholders to subscribe to shares of a certain security at a specified price.

Counterparty credit risk is the risk that the counterparty will not fulfill its obligations. The table below depicts BOI's counterparty credit risk exposure to its investment derivatives and the applicable counterparty credit ratings and risk concentrations.

Maximum Loss before and after Netting and Collateral (in thousands)

Investments in private equity and private real estate are usually made via Limited Partnership Agreements that involve many limited partners and a General Partner who is responsible for all investment decisions. The Limited Partners make an original commitment, after which capital is called as needed by the General Partner to make investments. These Agreements will usually last for a minimum of 10 years. The table below shows the remaining BOI commitments to private equity and private real estate funds. For further details on the balances as of June 30, 2016, as shown below, please refer to BOI's separately issued external investment pool financial statements.

Commitments to Fund Managers
(in thousands)

	Original Commitment	Commitment Remaining	Carrying Value	Fair Value

Total	\$ 2,981,840	\$ 913,785	\$ 1,239,217	\$ 1,313,607

D. Investments

Article VIII of Montana's Constitution, with supporting statutes, authorizes BOI to manage the State's Unified Investment Program. Long-term investments are administered by the following agencies, as allowed by state law, Section 17-6-201, MCA:

Long-term Investments	
Department	Percent Administered
Board of Investments	57.05%
Universities	15.00
MPERA (Montana Public Employee Retirement Administration)	19.30
College Savings Plan	4.08
Montana Board of Housing	2.67
Other (1)	1.90
Total	100.00%

(1) Other consists of the Commissioner of Higher Education, the Department of Administration, the Department of Natural Resources and Conservation, the Department of Public Health and Human Services, and State Auditor.

BOI must employ the "Prudent Expert Rule" in managing the State's investment portfolio. Investments are presented at fair value. Investment fair values for publicly traded securities are determined primarily by reference to market prices supplied to BOI's custodial bank or trustee. State investments are categorized within the fair value hierarchy established by GASB Statement No. 72.

The PERS Defined Contribution Retirement Plan and the Deferred Compensation Plan's fixed assets were administered on behalf of the plans by Pacific Investment Management Company (PIMCO) and State Street Bank Kansas City (SSKC) and a third-party synthetic Guaranteed Interest Contract (GIC) providers, Transamerica Life Insurance Company (Transamerica), Prudential Insurance Company of America (Prudential) and Voya Retirement Insurance & Annuity Company (Voya). The third party record keeper, Empower™ Retirement, tracks and reports the daily trading and valuations of all investment options, including the assets held by the individual mutual fund companies. When participants invest in the fixed investment, they are guaranteed a rate of return. All money invested in the Montana Fixed Fund (stable value investment option) of the PERS-DCRP and Deferred Compensation Plan are held in a Pooled Trust. The Pooled Trust assets are invested by PIMCO based on an investment guideline schedule as agreed upon in the Pooled Trust Contract and approved by the PERB, PIMCO, and any third party insurers, such as Transamerica, Prudential and Voya. Variable investments are held and managed by a selection of retail and institutional mutual funds, which cover all standard asset classes and categories.

(1) The increases and decreases noted above include adjustments related to prior periods and corrections of errors.

Depreciation expense was charged to governmental functions as follows (in thousands):

	Depreciation (2)
General government	\$ 10,393
Public safety	8,436
Transportation, including depreciation of the highway system maintained by the State	231,784
Health and human services	2,454
Education	370
Natural resources, including depreciation of the state's dams	10,904
Depreciation on capital assets held by the internal service funds	10,762
Total depreciation expense – Governmental Activities	\$275,103

Depreciation expense was charged to business-type activities as follows (in thousands):

	Depreciation (2)
Liquor Stores	\$107
State Lottery	167
Prison Funds	485
West Yellowstone Airport	175
Other Enterprise Funds	54
Total depreciation expense – Business-type Activities	\$988

(2) Depreciation expenses noted above include adjustments related to prior periods and correction of errors.

NOTE 6. RETIREMENT PLANS

A. General

The funding policies for each plan provide for periodic employee, employer, and State of Montana (State) nonemployer contributions at rates specified by state law. An actuary determines the actuarial implications of the funding requirement in an annual actuarial valuation. The actuarial method used to determine the implications of the statutory funding level is the Entry Age Actuarial Cost Method, with both normal cost and amortization of the unfunded actuarial liability determined as a level percentage of payrolls. Benefits are established by state law and can only be amended by the Legislature.

Montana State Fund, a discretely presented component of the State, by statute, prepares separately issued financial statements on a calendar year-end basis. Due to the difference in reporting period, there will be a variance between the note disclosures and the financial statements for some pension related items.

Public Employees' Retirement Board

The Public Employees' Retirement Board (PERB) oversees eight defined benefit plans: Public Employees' Retirement System-Defined Benefit Retirement Plan (PERS-DBRP); Judges' Retirement System (JRS); Highway Patrol Officers' Retirement System (HPORS); Sheriffs' Retirement System (SRS); Game Wardens' and Peace Officers' Retirement System (GWORS); Municipal Police Officers' Retirement System (MPORS); Firefighters' Unified Retirement System (FURS); and Volunteer Firefighters' Compensation Act (VFCA). The PERB also supervises two defined contribution plans: Public Employees' Retirement System-Defined Contribution Retirement Plan (PERS-DCRP) and the 457-Deferred Compensation Plan (457 Plan). All of the benefit plans, defined benefit and defined contribution, are administered by the Montana Public Employees' Retirement Administration (MPERA). Separately issued financial statements and actuarial reports can be obtained at 100 North Park, Suite 200, PO Box 200131, Helena, MT 59620-0131. The financial statements and the latest actuarial valuation may also be attained here: <http://mpera.mt.gov/>. The financial statements for the PERS-DBRP include activity for the defined benefit plan and the associated education fund. The PERS-DCRP financial statements include activity for the defined contribution plan and the associated education fund.

The PERB is an independent, seven-member body, appointed by the Governor. The members are assigned five-year, staggered terms. The PERB consists of two members at large, two active defined benefit public employees, one active defined contribution public employee, one member experienced in investments, and one retired public employee. The PERB approves the annual operating budget, developed by MPERA management, before the beginning of the fiscal year. As governed by statute, the PERB's defined benefit administrative expenses may not exceed 1.5% of the total defined benefit plan retirement benefits paid. In addition, the PERB decides legislative policy and priorities, hires the executive director, establishes the policies and procedures that govern operations at MPERA, and hear and rule on appeal matters of disabilities, retirees, and members. PERB members do not receive compensation for their service to the PERB, but are reimbursed for necessary expenses incurred while serving.

All defined benefit pension plans provide retirement, disability, and death benefits to the plan members and their beneficiaries. The PERS-DCRP Disability Plan provides disability benefits to disabled members of the PERS-DCRP. Beneficiaries do not receive disability benefits but may attain retirement benefits from the PERS-DCRP. A summary of the plan eligibility and benefits are found in the Summary of Benefits sections throughout Note 6. Related disclosures for the PERS-DCRP Disability Plan can be found within Note 7 of this report.

Teachers' Retirement System

The Teachers' Retirement System (TRS) is a defined benefit plan administered by the Teachers Retirement Board (TRB). The plan prepares a publicly issued comprehensive annual financial report that includes financial statements and required supplementary information for TRS. Separately issued financial statements, actuarial valuations and

experience studies can be obtained at 1500 East Sixth Avenue, PO Box 200139, Helena, MT 59620-0319; or can be found online at <https://trs.mt.gov/>.

The TRB consists of six members, all of which are appointed by the Governor. Three TRB members must be teaching professionals who, when appointed, are active members of TRS; at least one of them must be an active classroom teacher. One TRB member must be a retired teacher who was a member of TRS at the time of retirement. Two TRB members are appointed from the public at large. TRB members serve staggered five-year terms. Three TRB members constitutes a quorum.

A summary of the number of participating employer and nonemployer contributing entities as of June 30, 2016, follows:

Classification of Participant	GWPORS	PERS-DBRP	PERS-DCRP	SRS	MPORS	FURS	VFCA	TRS
Employer	7	535	289	57	32	26	220	373
Nonemployer contributing entity	-	1	-	-	1	1	1	1
Total Participants	7	536	289	57	33	27	221	374

There are approximately 700 State employees who are eligible to participate in defined benefit pension plans, other than the plans listed above. If these employees do choose to participate in any of these other plans the State is required to make contributions to the respective plan.

B. Summary of Significant Accounting Policies

The MPERA prepares its financial statements using the accrual basis of accounting. For the purposes of measuring the net pension liability, deferred inflows of resources and deferred outflows of resources related to pensions, pension expense, information about the fiduciary net position, and additions to/deductions from fiduciary net position, the items have been determined on the same accrual basis as they are reported by the MPERA. For this purpose, member contributions are recognized in the period in which contributions are due. Employer contributions are recognized when due and the employer has made a formal commitment to provide the contributions. Revenues are recognized in the accounting period they are earned and become measurable. Benefit payments and refunds are recognized in the accounting period when due and payable in accordance with the benefit terms. Expenses are recognized in the period incurred. Investments are reported at fair value. The MPERA adheres to all applicable Governmental Accounting Standards Board (GASB) statements.

The TRS prepares its financial statements using the accrual basis of accounting. For the purposes of measuring the net pension liability, deferred inflows of resources and deferred outflows of resources related to pensions, pension expense, information about the fiduciary net position of the TRS, and additions to/deductions from TRS’s fiduciary net position, the items have been determined on the same accrual basis as they are reported by the TRS. For this purpose, plan contributions are recognized as of employer payroll paid dates. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value. The TRS adheres to all applicable GASB statements.

The pension trust fund financial statements presented in this report are prepared using the accrual basis of accounting in the same manner as that described for the pension plan administrators above.

C. Public Employee Defined Benefit Retirement Plan

A summary of classes of members in JRS, HPORS, GWPORS, PERS-DBRP, SRS, MPORS, FURS, VFCA, TRS, PERS-DCRP, and 457-Deferred Compensation covered by benefit terms at June 30, 2016, follows:

Type of Plan for Reporting Purposes	Single-Employer Defined Benefit			Multi-Employer Defined Benefit						Multi-Employer Defined Contribution	
	JRS	HPORS*	GWPORS	PERS-DBRP	SRS	MPORS*	FURS	VFCA	TRS	PERS-DCRP	457-DC
Classification of Member											
Active	55	228	989	28,390	1,364	762	644	1,895	19,048	2,409	5,417
Inactive entitled to, but not yet receiving, benefits or a refund:											
Vested	2	16	105	3,062	95	61	27	878	1,704	346	3,970
Nonvested	-	18	278	10,031	394	112	77	-	12,888	590	-
Inactive members and beneficiaries currently receiving benefits:

(1) State as the Single Employer

Judges' Retirement System – The JRS, administered by the MPERA, is a single-employer defined benefit plan established in 1967, and governed by Title 19, chapters 2 & 5, MCA. This plan provides retirement benefits for all Montana judges of the district courts, justices of the Supreme Court, the Chief Water Judge, and the Associate Water Judge. Benefits are established by state law and can only be amended by the Legislature. The JRS provides retirement, disability, and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service and compensation. Member rights are vested after five years of service.

Summary of Benefits

Member's current salary¹ or highest average compensation (HAC)²

¹Hired prior to July 1, 1997, and non-Guaranteed Annual Benefit Adjustment (GABA) – monthly compensation at time of retirement;

²Hired on or after July 1, 1997, or electing GABA – HAC during any consecutive 36 months;

²Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's HAC.

Eligibility for benefit

Age 60, 5 years of membership service;

Any age with 5 years of membership service – involuntary termination, actuarially reduced.

Vesting

5 years of membership service.

Monthly benefit formula

3-1/3% of current salary¹ (non-GABA) or HAC² (GABA) per year of service credit for the first 15 years of service credit, plus 1.785% per year for each year after 15 years.

Guaranteed Annual Benefit Adjustment (GABA)

Hired on or after July 1, 1997, or those electing GABA - after the member has completed 12 full months of retirement, the member's benefit increases by a maximum of 3.0% each January, inclusive of all other adjustments to the member's benefit.

Minimum benefit adjustment (non-GABA)

If hired prior to July 1, 1997, and member did not elect GABA – current salary of an active member in same position is used in the calculation of the monthly benefit each time the Legislature increases salaries for active judges.

Contributions to the Plan

Rates are specified by state law for periodic employee and employer contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system - Contributions are deducted from each member's salary and remitted by the participating employer. An individual account is established for each member's contributions and interest allocations until a retirement or refund request is processed. Plan members are required to contribute 7.0% of the member's monthly compensation.

Employer contributions to the system - As the employer, the State is required to contribute 25.81% of a member's compensation.

Actuarial Assumptions

The total pension liability/(asset) used to calculate the net pension liability/(asset) was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability/(asset) to June 30, 2015. The actuarial assumptions used in the June 30, 2015, valuation were based on the results of the last actuarial experience study dated May 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability/(asset). Among those assumptions were the following:

- Investment Return 7.75%
- Admin Expense as a % of Payroll 0.15%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases None
- Postretirement Benefit Increases – After the member has completed 12 full months of retirement, the member's benefit increases by the applicable percentage (provided below) each January, inclusive of other adjustments to the member's benefit:
 - 3% for members electing GABA or hired on or after July 1, 1997

- Current salary of an active member in the same position, if hired prior to July 1, 1997, and not electing GABA
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension asset was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members and employers will be made based on the PERB's funding policy, which establishes the contractually required rates under Montana Code Annotated (MCA). Based on those assumptions, the JRS's fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2123. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension asset. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the JRS. The most recent analysis, performed for the period covering fiscal years 2003 through 2009, is outlined in a report dated May 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the JRS's target asset allocation as of June 30, 2015, is summarized in the table that follows:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.00%	-0.25%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.10%
Fixed Income	24.00%	1.25%
Private Equity	12.00%	8.00%
Real Estate	8.00%	4.25%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability/(asset) to changes in the discount rate, the table below presents the net pension liability/(asset) calculated using the discount rate of 7.75%, as well as what the net pension liability/(asset) would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
JRS Net Pension (Asset)	(\$28,958)	(\$33,961)	(\$38,300)

Net Pension Asset

In accordance with GASB 68, employers are required to recognize and report certain amounts associated with their participation in the JRS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension asset (NPA), pension expense, deferred inflows of resources and deferred outflows of resources associated with pensions.

(dollars presented in thousands)

	Net Pension Liability (Asset) as of 6/30/14	Net Pension Liability (Asset) as of 6/30/15	Percent of Collective NPA
Employer's Proportionate Share	(\$32,591)	(\$33,961)	100%

At June 30, 2016, the employer reported a net pension asset of \$34.0 million for its proportionate share of the net pension asset. The net pension asset was measured as of June 30, 2015, and the total pension liability used to calculate the net pension asset was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The employer's proportion of the net pension asset was based on the employer's contributions received by JRS during the measurement period July 1, 2014, through June 30, 2015, relative to the total employer contributions received from all of the JRS participating employers. At June 30, 2015, the State's proportion as an employer was 100%.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension asset and the employer's reporting date that are expected to have a significant effect on the employer's proportionate share of the collective net pension asset.

Other Items Related to and Changes in Net Pension Asset

(in thousands)

	Total Pension Liability	Plan Fiduciary Net Position	Net Pension Liability/(Asset)
Balances at 6/30/2014	\$51,632	\$84,223	(\$32,591)
Service Costs	1,653	-	1,653
Interest	3,934	-	3,934
Difference between Expected and Actual Experience	(1,032)	-	(1,032)
Contributions - employer	-	1,684	(1,684)
Contributions - member	-	534	(534)
Net Investment Income	-	3,843	(3,843)
Benefit Payments	(3,041)	(3,041)	-
Administrative Expense	-	(136)	136

Balances at 6/30/2015	\$53,146	\$87,107	(\$33,961)

Pension Expense

At June 30, 2016, the employer recognized pension expense/(income) of (\$2.4) million for the JRS.

Deferred Outflows and Inflows

At June 30, 2016, the employer recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$1.7 million.

As of the fiscal year ended June 30, 2016, remaining deferred outflows of resources and deferred inflows of resources related to the JRS are from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between projected and actual earnings on pension plan investments	-	\$ 774
Earnings on pension plan investments	-	1,971
Contributions paid to JRS subsequent to the measurement date - FY 2016 Contributions	\$1,786	-
Totals	\$1,786	\$2,745

Amounts reported as deferred outflows of resources related to pensions resulting from the employer's contributions made subsequent to the June 30, 2015, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in pension expense as follows:

<u>Year ended June 30:</u>	<i>(in thousands)</i> Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense
2017	\$(1,092)
2018	(1,092)
2019	(1,091)
2020	530
2021	-

Highway Patrol Officers' Retirement System – The HPORS, administered by the MPERA, is a single-employer defined benefit plan established in July 1, 1945, and governed by Title 19, chapters 2 & 6, MCA. This plan provides retirement benefits to all members of the Montana Highway Patrol, including supervisory personnel. Benefits are established by state law and can only be amended by the Legislature. The HPORS provides retirement, disability, and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service, and highest average compensation. Member rights for death and disability are vested immediately. All other member rights are vested after 5 or 10 years of service.

Section 19-6-709, MCA provides eligible members retired prior to July 1, 1991, or their survivors, an annual supplemental lump-sum payment distributed each September. This lump-sum payment is funded by a statutory appropriation requested by the PERB from the General Fund. Factors impacting eligibility include the number of years the recipient has received a service retirement or disability benefit, the recipient's age, and whether the recipient is employed in a position covered by a retirement system under Title 19, MCA.

Deferred Retirement Option Plan (DROP)

Beginning October 1, 2015, eligible members of HPORS can participate in the DROP by filing a one-time irrevocable election with the PERB. The DROP is governed by Title 19, Chapter 6, Part 10, MCA. A member must have completed at least twenty years of membership service to be eligible. They may elect to participate in the DROP for a minimum of one month and a maximum of 60 months and may only participate in the DROP once. A participant remains a member of the HPORS, but will not receive membership service or service credit in the system for the duration of the member's DROP period. During participation in the DROP, all mandatory employer contributions continue to the retirement system; mandatory employee contributions are deposited to the members DROP account. A monthly benefit is calculated based on salary and years of service to date as of the beginning of the DROP period. The monthly benefit is paid into the member's DROP account until the end of the DROP period. At the end of the DROP period, the participant may receive the balance of the DROP account in a lump-sum payment or in a direct rollover to another eligible plan, as allowed by the IRS. If the participant continues employment after the DROP period ends, they will again accrue membership service and service credit. The DROP account cannot be distributed until employment is formally terminated. The balance held by MPERA for HPORS DROP participants as of June 30, 2016, was approximately \$161.2 thousand.

Summary of Benefits

Member's highest average compensation (HAC)

Hired prior to July 1, 2013 – HAC during any consecutive 36 months;

Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's HAC.

Eligibility for benefit

20 years of membership service, regardless of age.

Early Retirement

Hired prior to July 1, 2013 – 5 years of membership service, actuarially reduced from age 60.

Hired on or after July 1, 2013 – 10 years of membership service, actuarially reduced from age 60.

Vesting

Hired prior to July 1, 2013 - 5 years of membership service.

Hired on or after July 1, 2013 - 10 years of membership service.

Monthly benefit formula

Retire prior to July 1, 2013 – 2.5% of HAC per year of service credit.

Retire on or after July 1, 2013 – 2.6% of HAC per year of service credit.

Guaranteed Annual Benefit Adjustment (GABA)

Hired on or after July 1, 1997, or those electing GABA - after the member has completed 12 full months of retirement, the member's benefit increases by a maximum of 3.0% each January, inclusive of all other adjustments to the member's benefit.

Hired on or after July 1, 2013 - after the member has completed 36 full months of retirement, the member's benefit increase by a maximum of 1.5% each January, inclusive of all other adjustments to the member's benefit.

Minimum Monthly Benefit (non-GABA)

If hired prior to July 1, 1997, and member did not elect GABA - monthly benefits are increased each July when the fall below a statutorily guaranteed minimum. Any annual increase is limited to 5.0% over the current benefit and may not exceed 60% of the current base salary of a probationary officer.

Contributions to the Plan

Rates are specified by state law for periodic employee and employer contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system – Contributions are deducted from each member's salary and remitted by participating employer.

Hired prior to July 1, 1997, and not electing GABA - Plan members are required to contribute 12.00%.

Hired after June 30, 1997, and electing GABA – Plan members are required to contribute 12.05%.

Effective July 1, 2013, and ending July 1, 2016, all HPORS member contributions, regardless of hired date, will increase 1.0% annually.

Employer contributions to the system – As the employer, the State is required to contribute 38.33% of a member's compensation. The first 28.15% is payable from the same sources used to pay a member's compensation. The remaining amount, equal to 10.18%, is payable from the General Fund through a statutory appropriation.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The actuarial assumptions used in the June 30, 2015, valuation were based on the results of the last actuarial experience study,

dated May 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Administrative Expense as a % of Payroll 0.23%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0% to 7.30%
- Postretirement Benefit Increases - After the member has completed 12 full months of retirement, the member's benefit increases by the applicable percentage each January, inclusive of other adjustments to the member's benefit:
 - If electing GABA or hired on or after July 1, 1997 – 3.00%
 - Hired on or after July 1, 2013 – 1.50%
 - Minimum Benefit Adjustment – Limited to 5% over the current benefit any may not exceed 60% of a newly confirmed officer
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members and employers will be made based on the PERB's funding policy, which establishes the contractually required rates under MCA. The State contributes 10.18% of salaries paid by employers, however, this is considered an employer contribution since HPORS is a single-employer plan and the State is the only employer. Based on those assumptions, the HPORS's fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2123. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience studies prepared for the HPORS. The most recent analysis, performed for the period covering fiscal years 2003 through 2009, is outlined in a report dated May 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public sector systems, as well as utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by an investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the HPORS's target asset allocation as of June 30, 2015, is summarized in the table that follows:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.00%	-0.25%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.10%
Fixed Income	24.00%	1.25%
Private Equity	12.00%	8.00%
Real Estate	8.00%	4.25%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
HPORS Net Pension Liability	\$89,975	\$63,899	\$42,629

Net Pension Liability

In accordance with GASB 68, employers are required to recognize and report certain amounts associated with their participation in the HPORS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability (NPL), pension expense, deferred inflows or resources, and deferred outflows of resources associated with pensions.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/14	Net Pension Liability as of 6/30/15	Percent of Collective NPL
Employer's Proportionate Share	\$57,123	\$63,899	100%

At June 30, 2016, the employer reported a liability of \$63.9 million for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The employer's proportion of the net pension liability was based on the employer's contributions received by HPORS during the measurement period July 1, 2014, through June 30, 2015, relative to the total employer contributions received from all of the HPORS participating employers. At June 30, 2015, the State's proportion as an employer was 100%.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There was a change in benefit terms since the measurement date. A DROP was added by Senate Bill 238 by the 2015 Legislature. The DROP plan increased the total pension liability by approximately \$1.9 million.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension liability and the employer's reporting date that are expected to have a significant effect on the employer's proportionate share of the collective net pension liability.

Other Items Related to and Changes in Net Pension Liability

	<i>(in thousands)</i>		
	Total Pension Liability	Plan Fiduciary Net Position	Net Pension Liability
Balances at 6/30/2014	\$183,133	\$126,010	\$57,123

Pension Expense

At June 30, 2016, the employer recognized pension expense of \$7.2 million for the HPORS.

Deferred Outflows and Inflows

At June 30, 2016, the employer recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$5.8 million.

As of the fiscal year ended June 30, 2016, remaining deferred outflows of resources and deferred inflows of resources related to the HPORS are from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 200	-
Difference between projected and actual earnings on pension plan investments	-	\$3,020
Contributions paid to HPORS subsequent to the measurement date - FY 2016 Contributions	6,161	-
Totals	\$6,361	\$3,020

Amounts reported as deferred outflows of resources related to pensions resulting from the employer’s contributions made subsequent to the June 30, 2015, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Game Wardens’ & Peace Officers’ Retirement System – The GWPORS, administered by the MPERA, is a multi-employer, cost-sharing defined benefit plan established in 1963, and governed by Title 19, chapters 2 & 8, MCA. This plan provides retirement benefits to all persons employed as a game warden, warden supervisory personnel, or state peace officer. Benefits are established by state law and can only be amended by the Legislature. The GWPORS provides retirement, disability and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service and highest average compensation.

The State of Montana and its discretely presented component units are the only employers who participate in the GWPORS. Therefore, while the plan is considered to be a multi-employer, cost-sharing defined benefit plan for actuarial valuation purposes, in accordance with GASB 68, the plan is treated as if it were a single-employer defined benefit pension plan type for financial reporting.

Summary of Benefits

Member’s highest average compensation (HAC)

Hired prior to July 1, 2011 – highest average compensation during any consecutive 36 months;

Hired on or after July 1, 2011 – highest average compensation during any consecutive 60 months;

Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member’s HAC.

Eligibility for benefit

Service Retirement

Age 50, 20 years of membership service.

Early Retirement (reduced benefit)

Age 55, vested members who terminate employment prior to 20 years of membership service.

Vesting

5 years of membership service.

Monthly benefit formula

2.5% of HAC per year of service credit.

Guaranteed Annual Benefit Adjustment (GABA)

After the member has completed 12 full months of retirement, the member’s benefit increases by the applicable percentage (provided below) each January, inclusive of all other adjustments to the member’s benefit:

- o 3.0% for members hired prior to July 1, 2007
- o 1.5% for members hired on or after July 1, 2007

Contributions to the Plan

Rates are specified by state law for periodic employee and employer contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system – Contributions are deducted from each member’s salary and remitted by participating employers. Plan members are required to contribute 10.56% of member’s compensation.

Employer contributions to the system – State agency and university employers are required to contribute 9.0% of a member’s compensation.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The actuarial assumptions used in the June 30, 2015, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Admin Expense as a % of payroll 0.17%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0% to 7.3%
- Postretirement Benefit Increases – After the member has completed 12 full months of retirement, the member’s benefit increases by the applicable percentage each January, inclusive of other adjustments to the member’s benefit:
 - o 3.00% for members hired prior to July 1, 2007
 - o 1.50% for members hired on or after July 1, 2007
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members and employers will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. Based on those assumptions, the GWPORS’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2123. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the GWPORS. The most recent analysis, performed for the period covering fiscal years 2003 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by an investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the GWPORS’s target asset allocation as of June 30, 2015, is summarized in the table below:

<u>Asset Class</u>	<u>Target Asset Allocation</u>	<u>Long-Term Expected Real Rate of Return</u>
Cash Equivalents	2.00%	-0.25%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.10%
Fixed Income	24.00%	1.25%
Private Equity	12.00%	8.00%
Real Estate	8.00%	4.25%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	<u>1.0% Decrease (6.75%)</u>	<u>Current Discount Rate</u>	<u>1.0% Increase (8.75%)</u>
Primary Government GWPORS Net Pension Liability	\$44,154	\$19,849	\$(118)
Discretely Presented Component Units GWPORS Net Pension Liability	2,584	1,162	(7)
Total Employer GWPORS Net Pension Liability	<u>\$46,738</u>	<u>\$21,011</u>	<u>\$(125)</u>

Net Pension Liability

In accordance with GASB 68, employers are required to recognize and report certain amounts associated with their participation in the GWPORS. Statement 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability (NPL), pension expense, deferred inflows of resources and deferred outflows of resources associated with pensions.

(dollars presented in thousands)

	Net Pension Liability as of 6/30/14	Net Pension Liability as of 6/30/15	Percent of Collective NPL
Primary Government Employer Proportionate Share	\$14,262	\$19,849	94.470296%
Discretely Presented Component Unit Share	859	1,162	5.529704%
Total Employer GWPORS Proportionate Share	\$15,121	\$21,011	100%

At June 30, 2016, the employer reported a total liability of \$21.0 million for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The employer's proportion of the net pension liability was based on the employer's contributions received by GWPORS during the measurement period July 1, 2014, through June 30, 2015, relative to the total employer contributions received from all of GWPORS participating employers. At June 30, 2015, the State's proportion as an employer was 100%.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension liability and the employer's reporting date that are expected to have a significant effect on the employer's proportionate share of the collective net pension liability.

Other Items Related to and Changes in Net Pension Liability

The State, as the primary government employer, has the following balances and changes related to the GWPORS's Net Pension Liability:

(in thousands)

	Total Pension Liability	Plan Fiduciary Net Position	Net Pension Liability
Balances at 6/30/2014	\$145,127	\$130,864	\$14,263

Pension Expense

At June 30, 2016, the employer recognized a total pension expense of \$3.6 million for its proportionate share of the GWPORS pension expense: \$3.4 million related to the primary government and \$193.8 thousand related to component units.

Deferred Outflows and Inflows

At June 30, 2016, the State, as a primary government employer, recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$3.8 million.

As of the fiscal year ended June 30, 2016, remaining deferred outflows of resources and deferred inflows of resources for the primary government, as an employer, related to the GWPORS are from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 592	-
Changes in proportionate shares	182	\$ 151
Difference between projected and actual earnings on pension plan investments	-	2,863
Contributions paid to GWPORS subsequent to the measurement date - FY 2016 Contributions	4,008	-
Totals	<u>\$4,782</u>	<u>\$3,014</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the employer's contributions made subsequent to the June 30, 2015, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	<i>(in thousands)</i>
Year ended June 30:	Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense
2017	\$(1,131)
2018	(1,131)
2019	(1,131)
2020	945
2021	104
Thereafter	104

The State's discretely presented component units, as employers, recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$231.6 thousand.

As of the fiscal year ended June 30, 2016, remaining deferred outflows of resources and deferred inflows of resources for the State's discretely presented component units, as employers, related to the GWPORS are from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources

(2) State as an Employer and/or a Nonemployer Contributing Entity to Cost-Sharing Multiple-Employer Plans

Public Employees’ Retirement System - Defined Benefit Retirement Plan – The PERS-DBRP, administered by the MPERA, is a multiple-employer, cost-sharing plan established July 1, 1945, and governed by Title 19, Chapters 2 & 3, MCA. This plan covers the State, local governments, certain employees of the Montana University System, and school districts.

All new members are initially members of the PERS-DBRP and have a 12-month window during which they may choose to remain in the PERS-DBRP or join the Public Employees’ Retirement System-Defined Contribution Retirement Plan (PERS-DCRP) by filing an irrevocable election. Members may not be participants of both the defined contribution and defined benefit retirement plans. All new members from the universities also have a third option to join the university system’s Montana University System-Retirement Program (MUS-RP). For members that choose to join the PERS-DCRP or the MUS-RP, a percentage of the Employer contributions are used to fund the PERS-DBRP liability.

The PERS-DBRP provides retirement, disability, and death benefits to plan members and their beneficiaries. Benefits are established by state law and can only be amended by the Legislature. Benefits are based on eligibility, years of service, and highest average compensation. Member rights are vested after five years of service.

Summary of Benefits

Member’s highest average compensation (HAC)

- Hired prior to July 1, 2011 – highest average compensation during any consecutive 36 months;
- Hired on or after July 1, 2011 – highest average compensation during any consecutive 60 months;
- Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member’s HAC.

Eligibility for benefit

Service retirement:

Hired prior to July 1, 2011 -
 Age 60, 5 years of membership service;
 Age 65, regardless of membership service; or
 Any age, 30 years of membership service.

Hired on or after July 1, 2011 -
 Age 65, 5 years of membership service;
 Age 70, regardless of membership service.

Early retirement, actuarially reduced:

Hired prior to July 1, 2011 -
 Age 50, 5 years of membership service; or
 Any age, 25 years of membership service.

Hired on or after July 1, 2011 - Age 55, 5 years of membership service.

Second retirement (all require returning to PERS-covered employment or PERS service):

Retire before January 1, 2016 and accumulate less than 2 years' additional service credit or retire on or after January 1, 2016 and accumulate less than 5 years' additional service credit:

- A refund of member's contributions plus regular interest (.25%);
- No service credit for second employment;
- Start the same benefit amount the month following termination; and
- Their GABA starts again in the January immediately following their second retirement

Retire before January 1, 2016 and accumulate at least 2 years of additional service credit:

- A recalculated retirement benefit based on provisions in effect after their initial retirement; and
- Their GABA starts on their recalculated benefit in the January after receiving new benefit for 12 months

Retire on or after January 1, 2016 and accumulate 5 or more years of service credit:

- The same retirement as prior to their return to service;
- A second retirement benefit as prior to their second period of service based on laws in effect upon their rehire date;
- Their GABA starts on both benefits in the January after receiving the original and new benefit for 12 months

Vesting

5 years of membership service

Monthly benefit formula

Members hired prior to July 1, 2011 -

Less than 25 years of membership service: 1.785% of HAC per year of service credit;
 25 years of membership service or more: 2% of HAC per year of service credit.

Members hired on or after July 1, 2011 -

Less than 10 years of membership service: 1.5% of HAC per year of service credit;
 10 years or more, but less than 30 years of membership service: 1.785% of HAC per year of service credit;
 30 years or more of membership service: 2% of HAC per year of service credit.

Guaranteed Annual Benefit Adjustment (GABA) – After the member has completed 12 full months of retirement, the member’s benefit increases by the applicable percentage (provided below) each January, inclusive of other adjustments to the member’s benefit:

- 3.0% for members hired prior to July 1, 2007
- 1.5% for members hired between July 1, 2007 and June 30, 2013
- Members hired on or after July 1, 2013
 - a. 1.5% for each year PERS is funded at or above 90%;
 - b. 1.5% is reduced by 0.1% for each 2% PERS is funded below 90%; and,
 - c. 0% whenever the amortization period for PERS is 40 years or more.

Contributions to the Plan

Rates are specified by state law for periodic employee, employer, and nonemployer entity contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system: Contributions are deducted from each member’s salary and remitted by participating Employers. Plan members are required to contribute 7.90% of member’s compensation. The 7.90% member contribution rate is temporary and will be decreased to 6.9% on January 1 following actuary valuation results that show the amortization period has dropped below 25 years and would remain below 25 years following the reduction of both the additional Employer and additional member contribution rates.

Employer contributions to the system

State and University System employers are required to contribute 8.37% of member compensation. Local government entities are required to contribute 8.27% of member compensation. School district employers contributed 8.00% of member compensation.

Per the 2013 Legislative Session’s House Bill 454, section 4, effective July 1, 2013, PERS employer contributions temporarily increased 1%. Beginning July 1, 2014, employer contributions will increase an additional 0.1% a year over 10 years, through 2024. The Employer additional contributions including the 0.27% added in 2007 and 2009, terminates on January 1 following actuary valuation results that show the amortization period of the PERS-DBRP has dropped below 25 years and would remain below 25 years following the reductions of both the additional employer and member contributions rates. On January 1, 2017, the additional contributions will not be terminated.

Effective July 1, 2013, employers are required to make contributions on working retirees’ compensation. Member contributions for working retirees are not required.

The portion of employer contributions allocated to the Plan Choice Rate (PCR) are included in the employers reporting. The PCR was paid off effective March 2016 and the contributions previously directed to the PCR are now directed to member accounts.

Non Employer Entity Contributions

Special Funding

- The State contributes 0.1% of member compensation on behalf of local government entities.
- The State contributes 0.37% of member compensation on behalf of school district entities.

Not Special Funding

- The State contributes a portion of Coal Severance Tax income and interest earnings from the Coal Trust Permanent Trust fund in accordance with Section 15-35-108, MCA.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. There were several significant assumptions and other inputs used to measure the total pension liability. The actuarial assumptions used in the June 30, 2015, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. Among those assumptions were the following:

- Investment Return 7.75%
- Admin Expense as a % of payroll 0.27%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0% to 6%
- Postretirement Benefit Increases – After the member has completed 12 full months of retirement, the member’s benefit increases by the applicable percentage each January, inclusive of other adjustments to the member’s benefit:
 - 3.00% for members hired prior to July 1, 2007
 - 1.50% for members hired between July 1, 2007 and June 30, 2013
 - Members hired on or after July 1, 2013:
 - 1.50% for each year PERS is funded at or above 90%
 - 1.50% is reduced by 0.1% for each 2% PERS is funded below 90%; and
 - 0% whenever the amortization period for PERS is 40 years or more
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members, employers, and nonemployer contributing entities will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. The State contributes 0.1% of salaries for local governments and 0.37% for school districts. In addition, the State contributes coal severance tax and interest money from the General Fund. The interest is contributed monthly and the severance tax is contributed quarterly. Based on those assumptions, the PERS-DBRP’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2123. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the PERS-DBRP. The most recent analysis, performed for the period covering fiscal years 2003 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the PERS-DBRP’s target asset allocation as of June 30, 2015, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.00%	-0.25%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.10%
Fixed Income	24.00%	1.25%
Private Equity	12.00%	8.00%
Real Estate	8.00%	4.25%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability (NPL) to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
State as an Employer in PERS-DBRP - Net Pension Liability	\$1,155,435	\$749,414	\$406,539
State as a Nonemployer Contributing Entity to PERS-DBRP - Net Pension Liability	20,606	13,365	7,250

Net Pension Liability

In accordance with GASB 68, employers and the nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the PERS-DBRP. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability, pension expense, deferred inflows of resources and deferred outflows of resources associated with pensions. The proportionate shares were determined based on contributions made to the plan by employers and the nonemployer contributing entity special funding. The Coal Severance Tax collection and interest amounts were not considered in determining proportionate shares as this is not a special funding situation component.

In accordance with GASB 68, the PERS-DBRP has a special funding situation where the State is legally responsible for making contributions directly to the PERS-DBRP on behalf of the employers. Due to the existence of this special funding situation, the State is required to report a proportionate share of a local government or school district's collective net pension liability that is associated with the non-State employer.

The State also has a funding situation that is not considered a special funding situation whereby the General Fund provides contributions received from the Coal Severance Tax collections and interest accrued on the Coal Tax Permanent Trust Fund. All employers are required to report the portion of Coal Severance Tax and interest attributable to the employer as a grant revenue.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/14	Net Pension Liability as of 6/30/15	Percent of Collective NPL
State's Proportionate Share as an Employer Entity	\$663,174	\$749,414	53.611080%
State's Proportionate Share as a Nonemployer Contributing Entity	11,978	13,365	0.956090%
State of Montana Totals	<u>\$675,152</u>	<u>\$762,779</u>	<u>54.567170%</u>

At June 30, 2016, the State reported a liability of \$762.8 million for its proportionate share of the net pension liability as an employer and nonemployer contributing entity. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The proportion of the net pension liability is based on the employer's and nonemployer's special funding contributions received by the PERS-DBRP during the measurement period of July 1, 2014, through June 30, 2015, relative to the total employer and nonemployer special funding contributions received from all PERS-DBRP participating employers.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: Between the measurement date of the collective net pension liability and the employer’s reporting date there were some changes in proportion that may have an effect on the employer’s proportionate share of the collective net pension liability.

Employer Pension Expense and Nonemployer Contributing Entity Grant Expenses

At June 30, 2016, the State as an employer recognized a pension expense of \$50.7 million for its proportionate share of the PERS-DBRP’s pension expense. The State as a nonemployer contributing entity recognized grant expense of \$874 thousand for special funding support provided by the General Fund for its proportionate share of the PERS-DBRP’s pension expense that is associated with other employer participants in the plan. Total pension related expenses at June 30, 2016 were \$51.6 million.

Support Revenue

As of the fiscal year ended June 30, 2016, the State as an employer recognized grant revenue of \$18.0 million for its proportionate share of total nonemployer entity contributions from the Coal Severance Tax and interest nonspecial funding situation.

Deferred Outflows and Inflows

At June 30, 2016, the State as an employer recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$58.6 million.

As of the fiscal year ended June 30, 2016, the State as an employer has the following proportionate shares of the PERS-DBRP’s deferred outflows of resources and deferred inflows of resources from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between projected and actual earnings on pension plan investments	-	\$63,446
Actual versus expected experience	-	4,534
Differences between actual contributions and proportionate share contributions	\$ 949	392
Changes in proportionate shares	8,880	4,326
Contributions paid to PERS-DBRP subsequent to the measurement date - FY 2016 Contributions	59,073	-
Totals	<u>\$68,902</u>	<u>\$72,698</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the employer’s contributions made subsequent to the June 30, 2015, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	<i>(in thousands)</i>
Year ended June 30:	Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense
2017	\$(26,419)
2018	(26,419)
2019	(26,532)
2020	16,501
2021	-
Thereafter	-

At June 30, 2016, the State as a nonemployer contributing entity recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$32.4 million.

As of the fiscal year ended June 30, 2016, the State as a nonemployer contributing entity reported its proportionate share of the PERS-DBRP’s deferred outflows of resources and deferred inflows of resources from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between projected and actual earnings on pension plan investments	-	\$1,131
Differences between actual contributions and proportionate share contributions	-	57
Changes in proportionate shares	-	61
Actual versus expected experience	-	81
Contributions paid to PERS-DBRP subsequent to the measurement date - FY 2016 Contributions	\$30,800	-
Totals	\$30,800	\$1,330

Amounts reported as deferred outflows of resources related to pensions resulting from the nonemployer’s contributions made subsequent to the June 30, 2015, measurement date will be recognized as a reduction to its share of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in grant expense as follows:

<u>Year ended June 30:</u>	<i>(in thousands)</i> Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense
2017	\$(545)
2018	(545)
2019	(534)
2020	294

Sheriffs’ Retirement System – The SRS, administered by the MPERA, is a multiple-employer, cost-sharing defined benefit plan established July 1, 1974, and governed by Title 19, chapters 2 & 7, MCA. This plan provides retirement benefits to all Department of Justice criminal and gambling investigators hired after July 1, 1993, all detention officers hired after July 1, 2005, and to all Montana sheriffs. Benefits are established by state law and can only be amended by the Legislature. The SRS provides retirement, disability and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service and highest average compensation. Member rights are vested after five years of service.

Summary of Benefits

Member’s highest average compensation (HAC)

- Hired prior to July 1, 2011 – highest average compensation during any consecutive 36 months;
- Hired on or after July 1, 2011 – highest average compensation during any consecutive 60 months.
- Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member’s HAC.

Eligibility for benefit

Service Retirement
20 years of membership service, regardless of age.

Early Retirement
Age 50, 5 years of membership service, actuarially reduced.

Vesting
5 years of membership service

Monthly benefit formula
2.5% of HAC per year of service

Guaranteed Annual Benefit Adjustment (GABA)

After the member has completed 12 full months of retirement, the member's benefit increases by the applicable percentage (provided below) each January, inclusive of all other adjustments to the member's benefit.

- 3.0% for members hired prior to July 1, 2007
- 1.5% for members hired on or after July 1, 2007

Contributions to the Plan

Rates are specified by state law for periodic employee and employer contributions and are a percentage of the member's compensation. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions to the system – Contributions are deducted from each member's salary and remitted by participating employers. Plan members are required to contribute 9.245% of member's compensation.

Employer contributions to the system - The employers are required to contribute 10.115% of member compensation. Effective July 1, 2013, employer contributions are required to be paid on working retiree compensation. Member contributions are not required for working retirees.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The actuarial assumptions used in the June 30, 2015, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Administrative Expense as a % of Payroll 0.17%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0% to 7.3%
- Postretirement Benefit Increases – After the member has completed 12 full months of retirement, the member's benefit increases by the applicable percentage each January, inclusive of other adjustments to the member's benefit.
 - For members hired prior to July 1, 2007 3.00%
 - For members hired on or after July 1, 2007 1.50%
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 6.68%, which is a blend of the assumed long-term expected rate of return of 7.75% on SRS's investments and a municipal bond index rate of 3.80%. The basis for this is the June 30, 2016 Bond Buyer General Obligation 20-year Municipal Bond Index published monthly by the Board of Governors of the Federal Reserve System. The projection of cash flows used to determine the discount rate

assumed that contributions from participating plan members and employers will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. Based on those assumptions, the SRS’s fiduciary net position was projected to not be adequate to make all the projected future benefit payments of current plan members after 2057. Therefore, the portion of future projected benefit payments after 2057 are discounted at the municipal bond index rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the SRS. The most recent analysis, performed for the period covering fiscal years 2003 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the SRS’s target asset allocation as of June 30, 2015, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.00%	-0.25%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.10%
Fixed Income	24.00%	1.25%
Private Equity	12.00%	8.00%
Real Estate	8.00%	4.25%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 6.86%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (5.86%) or 1.00% higher (7.86%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (5.86%)	Current Discount Rate	1.0% Increase (7.86%)
Employer’s SRS Net Pension Liability	\$8,727	\$5,434	\$2,735

Net Pension Liability

In accordance with GASB 68, employers are required to recognize and report certain amounts associated with their participation in the SRS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability (NPL), pension expense, deferred inflows of resources, and deferred outflows of resources associated with pensions.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/14	Net Pension Liability as of 6/30/15	Percent of Collective NPL
Employer Proportionate Share	\$2,304	\$5,434	5.637055%

At June 30, 2016, the State as an employer reported a liability of \$5.4 million for its proportionate share of net pension liability. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The employer’s proportion of the net

pension liability was based on the employer’s contributions received by the SRS during the measurement period, July 1, 2014, through June 30, 2015, relative to the total employer contributions received from all of SRS participating employers. At June 30, 2015, the employer’s proportion was 5.637055%.

Changes in actuarial assumptions and methods: There were no changes in demographic assumptions that affected the measurement of the total pension liability. There was an adjustment in the discount rate during the measurement period.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension liability and the employer’s reporting date that are expected to have a significant effect on the Employer’s proportionate share of the collective net pension liability.

Pension Expense

At June 30, 2016, the employer recognized a pension expense of \$420.3 thousand for its proportionate share of the SRS pension expense.

Deferred Outflows and Inflows

At June 30, 2016, the State as an employer recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$388 thousand.

As of the fiscal year ended June 30, 2016, the State, as an employer, reported its proportionate share of the SRS's deferred outflows of resources and deferred inflows of resources from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Changes of Assumptions	\$2,023	\$1,995
Actual versus expected experience	-	9
Changes in proportionate shares	87	-
Difference between projected and actual earnings on pension plan investments	-	372
Contributions paid to SRS subsequent to the measurement date - FY 2016 contributions	389	-
Totals	\$2,499	\$2,376

Amounts reported as deferred outflows of resources related to pensions resulting from the employer’s contributions made subsequent to the measurement date of June 30, 2015, will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	<i>(in thousands)</i>
Year ended June 30:	Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense
2017	\$(136)
2018	(136)
2019	(137)
2020	122
2021	21
Thereafter	-

Municipal Police Officers' Retirement System – The MPORS, administered by the MPERA, is a multiple-employer, cost-sharing defined benefit plan that was established in 1974 and is governed by Title 19, chapters 2 & 9, MCA. This plan covers all municipal police officers employed by first- and second-class cities and other cities that adopt the plan. Benefits are established by state law and can only be amended by the Legislature. The MPORS provides retirement, disability, and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service, and final average compensation. Member rights for death and disability are vested immediately. All other rights are vested after five years of service.

Deferred Retirement Option Plan (DROP)

Beginning July 2002, eligible members of the MPORS can participate in the DROP by filing a one-time irrevocable election with the PERB. The DROP is governed by Title 19, Chapter 9, Part 12, MCA. A member must have completed at least twenty years of membership service to be eligible. They may elect to participate in the DROP for a minimum of one month and a maximum of 60 months and may participate in the DROP only once. A participant remains a member of the MPORS, but will not receive membership service or service credit in the system for the duration of the member's DROP period. During participation in the DROP, all mandatory contributions continue to the retirement system. A monthly benefit is calculated based on salary and years of service to the date of the beginning of the DROP period. The monthly benefit is paid into the member's DROP account until the end of the DROP period. At the end of the DROP period, the participant may receive the balance of the DROP account in a lump-sum payment or in a direct rollover to another eligible plan, as allowed by the IRS. If the participant continues employment after the DROP period ends, they will again accrue membership service and service credit. The DROP account cannot be distributed until employment is formally terminated. As of June 30, 2016, there are 60 DROP participants. Since program inception, a total of 142 members have participated in the DROP. The balance held by MPERA for DROP participants as of June 30, 2016, was approximately \$7.2 million.

The State is not an employer participant in the MPORS plan. However, because the PERB is a fiduciary component unit of the State, this CAFR presents certain information to help ensure compliance with GASB 67. In addition, the State provides nonemployer entity contributions classified as special funding in accordance with GASB 68. Disclosures made in this financial report are meant to reflect the aforementioned relationships.

Summary of Benefits

Member's final average compensation (FAC)

Hired prior to July 1, 1977 – average monthly compensation of final year of service;

Hired on or after July 1, 1977 – final average compensation (FAC) for last consecutive 36 months.

Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member's FAC.

Eligibility for benefit

Service Retirement

20 years of membership service, regardless of age.

Second Retirement

Age 50, reemployed in a MPORS position

Early Retirement

Age 50, 5 years of membership service.

Vesting

5 years of membership service.

Monthly benefit formula

2.5% of FAC per year of service credit.

Second retirement benefit formula

Recalculated using specific criteria:

Less than 20 years of membership service, based on total MPORS service

More than 20 years of membership service, initial benefit plus new service credit and FAC after reemployment

Guaranteed Annual Benefit Adjustment (GABA)

Hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member’s benefit increases by a maximum of 3% each January, inclusive of all other adjustments to the member’s benefit.

Minimum benefit adjustment (non-GABA)

If hired before July 1, 1997, and member did not elect GABA – the monthly retirement, disability or survivor’s benefit may not be less than 50% of the compensation of a newly confirmed officer in the city where the member was last employed.

Contributions to the Plan

Rates are specified by state law for periodic employee, employer, and nonemployer entity contributions. The Legislature has the authority to establish and amend contribution rates to the plan.

Member contributions – Contribution rates are dependent upon date of hire as a police officer. Contributions are deducted from each member’s salary and remitted by the participating Employer. For fiscal year 2016:

- If hired after June 30, 1975, and prior to July 1, 1979, member contributions as a percentage of salary are 7.00%;
- If hired after June 30, 1979, and prior to July 1, 1997, member contributions as a percentage of salary are 8.50%; and,
- If hired on or after July 1, 1997, and for members electing GABA, member contributions as a percentage of salary are 9.00%.

Employer Contributions – Employers are required to contribute 14.41% of a member’s compensation.

Nonemployer Entity Contributions – The State contributes 29.37% of a member’s compensation from the General Fund. These amounts are considered a special funding situation in accordance with GASB 68.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The actuarial assumptions used in the June 30, 2015, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Admin expense as a % of payroll 0.20%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0% to 7.3%
- Postretirement Benefit Increases
 - GABA

Hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member’s benefit increases by a maximum of 3% each January, inclusive of all other adjustments to the member’s benefit
 - Minimum benefit adjustment (non-GABA)

If hired before July 1, 1997 and member did not elect GABA – the monthly retirement, disability or survivor’s benefit may not be less than 50% the compensation of a newly confirmed officer in the city that the member was last employed

- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members, employers, and nonemployer contributing entities will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. The State contributes 29.37% of salaries paid by employers. Based on those assumptions, the MPORS’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2123. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the MPORS. The most recent analysis, performed for the period covering fiscal years 2003 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the MPORS’s target asset allocation as of June 30, 2015, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.00%	-0.25%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.10%
Fixed Income	24.00%	1.25%
Private Equity	12.00%	8.00%
Real Estate	8.00%	4.25%

Sensitivity Analysis

In accordance with GASB 68, regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	1.0% Decrease (6.75%)	(in thousands) Current Discount Rate	1.0% Increase (8.75%)
State as a Nonemployer entity Net Pension Liability	\$156,371	\$110,756	\$70,262

Net Pension Liability

In accordance with GASB 68, employers and nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the MPORS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension

liability, pension expense, deferred inflows of resources, and deferred outflows of resources associated with pensions.

In accordance with GASB 68, the MPORS has a special funding situation in which the State is legally responsible for making contributions directly to the MPORS on behalf of the employers. Due to the existence of this special funding situation, the State is required to report a proportionate share of a local government’s collective net pension liability that is associated with the non-State employer.

(dollars presented in thousands)

	Net Pension Liability as of 6/30/14	Net Pension Liability as of 6/30/15	Percent of Collective NPL
State as a Nonemployer Contributing Entity - Proportionate Share	\$105,106	\$110,756	66.954111%

At June 30, 2016, the State as a nonemployer contributing entity reported a liability of \$110.8 million for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The nonemployer’s proportion of the net pension liability was based on the nonemployer’s special funding contributions received by the MPORS during the measurement period of July 1, 2014, through June 30, 2015, relative to total contributions received from all of the MPORS’s participating employers and the nonemployer contributing entity. At June 30, 2015, the State’s proportion was 66.954111%.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: Between the measurement date of the collective net pension liability and the employer’s reporting date there were some changes in proportion that may have an effect on the employer’s proportionate share of the collective net pension liability.

Grant Expense Related to Special Funding

The State recognized grant expense of \$11.3 million for special funding support provided by the General Fund for its proportionate share of the MPORS’s pension expense that is associated with other employer participants in the plan.

Deferred Outflows and Inflows

At June 30, 2016, the State as a nonemployer contributing entity recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$13.4 million.

As of the fiscal year ended June 30, 2016, the State as a nonemployer reported its proportionate share of the deferred outflows of resources and deferred inflows of resources related to MPORS from the following sources:

(in thousands)

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between projected and actual earnings on pension plan investments	-	\$4,161
Changes in proportionate shares	\$ 87	-
Actual versus expected experience	-	1,011
Contributions paid to MPORS subsequent to the measurement date - FY 2016 Contributions	13,752	-
Totals	<u>\$13,839</u>	<u>\$5,172</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the nonemployer’s contributions made subsequent to the June 30, 2015, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in grant expense as follows:

Firefighters’ Unified Retirement System – The FURS, administered by the MPERA, is a multiple-employer, cost-sharing defined benefit plan established in 1981, and governed by Title 19, chapters 2 & 13, MCA. This system provides retirement benefits to firefighters employed by first- and second-class cities, other cities and rural fire district departments that adopt the plan, and to firefighters hired by the Montana Air National Guard on or after October 1, 2001. Benefits are established by state law and can only be amended by the Legislature. The FURS provides retirement, disability, and death benefits to plan members and their beneficiaries. Benefits are based on eligibility, years of service, and compensation. Member rights for death and disability are vested immediately. All other member rights are vested after five years of service.

Summary of Benefits

Member’s compensation

- Hired prior to July 1, 1981, and not electing GABA – highest monthly compensation (HMC);
- Hired after June 30, 1981, and those electing GABA – highest average compensation (HAC) during any consecutive 36 months.
- Hired on or after July 1, 2013 – 110% annual cap on compensation considered as a part of a member’s highest average compensation.

Eligibility for benefit

Service retirement
20 years of membership service, regardless of age.

Early Retirement
Age 50, 5 years of membership service.

Vesting
5 years of membership service.

Monthly benefit formula

- Members hired prior to July 1, 1981, and not electing GABA are entitled to the greater of:
- 2.5% of HMC per year of service; **or**
 - if less than 20 years of service – 2% of HMC for each year of service;
 - if more than 20 years of service – 50% of the member’s HMC plus 2% of the member’s HMC for each year of service over 20 years.

Members hired on or after July 1, 1981, and those electing GABA: 2.5% of HAC per year of membership service.

Guaranteed Annual Benefit Adjustment (GABA)

Hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member’s benefit increases by a maximum of 3% each January, inclusive of all other adjustments to the member’s benefit.

Minimum Benefit Adjustment (non-GABA)

If hired before July 1, 1997 and the member did not elect GABA, the monthly retirement, disability or survivor’s benefit may not be less than 50% of the compensation of a newly confirmed firefighter employed by the city that last employed the member, provided the member has at least 10 years of membership service.

Contributions to the Plan

Rates are specified by state law for periodic employee, employer and nonemployer entity contributions. The Legislature has the authority to establish and amend contribution rates to the plan. Effective July 1, 2013, employer and state contributions are required to be paid on working retiree compensation. Member contributions are not required for working retirees.

Member contributions to the system – Contributions are deducted from each member’s salary and remitted by the participating Employer. For members:

Hired prior to July 1, 1997 and not electing GABA, member contributions as a percentage of salary are 9.50%;

Hired on or after July 1, 1997 and electing GABA, member contributions as a percentage of salary are 10.70%.

Employer contributions to the system – Employers are required to contribute 14.36% of member’s compensation.

Nonemployer entity contributions to the system – The State contributes 32.61% of a member’s compensation from the General Fund.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The actuarial assumptions used in the June 30, 2015, valuation were based on the results of the last actuarial experience study, dated June 2010 for the six-year period of July 1, 2003, to June 30, 2009. There were several significant assumptions and other inputs used to measure the total pension liability. Among those assumptions were the following:

- Investment Return 7.75%
- Admin Expense as a % of Payroll 0.19%
- General Wage Growth 4.00%
- Inflation at 3.00%
- Merit Increases 0% to 7.3%
- Postretirement Benefit Increases
 - GABA
 - Members hired on or after July 1, 1997, or those electing GABA – after the member has completed 12 full months of retirement, the member’s benefit increases by a maximum of 3% each January, inclusive of all other adjustment to the member’s benefit.
 - Minimum Benefit Adjustment (non-GABA)
 - Members hired before July 1, 1997 and member did not elect GABA – the monthly retirement, disability or survivor’s benefit may not be less than 50% the compensation of a newly confirmed firefighter employed by the city that last employed the member (provided the member has at least 10 years of membership service).
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating plan members, employers, and nonemployer contributing entities will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. The State contributes 32.61% of salaries pensionable payroll paid by employers. Based on those assumptions, the FURS’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2123. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. A municipal bond rate was not incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience study prepared for the FURS. The most recent analysis, performed for the period covering fiscal years 2003 through 2009, is outlined in a report dated June 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by an investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the FURS’s target asset allocation as of June 30, 2015, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.00%	-0.25%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.10%
Fixed Income	24.00%	1.25%
Private Equity	12.00%	8.00%
Real Estate	8.00%	4.25%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
State as an Employer in FURS - Net Pension Liability	\$ 3,959	\$ 2,454	\$ 1,228
State as a Nonemployer Contributing Entity to FURS - Net Pension Liability	111,140	68,892	34,463

Net Pension Liability

In accordance with GASB 68, employers and nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the FURS. GASB 68 became effective June 30, 2015, and includes requirements to record and report their proportionate share of the collective net pension liability, pension expense, deferred inflows of resources and deferred outflows of resources associated with pensions.

In accordance with GASB 68, the FURS has a special funding situation in which the State is legally responsible for making contributions directly to the FURS on behalf of the employers. Due to the existence of this special funding situation, the State is required to report a proportionate share of a local government or fire district’s collective net pension liability that is associated with the non-State employer.

(dollars presented in thousands)

	Net Pension Liability as of 6/30/14	Net Pension Liability as of 6/30/15	Percent of Collective NPL
State's Proportionate Share as an Employer Entity	\$ 1,806	\$ 2,454	2.399255%
State's Proportionate Share as a Nonemployer Contributing Entity	66,384	68,892	67.358196%
State of Montana Totals	<u>\$68,190</u>	<u>\$71,346</u>	<u>69.757451%</u>

At June 30, 2016, the State reported a liability of \$71.3 million for its proportionate share of the net pension liability as an employer and nonemployer contributing entity in relation to the FURS. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The proportion of the net pension liability was based on the all employer and nonemployer contributions received by the FURS during the measurement period, July 1, 2014, through June 30, 2015, relative to the total contributions received from all FURS participating employers and the nonemployer contributing entity. At June 30, 2015, the State as employer had a proportion of 2.399255% and the nonemployer proportion was 67.358196%.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: Between the measurement date of the collective net pension liability and the employer's reporting date there were some changes in proportion that may have an effect of the employer's proportionate share of the collective net pension liability.

Employer Pension Expense and Nonemployer Contributing Entity Special Funding Grant Expense

At June 30, 2016, the State as an employer recognized pension expense of \$377.3 thousand for its proportionate share of the FURS pension expense. The State also recognized grant expense of \$7.5 million for special funding support provided by the General Fund for its proportionate share of the FURS's pension expense that is associated with other employer participants in the plan. Total pension related expenses at June 30, 2016, was \$7.9 million.

Deferred Outflows and Inflows

At June 30, 2016, the State, as an employer, recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$361 thousand.

As of the fiscal year ended June 30, 2016, the State as an employer reported its proportionate share of deferred outflows of resources and deferred inflows of resources related to the FURS from the following sources:

(in thousands)

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between projected and actual earnings on pension plan investments	-	\$148
Changes in proportionate shares	\$536	-
Actual versus expected experience	-	3
Contributions paid to FURS subsequent to the measurement date - FY 2016 Contributions	475	-
Totals	<u>\$1,011</u>	<u>\$151</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the employer's contributions made subsequent to the measurement date of June 30, 2015, will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in pension expense as follows:

<i>(in thousands)</i>	
Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense	
Year ended June 30:	
2017	\$ 40
2018	40
2019	40
2020	157
2021	107
Thereafter	-

At June 30, 2016, the State recognized a beginning deferred outflow of resources as a nonemployer contributing entity for fiscal year 2015 contributions of \$13.6 million.

As of the fiscal year ended June 30, 2016, the State as a nonemployer contributing entity reported its proportionate share of deferred outflows of resources and deferred inflows of resources related to FURS from the following sources:

<i>(in thousands)</i>		
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between projected and actual earnings on pension plan investments	-	\$4,164
Changes in proportionate shares	-	631
Actual versus expected experience	-	90
Contributions paid to FURS subsequent to the measurement date - FY 2016 Contributions	\$13,635	-
Totals	\$13,635	\$4,885

Amounts reported as deferred outflows of resources related to pensions resulting from the nonemployer's contributions made subsequent to the June 30, 2015, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred inflows of resources related to pensions will be recognized in grant expense as follows:

<i>(in thousands)</i>	
Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense	
Year ended June 30:	
2017	\$(2,001)
2018	(2,001)

Volunteer Firefighters' Compensation Act – The VFCA, administered by the MPERA, is a statewide retirement and disability plan established in 1965, and governed by Title 19, chapter 17, MCA. All members are unpaid volunteers and the State is the only contributor to the plan. Benefits are established by state law and can only be amended by the Legislature. The VFCA provides pension, disability, and survivorship benefits for all eligible volunteer firefighters who are members of qualified volunteer fire companies in unincorporated areas, towns or villages, and included volunteer fire departments, fire districts, and fire service areas under the laws of the State. Benefits are based on eligibility and years of service. Member rights are vested after ten years of credited service. VFCA also provides limited benefits for death or injuries incurred in the line of duty. A member who chooses to

retire and draw a pension benefit may return to service with a volunteer fire department without loss of benefits. However, a returning retired member may not be considered an active member accruing credit for service.

Summary of Benefits

Eligibility for benefit

Age 55, 20 years of credited service;

Age 60, 10 years of credited service.

Additional benefit

As of April 25, 2005, all retirees may receive a benefit per month equal to \$7.50 for each year of credited service, up to 30 years of credited service (maximum benefit \$225).

Effective July 1, 2011, members who retire on or after July 1, 2011, and have greater than 30 years of credited service will receive \$7.50 per month for each additional year of credited service over 30 years if the pension trust fund is actuarially sound, amortizing any unfunded liabilities in 20 years or less. This determination will be made annually and a member's benefit will be capped at \$225 a month (30 years of credited service) if the amortization period grows to greater than 20 years.

Vesting

10 years of credited service.

Monthly benefit formula (effective January 1, 2016)

\$8.75 per year of credited service up to 20 years;

\$7.50 per year of credited service after 20 years

Contributions to the Plan

The State, as a nonemployer contributing entity, is the only contributor to the VFCA. Contributions are 5% of fire insurance premium taxes collected on certain fire risks. This requires the plan to be treated as a special funding situation in accordance with GASB 68. The State Auditor makes annual payments from the General Fund to the VFCA fund. Rates are specified by state law for contributions to the VFCA plan. The State legislature has the authority to establish and amend contribution rates to the plan.

Actuarial Assumptions

The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. There were several significant assumptions and other inputs used to measure the total pension liability. The actuarial assumptions used in the June 30, 2015, valuation were based on the results of the last actuarial experience study, dated May 2010 for the six-year period of July 1, 2003, to June 30, 2009. Among those assumptions were the following:

- Investment Return 7.75%
- Inflation at 3.00%
- Mortality assumptions among contributing members, terminated vested members, service retired members and beneficiaries are based on RP 2000 Combined Employee and Annuitant Mortality Tables projected to 2015 with scale AA.
- Mortality assumptions among Disabled Retirees are based on RP 2000 Combined Employee and Annuitant Mortality Tables with no projections. No future mortality improvement is assumed.

For VFCA the average dollar amount of recurring expense over the last three years was \$61,000, adjusted for the inflation assumption. This dollar amount is added to normal cost for valuation purposes.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from the nonemployer contributing entity will be made based on the PERB’s funding policy, which establishes the contractually required rates under MCA. The State contributes 5% of fire insurance premium taxes paid on certain fire risks. Based on those assumptions, the VFCA’s fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2123. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. No municipal bond rate was incorporated in the discount rate.

Target Allocations

The long-term expected return on pension plan assets is reviewed as part of the regular experience studies prepared for the VFCA. The most recent analysis, performed for the period covering fiscal years 2003 through 2009, is outlined in a report dated May 2010, which is located on the MPERA website. Several factors are considered in evaluating the long-term rate of return assumption. These factors include rates of return adopted by similar public sector systems, as well as the utilization of a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates are presented as the arithmetic real rates of return for each major asset class included in the VFCA’s target asset allocation as of June 30, 2015, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Cash Equivalents	2.00%	-0.25%
Domestic Equity	36.00%	4.55%
Foreign Equity	18.00%	6.10%
Fixed Income	24.00%	1.25%
Private Equity	12.00%	8.00%
Real Estate	8.00%	4.25%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the above table presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
State as a Nonemployer entity Net Pension Liability	\$14,777	\$10,504	\$6,865

Net Pension Liability

In accordance with GASB 68, employers and nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the VFCA. GASB 68 became effective June 30, 2015, and includes requirements to record and report proportionate shares of the collective net pension liability, pension expense, deferred inflows of resources, and deferred outflows of resources associated with pensions.

In accordance with GASB 68, the VFCA has a special funding situation in which the State is legally responsible for making contributions directly to the VFCA on behalf of volunteer employers. Due to the existence of this special funding situation, the State is required to report a proportionate share of a volunteer fire company’s collective net pension liability that is associated with the non-State volunteer employer.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/14	Net Pension Liability as of 6/30/15	Percent of Collective NPL
State as a Nonemployer Proportionate Share	\$5,089	\$10,504	100%

At June 30, 2016, the State reported a liability of \$10.5 million for its proportionate share of the net pension liability. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2014, with update procedures used to roll forward the total pension liability to June 30, 2015. The nonemployer's proportion of the net pension liability was based on the nonemployer's contributions received by the VFCA during the measurement period, July 1, 2014, through June 30, 2015, relative to total contributions received. At June 30, 2015, the State's proportion as a nonemployer contributing entity in a special funding situation was 100%.

Changes in actuarial assumptions and methods: There were no changes in assumptions or other inputs that affected the measurement of the total pension liability.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension liability and the nonemployer's reporting date that are expected to have a significant effect on the nonemployer's proportionate share of the collective net pension liability.

Grant Expense Related to Special Funding

The State as a nonemployer contributing entity recognized grant expense of \$6.3 million for special funding support provided by a portion of fire tax premiums paid to the State and transferred to MPERA for its proportionate share of the VFCA pension expense that is associated with other employer participants in the plan.

Deferred Outflows and Inflows

At June 30, 2016, the State as a nonemployer contributing entity recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$1.9 million.

As of the fiscal year ended June 30, 2016, the State as a nonemployer contributing entity reported its proportionate share of deferred outflows of resources and deferred inflows of resources related to VFCA from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	-	\$309
Earnings on pension plan investments	-	693
Contributions paid to VFCA subsequent to the measurement date - FY 2016 Contributions	\$2,024	-
Totals	<u>\$2,024</u>	<u>\$1,002</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the State's contributions made subsequent to the June 30, 2015, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in grant expense as follows:

Year ended June 30:	<i>(in thousands)</i> Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense

Teachers' Retirement System – The TRS is administered by the Teachers' Retirement Board (TRB), which is the governing body of a mandatory multiple-employer cost-sharing defined benefit pension plan that provides retirement services to persons in Montana employed as teachers or professional staff of any public elementary or secondary school, community college, or unit of the university system. The TRS as an employer does not participate in the plan and acts only as the administrator of the plan.

The TRB is the governing body of the TRS and the TRS's staff administer the TRS in conformity with the laws set forth in Title 19, chapter 20, MCA, and administrative rules set forth in Title 2, chapter 44 of the Administrative Rules of Montana.

Summary of Benefits

Through June 30, 2013, all members enrolled in TRS participated in a single-tiered plan ("Tier One"). Employees with a minimum of 25 years of service or who have reached age 60 with 5 years of service are eligible to receive an annual retirement benefit equal to creditable service years divided by 60 times the average final compensation. Final compensation is the average of the highest three consecutive years of earned compensation. Benefits fully vest after 5 years of creditable service. Vested employees may retire at or after age 50 and receive reduced retirement benefits. Benefits are established by state law and can only be amended by the Legislature.

Beginning July 1, 2013, new members in TRS participate in a second benefit tier ("Tier Two"), which differs from Tier One as follows:

- Tier Two uses a 5-year average final compensation (as opposed to 3-year AFC in Tier One)
- Tier Two provides for unreduced service retirement benefits at age 60 with 5 years of creditable service or at age 55 with at least 30 years of creditable service (rather than at age 60 with 5 years of service or at any age with creditable service in 25 years in Tier One)
- Tier Two provides for early retirement benefits with 5 years of creditable service at age 55 (rather than age 50 in Tier One)
- Tier Two has a one percent higher normal employee contribution rate (though a temporary 1% supplemental employee contribution rate is also now currently in place for Tier One members), and
- Tier Two provides for an enhanced benefit calculation— $1.85\% \times \text{AFC} \times \text{years of creditable service}$ —for members retiring with at least 30 years of creditable service and at least 60 years of age (rather than $1.6667 \times \text{AFC} \times \text{years of creditable service}$)

A guaranteed annual benefit adjustment (GABA) is payable on January 1st of each calendar year for each retiree who has received at least 36 monthly retirement benefit payments prior to that date. The GABA is applicable to both Tier One and Tier Two members. The GABA for Tier 1 members is 1.5% of the benefit payable as of January 1. For Tier Two members the GABA each year may vary from 0.5% to 1.5% based on the retirement system's funding status and the period required to amortize any unfunded accrued actuarial liability as determined in the prior actuarial valuation. The legislative enactment that allows for reduction of the GABA for Tier One members was in litigation and has since been settled.

Contributions to the System

All active employees in the TRS, regardless of employer type, are required to provide a contribution equal to 8.15% of their compensation.

All State and University employers are required to contribute 11.05% of compensation provided to an active, nonreemployed member. All school district and other employers are required to contribute 8.67% of an active, nonreemployed, member's compensation to the System.

Section 19-20-605, MCA, requires each employer to contribute 9.85% of total compensation paid to all reemployed TRS retirees employed in a TRS reportable position. Pursuant to Section 19-20-609, MCA, this amount shall increase by 1.00% for fiscal year 2014 and increase by 0.10% each fiscal year through 2024 until the total employer contribution is equal to 11.85% of reemployed retiree compensation.

The TRS receives a portion of the total required statutory contributions directly from the State for all employers. The employers are considered to be in a special funding situation and the State is treated as a nonemployer contributing entity in the TRS. The System receives 0.11% of reportable compensation from the General Fund for all TRS members. The TRS also receives 2.38% of reportable compensation from the General Fund for school districts and other employers. Finally, the State is also required to contribute \$25 million in perpetuity payable July 1st of each year. The Legislature has the authority to establish and amend contribution rates to the plan.

Actuarial Assumptions

The total pension liability as of June 30, 2015, is based on the results of an actuarial valuation date of July 1, 2015. There were several significant assumptions and other inputs used to measure the total pension liability. The actuarial assumptions used in the July 1, 2015, valuation were based on the results of the last actuarial experience study, dated May 1, 2014. Among those assumptions were the following:

- Total wage increases (includes 4% general wage increase assumption) 4.00%-8.51% for non-university members
5.00% for university members
- Price Inflation 3.25%
- Investment Return 7.75%
- Postretirement Benefit Increases (starting three years after retirement)
 - Tier One members: If the retiree has received benefits for at least three years, the retirement allowance will be increased by 1.5% on January 1st.
 - Tier Two members: The retirement allowance will be increased by an amount equal to or greater than .5% but no more than 1.5% if the most recent actuarial valuation shows the TRS to be at least 90% funded and the provisions of the increase is not projected to cause the funded ratio to be less than 85%.
- Mortality among contributing members, service retired members, and beneficiaries
 - For Males: 1992 base rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 base rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back four years, with mortality improvements projected by Scale BB to 2018.
 - For Females: 1992 base rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and base rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back two years, with mortality improvements projected by Scale BB to 2018.
- Mortality among disabled members
 - For Males: RP 2000 Disabled Mortality Table for Males, set forward one year, with mortality improvements projected by Scale BB to 2018.
 - For Females: RP 2000 Disabled Mortality Table for Females, set forward five years, with mortality improvements projected by Scale BB to 2018.

Discount Rate

The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that contributions from participating TRS members, employers, and nonemployer contributing entities will be made based on the TRB's funding policy, which establishes the contractually required rates under MCA. In addition to these contributions, the State General Fund will contribute \$25 million annually to the TRS payable July 1st of each year. Based on those assumptions, the TRS's fiduciary net position was projected to be adequate to make all the projected future benefit payments of current plan members through the year 2119. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. No municipal bond rate was incorporated in the discount rate.

Target Allocations

The assumed long-term expected return on pension plan assets is reviewed as part of the regular experience studies prepared for the TRS. The most recent analysis, performed for the period covering fiscal years 2008 through 2013, is outlined in a report dated May 1, 2014. Several factors are considered in evaluating the long-term rate of return assumption including long-term historical data, estimates inherent in current market data, and a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected return, net of investment expense and inflation) were developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The capital market assumptions developed by the investment consultant are intended for use over a 10-year horizon and may not be useful in setting the long-term rate of return for funding pension plans which covers a longer timeframe. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years. Best estimates of arithmetic real rates of return for each major asset class included in the TRS’s target asset allocation as of June 30, 2015, is summarized in the table below:

Asset Class	Target Asset Allocation	Long-Term Expected Real Rate of Return
Broad US Equity	36.00%	4.80%
Broad International Equity	18.00%	6.05%
Private Equity	12.00%	8.50%
Intermediate Bonds	23.40%	1.50%
Core Real Estate	4.00%	4.50%
High Yield Bonds	2.60%	3.25%
Non-Core Real Estate	4.00%	7.50%

Sensitivity Analysis

In accordance with GASB 68 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the table below presents the net pension liability calculated using the discount rate of 7.75%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1.00% lower (6.75%) or 1.00% higher (8.75%) than the current rate.

	<i>(in thousands)</i>		
	1.0% Decrease (6.75%)	Current Discount Rate	1.0% Increase (8.75%)
State as an Employer in TRS - Net Pension Liability	\$77,256	\$56,230	\$38,538
State as a Nonemployer Contributing Entity to TRS - Net Pension Liability	889,052	647,092	443,496

Net Pension Liability

In accordance with GASB 68, employers and nonemployer contributing entities are required to recognize and report certain amounts associated with their participation in the TRS. GASB 68 became effective June 30, 2015, and includes requirements for participants to record and report their proportionate share of the collective net pension liability, pension expense, deferred inflows of resources, and deferred outflows of resources associated with pensions. In accordance with GASB 68, the TRS has a special funding situation in which the State is legally responsible for making contributions directly to TRS that are used to provide pension benefits to the retired members of the TRS. Due to the existence of this special funding situation, the State is required to report a proportionate share of a local government or school district’s collective net pension liability that is associated with the non-State employer.

	<i>(dollars presented in thousands)</i>		
	Net Pension Liability as of 6/30/14	Net Pension Liability as of 6/30/15	Percent of Collective NPL
State's as an Employer Entity	\$ 72,168	\$ 56,230	3.422388%
State's as a Nonemployer Entity	596,724	647,092	39.384625%
State of Montana Totals	\$668,892	703,322	42.807013%

At June 30, 2016, the State reported a liability of \$703.3 million for its proportionate share of the net pension liability as an employer and nonemployer contributing entity. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of July 1, 2015. The employer's proportion of the net pension liability was based on the State's contributions received by the TRS during the measurement period, July 1, 2014, through June 30, 2015, relative to the all contributions received from the TRS's participating employers and the nonemployer contributing entity. At June 30, 2015, the State as an employer had a proportionate share of 3.422388% and as a nonemployer contributing entity a proportionate share of 39.384625%.

Changes in actuarial assumptions and methods: The following changes in assumptions or other inputs that affected the measurement of the total pension liability have been made since the previous measurement date.

- Correctly reflect the proportion of members that are assumed to take a refund of contributions upon termination and appropriately reflect the three-year COLA deferral period for Tier Two members.
- The 0.63% load applied to the projected retirement benefits of the university members "to account for larger than average annual compensation increases observed in the years immediately preceding retirement" is not applied to benefits expected to be paid to university members on account of death, disability and termination (prior to retirement eligibility).
- The actuarial valuation was updated to reflect the assumed rate of retirement for university members at age 60 is 8.50% as stated in the actuarial valuation report.
- The actuarial valuation was updated to reflect the fact that vested terminations are only covered by the \$500 death benefit for the one year following their termination and, once again when the terminated member commences their deferred retirement annuity (they are not covered during the deferral period). Additionally, only the portion of the terminated members that are assumed to "retain membership in the TRS" are covered by the \$500 death benefit after termination.

Changes in benefit terms: There have been no changes in benefit terms since the previous measurement date.

Changes in proportionate share: There were no changes between the measurement date of the collective net pension liability and the employer's reporting date that are expected to have a significant effect on the employer's proportionate share of the collective net pension liability.

Employer Pension Expense and Nonemployer Contributing Entity Special Funding Grant Expense

At June 30, 2016, the State as an employer recognized a pension expense of \$7.7 million for its proportionate share of the collective TRS pension expense. The State as a nonemployer contributing entity also recognized grant expense of \$30.0 million for special funding support provided by the State's General Fund for its proportionate share of the collective TRS pension expense that is associated with other employer participants in the TRS. Total pension expense for fiscal year 2016 was \$37.7 million.

Deferred Outflows and Inflows

At June 30, 2016, the State as an employer recognized a beginning deferred outflow of resources for fiscal year 2015 contributions of \$16.2 million.

As of the fiscal year ended June 30, 2016, the State as an employer reported its proportionate share of deferred outflows of resources and deferred inflows of resources related to the TRS from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 593	-
Difference between projected and actual earnings on pension plan investments	-	\$3,019
Changes in proportionate share	796	119
Difference between actual and expected	11,322	696

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
contributions and changes in proportion		
Contributions paid to TRS subsequent to the measurement date - FY 2016 Contributions	16,946	-
Totals	<u>\$29,657</u>	<u>\$3,834</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the employer’s contributions made subsequent to the June 30, 2015, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred outflows of resources and inflows of resources related to pensions will be recognized in pension expense as follows:

	<i>(in thousands)</i>	
Year ended June 30:	Amount recognized in Pension Expense as an increase or (decrease) to Pension Expense	
2017	\$3,778	
2018	3,777	
2019	547	
2020	775	
2021	-	
Thereafter	-	

At June 30, 2016, the State as a nonemployer contributing entity recognized a beginning deferred outflow of resources as a for fiscal year 2015 contributions of \$42.8 million.

As of the fiscal year ended June 30, 2016, the State as a nonemployer contributing entity reported its proportionate share of deferred outflows of resources and deferred inflows of resources from the following sources:

	<i>(in thousands)</i>	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 6,824	\$ -
Changes of assumptions	9,157	1,367
Difference between projected and actual earnings on pension plan investments	-	34,748
Changes in proportionate shares	4,384	24,206
Contributions paid to TRS subsequent to the measurement date - FY 2016 Contributions	42,400	-
Totals	<u>\$62,765</u>	<u>\$60,321</u>

Amounts reported as deferred outflows of resources related to pensions resulting from the nonemployer’s contributions subsequent to the June 30, 2015, measurement date will be recognized as a reduction of the net pension liability in the fiscal year ended June 30, 2017.

Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in grant expense as follows:

	<i>(in thousands)</i>	
Year ended June 30:	Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense	
2017	\$(15,598)	
2018	(15,596)	
2019	(17,676)	
2020	8,914	

Year ended June 30:	(in thousands) Amount recognized in Grant Expense as an increase or (decrease) to Grant Expense
2021	-
Thereafter	-

D. Legal Actuarial Status of Plans

The Montana Constitution, Article VIII, Section 15, states that public retirement systems shall be funded on an actuarially sound basis. To maintain a fund on an actuarially sound basis, the rate of contributions should fund the normal cost, in addition to amortizing the unfunded liability over a period not to exceed 30 years.

The statutory funding rate is tested in the valuation of each public retirement plan to determine if it is sufficient to cover the normal cost rate plus an amortization payment of the unfunded actuarial liability, if any, over no more than 30 years. As of June 30, 2016, the Sheriffs' Retirement System (SRS) and Game Warden & Peace Officers' Retirement System (GWPORS) were not in compliance and do not amortize.

E. Public Employee Defined Contribution Retirement Plans

Public Employees' Retirement System-Defined Contribution Retirement Plan – The Public Employees' Retirement System - Defined Contribution Retirement Plan (PERS-DCRP) is a multiple Employer plan established July 1, 2002, and governed by Title 19, Chapters 2 & 3, MCA. This plan is available to eligible employees of the State, Montana University System, local governments, and school districts. All new PERS members are initially members of the PERS-DBRP and have a 12-month window during which they may choose to transfer to the PERS-DCRP, or remain in the PERS-DBRP, by filing an irrevocable election. If an election is not filed, the member remains in the PERS-DBRP. Members may not be members of both the defined contribution and defined benefit retirement plans. The PERS-DBRC provides retirement, disability and death benefits to plan members and their beneficiaries.

Member and Employer contribution rates are established by state law and may be amended only by the Legislature. Employees contribute at a rate of 7.90% of their compensation. Contributions made to the plan by an employee remain 100% vested in their interest. Members who achieve 5 years of employment are vested in the plan. Should they terminate prior to this 5 year period, all employer contributions are forfeited to the plan. Amounts forfeited are held in a separate plan forfeiture account and can only be used to pay the administrative expenses, including startup costs, of the plan. Total pension expense for the State as a PERS-DCRP employer for the year ended June 30, 2016, is \$3.7 million and contribution forfeitures were \$219.8 thousand.

Local government entities contribute 8.27% of member compensation. School district employers contributed 7.90% of member compensation. The State contributes 0.1% of member compensation on behalf of local government entities and 0.37% of member compensation on behalf of school district entities. Each State agency and University employer contributed 8.37% of member compensation.

The total contribution rate of 8.37%, referenced in the preceding paragraph, is allocated as follows: 4.19% to the member's retirement account; 3.84% to the member's retirement account after the plan choice rate unfunded actuarial liability was paid in March 2016; 0.04% to the defined contribution education fund; and 0.30% to the defined contribution Other Post Employment Benefit (OPEB) disability plan.

The PERS-DCRP also administers an OPEB disability plan. See Note 7 for additional information related to this portion of the plan.

457-Deferred Compensation Plan – The 457-Deferred Compensation Plan (457-Plan) is a voluntary supplemental retirement savings plan established in 1974. The Deferred Compensation Plan is governed by Title 19, Chapter 50, MCA, in accordance with Internal Revenue Code (IRC) Section 457. This plan is available to all employees of the State, Montana University System, and contracting political subdivisions. The State and 43 non-state entity employers participate in the 457-Plan.

Assets of the Deferred Compensation Plan are required to be held in trusts, custodial accounts or insurance company contracts for the exclusive benefit of participants and their beneficiaries. Empower Retirement™ is the record keeper for the plan. Participants elect to defer a portion of their salary, within IRC limits. The deferred salary is not available to employees until separation from service, retirement, death, or upon an unforeseeable emergency while still employed, provided IRS-specified criteria are met.

F. Montana University System Retirement Program

Montana University System-Retirement Program (MUS-RP) – This system was established in January 1988 and is underwritten by the Teachers Insurance and Annuity Association-College Retirement Equities Fund (TIAA-CREF). Effective July 1, 1993, MUS-RP was made the mandatory retirement plan for new faculty and administrative staff with contracts under the authority of the Board of Regents, previously referred to as the Optional Retirement Program (ORP). The MUS-RP is a defined contribution retirement plan governed by Title 19, Chapter 21 of the MCA. Combined contributions to the faculty and professional staff plan cannot exceed 13% of the participant’s compensation per 19-21-203, MCA. Combined contributions to the classified staff plan are 16.37% per 19-3-316, MCA.

The benefits at retirement depend upon the amount of contributions, amount of investment gains and losses, and the employee life expectancy at retirement. Under the MUS-RP, each employee enters into an individual contract with TIAA-CREF. Individuals are immediately vested with all contributions. The Montana University System records employee/employer contributions, and remits monies to TIAA-CREF. Total contributions made to the plan by the employer were \$14.9 million and the total employee contributions were \$17.8 million for the fiscal year ended June 30, 2016.

G. Method Used to Value Investments

The Montana Board of Investments (BOI) manages the investments, as authorized by state law, for the defined benefit retirement plans in investment pools. Each plan owns an equity position in the pools and receives proportionate investment income from the pool in accordance with respective ownership. Investments are reported at fair value. Mortgages are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. The fair value of real estate investments is based on appraised value. Investments that do not have an established market are reported at estimated fair value. These values are based on market prices supplied to the BOI by its custodial bank, State Street Bank, and various brokerage services. Further detail related to investments is provided in Note 3.

H. Long-term Contracts for Contributions

The Montana Legislature enacted a provision of the Employee Protection Act (EPA) (Title 19, Chapter 2, Part 706, MCA) allowing state and university system employees who are eligible for a service retirement and whose positions have been eliminated to have their Employer pay a portion of the total cost of purchasing up to three years of “1-for-5” additional service. In fiscal year 2016, there were 242 employees participating in the program.

The Employer has up to ten years to complete payment for the service purchases and is charged the actuarially required rate of return as established by the Montana Public Employee Retirement Administration (MPERA) on the unpaid balance. Total contributions received (including interest) during fiscal year 2016 totaled \$239.3 thousand. The outstanding balance at June 30, 2016, totaled \$29.7 thousand.

I. Litigation

Wrzesien v. State. Three members of PERS who elected to participate in either the PERS Defined Contribution Retirement Plan or the University System’s Montana University System Retirement Program (MUS-RP) (formally known as the Optional Retirement Program) have sued the State of Montana and MPERA over the PERS plan choice rate. The complaint alleges equal protection and due process violations, and requests issuance of a declaratory judgment granting plaintiffs the employer contributions paid toward the plan choice rate. Class action certification is also requested. The plaintiffs are represented by Travis Dye of Kalkstein, Johnson & Dye in

Missoula, Montana. The State and MPERA are represented by J. Stuart Segrest of the Montana Attorney General's Office. The complaint was subsequently amended to include the 1% in employer contributions for DCRP plan members that, pursuant to HB 454 (2013), go to the PERS defined benefit retirement plan starting July 1, 2013. A hearing on the cross motions for summary judgment was held before Judge Reynolds on October 7, 2014. A decision was made in favor of the State granting the motion on November 13, 2014.

The Plaintiffs appealed to the State Supreme Court and on September 28, 2016, the Court upheld the constitutionality of the plan choice rate. Therefore, neither the State nor MPERA will incur a liability.

Tadman, et al. v. State. A retired member of the Sheriffs' Retirement System filed a class action against the State of Montana on October 6, 2015, alleging the inappropriate payment of state and federal income tax on certain line-of-duty disability benefits. Plaintiff is represented by Lawrence A. Anderson, an attorney located in Great Falls, Montana. The State was served with the complaint on November 25, 2015, and will be represented by Eric Biehl and Hanna Warhank from Church, Harris, Johnson, & Williams PC, in Great Falls, Montana and the PERB's legal counsel. The State's response to the complaint was filed on January 25, 2016. As of the date of the printing of this report, no further action other than discovery has taken place in this matter.

NOTE 7. OTHER POSTEMPLOYMENT BENEFITS (OPEB)

A. General

The State of Montana and the Montana University System (MUS) provide optional postemployment healthcare benefits in accordance with Section 2-18-704, MCA to the following employees and dependents who elect to continue coverage and pay administratively established contributions: (1) employees and dependents who retire under applicable retirement provisions, and (2) surviving dependents of deceased employees. Medical, dental, and vision benefits are available through this plan. Retirement eligibility criteria differ by retirement plan. Further detail on Retirement Plans is provided in Note 6.

In accordance with Section 2-18-704, MCA, the MUS provides post-retirement health insurance benefits to employees who are eligible, to receive retirement benefits from the Teachers Retirement System (TRS), the Public Employees' Retirement System (PERS), or an annuity under the Optional Retirement Plan, and have been employed by MUS for at least five years, are age 50, or have worked 25 years with MUS. Spouses, unmarried dependent children, and surviving spouses are also eligible.

Section 19-3-2141, MCA, establishes a long-term disability plan trust fund (PERS-DCRP Disability) for all State of Montana Employees that participate in the Public Employee Retirement System-Defined Contribution Retirement Plan (PERS-DCRP). All new PERS members are initially members of the Public Employee Retirement System-Defined Benefit Retirement Plan (PERS-DBRP) and have a 12-month window during which they may choose to transfer to the PERS-DCRP or remain in the PERS-DBRP by filing an irrevocable election. If an election is not filed, the member remains in the PERS-DBRP. Members may not be members of both the defined contribution and defined benefit retirement plans. Only those participants that choose the PERS-DCRP are covered by the PERS-DCRP Disability plan.

Montana State Fund, a discretely presented component of the State, by statute, prepares separately issued financial statements on a calendar year-end basis. Due to the difference in reporting period, there will be a variance between the note disclosures and the financial statements for the OPEB implicit rate subsidy.

B. Plan Descriptions

Both healthcare OPEB plans for the State of Montana and MUS are agent multiple employer plans. In addition to the primary government, the participating employers under the State Plan are Facility Finance Authority, Montana Board of Housing, Public Employees' Retirement System, Montana State Fund, and Teachers' Retirement System. The participating employers under the MUS plan are Dawson Community College (Dawson CC), Flathead Valley Community College (Flathead CC), Miles Community College (Miles CC), Office of Commissioner on Higher Education (OCHE), Montana State University – Billings (MSU-Billings), Montana State University – Bozeman (MSU-Bozeman), Great Falls College MSU, Montana State University – Northern (MSU-Northern), University of Montana – Montana Tech (UM-MT Tech), Helena College UM, University of Montana – Missoula (UM-Missoula), and University of Montana – Western (UM-Western). Each participating employer is required by GASB Statement No. 43, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans (GASB 43) to disclose additional information regarding funding policy, the employer's annual OPEB cost and contributions made, the funded status and funding progress of the employer's individual plan, and actuarial methods and assumptions used.

The healthcare OPEB plans allow retirees to participate, as a group, at a rate that does not cover all of the related costs. This results in the reporting of an "implied rate" subsidy in the related financial statements and note disclosures. While this liability is disclosed for financial statement purposes, it does not represent a legal liability of the State or any of its component units. Accordingly, reported contributions are not a result of direct funding to the plans or for associated liabilities, but are a measure of the difference in retiree payments into the plans and actual medical costs associated with those individuals paid for by the plans.

The healthcare OPEB plans are reported as agency funds. There are no assets or liabilities as only contributions collected and distributions made are reflected in these funds.

The PERS-DCRP Disability is a multiple-employer cost sharing plan that covers employees of the State, local governments, and certain employees of the university system and school districts, who are not covered by a separate retirement system governed by Title 19, MCA. The PERS-DCRP Disability plan provides disability benefits to PERS-DCRP plan members who are vested in the plan and are currently ineligible for retirement.

A separate trust has been established for purposes of providing disability benefits to PERS-DCRP Disability plan members and it is accounted for as a fiduciary fund. The assets are held in a trust capacity for the beneficiaries. The Public Employee Retirement System issues publicly available annual reports which include financial statements and required supplemental information for the plan. Those reports may be obtained online (<http://mpera.mt.gov>) or by contacting the following:

Public Employees’ Retirement Board
 100 North Park, Suite 200
 P.O. Box 200131
 Helena, MT 59620-0131

Further details on the funding policies are provided in section D. of this note.

C. Basis of Accounting

OPEB liability is reported on an accrual basis on the proprietary and fiduciary fund financial statements, the government-wide financial statements and the component unit financial statements. OPEB is not reported on the governmental fund financial statements, as OPEB liability is considered a long-term liability. Plan member contributions are recognized in the period in which the contributions are made. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan.

The healthcare OPEB plan document states “an employee enrolled in the State Plan who (a) at least meets the early retirement criteria defined by Montana Public Employees’ Retirement Administration (MPERA); and (b) makes arrangements with the Health Care and Benefits Division (HCBD) within 60 days of the date active employee coverage ends to continue post-retirement coverage, may continue with the State Plan on a self-pay basis, retroactive back to the date active employee coverage was lost.” Therefore, the plan does not include terminated employees who have accumulated benefits but are not yet receiving them. There have been no significant changes in the number covered or the type of coverage as of June 30, 2016.

The number of State Plan participants as of December 31, 2015, follows:

Enrollment	State	Facility Finance Authority	Montana Board of Housing	Public Employee Retirement Board	Montana State Fund	Teachers Retirement System	Total
Active employees	12,241	1	17	45	269	19	12,592
Retired employees, spouses, and surviving spouses (1)	3,983	-	2	3	28	2	4,018
Total	16,224	1	19	48	297	21	16,610

(1) Due to the inability to determine, without considerable effort, the last place an employee worked before retiring, the bulk of retirees are listed as State regardless of their last place of employment. Since we are unable to account for all retired employees last place of employment cumulatively, an allocation method was used based on the accrued liability and ARC for active employees by entity for the determination of the inactive liability by entity.

The number of MUS Plan participants as of June 30, 2016, follows:

MUS Plan Participants											
Enrollment	MSU-Billings	MSU-Bozeman	GFC-MSU	MSU-Northern	OCHE	HC-UM	UM-Msla	UM-MT Tech	UM-Western	Other	Total
Active employees	427	2,392	113	165	76	87	2,091	373	173	324	6,221
Retired employees, spouses, and surviving spouses	168	699	12	52	29	23	649	129	86	79	1,926
Total	595	3,091	125	217	105	110	2,740	502	259	403	8,147

PERS-DCRP participants who are 100% vested in the plan, and become disabled, are entitled benefits as defined in Section 19-3-2141, MCA. There have been no significant changes in the number of participants or the type of coverage as of June 30, 2016.

The number of PERS-DCRP Disability Plan participants as of June 30, 2016, follows:

PERS-DCRP Disability Plan Participants						
Enrollment	Active	Disabled	Retirees and Beneficiaries	Terminated Vested Members	Terminated Non-Vested Members	Total
Participant counts used for valuation	2,409	7	-	-	-	2,416

D. Funding Policies

The State of Montana and MUS pay for postemployment healthcare benefits on a pay-as-you-go basis. Section 2-18-8, MCA gives authority for establishing and amending the funding policy to the Department of Administration for the State group health insurance plan. Section 20-25-13, MCA gives authority for establishing and amending the funding policy to the Board of Regents for the MUS group health insurance plan.

As of June 2016, the State Plan’s administratively established retiree medical contributions vary between \$416 and \$1,506 per month depending on the medical plan selected, family coverage, and Medicare eligibility. Administratively established dental contributions vary between \$41.10 and \$70 and vision hardware contributions vary between \$7.64 and \$22.26 depending on the coverage selected.

As of June 2016, the MUS plan’s administratively established retiree medical premiums vary between \$225 and \$1,885 per month. Retiree dental premiums vary between \$52 and \$156 per month while vision premiums vary from \$7.48 to \$21.80 depending on the types and number of dependents enrolled. The plan provides different coinsurance amounts and deductibles depending on whether members use in-network or out-of-network providers. The plan automatically reduces claim reimbursement for members eligible for Medicare, even if the member is not enrolled in Medicare. As of June 30, 2016, 1,763 retirees (policyholders) were enrolled in the MUS plan.

The PERS-DCRP Disability plan is funded through a portion of the statutorily required employer contributions in Section 19-3-2117, MCA. An amount equal to 0.3% of a PERS-DCRP members’ compensation is contributed to this trust fund by each participating employer.

E. Annual Other Postemployment Benefit Cost and Contributions

The annual required contribution (ARC), an actuarially determined rate in accordance with the parameters of GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions (GASB 45) represents a level of funding that, if paid on an ongoing basis, is projected to cover the normal cost each year and amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The current

State’s ARC of \$34.0 million is 5.26% of annual covered payroll. The State’s annual covered payroll is \$645.9 million. The current MUS’s ARC of \$9.7 million is 2.33% of annual covered payroll. The MUS’s annual covered payroll is \$416.6 million.

There are no long-term contracts for contributions to either plan. Contributions refer to payments made in relation to the ARC. Since the State and MUS do not fund their plans, contributions disclosed as being made herein are an implicit rate subsidy provided through the difference of retiree payments provided to the healthcare plan and claims paid by the plan on a retiree’s behalf.

The following table presents the OPEB cost for the year, the amount contributed, and changes in the OPEB plan for fiscal year 2016 (in thousands):

Annual OPEB Cost & Changes in Net OPEB Obligation

	State	MUS
Annual required contribution/OPEB cost	\$ 33,960	\$ 9,669
Interest on net OPEB obligation	10,482	4,569
Amortization factor	(8,221)	(3,584)
Annual OPEB cost	36,221	10,654
Retiree claims paid (1)	(8,999)	(3,056)
Increase in net OPEB obligation	27,222	7,598
Net OPEB obligation – beginning of year (1)	245,825	107,498
Net OPEB obligation – end of year	\$273,047	\$115,096

Note that the amounts in the State and MUS Annual OPEB Cost table above include component unit and community college portions and therefore, they will not match the Statement of Net Position.

- (1) A new actuarial valuation of the OPEB Liability was performed as of December 31, 2015. This resulted in the need to perform an adjustment of the amounts for reflection in the accounting records. The State adjusted the current year Retiree Claims Paid amount and the Montana University System adjusted their prior year OPEB balance. As a result, the upper table continues to show the State’s Beginning Net OPEB Obligation historical value, but the new actuarial value is presented below; whereas, the MUS liability, in either table, no longer presents the prior year CAFR amount reported.

The State and MUS annual healthcare OPEB cost, the percentage of annual implicit contributions toward the OPEB cost through retiree claims paid on their behalf, and the net OPEB obligation for fiscal years 2016 through 2013 was as follows (in thousands):

Contribution Ratio

	Fiscal Year Ended	Annual OPEB Cost	Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
State	6/30/2016	\$36,221	24.8%	\$273,047
	6/30/2015	37,205	28.2%	246,643
	6/30/2014	36,823	19.1%	219,109
	6/30/2013	34,544	10.0%	189,327
MUS	6/30/2016	\$10,654	28.7%	\$115,096
	6/30/2015	10,624	31.3%	107,498
	6/30/2014	10,671	15.9%	99,891
	6/30/2013	13,288	6.9%	90,916

The disability OPEB plan administered for defined contribution pension plan participants has an annual covered payroll, statutorily required contribution amount, and percentage of required contributions paid into the plan for fiscal years 2016 through 2013 as follows for the State and University system plan participants (in thousands):

	Fiscal Year Ended	Covered Payroll	Statutorily Required Contribution Amount	Percentage of Statutorily Required Contribution Funded
State	6/30/2016	\$66,224	\$199	100%
	6/30/2015	55,339	166	100%
	6/30/2014	50,083	150	100%
	6/30/2013	46,540	140	100%
MUS	6/30/2016	\$4,612	\$14	100%
	6/30/2015	4,057	12	100%
	6/30/2014	4,115	12	100%
	6/30/2013	3,901	12	100%

F. Actuarial Methods and Assumptions

As of January 1, 2015, the State's actuarially accrued liability (AAL) for benefits was \$347.9 million, with no actuarial value of assets, resulting in an unfunded actuarial accrued liability (UAAL) of \$347.9 million, and the ratio of the UAAL to the covered payroll was 53.87%. The UAAL is being amortized as a level dollar amount over an open basis for 30 years.

In the December 31, 2015, actuarial valuation, the projected unit cost funding method was used for the State. The actuarial assumptions included a 4.25% discount rate and a 2.50% payroll growth rate. The projected annual healthcare cost trend rate is initially 3.4% for medical and 10.8% prescription drugs. The decrease to the medical costs trend rate in plan year 2015 is based on actual trend data instead of estimated trend rates. The medical rate increases to an actuarially determined 9.5% in 2016. Both medical costs and prescription drugs are reduced by decrements to a rate of 5.0%, medical costs after eleven years and prescription drugs after six years.

As of July 1, 2015, the MUS actuarially accrued liability (AAL) for benefits was \$110.5 million, with no actuarial value of assets, resulting in an unfunded actuarial accrued liability (UAAL) of \$110.5 million, and the ratio of the UAAL to the covered payroll was 26.5%. The UAAL is being amortized as a level dollar amount over an open basis for 30 years.

In the June 30, 2016, actuarial valuation, the projected unit cost funding method was used for MUS. The actuarial assumptions included a 4.25% discount rate and a 2.50% payroll growth rate. The projected annual healthcare cost trend rate is 20.6% for both medical and prescription drugs, initially. The increase to medical and prescriptions drug cost trend rates in plan year 2015 is based on groups cumulative rate increase instead of estimate trend rates. Both medical costs and prescriptions drugs are reduced by decrements to a rate of 4.5% after eight years.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Actuarially determined amounts are subject to continual revisions being actual results are compared with past expectations and new estimates are made about the future. Actuarial calculations reflect a long-term perspective. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, is designed to present multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial liabilities for benefits.

Projections of benefits for financial reporting progress are based on the substantive plan (*the plan as understood by the employer and the plan members*). This includes the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point.

The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations on the pattern of cost sharing between the employer and plan members in the future.

Additional information as of the latest actuarial valuation for the State Plan follows:

Other Postemployment Benefits State Agent Multiple-Employer Plan		
	Retiree/Surviving Spouse	Spouse
Contributions (in thousands)		
Before Medicare eligibility	\$11,172	\$4,267
After Medicare eligibility	4,454	3,545
Actuarial valuation date	1/1/2015 (ARC calculated through December 31, 2015)	
Actuarial cost method	Projected unit cost funding	
Amortization method	Level percent of payroll, open	
Remaining amortization period	30 years	
Asset valuation method	Not applicable since no assets meet the definition of plan assets under GASB 43 or GASB 45

Future retirees	50.00%
Future eligible spouses	60.00%
Marital status at retirement	70.00%

G. Termination Benefits

During the year ended June 30, 2016, the State made the following termination benefit arrangements: continued coverage of group health insurance benefits for six employees provided for up to twelve months, one-time lump-sum incentive payments for fifteen employees, and paid administrative leave for two employees. In determining the termination benefit liability related to the continued coverage of group health insurance benefits, it was assumed that these benefits would be paid for the entire period of the arrangement.

During the year ended June 30, 2016, component units of the State made the following termination benefit arrangements: continued coverage of health insurance benefits and/or one-time incentive payments for eighteen employees.

During the year ended June 30, 2016, the cost of termination benefits for the fiscal year was \$665.0 thousand and \$508.9 thousand for the State and its component units, respectively.

NOTE 8. RISK MANAGEMENT

There are three primary government public entity risk pools and one claims-servicing pool that are reported within the enterprise fund. These pools include Hail Insurance, the Montana University System (MUS) Group Insurance Plan, the MUS Workers Compensation Program, and the Subsequent Injury claims-servicing pool. The State of Montana (Old Fund) provides risk financing as an entity other than a public entity risk pool. The liability and payment of the workers compensation claims for incidents occurring before July 1, 1990, are reported in the government-wide financial statements within the primary government. Unpaid claims and claim adjustment expenses are estimated based on the ultimate cost of settling the claims including the effects of inflation and other societal/economic factors. Additionally, the primary government reports its own risk management activity within two internal service funds: Employees Group Benefits Plans and Administration Insurance Plans. In all of these funds, there are no significant reductions in insurance coverage from the prior year. These funds use the accrual basis of accounting. By statute, these funds cannot invest in common stock. Investments are recorded at fair value. Premiums and discounts are amortized using the straight-line method over the life of the securities.

A. Public Entity Risk Pools

(1) Hail Insurance – Any Montana producer engaged in growing crops subject to destruction or damage by hail may participate in the Hail Insurance program. The Hail Insurance program issued 1,109 policies during the 2016 growing season. This fund accounts for premium assessments paid by producers for crop acreage insured, investment and interest earnings, administrative costs, and claims paid for hail damage. Depending upon the actuarial soundness of the reserve fund and the damage in a season, producers may receive a premium refund. Anticipated investment income is considered in computing a premium deficiency, of which there is none.

A claim must be submitted to the State Board of Hail Insurance within 14 days of a loss occurrence. The claim must indicate whether the grain is stemming, in the boot, heading out, in the milk, in the stiff dough, ready to bind, or combine. If beans, peas, or other crops are damaged, the growth-stage must also be indicated. Inspection of a crop will occur as promptly as possible after claim receipt. The liability on all insured crops expires after October 1. The insurance only covers loss or damage to growing grain that exceeds 5% destruction by hail.

To reduce its exposure to large losses, the fund purchased Crop Hail Quota Share Reinsurance for the 2016 growing season, with an 85% share of premiums and losses allotted to the Reinsurer and a 15% share of each allotted to the State Hail Insurance. The fund recorded a liability of \$134.5 thousand which is 15% of the estimated claims in the amount of \$813.6 thousand plus adjustment expenses through June 30, 2016. The amount deducted from the estimated claims as of June 30, 2016 for reinsurance was \$691.6 thousand or 85% of estimated claims. The premiums ceded to the reinsurer through June 30, 2016 were \$1.9 million which was 85% of total premiums of \$2.2 million.

Any crop insurance liability is paid to the producers within one year of occurrence; therefore, liabilities are not discounted. The fund has no excess insurance or annuity contracts.

(2) Montana University System (MUS) Group Insurance Plan – This plan is authorized by the Regents and in Section 20-25-13, MCA. The Plan's purpose is to provide medical, dental, prescription drug, and related group benefits coverage to employees of the Montana University System and affiliates, as well as their dependents, retirees, and COBRA members. The MUS Group Benefits Plan is fully self-insured, except for life insurance, long-term care, long-term disability, and accidental death and dismemberment insurance. Delta Dental administers the dental plan, Blue Cross and Blue Shield of Montana administers the vision plan, and MedImpact is the administrator for the prescription drug program. Allegiance Benefit Plan Management, Blue Cross and Blue Shield of Montana, and Pacific Source are the three third-party claims administrators for the self-insured managed care plan. Allegiance Benefit Plan Management, Blue Cross and Blue Shield of Montana, and Pacific Source have contracts for utilization management. The utilization management program consists of hospital pre-authorization and medical necessity review as well as large case management. Premiums are collected from employees through payroll deductions and recorded in the MUS Group Insurance enterprise fund. The claims liability is calculated by Actuaries Northwest and estimated to be \$9.1 million as of June 30, 2016, based on prior year experience. A liability is reported in the accompanying financial statements for these estimated claims.

(3) Montana University System (MUS) Workers' Compensation Program – This plan was formed to provide self-insured workers compensation coverage for employees of the MUS. The MUS Board of Regents provides workers' compensation coverage under Compensation Plan Number One (Section 39-7-2101, MCA). The program is self-insured for workers' compensation claims with losses in excess of \$750.0 thousand per occurrence (\$500.0 thousand for claims occurring prior to July 1, 2013) and \$1.0 million per aircraft occurrence covered by reinsurance with a commercial carrier. Employer's liability claims are covered to a maximum of \$1.0 million above the self-insured amount of \$750.0 thousand (\$500.0 thousand for claims occurring prior to July 1, 2013). During fiscal year 2016, the program ceded \$311.8 thousand in premiums to reinsurers.

Premium rates for all participating campuses are established by the MUS Workers' Compensation Program Committee based on actuarial calculations of premium need and premium rate. Premium rates are adjusted periodically based on inflation, claims experience, and other factors. Premiums are recorded as revenue in the MUS Workers' Compensation Program in the period for which coverage is provided. Members may be subject to supplemental assessments in the event of deficiencies. The program considers anticipated investment income in determining if a premium deficiency exists.

The fund recorded a liability of \$7.8 million for estimated claims at June 30, 2016. The liability is based on the estimated ultimate cost of settling the reported and unreported claims, claims reserve development including the effects of inflation, and other societal and economic factors. Estimated amounts of subrogation and reinsurance recoverable on unpaid claims are deducted from the liability for unpaid claims. Estimated claims liabilities are recomputed periodically based on current review of claims information, experience with similar claims, and other factors. Adjustments to estimated claims liabilities are recorded as an increase or decrease in claims expense in the period the adjustments are made.

(4) Subsequent Injury – The purpose of the Subsequent Injury Fund (SIF) is to assist individuals with a permanent impairment that may create an obstacle to employment by offering a financial incentive to employers to hire SIF-certified individuals. The program is funded through an annual assessment on Montana self-insured employers and a surcharge on premium for private insured and Montana State Fund policyholders.

The assessment and surcharge rates are set by the Employment Relations Division of the Department of Labor and Industry annually. The rates are based on the total amount of paid losses reimbursed by SIF in the preceding calendar year, plus the expenses of administration, less other income earned. Employers covered by Plans 1, 2 and 3 share in the reimbursement of SIF based on the percentage of the compensation and medical benefits paid in Montana by their insurers in the preceding calendar year.

The SIF program reduces the liability of the employer (if self-insured) or insurer by placing a limit of 104 weeks on the amount an employer (if self-insured), or the employer's insurer, will have to pay for medical and wage loss benefits in the event a worker who is SIF-certified becomes injured or re-injured on the job. SIF will assume liability for the claim when the 104 weeks is reached. The benefit to an insured employer is that the insurer's liability is limited to 104 weeks on the claim. This can favorably impact the employer's modification factor, which in turn can keep premiums lower than would otherwise be the case without SIF. For a self-insured employer, it provides a direct recovery of expenses paid for a workers' compensation claim. If a certified worker does become injured on the job, the worker remains entitled to all benefits due under the Workers' Compensation Act.

An estimated liability is recorded based on a projected cost analysis and total population of registered SIF participants. As of June 30, 2016, the amount of this liability was estimated to be \$3.3 million.

(5) Changes in Claims Liabilities for the Past Two Years – As indicated above, these funds establish liabilities for both reported and unreported insured events including estimates of future payments of losses and related claim adjustment expenses. The following tables present changes (in thousands) in those aggregate liabilities during the past two years. All information in these tables is presented at face value and has not been discounted.

	Hail Insurance		MUS Group Insurance Plan		MUS Workers Compensation	
	2016	2015	2016	2015	2016	2015
Unpaid claims and claim adjustment expenses at beginning of year	\$ 17	\$ 226	\$ 7,300	\$ 6,400	\$ 8,289	\$ 7,619
Incurred claims and claim adjustment expenses:						
provision for insured events of the current year	324	6,660	90,131	87,768	3,157	3,417
Less excess insurance reimbursement	-	-	-	-	(62)	-
Increase (decrease) in provision for insured events of prior years	79	523	-	-	(1,655)	(556)
Total incurred claims and claim adjustment expenses	403	7,183	90,131	87,768	1,440	2,861
Payments:						
Claims and claim adjustment expenses attributable to insured events of the current year	(189)	(6,643)	(88,331)	(86,868)	(598)	(701)
Claims and claim adjustment expenses attributable to insured events of prior years	(97)	(749)	-	-	(1,367)	(1,490)
Total payments	(286)	(7,392)	(88,331)	(86,868)	(1,965)	(2,191)
Total unpaid claims and claim adjustment expenses at end of year	\$ 134	\$ 17	\$ 9,100	\$ 7,300	\$ 7,764	\$ 8,289

B. Entities Other Than Pools

(1) Administration Insurance Plans – This self-insurance plan provides coverage for general liability, automobile liability, automobile physical damage, foster care liability, and state-administered foreclosure of housing units. The State self-insures the \$2.0 million deductible per occurrence for most property insurance, as well as various deductible amounts for other state property. The State also self-insures against losses of property below \$2.0 million of value, with state agencies paying the first \$1.0 thousand. Commercial property insurance protects approximately \$5.7 billion of state-owned buildings and contents. The State's property insurance includes separate earthquake and flood protection coverage, with deductibles of \$2.0 million for earthquake and \$2.0 million for flood per occurrence. Premiums are collected from all state agencies, including component units, and recorded as revenue in the Administration Insurance Fund.

An annual actuarial study, prepared by Towers Watson Company, and issued for the accident period July 1, 2006, through June 30, 2016, is the basis for estimating the liability for unpaid claims and is supported by historical loss data. As of June 30, 2016, estimated claims liability was \$15.4 million.

(2) Employee Group Benefits Plans – The medical and dental health plans provided by the State are fully self-insured with the State assuming the risk for claims incurred by employees of the State, elected officials, retirees, former employees covered by COBRA benefits, and their dependents. The State contracted with Cigna as third party administrator for medical coverage for the first six months of the fiscal year. The plan operates on a calendar year and the contract expired on December 31, 2015. Allegiance replaced Cigna as the administrator on January 1, 2016, for the last six months of the fiscal year. Delta Dental is the administrator for dental coverage. MedImpact is the administrator for the prescription drug program. Contributions are collected through payroll deductions, deductions through the Public Employees Retirement Administration, the Legislative Branch, and self-payments and are recorded as revenue in the Employee Group Benefits internal service fund. At June 30, 2016, estimates for claims liabilities, which include both incurred but not reported claims and grandfathered claims resulting from a 1998 change in period for which the

benefit coverage is available, as well as other actuarially determined liabilities, were \$17.9 million based on a formula provided by Actuaries Northwest, a consulting actuarial firm, of which \$17.7 million is estimated to be paid in fiscal year 2017.

(3) State of Montana (Old Fund) – State of Montana (Old Fund) covers workers' compensation claims that were incurred before July 1, 1990. Old Fund is a risk financing insurance entity; however, the participants within the pool are individuals outside of governmental entities.

An actuarial study prepared by Towers Watson, as of June 30, 2016, estimated the cost of settling claims that have been reported, but not settled, and claims that have been incurred, but not reported. At June 30, 2016, \$38.4 million of unpaid claims and claim adjustment expenses were reported at face value.

(4) Changes in Claims Liabilities for the Past Two Years – These funds establish liabilities for both reported and incurred, but not reported, claims. Grandfathered claims are not included as they relate to future claims not yet incurred. The following table presents changes in the balances of claims liabilities during the past two fiscal years (in thousands).

	Administration Insurance Plans		Employers Group Benefits Plan		State of Montana Old Fund	
	2016	2015	2016	2015	2016	2015
Amount of claims liabilities at the beginning of each fiscal year	\$ 16,953	\$ 17,550	\$ 18,028	\$ 22,103	\$ 41,597	\$ 45,034
Incurred claims:						
Provision for insured events of the current year	5,343	5,278	163,115	167,770	-	-
Increase (decrease) in provision for insured events of prior years	(167)	1,834	(4,035)	(7,182)	5,707	4,618
Total incurred claims	5,176	7,112	159,080	160,588	5,707	4,618
Payments:						
Claims attributable to insured events of the current year	(1,737)	(937)	(145,572)	(148,342)	-	-
Claims attributable to insured events of prior years	(4,948)	(6,772)	(13,663)	(16,321)	(8,894)	(8,055)
Total payments	(6,685)	(7,709)	(159,235)	(164,663)	(8,894)	(8,055)
Total claims liability at end of each fiscal year	\$ 15,444	\$ 16,953	\$ 17,873	\$ 18,028	\$ 38,410	\$ 41,597

NOTE 9. COMMITMENTS

A. Highway Construction

At June 30, 2016, the Department of Transportation had contractual commitments of approximately \$189.2 million for construction of various highway projects. Funding for these highway projects is to be provided from federal grants and matched with state special revenue funds.

B. Capital Construction

At June 30, 2016, the Department of Administration, Architecture & Engineering Division, had commitments of approximately \$24.9 million for capital projects construction. The primary government will fund \$15.1 million of these projects, with the remaining \$9.8 million funding coming from the Montana University System.

C. Loan and Mortgage Commitments

The Board of Investments (BOI) makes firm commitments to fund commercial loans and Veterans' Home Loan Mortgages (VHLM) from the Coal Severance Tax Permanent Trust Fund. These commitments have expiration dates and may be extended according to the BOI policies. As of June 30, 2016, the BOI had committed, but not yet purchased, \$61.5 million in loans from Montana lenders. In addition to the above commitments, lenders had reserved \$14.1 million for loans as of June 30, 2016. As of June 30, 2016, \$1.6 million represented lender reservations for the VHLM residential mortgage purchases with no purchase commitments.

As of June 30, 2016, the BOI has committed but not yet funded \$3.0 million to the Department of Natural Resources and Conservation to purchase tax bonds to finance projects.

The BOI makes reservations to fund mortgages from the state's pension funds. The Montana Retirement Funds Bond Pool holds the residential mortgages in its portfolio. As of June 30, 2016, there were no mortgage reservations. All BOI residential mortgage purchases are processed by the Montana Board of Housing (MBOH). The MBOH does not differentiate between a mortgage reservation and a funding commitment.

The BOI makes firm commitments to fund loans from the INTERCAP loan program. The BOI's outstanding commitments to eligible Montana governments, as of June 30, 2016, totaled \$44.1 million.

In November 2015, BOI authorized the issuance of up to an \$8.5 million bond anticipation note (BAN) in anticipation of a new bond issuance in 2017 to provide liquidity to the INTERCAP loan program. The BAN was purchased and funded by the Permanent Coal Tax Trust Fund on April 15, 2016, with a stated maturity of March 15, 2017.

As of June 30, 2016, the Economic Development Bonds Enterprise Fund recorded an interentity loan payable to the Permanent Coal Tax Trust Fund in the amount of \$1.2 million related to the BAN. The proceeds were used to fund two INTERCAP loan draws from a local government.

D. Department of Corrections Bond Commitments

At June 30, 2016, the outstanding tax-exempt bonds issued by the Facility Finance Authority were issued in the amount of \$19.7 million of which \$2.5 million is scheduled to be paid by June 30, 2017. These bonds have been issued to facilities operating treatment and prerelease centers. The Department of Corrections agrees to provide payment on behalf of the contractors for the total principal and interest payments in regard to these outstanding bonds.

E. Proprietary Fund Commitments

Budgets are administratively established in the enterprise and internal service funds, excluding depreciation, compensated absences, and bad debt expense. Appropriations may be committed for goods/services that are not

received as of fiscal year-end. These executory commitments are included in unrestricted net position in the accompanying financial statements as follows (in thousands):

Proprietary Fund Commitments	
<u>Enterprise Funds</u>	<u>Amount</u>
Liquor Warehouse	\$ 69
State Lottery	260
Other	1
Subtotal – Enterprise funds	<u>\$330</u>
<u>Internal Service Funds</u>	
Buildings & Grounds	\$ 5
Employee Group Benefit	22
FWP Equipment	47
Information Technology Services	7
Labor Central Services	97
Prison Industries	98
Subtotal – Internal Service funds	<u>\$276</u>

F. Encumbrances

As of June 30, 2016, the State of Montana encumbered expenditures as presented in the table below (in thousands):

	<u>Federal Special Revenue Fund</u>	<u>General Fund</u>	<u>Nonmajor Governmental Funds</u>	<u>State Special Revenue Fund</u>	<u>Total</u>
Encumbrances	\$27,495	\$10,333	\$119	\$52,878	\$90,825

NOTE 10. LEASES/INSTALLMENT PURCHASES PAYABLE

The State has entered into various capital and operating leases for land, buildings, equipment, and computer software. Lease contracts are required by law to contain a clause indicating continuation of the lease is subject to funding by the Legislature. It is expected, in the normal course of operations, that most of these leases will be replaced by similar leases.

A. Capital Leases/Installment Purchases

Obligations under capital leases/installment purchases at June 30, 2016, were as follows (in thousands):

Fiscal Year Ending June 30	Governmental Activities	Business-Type Activities
2017	\$1,172	\$208
2018	957	208
2019	663	208
2020	353	18
2021	167	-
2022-2026	2	-
Total minimum payments	3,314	642
Less: interest	(144)	(42)
Present value of minimum payments	<u>\$3,170</u>	<u>\$600</u>

Assets acquired under capital leases for the primary government by asset class were as follows (in thousands):

Asset Class	
Buildings	\$ 1,596
Equipment	7,506
Less: Accum Depreciation	(4,237)
Net Book Value	<u>\$ 4,865</u>

B. Operating Leases

Primary government rental payments for operating leases in fiscal year 2016 totaled \$25.4 million. Future rental payments under operating leases are as follows (in thousands):

Fiscal Year Ending June 30	Governmental Activities	Business-Type Activities
2017	\$ 24,735	\$ 393
2018	21,953	229
2019	19,389	195
2020	15,424	118
2021	10,932	80
2022-2026	37,937	295
2027-2031	16,580	8
Thereafter	7,506	-
Total future rental payments	<u>\$154,456</u>	<u>\$1,318</u>

NOTE 11. STATE DEBT

A. General Information

The State has no constitutional limit on its power to issue obligations or incur debt, other than a provision that no debt may be created to cover deficits incurred because appropriations exceeded anticipated revenues. No State debt shall be created unless authorized by a two-thirds vote of the members of each house of the Legislature or a majority of the electors voting thereon. The Board of Examiners (consisting of the Governor, Secretary of State, and Attorney General) is authorized, pursuant to various enabling acts, to issue bonds and notes of the State.

B. Short-term Debt

The Board of Examiners, upon recommendation of the Department of Administration, may issue notes in anticipation of the receipt of taxes and revenues. Notes may not be issued to refund outstanding notes.

During fiscal year 2016, the State issued four bond anticipation notes. The proceeds of Water/Waste Water – 2015A, Drinking Water – 2015B, Water/Waste Water – 2016C and Drinking Water – 2016D were used, and will be used, to fund water and wastewater system improvements and rehabilitation. As of June 30, 2016, no funds have been drawn on the Water/Waste Water – 2016C and Drinking Water – 2016D issuances. The State issued two bond anticipation notes during fiscal year 2015 that were still active at the end of fiscal year 2016. The following schedule summarizes the activity for the year ended June 30, 2016 (in thousands):

	Beginning Balance	Additions	Reductions	Ending Balance
BANS				
Water / Wastewater – 2014A	2,642	358	2,700	300
Drinking Water – 2014A	1,550	350	835	1,065
Water / Wastewater – 2015A	-	2,605	-	2,605
Drinking Water – 2015B	-	900	-	900

The Board of Investments (BOI) of the State is authorized to issue Intermediate Term Capital (INTERCAP) bonds under the Municipal Finance Consolidation Act. These bonds may not aggregate more than \$190 million as amended by the 2007 Legislature. The purpose of the bonds is to provide funds for the BOI to make loans to eligible government units. The bonds are not a debt or liability of the State. The bonds are limited obligations of the BOI, payable solely from (1) repayments of principal and interest on loans made by the BOI to participating eligible governmental units, (2) investment income under the indenture, and (3) an irrevocable pledge by the BOI. The BOI has no taxing power. The bonds may be redeemed, at the bondholder's option, any March 1, prior to maturity. The BOI did not enter into an arms-length financing agreement to convert the bonds "put," or tender, and were not resold into some other form of long-term obligation. Accordingly, these bonds, considered demand bonds, are included in short-term debt. The amounts issued and outstanding at June 30, 2016, were as follows (in thousands):

Series	Amount Issued	Balance June 30, 2016
1998	12,500	11,695
2000	15,000	14,335
2003	15,000	14,430
2004	18,500	18,130
2007	15,000	14,775
2010	12,000	11,975
2013	12,000	12,000
		<u>\$97,340</u>

The following schedule summarizes the activity relating to the demand bonds during the year ended June 30, 2016 (in thousands):

	Beginning Balance	Additions	Reductions	Ending Balance
Demand bonds	\$106,445	\$ -	\$9,105	\$97,340

C. Long-term Debt

The full faith, credit, and taxing powers of the State are pledged for the payment of all general obligation debt. Revenue and mortgage bonds are secured by a pledge from the facilities to which they relate and by certain other revenues, fees, and assets of the State and the various colleges and universities. Primary government bonds and notes outstanding at June 30, 2016, were as follows (in thousands):

<u>Governmental Activities</u>	Series	Amount Issued	Interest Range (%) (1)	Principal Payments		Balance June 30, 2016
				Fiscal Year 2017	In Year of Maturity (2)	
General obligation bonds

ITSD Software Licenses	2,890	2.41	947	494 (2019)	2,411
Total notes payable	<u>\$ 18,466</u>		<u>\$ 1,641</u>		<u>\$ 11,643</u>
Subtotal governmental activities, before unamortized balances					216,983
Unamortized discount					(11)
Unamortized premium					13,645
Total governmental activities	<u>\$ 341,341</u>		<u>\$ 33,506</u>		<u>\$230,617</u>

- (1) The interest range is over the life of the obligation.
- (2) Year of maturity refers to fiscal year.
- (3) These bonds provide matching funds to enable the State to obtain capitalization grants from the U.S Environmental Protection Agency for water system development loans to state political subdivisions.
- (4) The general obligation Renewable Resource Program Bonds are secured additionally by a pledge of, and payable from, certain coal severance taxes. The bonds are also secured by a pledge of loan repayments from loans made from the bond proceeds.
- (5) Bonds issued for financing the design, construction, and installation of energy conservation projects at various state buildings.
- (6) The CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act) Program Bonds were issued for the purpose of financing the costs of State of Montana participation in the remedial actions under Section 104 of the CERCLA 42 United States Code Sections 9601-9657, and State of Montana costs for maintenance of sites under CERCLA. The CERCLA Bonds are secured additionally by a pledge of monies received by the State as cost recovery payments and revenues derived from the resource indemnity and groundwater assessment tax in the event cost recovery payments are insufficient.
- (7) Facility Finance Authority loan to the Department of Public Health and Human Services for the Montana State Hospital Project.
- (8) Issued by the Department of Natural Resources and Conservation and backed by a pledge of coal severance taxes and project revenues.
- (9) The U.S. Highway 93 GARVEES (Grant Anticipation Revenue Vehicles) Bonds were issued for the purpose of improving a 44.8-mile stretch of U.S. Highway 93. Repayment of the bonds is secured by a pledge of certain federal aid revenues.
- (10) U.S. Bureau of Reclamation loan to the Department of Natural Resources & Conservation.
- (11) Northern Cheyenne Tribe loan to the Department of Natural Resources & Conservation. The loan will not accrue interest and will be repaid over 39 years. Loan repayment is secured by the issuance of a coal severance tax bond to the tribe.

D. Debt Service Requirements

Primary government debt service requirements at June 30, 2016, were as follows (in thousands):

Year Ended June 30	<u>Governmental Activities</u>					
	General Obligation Bonds		Special Revenue Bonds		Notes Payable	
	Principal	Interest	Principal	Interest	Principal	Interest
2017	\$15,575	\$ 4,351	\$16,290	\$ 3,641	\$ 1,641	\$ 114
2018	14,190	3,826	17,115	2,875	1,679	80
2019	11,010	3,381	16,195	2,234	872	46
2020	9,370	3,034	16,915	1,595	382	42
2021	8,165	2,735	6,160	947	385	42
2022-2026	31,540	9,290	14,505	1,832	1,992	208
2027-2031	17,190	3,920	2,660	250	2,125	208
2032-2036	8,460	1,099	-	-	1,987	124

Total	<u>\$115,500</u>	<u>\$ 31,636</u>	<u>\$89,840</u>	<u>\$ 13,374</u>	<u>\$ 11,643</u>	<u>\$ 864</u>

E. Summary of Changes in Long-term Liabilities

Primary government long-term liability activities for the year ended June 30, 2016, were as follows (in thousands):

	Beginning Balance	Additions	Reductions	Ending Balance	Amounts Due Within One Year	Amounts Due In More Than One Year
Governmental activities						
Bonds/notes payable						
General obligation bonds	\$ 134,795	\$ -	\$ 19,295	\$ 115,500	\$ 15,575	\$ 99,925
Special revenue bonds	110,975	23	21,158	89,840	16,290	73,550
Notes payable	9,949	2,890	1,196	11,643	1,641	10,002
	255,719	2,913	41,649	216,983	33,506	183,477
Unamortized discount	(12)	1	-	(11)	-	(11)
Unamortized premium	13,015	630	-	13,645	-	13,645
Total bonds/notes payable (3)	268,722	3,544	41,649	230,617	33,506	197,111
Other liabilities						
Lease/installment purchase payable	1,186	2,646	662	3,170	1,110	2,060
Operating lease rent holiday	54	-	8	46	9	37
Pension benefits payable	4	-	-	4	2	2
Compensated absences payable (1)	101,545	56,629	55,606	102,568	55,210	47,358
Arbitrage rebate tax payable (1)	97	-	14	83	-	83
Estimated insurance claims (1)	76,579	169,963	174,815	71,727	30,940	40,787
Pollution remediation	269,898	16,169	43,078	242,989	33,610	209,379
Net pension liability	1,423,406	135,057	-	1,558,463	-	1,558,463
OPEB implicit rate subsidy (2)	236,667	34,693	8,619	262,741	-	262,741
Total other liabilities	2,109,436	415,157	282,802	2,241,791	120,881	2,120,910
Total governmental activities long-term liabilities	\$ 2,378,158	\$ 418,701	\$ 324,451	\$ 2,472,408	\$ 154,387	\$ 2,318,021
Business-type activities						
Lease/installment purchase payable	836	2	238	600	186	414
Compensated absences payable	1,867	1,178	970	2,075	970	1,105
Arbitrage rebate tax payable	-	17	-	17	-	17
Estimated insurance claims	19,065	91,974	90,692	20,347	12,776	7,571
Net pension liability	9,363	1,387	-	10,750	-	10,750
OPEB implicit rate subsidy (2)	4,168	642	159	4,651	-	4,651
Total business-type activities long-term liabilities	\$ 35,299	\$ 95,200	\$ 92,059	\$ 38,440	\$ 13,932	\$ 24,508

- (1) The compensated absences liability attributable to the governmental activities will be liquidated by several of the governmental and internal service funds. The arbitrage rebate tax payable will be liquidated by debt service funds. The Employee Group Benefits and Administration Insurance internal service funds will liquidate the estimated insurance claims liability.
- (2) The OPEB plan allows retirees to participate, as a group, at a rate that does not cover all the related costs. This results in the reporting of an "implicit rate" subsidy on the related financial statements. While this liability is disclosed for financial purposes, it does not represent a legal liability of the State, or any of its component units.
- (3) Deferred outflows, including those related to bonds payable, are reported separately on the Statement of Net Position based on GASB Statement No. 65.

F. Refunded and Early Retired Debt

Prepayments

The Department of Natural Resources and Conservation (DNRC) used current available resources to make three prepayments: \$480.0 thousand on Series 2005F, \$255.0 thousand on Series 2006D and \$1.1 million on Series 2010C general obligation bonds. The Department of Public Health and Human Services (DPHHS) used current and available resources to make one prepayment resulting in a payoff: \$2.8 million on special revenue Series 2003 bonds.

Refundings

In March 2016, the State issued Grant Anticipation (GARVEE) Refunding Series 2016 Bonds in the amount of \$22.5 million to make an advanced refunding of \$29.1 million GARVEE, Series 2008. The refunding resulted in an economic gain of \$1.2 million and a difference in cash flow requirements of \$1.2 million.

G. No-Commitment Debt

Information is presented below for financing authorities participating in debt issues. The related debt issued does not constitute a debt, liability, obligation, or pledge of faith and credit of the State. Accordingly, these bonds and notes are not reflected on the accompanying financial statements.

Montana Board of Investments (BOI)

The BOI is authorized to issue Qualified Zone Academy Bonds (QZAB) under the Municipal Finance Consolidation Act, as conduit (no commitment) debt. The revenues, and in some cases, the taxing power of the borrower are pledged to repay the bonds. At June 30, 2016, QZAB debt outstanding aggregated \$8.5 million.

The BOI is also authorized to issue Qualified School Construction Bonds (QSCB) under the Municipal Finance Consolidation Act, as conduit (no commitment) debt. The revenues of the borrower are pledged to repay the bonds. At June 30, 2016, QSCB debt outstanding aggregated \$6.1 million.

Beginning Farm Loan Program

The Department of Agriculture is authorized to request issuance of bonds by the BOI to finance projects for beginning farmers within the state, if it appears, after a properly noticed public hearing, that the project is in the public interest of the state. These non-recourse, industrial development revenue bonds do not constitute a debt, liability, or obligation of the State. The amount issued and outstanding at June 30, 2016, was as follows: Hershberger Project – issued \$129.4 thousand, outstanding \$49.1 thousand.

H. Estimated Pollution Remediation Obligation

Estimated pollution remediation obligations are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities such as site assessments and cleanups. The estimates are derived using the expected cash flows method as well as technical estimates from record of decisions, consent decrees and/or settlement agreements. There may be factors influencing the estimates that are not known at this time. Prospective recoveries from other responsible parties may reduce the State's obligation.

The State's estimated pollution remediation liability as of June 30, 2016, was \$243.0 million. Of this liability, \$21.5 million resulted in settlement agreements to provide restoration of natural resources, water supplies and natural resource-based recreational opportunities up to the settlement amount; \$214.9 million is based on decrees or settlements for remediation activities. Other estimated liabilities have been recorded for soil and PCB contamination, as well as removal of asbestos contamination. The estimated pollution remediation liability was recorded in compliance with accounting and reporting standards and does not constitute the State's total acceptance of the liability or responsibility on these matters.

NOTE 12. INTERFUND BALANCES AND TRANSFERS**A. Balances Due From/To Other Funds**

Balances due from/to other funds arise when there is a time lag between the dates that reimbursable expenditures and interfund services provided/used are recorded in the accounting system, and the dates on which payments are made. Balances also arise when there is a time lag between the dates that transfers between funds are recorded, and the dates on which payments are made. Balances due from/to other funds also include the current portion of balances related to amounts loaned by the Economic Development Bonds Fund to other funds, under the Board of Investments INTERCAP loan program. Balances due from/to other funds are expected to be repaid within one year from origination.

Balances due from/to other funds at June 30, 2016, consisted of the following (in thousands):

	Due to Other Funds				
	Coal Severance Tax	Economic Development Bonds	Federal Special Revenue	General Fund	Internal Service Funds
Due from Other Funds					
Coal Severance Tax	\$ -	\$1	\$ -	\$ -	\$ -
Economic Development Bonds	-	-	-	-	1,397
Federal Special Revenue	-	-	-	-	-
General Fund	18	-	374	-	-
Internal Service Funds	45	-	-	7	-
Nonmajor Governmental Funds	-	-	-	-	-
State Special Revenue	-	-	7	89	-
Total	\$63	\$1	\$381	\$96	\$1,397

	Due to Other Funds (cont)			
	Nonmajor Enterprise Funds (3)	Nonmajor Governmental Funds	State Special Revenue	Total
Due from Other Funds (cont)				
Coal Severance Tax	\$ -	\$ 4	\$ -	\$ 5
Economic Development Bonds	-	349	679	2,425
Federal Special Revenue	-	-	48	48
General Fund	12,004	-	8,908	21,304
Internal Service Funds	-	-	-	52
Nonmajor Governmental Funds (1)	-	-	231	231
State Special Revenue (2)	532	493	-	1,121
Total	\$12,536	\$846	\$9,866	\$25,186

(1) Total due from other funds to the non-major governmental funds on the financial statements is reported as \$2.0 million. The difference of \$1.7 million between the amount reported above of \$231.4 thousand and the amount reported in the fund financial statements relates to long-term receivables. The receivables are reported on the fund financial statement and the long-term liabilities are reported on the government-wide statement.

(2) Total due from other funds to the state special revenue fund on the fund financial statement is reported as \$9.2 million. The difference of \$8.0 million between the amount reported above of \$1.1 million and the amount reported in the fund financial statement relates to long-term receivables. The receivables are reported on the fund financial statement and the long-term liabilities are reported on the government-wide statement.

(3) Total due to other funds from the non-major enterprise funds on the fund financial statement is reported as \$12.9 million. The difference of \$334.8 thousand between the amount reported above of \$12.5 million and the amount reported on the fund financial statement relates to loans payable. The receivables are reported on the government-wide and the liabilities are reported on the fund financial statement.

B. Interfund Loans Receivable/Payable

Montana statutes include a provision for interfund loans when the expenditure of an appropriation is necessary and the cash balance in the account from which the appropriation was made is insufficient to pay the expenditure. Interfund loans receivable/payable are expected to be repaid within one year from the date of origination.

Interfund loans receivable/payable at June 30, 2016, consisted of the following (in thousands):

	Interfund Loans Payable					Total
	Coal Severance Tax	Economic Development Bonds	Federal Special Revenue	Nonmajor Governmental Funds	State Special Revenue	
Interfund Loans Receivable						
Coal Severance Tax	\$ -	\$1,207	\$ -	\$ -	\$ -	\$ 1,207
General Fund (1)	1,581	-	73,940	293	10,854	86,668
Nonmajor Enterprise	-	-	6	-	-	6
State Special Revenue	-	-	65,655	-	-	65,655
Total	\$1,581	\$1,207	\$139,601	\$293	\$10,854	\$153,536

- (1) The interfund loan balance of \$ 73.9 million between the General Fund and the Federal Special Revenue Fund includes a loan processed unnecessarily in the amount of \$ 20.0 million.

C. Advances To/From Other Funds

Advances to/from other funds represent the portion of interfund loans that are not expected to be repaid within one year from the date of origination. Advances to/from other funds also include the noncurrent portion of balances related to amounts loaned by the Economic Development Bonds Fund to other funds, under the Board of Investments INTERCAP loan program. For more information on the INTERCAP loan program, refer to Note 11.

Advances to/from other funds at June 30, 2016, consisted of the following (in thousands):

	Advances from Other Funds					Total
	Federal Special Revenue	Internal Service Funds	Nonmajor Enterprise Funds	Nonmajor Governmental Funds	State Special Revenue	
Advances to Other Funds						
Coal Severance Tax	\$ -	\$ -	\$ -	\$ 1,375	\$ -	\$ 1,375
Economic Development Bonds	-	5,265	-	4,570	1,048	10,883
General Fund	325	-	-	-	314	639
Internal Service Funds	-	-	80	-	-	80
Nonmajor Governmental Funds	-	-	-	-	10,578	10,578
State Special Revenue	19,158	-	-	6,106	-	25,264
Total	\$19,483	\$5,265	\$80	\$12,051	\$11,940	\$48,819

Additional detail for certain advance balances at June 30, 2016, follows (in thousands):

Advances from the Economic Development Bonds Fund under the INTERCAP Loan Program	
Department	Balance
Justice	\$ 1,048
Natural Resources and Conservation	4,570
Transportation	5,265
Total	\$10,883

D. Interfund Transfers

Routine transfers between funds are recorded to (1) transfer revenues from the fund legally required to receive the revenue to the fund authorized to expend the revenue, (2) transfer resources from the General Fund and special revenue funds to debt service funds to support principal and interest payments, (3) transfer resources from enterprise funds to the General Fund to finance general government expenditures, and (4) provide operating subsidies.

Interfund transfers for the year ended June 30, 2016, consisted of the following (in thousands):

	Transfers In				
	Coal Severance Tax	Federal Special Revenue	General Fund	Internal Service Funds	Land Grant
Transfers Out					
Coal Severance Tax	\$ -	\$ -	\$20,722	\$ -	\$ -
Federal Special Revenue	-	-	133	-	-
General Fund	-	-	-	1,034	-
Internal Service Funds (1)	-	-	-	7	-
Land Grant	-	-	11	-	-
Nonmajor Enterprise Funds	-	-	43,630	-	-
Nonmajor Governmental Funds	9	1,241	300	-	-
State Special Revenue	-	3,932	13,758	1,031	6
Total	\$9	\$5,173	\$78,554	\$2,072	\$6

	Transfers In (cont)			
	Nonmajor Enterprise Funds	Nonmajor Governmental Funds	State Special Revenue	Total
Transfers Out (cont)				
Coal Severance Tax	\$ -	\$ 683	\$ 2,700	\$ 24,105
Federal Special Revenue	-	15,604	14,295	30,032
General Fund	-	23,459	66,715	91,208
Internal Service Funds (1)	68	240	5	320
Land Grant	-	1,510	66,851	68,372
Nonmajor Enterprise Funds (2)	-	-	7,809	51,439
Nonmajor Governmental Funds	-	5,291	19,657	26,498
State Special Revenue	577	14,687	-	33,991
Total	\$645	\$61,474	\$178,032	\$325,965

- (1) Total transfers-out for internal service funds on the fund financial statements is reported as \$1.8 million. The difference of \$1.4 million between the amount reported above of \$3.2 thousand and the amount reported on the fund financial statements relates to the transfer of capital assets between a governmental fund type and the internal service fund type. When capital assets are transferred between these fund types, the transferring fund reports the net book value of the capital asset as a transfer-out, and the receiving fund reports the net book value of the capital asset as a capital contribution.
- (2) Total transfers-out for nonmajor enterprise funds on the fund financial statements is reported as \$51.5 million. The difference of \$18.2 thousand between the amount reported above of \$51.4 million and the amount reported on the fund financial statements relates to the transfer of capital assets between a governmental fund type and the nonmajor enterprise fund type. When capital assets are transferred between these fund types, the transferring fund reports the net book value of the capital asset as a transfer-out, and the receiving fund reports the net book value of the capital asset as a capital contribution.

NOTE 13. FUND EQUITY DEFICITS

The following funds have a deficit net position remaining at June 30, 2016, as follows (in thousands):

Fund Type/Fund	<u>Deficit</u>
<u>Internal Service Funds</u>	
Information Tech Services	\$ (15,652)
Building and Grounds	(839)
Admin Central Services	(1,607)
Labor Central Services	(4,979)
Commerce Central Services	(1,391)
OPI Central Services	(1,102)
DEQ Indirect Cost Pool	(4,070)
Payroll Processing	(1,320)
Warrant Processing	(48)
Investment Division	(2,268)
Aircraft Operation	(576)
Justice Legal Services	(387)
Personnel Training	(203)
Other Internal Services	(295)
<u>Enterprise Fund</u>	
State Lottery	(2,240)
Subsequent Injury	(2,564)
Secretary of State Business Services	(47)
Local Government Audits	(50)

NOTE 14. MAJOR PURPOSE PRESENTATION

Special Revenue and Fund Balances Classifications by Purpose – In the governmental fund financial statements, classifications of special revenue fund revenues and fund balances are presented in the aggregate. The tables presented below further display the special revenue fund revenues and fund balances by major purpose for the year ending June 30, 2016.

	State Special Revenue By Source (in thousands)						Total
	General Government	Public Safety	Transportation	Health and Human Services	Education	Natural Resources	
Licenses/permits	\$ 65,615	\$30,927	\$ 22,626	\$ 2,241	\$ 169	\$ 73,421	\$ 194,999

(1) In fiscal year 2016, the General Fund unassigned fund balance was \$126.5 million. An additional \$130.0 million was reported as assigned fund balance pertaining to the projected General Fund spend down of fund balance in fiscal year 2017. The 2015 Legislature projected \$319 million of unassigned fund balance for fiscal year 2016.

NOTE 15. RELATED PARTY TRANSACTIONS

The Montana Board of Regents, which governs the Montana Guaranteed Student Loan Program (MGSLP), guarantees loans owned by the Montana Higher Education Student Assistance Corporation (MHESAC), a nonprofit corporation operating exclusively for the purpose of acquiring student loans. MHESAC has no employees. Its business operations are managed by the Student Assistance Foundation (SAF). Approximately 70.44%, or \$841.6 million of MGSLP's outstanding loan volume is held by MHESAC.

The Montana Association of Health Care Purchasers (MAHCP) had a member from the Department of Administration (DOA), Health Care and Benefits Division, serve on the board from July 1 through December 31, 2015 as well as a member from the Montana University System. No remuneration was received for their services. DOA paid MAHCP \$1.25 per health care plan member per year to maintain its membership for this time period. The DOA transitioned from a full member to an associate member of the MAHCP effective January 1, 2016. Associate membership does not require a membership fee, but no longer provides a seat on the board. DOA also paid \$0.71 per pharmacy script to MAHCP for administration of the URx program, which includes the Ask-A-Pharmacist Program, for the period July 1, 2015, through June 30, 2016.

The Montana School for the Deaf and Blind is associated with a foundation, which is a nonprofit organization outside of state government. The school's foundation is governed by a board of directors that yearly approves a budget for the financial support to be provided to the school. This budget defines the allowable expense categories for the year. A school employee is the person approving the expenses to be paid by the foundation based on its budget. The employee submits the approved invoices to the foundation's bookkeeper, who then prepares the checks and submits them to a board member who reviews backup documentation and signs the checks.

The Department of Labor and Industry Workforce Services Division rents space in Libby, MT from Mineral Plaza, LLC, in which one of the owners is Johnette Watkins, a local job service manager. The term of the lease is four years beginning July 1, 2013, and ending June 30, 2017. The annual lease amount is currently set at \$21,330.

NOTE 16. CONTINGENCIES

Litigation

The State is party to legal proceedings, which normally occur in government operations. The legal proceedings are not, in the opinion of the State's legal counsel and the Department of Administration, likely to have a material adverse impact on the State's financial position, except where listed below.

In State of Montana v. Philip Morris, Inc., No. CDV 97-306 (Mont. 1st Jud. Dist. Lewis & Clark County), the State of Montana filed various claims against six tobacco manufacturers seeking recovery of an unspecified amount of damages, penalties, and attorney's fees. The lawsuit was resolved eventually through two settlements. The State first settled its claims against one of the manufacturers, Liggett & Meyers, Inc., for \$1 million to be paid over a 20-year period. Next, Montana was among the Settling States that signed onto the 1998 Master Settlement Agreement (MSA) and settled its claims against the remaining manufacturers for a base settlement amount of \$832 million payable over 26 years. The base amount was augmented by \$90 million in 1999, with the additional amount to be paid in equal installments over a 10-year period beginning in 2007 and ending in 2017.

The settlement provides that the cigarette manufacturers may offset, against their payment in any year, certain amounts of money if it is found that the original settling manufacturers (known as OPMs) have lost more than 2% of their market share to non-settling manufacturers (known as NPMs), and that the disadvantages imposed by the settlement were a "significant factor" in the market share loss. The settlement further provides that the offset, known as the "NPM adjustment," may not be taken against the payments to any state that has enacted a "qualifying statute" and diligently enforced the statute during the year in question. Montana enacted such a qualifying statute in 1999, Section 16-11-401 to -404, MCA, and complimentary legislation in 2003, Section 16-11-501 to -512, MCA.

In March 2006, a determination was made (pursuant to the settlement) that the OPMs had lost sufficient market share in 2003 to trigger an NPM adjustment analysis, and that disadvantages caused by the settlement were a significant factor in the market share loss. Similar findings have been made or agreed to for years 2004 through 2006. The State filed a motion in the lawsuit seeking a declaration that it diligently enforced its qualifying statute during 2003. The OPMs moved to compel arbitration of the question. District Court ordered arbitration, but was overruled on appeal to the Montana Supreme Court. Virtually all of the other Settling States filed similar motions or new actions in their various court systems preferring to litigate their diligent enforcement disputes in court rather than in the tobacco companies' proposed nationwide arbitration. Montana was the only state to prevail on its argument against arbitration before its highest state court. Montana then successfully defended the favorable ruling from a petition for rehearing in Montana and ultimately a *certiorari* petition to the U.S. Supreme Court filed by tobacco companies which the Court rejected.

Simultaneously, arbitration between the other Settling States and the tobacco companies commenced and proceeded to discovery. After the U.S. Supreme Court denied *cert* regarding Montana's participation in the arbitration, the tobacco companies sought and received a stay of Montana's litigation pending completion of the nationwide arbitration, effectively shutting Montana out of any opportunity for input or influence over standards for determining what constitutes "diligent enforcement," and potentially subjecting Montana to whatever standards may ultimately result from the ongoing nationwide arbitration for lack of any alternative interpretative precedent. Thereafter, the Montana Supreme Court granted Montana's writ for supervisory control, overturned the stay, and allowed the State's district court action to proceed through discovery.

The Montana litigation ended with entry of a stipulated consent decree on June 25, 2012, reflecting the tobacco companies' determination after discovery that they would not contest Montana's diligent enforcement during 2003. In the nationwide arbitration, and as applied to Montana's consent decree, a "no contest" determination for an individual state means that state will not participate in the NPM Adjustment for 2003, (*i.e.*, as a "no contest" state Montana will have no reduction to its annual OPM settlement payments for 2003).

However, the "no contest" for 2003 has no precedential effect in any subsequent year for Montana or any other state's case. Accordingly, Montana will not be subject to the 2003 NPM Adjustment, but the consent decree specifically

articulates that Defendants' consent to its terms "is not a factual concession that Montana, in fact, did or did not diligently enforce the Montana Qualifying Statute in 2003 or any other year."

Despite Montana's successful defense of its 2003 enforcement actions, no precedential protections exist, and the State remains vulnerable to further expected, though not yet filed, litigation challenging its diligent enforcement in 2004, 2005, and 2006, for which years the OPMs have already received a determination that Master Settlement terms were a "substantial factor" reducing their market share and triggering an NPM Adjustment analysis with the potential to reduce annual payments for those Settling States which failed to diligently enforce their statutes.

Factual arguments exist to show that Montana enacted a qualifying statute within the meaning of the Master Settlement Agreement, which was in full force and effect and diligently enforced during 2004-2006 and thereafter to date. However, legal and procedural uncertainties exist that make an adverse determination possible. An adverse determination on the diligent enforcement issue could result in the loss of some or all of the MSA annual payments to the State for years 2004 through 2006, which would be recouped through an offset of payments due to Montana in future years. The OPMs have asserted claims for NPM adjustments for later years as well. The outcome of these claims is also uncertain.

In 2015, certain Settling States and certain tobacco product manufacturers commenced multi-state arbitration of the issue of diligent enforcement for calendar year 2004. Montana is not a party to this arbitration. Neither Montana nor any tobacco product manufacturers have yet initiated litigation to determine the State's diligent enforcement for 2004. Montana anticipates initiating such an action in Montana District Court in fiscal year 2017.

PPL v. Montana involves ownership of sections of riverbed on the Missouri, Clark Fork and Madison rivers. The case originated in 2003, when a group of parents of school age children sued PPL in Federal Court alleging that the company must pay rent for the use of state owned riverbeds to generate hydroelectric power. After the Federal Court dismissed the case for lack of jurisdiction, PPL filed an action in state district court seeking a declaration that the state could not charge them rent for use of the riverbeds at issue. The state intervened in the case and counterclaimed for a declaration that PPL and its co-plaintiffs unlawfully occupied state lands and must compensate the State land trust on behalf of its public beneficiaries for the use of those lands. The legal test for ownership of the riverbeds is whether the rivers at issue were navigable at the time of statehood. Based upon the historical record, the District Court granted the State summary judgment on the question of navigability and the case proceeded to trial on the issue of compensation for use of trust lands. In June of 2008, the Court issued its ruling and ordered that PPL owed the state almost \$41 million for past use of the riverbeds.

PPL appealed the decision to the Montana Supreme Court. The case was briefed and argued before the Court, and in March of 2010, the Montana Supreme Court issued a decision upholding the district court's finding of navigability and determination of compensation.

PPL appealed the case to the United States Supreme Court. The case was briefed and argued, and in February of 2012, the Court reversed the Montana Supreme Court's decision. The United States Supreme Court concluded that the Montana courts had applied an incorrect legal standard for determining a river's navigability. The Court clarified that navigability had to be determined on a segment-by-segment basis. The Court remanded the case for further proceedings, and the case currently is pending in the Montana First Judicial District, Lewis and Clark County, Judge Michael McMahon presiding. The cause number is CDV 2004-846.

The most obvious impact of the Supreme Court's decision is that the State is no longer entitled to the \$41 million judgment. The monetary amount that the State may be entitled to depends on the navigability of the rivers, which will have to be determined under the Supreme Court's segment-by-segment approach. Going forward, the litigation will focus on applying the Supreme Court's segmentation approach to determine the navigable reaches of the Madison, Clark Fork, and Missouri Rivers. At this stage, it is difficult to predict an outcome on this litigation.

A less obvious financial impact is the bill of costs that PPL submitted to the district court following the remand. PPL requested that the district court tax the State of Montana with \$1.2 million for PPL's costs relating to the appellate proceedings. All but approximately \$31,000 relate to premiums that PPL paid for a supersedeas bond in support of staying the \$41 million judgment. In May 2012, the State filed its response to PPL's bill of costs and agreed to costs for \$31,263. However, the State moved the court to deny PPL's request for costs related to the supersedeas bond. The

parties stipulated to hold this issue in abeyance until the court is able to rule on all remaining matters in the case. Counsel for the State has agreed to release the supersedeas bond. In the opinion of counsel, there are good legal arguments that support the State's position that it should not be required to pay the supersedeas bond premiums; however, legal and procedural uncertainties exist that make an adverse determination reasonably possible. At this time, no further potential liability to the State is expected relative to this action and no additional updates are necessary in regards to the outstanding litigation.

Spoklie v. Montana Department of Fish, Wildlife and Parks (Spoklie), Sheridan County Docket No. 11013, is the final pending case challenging the constitutionality of Initiative Measure 143 (I-143), which banned the issuance of new licenses for game farms in Montana, prohibited the transfer of existing licenses, and prohibited game farm licenses from allowing the shooting of game farm animals on a game farm for a fee or other remuneration. The State moved for summary judgment and that motion is still pending. In the opinion of counsel, good defenses exist to all claims, and the possibility of an outcome adverse to the state is very remote.

Spoklie is the last in a long line of cases that were filed after passage of I-143. The following cases have been concluded in favor of the state: Kafka v. Montana Department of Fish Wildlife, and Parks, Hill County Docket No. DV-02-059, Buhmann et al. v. State of Montana et al., Lewis and Clark Docket No. DV-2002-555, Royal Tine Ranch v. State, Flathead County Docket No. DV-02-606C, and Mesaros v. Department of Fish, Wildlife and Parks, Cascade County Docket No. BDV 03-0119. Wallace v. State of Montana, Ravalli County Docket No. 02-254, and Bowman v. Montana Fish, Wildlife and Parks, Fergus County Docket No. DV-2002-02, were previously dismissed without prejudice and have not been refiled. No other updates in relation to this pending action are known at this time.

In October 2008 a lawsuit, Diaz et al. v. Blue Cross and Blue Shield of Montana et al. (Diaz), was filed in the Montana First Judicial District Court, Lewis and Clark County, Cause No. BVD-2008-956, by plaintiffs Jeanette Diaz, Leah Hoffman-Bernhardt, and Rachel Laudon, individually, and on behalf of others similarly situated, naming Blue Cross and Blue Shield of Montana (BCBS), New West Health Services (New West), Montana Comprehensive Health Association, State of Montana (State) as defendants. The complaint alleges that the defendants have violated the made-whole laws of Montana and illegally given themselves subrogation rights.

On June 12, 2009, Plaintiffs filed with the District court a motion for class certification. The District Court Judge denied Plaintiffs' motion for class certification on December 16, 2009. Plaintiffs appealed this decision to the Montana Supreme Court. As part of the review of the underlying decision denying class certification, the Montana Supreme Court remanded the case to the District Court to determine the question of whether the made-whole laws, codified in Section 2-18-902 and 33-30-1102, MCA, apply to the various types of third-party administrators (TPAs) at issue in Diaz. The District Court held that these laws do not apply to TPAs. Plaintiffs appealed this decision.

On December 21, 2011 the Supreme Court issued its decision, holding that the District Court abused its discretion in denying a class action and that BCBS and New West, as TPAs of the State's health plan, are not subject to the made-whole laws as "insurers" under Section 2-18-901 to -902, MCA, or under a third party beneficiary theory.

On June 20, 2012, the District Court ruled on the State's summary judgment motion seeking an order from the court that the State has not violated the made-whole laws in the administration of its health plan. The court denied the State's motion, ruling that the State is an insurer for the purposes of the made-whole laws and that it must conduct a made-whole analysis before exercising and subrogation/coordination of benefits rights. The State filed with the District Court a motion requesting that the court certify its decision to the Montana Supreme Court. The District Court granted the motion, and the Montana Supreme Court, over Plaintiffs' objection, ultimately agreed in a November 27, 2012, Order to hear this issue. The Plaintiffs also appealed to the Montana Supreme Court the District Court's definition of the class action.

On August 6, 2013, the Montana Supreme Court issued its opinion, affirming the Montana First Judicial District Court's decision defining the class action to include only those State benefit plan members who had timely filed claims for covered benefits within eight years before the filing of the Plaintiffs' complaint.

On November 6, 2013, the Montana Supreme Court issued its opinion, affirming the District Court's June 20, 2012, decision that the applicable made-whole laws apply to the State benefit plan.

On September 8, 2014, the District Court issued an order ruling on several motions that the parties had filed. The principal rulings were: (i) the Court authorized Plaintiffs to proceed with additional discovery to determine if the class definition should be altered or amended; (ii) given its order to allow additional discovery, the Court held in abeyance its decision on the State's Motion for Summary Judgment requesting that the class be limited to those who timely filed claims within the one-year filing restriction contained in the State's policy; (iii) the Court granted the Plaintiffs' motions asking the Court to require the State conform its health plans, procedures, notices and practices to comply with the Montana Supreme Court's rulings in this case and to pay covered medical expenses, await the resolution of claims against liability carriers, and then conduct a made-whole determination before it can exercise subrogation or accept reimbursements from its members or providers; and (iv) the Court ordered the parties to develop a class notice to be sent to past and current plan members dated back to eight years before this suit was filed. The State and Plaintiffs' counsel are currently working on the notice.

On April 13, 2015, the District Court issued an Order on Interest to Be Paid, requiring the State to include in the payments ultimately made to class members' interest at the rate of 10% per annum. For claims arising before December 24, 2009, interest will begin 30 days following the Montana Supreme Court's decision in Blue Cross and Blue Shield of Montana, Inc. v. Montana State Auditor. For any claims arising after December 24, 2009, interest will begin starting on the day the underlying medical expenses were incurred.

On October 5, 2015, the Plaintiffs filed with the District Court a motion directing the State to pay attorney fees arising from the class action suit. On November 9, 2015, the District Court issued an order denying Plaintiffs' motion for attorney fees.

On December 14, 2015, the District Court issued an order certifying that its orders concerning interest and attorney fees were final for purposes of an appeal to the Montana Supreme Court. On January 12, 2016, the Plaintiffs filed a Notice of Appeal with the Montana Supreme Court, appealing the interest and attorney fee orders.

Pursuant to the Montana Supreme Court's mandatory mediation process, the parties reached a settlement on attorney fee payments; however, the parties did not reach agreement on the interest issue. On October 25, 2016, the Montana Supreme Court issued its ruling on the interest issue, finding that November 14, 2009, is the date that interest commences; and, for claims arising after November 14, 2009, interest will begin starting on the day the underlying medical expenses were incurred.

As of June 30, 2016, the State booked an accrual of approximately \$1.5 million, which includes a base payment plus interest consistent with the District Court's April 13, 2015, order. Interest will be recalculated based on the Supreme Court's October 25, 2016, decision.

Since the case is ongoing, the State does not have sufficient information to determine the ultimate cost to the State.

Kohoutek, Inc. v. Montana involves a class action constitutional challenge to the state's statute governing compensation for mandatory case-lot sales of liquor. Agency liquor stores are required by statute to provide an 8% discount to liquor licensees for sales of unbroken case-lots. Section 16-2-101(2)(b)(ii)(B), MCA, provides for a weighted average discount ratio to offset for some or all of this mandatory case lot discount. The weighted average discount ratio is based on fiscal year 1994 sales. Plaintiffs contend that this provision, rooted in 1994 rather than based on actual sales, violates their rights to substantive due process and equal protection, and constitutes a taking.

Plaintiffs filed a Complaint for Declaratory, Injunctive, and Class Relief on March 25, 2014, before the Eighth Judicial District Court, ADV-14-181. The District Court for the Eighth Judicial District granted class certification by Order dated August 21, 2014. The case has been bifurcated into two parts: constitutionality and damages. The Court heard oral argument on the Plaintiffs' Motion for Partial Summary Judgment, addressing its constitutional claims, on January 20, 2015, and will decide on that issue in the near future.

On May 28, 2015, the District Court determined that Section 16-2-101(2)(b)(ii)(B), MCA, violated the plaintiffs' rights to substantive due process and to equal protection of the law because the state has continued to use 1994 sales information to reimburse agency liquor stores for the mandatory case lot discounts. Trial on the issue of damages is set for February 4 and 5, 2016.

On August 2, 2016, District Judge Greg Pinski ruled the damages due to the class is \$14.7 million. Further proceedings will be held in December 2016 to determine whether interest and attorney fees are due to the plaintiffs; however, it is anticipated that the total amount due to this litigation will exceed \$31 million.

Stretch v. State of Montana (Cause # DV-05-475A) is a class action wage claim for overtime wages for employees at Treasure State Correctional Training Center. The court recently granted Plaintiffs' motion to expand the class. The matter has been set for trial in late 2017. The parties are currently scheduled for settlement discussions in mid-December 2016. Plaintiffs claim that their damages run from \$2 to \$4 million. Plaintiffs recently offered to settle for \$1.5 million.

Barclay v. Montana Department of Corrections (Cause # DV-13-26) is a wage claim suit filed by 41 non-union employees at Montana State Prison (MSP). Plaintiffs claim the department failed to pay their wages under the 2010 market survey, since May 2012. They claim losses in excess of \$2 million in lost wages and penalties. The parties are currently engaged in discovery and are required to engage in a mandatory settlement conference. The case is currently scheduled for a jury trial in February 2017, but the parties anticipate seeking a new scheduling order and trial date.

Langford v. Bullock (Cause # 93-CV-46) is a civil rights case over conditions of confinement at Montana State Prison (MSP) in Deer Lodge, MT. The court imposed a consent decree against the department in 1994, with continued monitoring by the court until the Department is in full compliance. The consent decree obligates the State to come into full compliance with the Americans with Disabilities Act. Department has incurred costs to make upgrades to the physical infrastructure at MSP. Since about 2014, the department has assumed the additional responsibility to pay attorneys' fees and expert fees for Plaintiffs' counsel (ACLU). Currently, the parties are engaged in weekly conferences to reach the goal of final settlement of the remaining issue before February 1, 2017, as ordered by the court. At this time, the department cannot specify an anticipated amount of financial obligation.

Disability Rights Montana v. Batista (Cause # CV-15-22) is a civil rights case filed by ACLU on behalf of Plaintiff, alleging deliberate indifference in the provision of mental health care to seriously mentally ill inmates at MSP. The Plaintiff appealed the district court order, dismissing the case for failure to state a claim, to the Ninth Circuit Court of Appeals. The 9th Circuit "suggested" that the parties engage in mediation, so the department has exchanged settlement proposals with Plaintiff. The Plaintiff's counsel has presented an unrealistic settlement proposal, including construction of two separate housing units for mentally ill inmates and at least \$800,000 in attorneys' fees, continued monitoring of the facility and fees to pay the expert monitor. The Plaintiff's chances of success are not good, but the cost to defend could be expensive. At this time the department cannot specify an anticipated amount of financial obligation.

The Public Employee Retirement Board (PERB) has one item of outstanding litigation in relation to the Public Employees' Retirement System - Defined Contribution Retirement Plan. Refer to Note 6, section I for additional disclosure in relation to this legal proceeding.

The Montana State Fund, a discretely presented component unit of the State, has two items of litigation in relation to their operations and underlying statutory authority governing the program. Refer to Note 18, section N for additional disclosure in relation to these legal proceedings.

Federal Contingencies

Food Distribution Program – The amount reported for Food Distribution programs (CFDA #10.555, #10.565, #10.567, #10.569, and #10.570) represents the dollar value of food commodities distributed to eligible recipients during the year. The U.S. Department of Agriculture provides the current value of the commodities used by the State to compute the amount reported. The amount of funds received to administer the program is also included in the reported amount. The State also distributes food commodities to other states in the western region of the United States, the value of which is excluded from the reported amounts. During fiscal year 2016, the State distributed \$1.0 million of food commodities under CFDA #10.567 to other states.

The State of Montana distributed \$10.6 million in commodities in fiscal year 2016. The value at June 30, 2016, of commodities stored at the State’s warehouse is \$1.9 million for which the State is liable in the event of loss. The State has insurance to cover this liability.

Miscellaneous Contingencies

Loan Enhancements – As of June 30, 2016, the Board of Investments (BOI) had provided loan enhancements from the Coal Severance Tax Permanent Fund to the Municipal Finance Consolidation Act Bond Fund and the Facility Finance Authority (a component unit of the State of Montana), totaling \$177.2 million. The BOI’s exposure to bond issues of the Municipal Finance Consolidation Act Bond Fund was \$97.3 million, while exposure to bond issues, surety bonds, and designated loans of the Facility Finance Authority was \$79.9 million.

Gain Contingencies – Certain natural resource and corporate tax assessments are not reported on the State's financial statements because they are being protested administratively. As of June 30, 2016, the following assessments (by fund type) were outstanding (in thousands):

<u>Taxes</u>	<u>General Fund</u>
Corporate Tax	<u>\$42,354</u>
Total	<u><u>\$42,354</u></u>

Collectability of these contingencies is dependent upon the decisions of the court, other authorities, or agreed upon settlements. The corporate tax assessments include material estimates that could result in a significant reduction of the tax assessed once actual numbers are provided. Interest related to corporate tax assessments is distributed to the General Fund and is included in the assessment total above.

Loss Contingencies – Certain corporations have requested refunds that are not reported on the State’s financial statements as of June 30, 2016. The corporations have appealed the department’s decision to deny or adjust the refund. As of June 30, 2016, these include \$6.0 million of General Fund corporate tax refunds.

Certain companies have protested property taxes that have been included as revenue on the State’s financial statements as of June 30, 2016. As of June 30, 2016, these include \$3.4 million of protested property taxes recorded in the General Fund and \$3.9 million recorded in the State Special Revenue Fund. In addition, certain companies have appealed an additional \$5.6 million in regular property taxes recorded in the General Fund on the State’s financial statements.

NOTE 17. SUBSEQUENT EVENTS

Investment Related Issues

Since June 30, 2016, an additional \$50.0 million was committed to Montana Private Equity Pool fund managers and an additional \$45.0 million was committed to Montana Real Estate Pool fund managers by the Board of Investments (BOI).

Since June 30, 2016, the BOI made additional commitments to fund loans from the INTERCAP loan program in the amount of \$28.0 million.

From July 1 through December 12, 2016, the BOI received recovery payments associated with AFF Financing LLC holding of \$2.5 million, representing \$2.4 million in principal and \$60.0 thousand in interest. For the same period, the BOI received recovery payments associated with the Orion Finance collective holding of \$572.0 thousand with \$521.0 thousand and \$51.0 thousand applied to principal and interest, respectively. Both the principal and interest was treated as recovery money and applied to the reserve.

During July 2016, the BOI terminated one manager in Montana Domestic Equity Pool. A transition manager was hired to liquidate the portfolio and cash was transferred to another fund within the portfolio. The market value of the transfer was approximately \$63.0 million.

On August 16, 2016, the BOI approved two commercial loans for a total of \$3.1 million.

During October 2016, the BOI terminated one manager in the Montana Domestic Equity Pool. A transition manager was hired to liquidate the portfolio. The market value of the liquidation was approximately \$27.0 million.

The BOI exercised the United States Department of Agriculture - Rural Development's guarantee on two commercial loans outstanding in the principal amount of \$6.9 million. Payment was received October 19, 2016.

As of October 31, 2016, the Short-term Investment Pool will no longer participate in the Security Lending Program.

During the November 15-16, 2016, meeting of the BOI, the board approved the issuance of up to \$20 million in INTERCAP bonds on March 1, 2017. Up to \$8.5 million of the proceeds will be used to satisfy the BAN with the Permanent Coal Tax Trust Fund. Since June 30, 2016, an additional \$5.9 million has been recorded as an interentity loan payable to the Permanent Coal Tax Trust Fund. The proceeds funded six INTERCAP loan draws of a local government.

The BOI is in the process of working through a bankruptcy trustee to begin foreclosure on one commercial loan with an outstanding principal amount of \$1.2 million.

Other Subsequent Events

On August 2, 2016, \$3,000,000 was drawn for a Coal Severance Tax, taxable bond series 2016A, for the renewable resource loan program. The bond was purchased by the BOI.

On August 15, 2016, the Land Board approved, by vote of 5-0, a like-kind property exchange. The Old Amory at 1100 Last Chance Gulch and the Old Liquor Warehouse at 920 Front St. will be traded for a former Coca-Cola Warehouse located at 1698 A St.; all respective properties are located in Helena. Additional requirements must be met, such as renovations to the Coca-Cola Warehouse that are suitable to the State, prior to completion of the exchange.

On September 21, 2016, a complaint and proposed consent decree, related to the case of United States of America and State of Montana v. ExxonMobil Pipeline Company, No. 1:16-cv-00143-SPW-TJC, (United States District Court for the District of Montana, Billings Division) resulting from a July 2011 Yellowstone River oil spill near Laurel, was filed. The consent decree settles all natural resource damage claims of the U.S. and the State of Montana under the Oil Pollution Act and State CECRA for a total of \$12.0 million. The split of the settlement proceeds is \$2.5 million

for the U.S., and \$9.5 million for the State. The consent decree and a related restoration plan were subject to public comment. The Court then entered the consent decree on December 12, 2016, and settlement proceeds are due February 21, 2017.

On October 3, 2016, the Consumer Protection Bureau prevailed in the case State of Montana, ex rel. Tim Fox, Attorney General vs. Merck & Co., Inc., No. ADV 2005-899 (Mont. 1st Jud. Dist. Lewis & Clark County). The Bureau anticipates future receipt of \$9.9 million into its State Special Revenue reserve fund and a \$3.0 million distribution to the Montana Healthcare Foundation as a result of a Consent Judgment agreed to by the parties on this date.

The Hail Insurance program has experienced an approximate doubling of claims compared to prior growing seasons' occurrences. While the program has the resources to cover all claims incurred, participants may not receive premium refunds for multiple future years. See Note 8 for additional information related to this self-supported program.

On January 18, 2017, the Cascade County District Court approved mediation process agreements sought by the Risk Management and Tort Defense Division for additional groups of Libby Mine Claims. As a result, an amount of \$750.0 thousand has been paid. Within thirty days of the approval date, the State will pay an additional \$14.2 million and another \$10.0 million will be paid in July 2017. However, the State may be able to mitigate a portion or all of this payment should it receive a favorable outcome in a related case against NIC, a State insurer.

NOTE 18. COMPONENT UNITS**A. Condensed Financial Statements**

Below are the condensed financial statements of the component units for the State of Montana as of June 30, 2016 (in thousands):

	Condensed Statement of Net Position Component Units					
	Montana Board of Housing	Facility Finance Authority	Montana State Fund (1)	Montana State University	University of Montana	Total Component Units
Assets:						
Cash, investments and other assets	\$640,966	\$5,269	\$1,648,050	\$595,374	\$457,648	\$3,347,307
Due from primary government	-	-	-	458	1,341	1,799
Due from component units	-	-	-	57	226	283
Capital assets (net) (Note 18C)	3	-	28,843	459,067	359,388	847,301

(1) Includes non-employer pension revenue and payments for services provided.

(2) Effective January 1, 2016, Montana State Fund reports their financial statements on a calendar-year basis. The information provided is based on a six-month period, ending December 31, 2015.

B. Cash/Cash Equivalents and Investments

Due to the integration of funds and combined financial information, component unit cash and cash equivalents, equity in pooled investments and investments are included with the primary government in Note 3.

C. Capital Assets

The following table summarizes net capital assets reported by the discretely presented component units (in thousands). All component units, other than higher education units, are included under the “Other” caption for this schedule:

	Montana State University	University of Montana	Other	Total
Capital assets not being depreciated:				
Land	\$ 8,377	\$ 8,225	\$ 1,139	\$ 17,741
Construction work in progress	54,016	46,219	-	100,235

Discretely Presented Component Units capital assets, net	\$ 459,067	\$ 359,388	\$28,846	\$ 847,301

D. Other Postemployment Benefits (OPEB)

Non-university component units are included in the State of Montana benefit plan, whereas the Office of the Commissioner of Higher Education (included in the primary government otherwise) is included in the Montana University System benefit plan. For these reasons component unit OPEB information is included in Note 7.

E. Risk Management

Montana State Fund (MSF or New Fund) is the only component unit risk pool. Unpaid claims and claim adjustment expenses are estimated based on the ultimate cost of settling the claims including the effects of inflation and other societal/economic factors. There are no significant reductions in insurance coverage from the prior year, nor any insurance settlements exceeding insurance coverage for the last three years for MSF. This fund uses the accrual basis of accounting. MSF investments are recorded at fair value, and the premiums and discounts are amortized using the scientific interest method over the life of the securities.

(1) Montana State Fund (MSF) – This fund provides liability coverage to employers for injured employees who are insured under the Workers Compensation and Occupational Disease Acts of Montana and workers compensation claims occurring on or after July 1, 1990. MSF is a self-supporting, competitive State fund, and functions as the guaranteed market. At December 31, 2015, approximately 24,400 employers were insured with MSF. Anticipated investment income is considered for computing a premium deficiency, and employers must pay premiums to MSF within specified time frames.

An actuarial study prepared by Willis Towers Watson, as of December 31, 2015, estimated the cost of settling claims that have been reported, but not settled; and claims that have been incurred, but not reported. Due to the fact that actual claim costs depend on such complex factors as inflation and changes in the law, claim liabilities are recomputed periodically using a variety of actuarial and statistical techniques in order to produce current estimates that reflect recent settlements, claim frequency, and other economic and societal factors.

A provision for inflation is implicit in the calculation of estimated future claim costs because reliance is placed both on actual historical data that reflect past inflation and on other factors that are considered to be appropriate modifiers of past experience. As of December 31, 2015, \$900.3 million of unpaid claims and claim adjustment expenses were presented at face value.

Section 39-71-2311, MCA requires MSF to set premiums at least annually at a level sufficient to insure adequate funding of the insurance program during the period the rates will be in effect. It also requires MSF to establish a minimum surplus above risk-based capital requirements to support MSF against risks inherent in the business of insurance.

For the six-month period ended December 31, 2015, MSF ceded premiums to other reinsurance companies to limit the exposure arising from large losses. These arrangements consist of excess of loss contracts that protect against individual occurrences over stipulated amounts, and an aggregate stop loss contract which protects MSF against the potential that aggregate losses will exceed expected levels expressed as a percentage of premium. The excess of loss contract provides coverage up to \$100.0 million in which MSF retains the first \$5.0 million for the first layer of reinsurance coverage. The excess of loss protection applies to an individual occurrence with the maximum of \$5.0 million on any one life.

The term of the current aggregate stop loss contract was July 1, 2014 through December 31, 2016. The contract provides coverage based on MSF's premium levels not to exceed 15% of the subject net earned premium. In the event reinsurers are unable to meet their obligations, under either the excess of loss contracts or the aggregate stop loss contract, MSF would remain liable for all losses, as the reinsurance agreements do not discharge MSF from its primary liability to the policyholders.

Premium revenue was reduced by premiums paid for reinsurance coverage of \$5.5 million during the six-month period ended December 31, 2015.

Estimated claim reserves were reduced by \$10.8 million as of December 31, 2015 for the amount of reinsurance estimated to be ultimately recoverable on incurred losses due to the excess of loss reinsurance contract and an additional \$22.4 million for the amount of reinsurance estimated to be ultimately recoverable on incurred losses due to the aggregate stop loss contract.

(2) Changes in Claims Liabilities for the Past Two Years – As indicated above, this fund establishes liabilities for both reported and unreported insured events including estimates of future payments of losses and related claim adjustment expenses. The following table presents changes (in thousands) in the aggregate liabilities for Montana State Fund net of estimated reinsurance recoverable. The information presented is at face value and has not been discounted.

	Six Months Ended December 31, 2015
Unpaid claims and claim adjustments expenses at beginning of year	\$ 895,543
Incurring claims and claim adjustment expenses:	
Provision for insured events of the current year	72,200
Increase (decrease) in provision for insured events of prior years	(4,817)
Total incurred claims and claim adjustment expenses	67,383
Payments:	
Claims and claim adjustment expenses attributable to insured events of the current year	(8,090)
Claims and claim adjustment expenses attributable to insured events of prior years	(54,540)
Total payments	(62,630)
Total unpaid claims and claim adjustment expenses at end of year	\$ 900,296

F. Capital Leases/Installment Purchases

Obligations under capital leases/installment purchases at June 30, 2016, were as follows (in thousands):

Fiscal Year Ending June 30	Discretely Presented Component Units
2017	\$249
2018	175
2019	97
2020	62
2021	20
2022-2026	-
Total minimum payments	603
Less: interest	(53)
Present value of minimum payments	\$550

G. Operating Leases

Future rental payments under operating leases at June 30, 2016, are as follows (in thousands):

Fiscal Year Ending June 30	Discretely Presented Component Units
2017	\$ 4,598
2018	2,718
2019	2,488
2020	2,307
2021	1,274
2022-2026	2,874
2027-2031	1,491
Thereafter	2,833
Total future rental payments	<u>\$20,583</u>

H. Debt Service Requirements

Debt service requirements of discretely presented component units at June 30, 2016, were as follows (in thousands):

Year Ended June 30	Montana Board of Housing		Montana State University		University of Montana	
	Principal	Interest	Principal	Interest	Principal	Interest
2017	\$ 13,550	\$ 16,036	\$ 9,642	\$ 6,094	\$ 8,207	\$ 3,587
2018	15,325	15,741	8,995	5,834	8,506	3,293
2019	15,795	15,403	12,560	5,560	8,825	2,964
2020	16,265	15,010	9,180	5,242	9,220	2,611
2021	16,800	14,569	9,200	4,931	9,565	2,227
2022-2026	96,575	64,433	35,255	20,220	42,830	5,585
2027-2031	105,880	46,068	25,380	13,731	9,800	1,201

I. Summary of Changes in Long-term Liabilities Payable

Long-term liability activity of discretely presented component units for the year ended June 30, 2016, was as follows (in thousands):

	Beginning Balance (3)	Additions	Reductions	Ending Balance	Amounts Due Within One Year	Amounts Due In More Than One Year
Discretely presented component units						
Bonds/notes payable						
Montana Board of Housing	\$ 482,723	\$ 129,045	\$ 134,754	\$ 477,014	\$ 13,550	\$ 463,464
Montana State University (MSU)	168,723	4,805	9,589	163,939	9,642	154,297
University of Montana (UM)	108,670	-	8,284	100,386	8,241	92,145
Total bonds/notes payable (1)	760,116	133,850	152,627	741,339	31,433	709,906
Other liabilities						
Lease/installment purch payable	556	255	261	550	218	332
Compensated absences payable	60,312	31,613	30,161	61,764	31,207	30,557
Arbitrage rebate tax payable	904	310	453	761	409	352
Estimated insurance claims	895,543	67,383	62,630	900,296	126,298	773,998
Due to federal government	33,201	313	1,013	32,501	-	32,501
Derivative instrument liability	4,607	1,490	-	6,097	-	6,097
Reinsurance funds withheld	77,720	13,328	1,477	89,571	-	89,571
Unearned compensation	371	20	-	391	-	391
Net pension liability	163,178	29,601	14,079	178,700	-	178,700
OPEB implicit rate subsidy (2)	106,648	9,833	1,587	114,894	-	114,894
Total other liabilities	1,343,040	154,146	111,661	1,385,525	158,132	1,227,393
	\$2,103,156	\$287,996	\$264,288	\$2,126,864	189,565	1,937,299
Long-term liabilities of Montana University System component units (4)					(95)	2,564
Total discretely presented component units long-term liabilities					\$189,470	\$1,939,863

(1) When applicable, this amount includes unamortized discounts and unamortized premiums.

(2) The OPEB plan allows retirees to participate, as a group, at a rate that does not cover all the related costs. This results in the reporting of an "implicit rate" subsidy in the related financial statements. While this liability is disclosed for financial purposes, it does not represent a legal liability of the State, or any of its component units.

(3) Beginning balances are taken from component unit financial statements.

(4) Interentity transaction eliminations between Montana University System component units for debt shown in the component unit information can cause negative balances in component unit information.

J. Refunded and Early Retired Debt

Universities

Defeased Debt Outstanding

The University of Montana has defeased certain bond issues by placing proceeds of new bonds in an irrevocable trust. The proceeds, together with interest earned thereon, will be sufficient for future debt service payments on the refunded issues. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the University's consolidated financial statements. As of June 30, 2016, \$113.6 million of bonds outstanding were considered defeased.

K. No-Commitment Debt

Information is presented below for financing authorities participating in debt issues. The State has no obligation for this debt. Accordingly, these bonds and notes are not reflected in the accompanying financial statements.

Facility Finance Authority (FFA)

The FFA is authorized to issue bonds and notes to finance projects for qualifying health care and other community-based service providers. The revenue bonds are payable solely from loan repayments to be made by eligible facilities pursuant to loan agreements, and further, from the funds created by the indentures and investment earnings thereon. The notes are payable solely from loan repayments pursuant to loan agreements. The revenue bonds and notes payable issued by the FFA do not constitute a debt, liability, obligation, or pledge of faith and credit of the State of Montana, with the exception of the Montana State Hospital Project included in Note 11. At June 30, 2016, revenue bonds and notes outstanding aggregated \$966 million.

The Board of Investments and the FFA have entered into a capital reserve account agreement for certain bond issues. See Note 16 for more information.

Montana Board of Housing (MBOH)

The MBOH is authorized to issue bonds and make mortgage loans in order to finance affordable housing for Montana residents. The bonds are special limited obligations, payable solely from pledged revenues and assets of the borrower, not general obligations of the MBOH. These bonds issued by the MBOH do not constitute a debt, liability, obligation, or pledge of faith and credit of the State of Montana. At June 30, 2016, bonds outstanding aggregated \$14.8 million.

L. Derivative Transactions Related to Long-term Debt

Montana State University (MSU) has two interest rate swaps as of June 30, 2016. Interest rate swaps are classified as hedging derivative instruments if the instruments meet the criteria of paragraphs 27 (a) and (b) of GASB Statement No. 53 – Accounting and Financial Reporting for Derivative Instruments (GASB 53), or as investment derivative instruments if they do not.

<u>Derivative Description</u>	<u>Trade Date</u>	<u>Effective Date</u>	<u>Termination Date</u>	<u>Terms</u>	<u>Counterparty</u>
\$25.75 million fixed payer swap	3/10/2005	7/21/2005	*11/15/2035	Pay 3.953%, Receive SIFMA	Deutsche Bank AG
\$25.25 million basis swap	12/19/2006	11/15/2007	11/15/2035	Pay SIFMA, Receive 86.8% of 10-year SIFMA	Morgan Stanley Capital Services Inc.

* Counterparty may opt out in 2016

As of June 30, 2016, the fixed payer swap is classified as a hedging derivative instrument under GASB 53, whereas the basis swap is an investment derivative instrument because there is no identified financial risk being hedged by the basis swap that can be expressed in terms of exposure to adverse changes in cash flows or fair values. GASB 53 includes four methods for evaluating hedge effectiveness; a governmental entity may use any of the evaluation methods outlined in GASB 53 and is not limited to using the same method from period to period. The four methods described in GASB 53 are: consistent critical terms, synthetic instrument, dollar-offset, and regression analysis. In Addition, GASB 53 permits a governmental entity to use other quantitative methods that are based on “established principles of financial economic theory.” The fixed payer swap passes the established criteria using the regression analysis methodology.

The fair values of the interest rate swaps were estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on the date of each future net settlement on the swaps. To measure non-performance risk for a derivative liability, credit spreads implied by the credit rating for debt issues by entities with similar credit characteristics were used. This is the best method available under current market conditions since MSU has no credit default swaps that actively trade in the marketplace. For a derivative asset, the adjustment for non-performance risk of counterparties was determined by analyzing counterparty-specific credit default swaps, if available. If not available, credit default swaps in the market for entities of similar type and rating were used, along with information found in various public

and private information services. This analysis is used to construct a credit curve that is applied to the discount curve on the net settlement payments of the derivative.

The counterparty to the fixed payer swap had the right to terminate the swap at \$0 on December 14, 2016 (a European option); this option was not exercised. The value of the cancellation option was included within the derivative structure, resulting in an off-market (i.e., lower) fixed swap rate. As of the trade date, the option's value included intrinsic value and time value. The option's intrinsic value (calculated as the difference between the at-market rate of 4.11% and the off-market rate of 3.953%) is accounted for as a loan receivable and is repaid by the off-market portion of each swap payment. The option's time value, which will always be negative to MSU and will equal \$0 on the option's expiration date, is reported as deferred investment revenue. On September 10, 2010, the Series J bonds were converted to index bonds. While in index mode the interest rate is reset weekly at a rate of the Securities Industry and Financial Markets Association (SIFMA) rate plus a fixed spread. The spread is based on the long-term, unenhanced rating assigned to the issuer; the current spread as of June 30, 2016, was 0.65%. The dependent variable in the regression is the interest rates of the hedged cash flows; the independent variable is the floating rates due under the hedging derivative.

The fair value of the fixed payer swap liability as of June 30, 2016, is at fair value level 2, and was based on forward SIFMA rates using the three month Libor Zero Curve, and the BMA Swaption Volatility on the AA Rated Muni Revenue Curve. The fair value of the nonhedging derivative investment is also at level 2, and was based on forward SIFMA rates using the 10-year forward BMA constant maturity swap using the three month Libor Zero Curve, and the BMA Swaption Volatility on the counterparty's credit default swap.

The following table summarizes the reported balances as of, and the derivative instrument activity during, the year ended June 30, 2016 (in thousands):

Cash flow hedges:	Notional	Activity During 2016		Fair Values at June 30, 2016	
		Classification	Amount	Classification	Amount
Cash flow hedge –					
Pay fixed interest rate swap	\$21,200	Interest expense	\$ 20	Loan receivable	<u>\$ 268</u>
		Investment income	20	Derivative liability	<u>6,097</u>
		Deferred outflow	1,512		
Investment derivative –					
Basis swap	\$21,200	Investment revenue	\$16	Investment (excluding interest accrued)	<u>\$1,271</u>

The objective and terms of MSU's hedging derivative outstanding as of June 30, 2016, is as follows (in thousands):

Type	Objective	Notional amount	Effective Date	Termination Date	Cash (Paid)/ Received	Terms
Pay fixed, cancelable interest rate swap	Hedge interest rate risk on Series J 2005 Bonds	\$21,200	7/21/2005	11/15/2035	-	Pay 3.953% Receive SIFMA

Credit Risk

It is MSU's policy to enter into derivative agreements with highly rated counterparties. As of June 30, 2016, counterparty ratings were A3 and Baa2 by Moody's and BBB+ and BBB+ by Standard and Poor's (S&P). MSU manages credit risk by requiring its counterparties to post collateral in certain events. MSU is entitled to collateral from its fixed payer swap counterparty if the interest rate swap's fair value is greater than \$5 million and the counterparty is rated A+ or A, by S&P, or A1 or A2 by Moody's. If the counterparty to the fixed payer swap is rated A- or below, by S&P, or A3 or below by Moody's, MSU is entitled to collateral up to 100% of the swap's fair value. MSU is not required to post collateral. MSU will continue to monitor counterparty credit risk.

MSU enters into derivative agreements with multiple counterparties to limit concentration of credit risk. Currently, MSU has interest rate swaps with two different counterparties and each counterparty accounts for approximately 50% of outstanding notional. MSU monitors counterparty credit risk on an ongoing basis.

Interest Rate Risk

Interest payments on variable rate debt will typically increase as interest rates increase. MSU believes it has significantly reduced interest rate risk by entering into a pay-fixed, receive floating interest rate swap. As interest rates increase, net swap payments decrease so that changes in hedged variable-rate debt interest payments, attributable to SIFMA, are largely offset by the net swap payments.

Basis Risk

The variable-rate cash flows being hedged by the pay-fixed swap will increase or decrease as SIFMA rates increase or decrease. Because the hedged cash flows are SIFMA based and the floating receipts of the pay-fixed swap are SIFMA based, there is no basis risk.

Termination Risk

MSU or its counterparties may terminate a derivative instrument if the other party fails to perform under the terms of the contract. In addition, MSU's fixed payer swap counterparty has the right to terminate the derivative if the credit rating of MSU's unenhanced long-term revenue bond rating is withdrawn, suspended or reduced below BBB-, in the case of S&P, or below Baa3 in the case of Moody's. If such an event occurs, MSU could be forced to terminate the fixed payer swap in a liability position. As of June 30, 2016, MSU's unenhanced long-term revenue bond rating was Aa3 by Moody's and A+ by S&P.

Rollover Risk

MSU's hedging derivative includes a cancellation option which allows the counterparty to cancel the swap on December 14, 2016. Should the counterparty exercise its option, MSU would be exposed to rollover risk as exercise would only be likely in a rate environment higher than that at the time the trade was originally entered into.

Foreign Currency Risk

All hedging derivatives are denominated in US Dollars and therefore MSU is not exposed to foreign currency risk.

Market Access Risk

Market access risk is the risk that MSU will not be able to enter credit markets or that credit will become more costly. For example, to complete a derivative instrument's objective, an issuance of refunding bonds may be planned in the future. If at that time MSU is unable to enter credit market, expected cost savings may not be realized.

M. Related Party Transactions

Private nonprofit organizations with relations to the University of Montana (UM) include the Alumni Association, the Montana Technology Enterprise Center (MonTEC), the Montana Tech Booster Club and the Montana Tech Alumni Association.

The associations and the booster club operate exclusively for the purpose of encouraging, promoting and supporting educational programs, research, scholarly pursuits and athletics at, or in connection with, UM. For the year ended June 30, 2016, \$112.4 thousand was transferred from or expended by the Montana Tech Booster Club for scholarships and construction projects. In exchange, UM provides the associations and the booster club with office space, staff and some related office expenses.

MonTEC was established as a nonprofit 501(C)(3) corporation in fiscal year 2001 as a result of an agreement between UM and the Missoula Area Economic Development Foundation (MAEDF). MonTEC provides low cost lease space and business consulting to local “start-up” companies. The corporation’s board of directors is comprised equally of members appointed by MAEDF and UM.

Private nonprofit organizations affiliated with Montana State University (MSU) include the MSU-Bozeman Bookstore, Friends of KUSM, and Friends of KEMC. Friends of Montana Public Television provided \$1.1 million during 2016 and Friends of KEMC Public Radio provided \$865.0 thousand during 2016 in support of MSU’s television and radio stations.

N. Litigation Contingencies

Susan Hensley v. Montana State Fund Montana State Fund received a Petition for Hearing that was filed before the Workers’ Compensation Court in October, 2013. The matter is Susan Hensley vs. Montana State Fund, WCC No. 2013-3235. Under House Bill 334, as passed by the legislature in 2011 and codified in 39-71-703 (2), MCA, when a claimant receives a Class I impairment, it is not payable unless the claimant has an actual wage loss as a result of the compensable injury or occupational disease. The law was effective July 1, 2011, and applicable to claims that occurred on or after that date. The petitioner in this matter is challenging the constitutionality of 39-71-703 (2), MCA. State Fund anticipates the chances are remote, but as with any litigated matter there is the possibility of an adverse decision. Should the statute be held unconstitutional, determined to be applicable to other claims and also determined to be retroactively applicable, potential liability is estimated to be at least \$2.2 million per year, as based on NCCI initial pricing, and current estimated business volumes.

Montana State Fund received another Petition for Hearing that was filed before the Workers’ Compensation Court. The matter is **Steven Hanson vs. Montana State Fund**, WCC No. 2014-3398. This is a companion case to Susan Hensley v. Montana State Fund and has been held in abeyance pending a decision in Hensley.

O. Subsequent Events

Subsequent to June 30, 2016, the Montana State University drew an additional \$2.8 million on its Series C bonds, bringing the total outstanding as of December 9, 2016, to \$7.6 million. The University is committed to draw a total of \$16.5 million through February of 2018, as funds are required to complete its parking garage and new dining hall.

On July 1, 2016, a promissory note was entered into between the Montana Facility Finance Authority (FFA) and Gateway Community Services for \$32.0 thousand for the approximate cost of FFA purchasing a condo unit during remediation of defaulted loans.

On August 3, 2016, a \$771.0 thousand loan was made to Northeast Montana Health Services from the Trust Fund Loan Program to finance the costs associated with the purchase of replacement boilers and asbestos mitigation.

On August 17, 2016, \$20.5 million of bonds were issued for North Valley Hospital to refinance bonds issued by the FFA in 2012 and 2014. The refinancing was necessary because of an affiliation with Kalispell Regional Healthcare System. The refinancing also reduced the interest rate and extended the term of the bonds.

On September 16, 2016, the Montana State Fund Board of Directors declared a \$35.0 million dividend at their board meeting. The dividend payments were issued in November 2016 to eligible policyholders for the 2014 policy year.

On September 28, 2016, \$50.8 million of bonds were issued for Providence St. Joseph Health to refund bonds issued in 2006 by the FFA for Providence Health & Services. The 2016 issuance will bring the 2006 debt into the new obligated group formed by the merger of Providence Health & Services and St. Joseph Health System.

On October 5, 2016, \$17.9 million of bonds were issued for St. Luke Community Healthcare to redeem bonds originally issued by the FFA in 2006. The Series 2016 bonds reduced the interest rate of the prior bonds.

On October 11, 2016, \$2.1 million of bonds were issued for Marias Medical Center to refinance bonds originally issued by the FFA in 2005. The Series 2016 bonds reduced the interest rate of the prior bonds.

On October 14, 2016, a \$100.0 thousand Direct Loan was made to McCone County Health Center by the FFA to finance the purchase, move and installation of a modular building to house traveling professionals.

On October 21, 2016, \$3.1 million of bonds were issued for Boyd Andrew Community Services to refinance bonds originally issued by the FFA in 2006. The Series 2016 bonds reduced the interest rate of the prior bonds.

On October 27, 2016, a \$245.0 thousand loan was made to Broadwater Health Center by the FFA to purchase lab equipment and a house for the use of locum physicians and offices.

In November 2016, the Montana State University received approval from the Board of Regents' to negotiate a long-term land and building lease at a cost of approximately \$2 million per year for up to ten years, with renewal options at a land-lease only rate for five or more years thereafter. The leased facility will be used to conduct classified research that is expected to be funded by governmental grants. Lease negotiations were not yet complete as of December 9, 2016.

On November 10, 2016, \$141.3 million of bonds were issued for Benefis Health System to refinance bonds issued by the FFA in 2007 and 2011. The Series 2016 bonds reduced the interest rate of the prior bonds.

On December 31, 2016, the Executive Director of the FFA retired.

On December 31, 2016, the President of the University of Montana departed from the institution.

NOTE 19. MATERIAL VIOLATIONS OF FINANCE-RELATED LEGAL PROVISIONS**Constitutionality of Retirement Plan Funding**

The Montana Constitution, Article VIII, Section 15, states that public retirement systems shall be funded on an actuarially sound basis. Public pension plans are considered actuarially sound if the unfunded accrued actuarial liability amortization period is less than 30 years. As of June 30, 2016, the Sheriffs' Retirement System (SRS), the Game Warden & Peace Officers' Retirement System (GWPORS), and Public Employees' Retirement System-Defined Contribution Retirement Plan Disability Other Post Employment Benefit (PERS-DCRP Disability) plans were not in compliance and do not amortize. The unfunded liabilities in the other state retirement systems amortize in less than 30 years as of the fiscal year ended June 30, 2016.

NOTES TO THE REQUIRED SUPPLEMENTARY INFORMATION

NOTE RSI – 1. BUDGETARY REPORTING

A. State Budget Process

The Montana Legislature meets in the odd-numbered years to prepare annual budgets for the next biennium. The Constitution requires that legislative appropriations not exceed available revenues. The Legislature uses revenue estimates in the budgetary process to establish appropriation levels. Expenditures may not legally exceed budget appropriations at the fund level. In addition, the State Constitution prohibits borrowing to cover deficits incurred because appropriations exceeded anticipated revenues. State law requires an appropriation for disbursements from the general, special revenue and capital projects funds, except for those special revenue funds from non-state and non-federal sources restricted by law or by the terms of an agreement. The level of budgetary control is established by fund type, except capital project funds, which are at project level. Budgets may be established in other funds for administrative purposes.

Agency budget requests are submitted to the Governor, and the Legislative Fiscal Division receives a copy. The Office of Budget and Program Planning (OBPP) and the Governor analyze the requests, establish priorities, and develop the requests into the executive budget request submitted to the Legislature. Joint appropriations subcommittee hearings are held, and an omnibus appropriation bill is reported in the House and subsequently sent to the Senate. The Legislature generally enacts one bill to establish the majority of appropriations for the next two fiscal years. OBPP establishes appropriations for each program by accounting entity (fund) within an agency. The Legislature enacts other appropriations, but only within the available revenue. Agencies must prepare and submit to the budget director operational plans showing the allocation of operating budgets by expenditure category (i.e., personal services, operating expenses, equipment, etc.). The budget director or other statutorily designated approving authority may authorize changes among expenditure categories and transfers between program appropriations.

Appropriations may not be increased by amendment in the General Fund. However, a department, institution, or agency of the executive branch desiring authorization to make expenditures from the General Fund during the first fiscal year of the biennium from appropriations for the second fiscal year of the biennium may apply for authorization from the Governor through the budget director. In the second year of the biennium, during the legislative session, the Legislature may authorize supplemental appropriations. The Governor, or designee, may approve budget amendments for non-general fund monies not available for consideration by the Legislature and for emergencies. In the accompanying financial schedule, original and final budget amounts are reported. There were no expenditures in excess of total authorized appropriations in the State's budgeted funds for the fiscal year.

Appropriations for debt service activities are continuing through statutory authority until the obligation is extinguished. Because these non-operating budgets primarily serve a management control purpose, and related appropriations are continuing in nature, no comparison between budgeted and actual amounts for funds budgeted on this basis is provided.

Appropriations for capital projects funds are not made on an annual basis, but are adopted on a project-length basis. Because these non-operating budgets primarily serve a management control purpose, and related appropriations are continuing in nature, no comparison between budgeted and actual amounts for funds budgeted on this basis is provided.

Appropriations may be continued into the next fiscal year when authorized by the Legislature or the Governor's Office. After fiscal year-end, appropriations that are not continued are reverted. The reverted appropriations remain available for one fiscal year for expenditures that exceed the amount accrued or encumbered. Fund balances are not reserved for reverted appropriations. For fiscal year 2016, reverted governmental fund appropriations were as follows: General Fund - \$26.3 million, State Special Revenue Fund - \$145.2 million, and Federal Special Revenue Fund - \$104.1 million. Agencies are allowed to carry forward 30% of their reverted operating appropriations into the next two fiscal years. This amount can be used for new expenditures at the request of the agency and upon approval of OBPP.

B. Budget Basis

The Legislature's legal authorization ("appropriations") to incur obligations is enacted on a basis inconsistent with Generally Accepted Accounting Principles (GAAP). The budget basis differs from GAAP for encumbrances outstanding at fiscal year-end, compensated absences, capital assets and inventories purchased in proprietary funds, certain loans from governmental funds, and other miscellaneous nonbudgeted activity.

Judges' Retirement System
Notes to Required Supplementary Information
For the Year Ended June 30, 2016

Method and assumptions used in calculations of contractually determined contributions: The contractually required contribution rates are determined on an annual basis for the fiscal year beginning July 1, 2015, determined as of June 30, 2015.

The following key methods and assumptions were used to determine the contractual contribution rates reported in that schedule:

Timing	ADC rates are calculated based on the actuarial valuation just prior to the beginning of the plan year
Actuarial cost method	Entry age
Amortization method	Level percentage of payroll, open
Remaining amortization period	30 years
Amortization growth rate	4.00%
Asset valuation method	4-year smoothed market
Inflation	3.00%
Salary increases	4.00%
Investment rate of return	7.75%, net of investment expense
Mortality (healthy)	Sex distinct RP-2000 combined mortality projected to 2015 using scale AA

Changes of assumptions: No changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date.

Method and assumptions used in calculations of contractually determined contributions: The contractually determined contribution rates are set forth by the Legislature and are contained within the Montana Code Annotated (MCA). The amounts used for the valuation as of the year ended June 30, 2015, are as follows:

Special Funding

The State contributes 0.1% of member compensation on behalf of local government entities per Section 19-3-319, MCA.

The State contributes 0.37% of member compensation on behalf of school district entities per Section 19-3-319, MCA.

Not Special Funding

The State contributes a portion of Coal Severance Tax income and interest earnings from the Coal Trust Permanent Trust fund in accordance with Section 15-35-108, MCA.

Changes of assumptions: No changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date.

**Firefighters' Unified Retirement System
Notes to Required Supplementary Information
For the Year Ended June 30, 2016**

Method and assumptions used in calculations of contractually determined contributions: The contractually required contribution rates are determined on an annual basis for the fiscal year beginning July 1, 2015, determined as of June 30, 2015. The following actuarial methods and assumptions were used to determine contractual contribution rates reported in that schedule:

Timing	Actuarially determined contribution rates are calculated based on the actuarial valuation just prior to the beginning of the plan year
Actuarial cost method	Entry age normal
Amortization method	Level percentage of payroll, open
Remaining amortization period	30 years
Amortization growth rate	4.00%
Asset valuation method	4-year smoothed market
Inflation	3.00%
Salary increases	4.00% plus merit/seniority increases where applicable
Investment rate of return	7.75%, net of pension plan investment expense, and including inflation
Mortality	Sex distinct RP-2000 combined mortality projected to 2015 using scale AA

Changes of assumptions: No changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date.

Notes to Required Supplementary Information
For the Year Ended June 30, 2016

Method and assumptions used in calculations of statutorily determined contributions: The statutorily determined contribution rates are set forth by the Legislature and are contained within the Montana Code Annotated (MCA). The amounts used for the valuation as of the year ended June 30, 2015, are as follows:

The State contributes 32.61% of member compensation on behalf of all employer entities per Section 19-13-604, MCA.

Changes of assumptions: No changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date.

**Teachers' Retirement System
Notes to Required Supplementary Information
For the Year Ended June 30, 2016**

Changes of assumptions: The following changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date:

- Correctly reflect the proportion of members that are assumed to take a refund of contributions upon termination and appropriately reflect the three year COLA deferral period for Tier 2 members.
- The 0.63% load applied to the projected retirement benefits of the university members “to account for larger than average annual compensation increases observed in the years immediately preceding retirement” should not be applied to benefits expected to be paid to university members on account of death, disability and termination (prior to retirement eligibility).
- The actuarial valuation should be updated so that the assumed rate of retirement for university members at age 60 is 8.50% as stated in the actuarial valuation report.
- The actuarial valuation should be updated to reflect the fact that vested terminations are only covered by the \$500 death benefit for the one year following their termination and, once again when the terminated members commences their deferred retirement annuity (they are not covered during the deferral period). Additionally, only the portion of the terminated members that are assumed to “retain membership in the TRS” should be covered by the \$500 death benefit after termination.

Method and assumptions used in calculations of actuarially determined contributions: The actuarially determined contribution rates are determined on an annual basis for the fiscal year beginning July 1, 2015, determined as of June 30, 2015.

The following actuarial methods and assumptions were used to determine actuarial contribution rates reported in that schedule:

Actuarial cost method	Entry age
Amortization method	Level percentage of pay, open
Remaining amortization period	26 years
Asset valuation method	4-year smoothed market
Inflation	3.25%
Salary increase	4.00% to 8.51% percent, including inflation for Non- University Members and 5.00% for University Members
Investment rate of return	7.75%, net of pension plan investment expense, and including inflation

Notes to Required Supplementary Information
For the Year Ended June 30, 2016**

Method and assumptions used in calculations of contractually determined contributions: The contractually required contribution rates are set forth by the Legislature and are contained within the Montana Code Annotated (MCA). The amounts used for the valuation as of the year ended June 30, 2015, are as follows:

The State contributes 0.11% of the compensation of members participating per Section 19-20-604, MCA.

The State contributes 2.38% of member compensation on behalf of school district and community college entities per Section 19-20-607, MCA.

The State contributes a \$25 million payment from the General Fund per Section 19-20-607, MCA.

Changes of assumptions: No changes in assumptions or other inputs that affected the measurement date have been made since the prior measurement date.

REQUIRED SUPPLEMENTARY INFORMATION

NOTE RSI – 3. OTHER POSTEMPLOYMENT BENEFITS PLAN INFORMATION (OPEB)

The State of Montana and MUS OPEB plans allow retirees to participate, as a group, at a rate that does not cover all of the related costs. This results in the reporting of an “implied rate” subsidy in the related financial statements and footnotes. While this liability is disclosed for financial statement purposes, it does not represent a legal liability of the State or any of its component units.

In accordance with GASB Statement No. 45, the following information is presented to reflect the funding progress of the Other Postemployment Benefits Plans.

Other Postemployment Benefits Plan Information Schedule of Funding Progress <i>(in thousands)</i>						
Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability(AAL) Entry Age (b)	Unfunded (UAAL) (b-a)	Funded Ratio (a/b)	Annual Covered Payroll (c)	UAAL as Percentage of Covered Payroll ((b-a)/c)

REQUIRED SUPPLEMENTARY INFORMATION

NOTE RSI – 4. RISK MANAGEMENT TREND INFORMATION

The following tables present risk management trend information for the Hail Insurance Fund and the MUS Group Benefits Fund. The Hail Insurance Fund pays claims within a calendar year cycle that parallels the growing season from spring planting to fall harvesting; therefore, it has no development cycle. The MUS Group Benefits Fund has a three to five-year development cycle.

The tables illustrate how the earned revenues (net of reinsurance) of the funds and their investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the funds as of the end of the fiscal year (in thousands). Section 3 shows the funds' incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred. Section 4 shows the cumulative amounts paid as of the end of successive years for each policy year. Section 6 shows how each policy year's incurred claims increased or decreased as of the end of successive years. This annual re-estimation results from new information received on known claims, reevaluation of existing information on known claims, as well as emergence of new claims not previously known. Section 7 compares the latest re-estimated incurred claims amount to the amount originally established (Section 3) and shows whether this latest estimate of claims cost is greater or less than originally thought. As data for individual policy years mature, the correlation between original estimates and re-estimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years. This table will be revised as data for successive policy years develops.

**STATE OF MONTANA
NOTES TO THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
FOR THE FISCAL YEAR ENDED JUNE 30, 2016**

Note 1. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying Schedule of Expenditures of Federal Awards includes the federal award activity of the state of Montana under programs of the federal government for the fiscal year ended June 30, 2016. The information in this schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (referred to as the "Uniform Guidance"), and where applicable, Office of Management and Budget Circular A-133 requirements.

Because this schedule presents only a selected portion of the operations of the state of Montana, it is not intended to, and does not present, the financial positions, change in net assets, or cash flows of the state.

Significant Accounting Policies

Expenditures shown on the Schedule of Expenditures of Federal Awards are reported on the modified accrual basis of accounting, except as noted below. Under the modified accrual basis of accounting, expenditures are recorded in the accounting period in which the liability is incurred.

Such expenditures are recognized following the cost principles contained in the Uniform Guidance, OMB Circular A-87, or other costs circulars wherein certain types of expenditures are not allowed or are limited as to reimbursement. Negative amounts shown on the schedule represent adjustments or credits made in the normal course of business to amounts reported as expenditures in prior years.

The Unemployment Insurance, Section 8 Voucher, and Section 8 Project-Based programs are accounted for as enterprise fund activity. Enterprise funds use the full accrual basis of accounting.

Loan and Loan Guarantees (Note 2), Federal Excess Personal Property (Note 6), and the Department of Defense Firefighting Property (Note 7) are presented on the basis of accounting described in each note. The Books for the Blind and Physically Handicapped Program (Note 8) is not presented on the Schedule of Expenditures of Federal Awards but is provided as additional information regarding the types of donations received by the state as part of this federal program.

The state of Montana did not elect to use the 10% de minimis indirect cost rate allowed under the Uniform Guidance.

Food Distribution Program

The amount reported for Food Distribution programs (CFDA #10.555, #10.565, #10.567, #10.569, and #93.053) represents the dollar value of food commodities distributed to eligible recipients during the year. The U.S. Department of Agriculture provides the current value of the commodities used by the state to compute the amount reported. The amount of funds received to administer the program is also included in the reported amount. Montana also distributes food commodities to other states in the western region of the United States. During fiscal year 2016, Montana distributed \$1,040,625 of food commodities under CFDA #10.567 to other states.

The state of Montana distributed \$10,647,333 in commodities in fiscal year 2016. The value at June 30, 2016 of commodities stored at the state's warehouse is \$1,882,775, for which the state is liable in the event of loss. The state has insurance to cover this liability.

Minority Health and Health Disparities Research

The amount reported for the Minority Health and Health Disparities Research Program (CFDA #93.307) includes endowment funds of \$9,375,000, along with interest earned on the endowment. The entire endowment amount is reported as expended each year, as the funds are restricted for the life of the endowment.

Immunization Cooperative Agreements

The amount reported for the Immunization Cooperative Agreements (CFDA #93.268) includes the dollar value of vaccine doses received during fiscal year 2016. The state used the Centers for Disease Control's price list to calculate the value of doses received. During fiscal year 2016, Montana received 172,687 vaccine doses valued at \$10,328,582.

Note 2. Loan and Loan Guarantee Programs

The following loan and loan guarantee programs are reported on the Schedule of Expenditures of Federal Awards at their July 1, 2015 beginning loan balance plus the amount of any interest subsidy, cash, or administrative cost allowance received during fiscal year 2016:

CFDA #	Federal Loan/Loan Guarantee Program State Revolving Loans	FY 2016 Ending Balance
66.458	Capitalization Grants for Clean Water State Revolving Funds	\$ 267,269,399
66.468	Capitalization Grants for Drinking Water State Revolving Funds	\$ 132,076,760
	Total Loan Programs	\$ 399,346,159

CFDA #	Federal Loan/Loan Guarantee Program Student Financial Assistance	FY 2016 Ending Balance
84.032	Federal Family Education Loans	\$71,330,772
84.038	Federal Perkins Loan Program	\$31,718,993
93.364	Nursing Student Loans	\$2,166,740
93.264	Nurse Faculty Loan Program	\$17,721
93.342	Health Professions Student Loans	\$148,150
	Total Loan Programs	\$105,382,376

Economic Adjustment Assistance Program

The Economic Adjustment Assistance Program (CFDA #11.307) is reported on the Schedule of Expenditures of Federal Awards at its June 30, 2016 ending loan balance. The amount of loans outstanding as of June 30, 2016 is \$3,202,401.

The following loans, originally funded through federal programs, do not have any continuing federal compliance requirements imposed on the state, other than the loan repayments. These loans are not reported on the Schedule of Expenditures of Federal Awards:

Tongue River –Northern Cheyenne Tribal Loan

The Northern Cheyenne Tribe and the Department of Natural Resources and Conservation entered into an agreement on July 1, 1994 in which the tribe agreed to loan the state of Montana \$11,300,000 of federal funds appropriated as part of the Northern Cheyenne Indian Reserved Water Rights Settlement. The loan is to assist the state in financing costs of the Tongue River Dam project. No expenditures of tribal loan funds were incurred on project costs during fiscal year 2016. The amount of the loan outstanding as of June 30, 2016 is \$6,374,359.

Middle Creek Dam Rehabilitation Project Loan

The Department of Natural Resources and Conservation and the U.S Department of the Interior, Bureau of Reclamation (BOR), entered into an agreement on September 21, 1990. The BOR agreed to loan the state of Montana "...a sum of money not to exceed the lesser of (1) \$3,023,925 plus reimbursable interest during construction, or (2) the actual cost of the project, including reimbursable interest during construction..." The total loan repayable is \$2,990,129, and reimbursable interest during construction is \$281,857. As of June 30, 2016, the loan outstanding is \$2,019,679, and reimbursable interest during construction is \$180,279.

Note 3. Type A Federal Programs

The State of Montana issues a biennial single audit report. The Montana Single Audit report for the two fiscal years ended June 30, 2017 will be issued by March 31, 2018.

The Type A program threshold will be determined based on actual expenditures incurred during the two fiscal years ended June 30, 2017.

Note 4. CFDA Number

The CFDA number assigned for each federal program listed in the Schedule of Expenditures of Federal Awards is based upon agency agreements with the federal government and the Catalog of Federal Domestic Assistance in effect during the audit period.

The complete CFDA number is a five-digit number, where the first two digits represent the federal agency and the second three digits represent the program. Programs not assigned a CFDA number in the Catalog of Federal Domestic Assistance were assigned a CFDA number in the format **.UXX or **.RD. Also refer to Note 12.

Note 5. Research and Development Grants

Research and Development includes all research activities, both basic and applied, and all development activities that are performed by a non-federal entity. Research is defined as a systematic study directed toward fuller scientific knowledge or understanding of the subject studied. The term research also includes activities involving the training of individuals in research techniques, where such activities utilize the same facilities as other research and development activities, and where such activities are not included in the instruction function. Development is the systematic use of knowledge and understanding gained from research directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes. Federal awards that meet the research and development criteria are listed in the Research and Development Cluster.

Note 6. Federal Excess Personal Property

The state of Montana receives Federal Excess Personal Property (FEPP). The title to this property remains with the federal agency. In accordance with General Services Administration guidelines, the amounts are presented at fair market value at the time of receipt by the state, which is determined to be 22.47% of the original acquisition cost of the property.

Property received under the federal Conservation Research and Development Program (CFDA #81.RD) is shown at its fair market value at the time of receipt.

The following is a list of the FEPP received by the state of Montana during fiscal year 2016. The negative amount reflects property sold (title transferred at public sale) or other disposition.

CFDA #	Program	FY 16 Amount	FY 16 Ending Inventory
10.203	Agricultural Experiment Stations	\$0	\$123,236
10.500	Cooperative Extension Service	\$0	\$3,039
10.664	Cooperative Forestry Assistance	(\$296,953)	\$4,751,147
10.UXX	Agriculture Miscellaneous – Non-major	\$0	\$131,341
39.003	General Services Administration	(\$1,066)	\$78,179
81.RD	Conservation Research and Development	\$2,780	\$5,150
43.UXX	NASA Miscellaneous – Non-major	\$0	\$640,395
47.UXX	NSF Miscellaneous – Non-major	\$0	\$184,639

Note 7. Department of Defense Firefighting Property

The Department of Natural Resources and Conservation (DNRC) receives Department of Defense Firefighting Property (FFP). The title to this property is transferred to the DNRC. In accordance with General Services Administration guidelines, the amounts are presented at fair market value at the time of receipt by DNRC, which is determined to be 22.47% of the original acquisition cost of the property. The following is the value of FFP received by the state of Montana during fiscal year 2016.

CFDA #	Program	FY 16 Amount	FY 16 Ending Inventory
12.UXX	DOD Firefighter Program	\$269,450	\$2,341,811

Note 8. Books for the Blind and Physically Handicapped

The Montana State Library receives “talking book” machines, cassette books, accessories, and magazines from the federal government under the Books for the Blind and Physically Handicapped Program (CFDA #42.001). These items are then distributed to provide library services to blind and physically handicapped individuals. The federal government retains title to these items. The approximate value of the items in inventory (not distributed to individuals) at June 30, 2016 was \$943,278.

Since this program is considered a federal “use of equipment” agreement, the accompanying Schedule of Expenditures of Federal Awards does not include this amount.

Note 9. Unemployment Benefits

The unemployment compensation system is a federal-state partnership. State unemployment insurance laws must conform to certain provisions of the federal law. Federal funds are expended for administrative costs. State unemployment taxes must be deposited into a state account in the Federal Unemployment Trust Fund and are used only to pay benefits. State Unemployment Insurance (UI) funds, as well as federal funds, are included on the Schedule of Expenditures of Federal Awards.

The following schedule provides a breakdown of the state and federal portions of the total expenditures recorded for the Unemployment Insurance Program (CFDA #17.225).

State UI Expenditures	\$112,639,696
Federal UI Expenditures	<u>17,237,706</u>
Total	\$129,877,402

Note 10. Subgrants to State Agencies

Federal assistance transferred from one Montana state agency to another Montana state agency is shown only once on the Schedule of Expenditures of Federal Awards.

Federal assistance received from non-state sources, which are considered subgrants by the awarding agency, are treated as pass-through grants to the state. These pass-through awards are listed below the direct federal awards reported on the Schedule of Expenditures of Federal Awards. Pass-through grant numbers are included for those awards that were assigned an identifying number.

Note 11. Subgrants to Non-State Agencies

Federal assistance transferred from a Montana state agency or university to a non-state agency, such as a city, county, tribal government, or nonprofit organization, is identified in the Amount to Subrecipients column shown in the Schedule of Expenditures of Federal Awards.

Note 12. Federal Awards not having a CFDA Number

The following schedules contain contract or grant numbers associated with awards that did not have a CFDA number and were assigned either a **.UXX or **.RD number in the Schedule of Expenditures of Federal Awards. Not all **.UXX or **.RD awards reported on the SEFA had a grant or contract number. Also refer to Note 4.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH
MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER
COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

The Legislative Audit Committee
of the Montana State Legislature:

Report on Compliance for Each Major Federal Program

We have audited the state of Montana's compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of the state of Montana's major federal programs for the two fiscal years ended June 30, 2017. The state of Montana's major federal programs are identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs.

Management's Responsibility

Management is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of state of Montana's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards, and the Uniform Guidance, require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the state of Montana's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the state of Montana's compliance.

Basis for Qualified Opinion on Medicaid Cluster

As described in Findings 2017-014, 2017-017, and 2017-019 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-002	93.775 93.777 93.778	Medicaid Cluster	Cash Management
2017-014			Allowable Costs/Cost Principles
2017-017 2017-019			Special Tests and Provisions

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Medicaid Cluster

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Medicaid Cluster* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Medicaid Cluster for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Highway Planning and Construction Cluster

As described in Findings 2017-002, 2017-009, 2017-010, and 2017-028 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-002 2017-009	20.205 20.219	Highway Planning and Construction Cluster	Cash Management
2017-010			Subrecipient Monitoring
2017-028			Special Tests and Provisions

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Highway Planning and Construction Cluster

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Highway Planning and Construction Cluster* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Highway Planning and Construction Cluster for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Child Nutrition Cluster

As described in Findings 2017-002 and 2017-005 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-002 2017-005	10.553 10.555 10.556 10.559	Child Nutrition Cluster	Cash Management

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Child Nutrition Cluster

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Child Nutrition Cluster* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Child Nutrition Cluster for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Special Education Cluster (IDEA)

As described in Findings 2017-002 and 2017-005 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-002 2017-005	84.027 84.173	Special Education Cluster (IDEA)	Cash Management

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Special Education Cluster (IDEA)

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Special Education Cluster (IDEA)* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Special Education Cluster (IDEA) for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on TANF Cluster

As described in Findings 2017-002, 2017-014, 2017-023, and 2017-024 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-014 2017-024	93.558	TANF Cluster	Allowable Costs/Cost Principles
2017-002			Cash Management
2017-023			Special Tests and Provisions

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on TANF Cluster

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on TANF Cluster* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the TANF Cluster for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on CCDF Cluster

As described in Findings 2017-015 and 2017-022 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-015	93.575	CCDF Cluster	Cash Management
2017-022	93.596		Special Tests and Provisions

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on CCDF Cluster

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on CCDF Cluster* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the CCDF Cluster for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Housing Voucher Cluster

As described in Findings 2017-002, 2017-012, and 2017-013 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-002 2017-012	14.871	Housing Voucher Cluster	Cash Management
2017-013			Procurement and suspension and debarment

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Housing Voucher Cluster

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Housing Voucher Cluster* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Housing Voucher Cluster for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Forest Service Schools and Roads Cluster

As described in Finding 2017-001 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-001	10.665	Forest Service Schools and Roads Cluster	Subrecipient Monitoring

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Forest Service Schools and Roads Cluster

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Forest Service Schools and Roads Cluster* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Forest Service Schools and Roads Cluster for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Unemployment Insurance

As described in Findings 2017-002, 2017-003, and 2017-004 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-002 2017-003	17.225	Unemployment Insurance	Cash Management
2017-004			Reporting

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Unemployment Insurance

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Unemployment Insurance* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Unemployment Insurance for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Title I Grants to Local Educational Agencies

As described in Findings 2017-002, 2017-005, and 2017-006 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-002 2017-005	84.010	Title I Grants to Local Educational Agencies	Cash Management
2017-006			Special Tests and Provisions

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Title I Grants to Local Educational Agencies

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Title I Grants to Local Educational Agencies* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Title I Grants to Local Educational Agencies for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Low-Income Home Energy Assistance

As described in Findings 2017-002 and 2017-015 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-002 2017-015	93.568	Low-Income Home Energy Assistance	Cash Management

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Low-Income Home Energy Assistance

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Low-Income Home Energy Assistance* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Low-Income Home Energy Assistance for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Foster Care-Title IV-E

As described in Finding 2017-015 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-015	93.658	Foster Care-Title IV-E	Cash Management

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Foster Care-Title IV-E

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Foster Care-Title IV-E* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Foster Care-Title IV-E for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)

As described in Findings 2017-002, 2017-014, 2017-020, and 2017-021 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-014	10.557	Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)	Allowable Costs/Cost Principles
2017-002			Cash Management
2017-020 2017-021			Special Tests and Provisions

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Formula Grants for Rural Areas

As described in Finding 2017-030 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-030	20.509	Formula Grants for Rural Areas	Reporting

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Formula Grants for Rural Areas

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Formula Grants for Rural Areas* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Formula Grants for Rural Areas for the two fiscal years ended June 30, 2017.

Basis for Qualified Opinion on Immunization Cooperative Agreements

As described in Finding 2017-026 in the accompanying Schedule of Findings and Questioned Costs, the state of Montana did not comply with requirements regarding the following:

Finding #	CFDA #	Cluster Name	Compliance Requirement
2017-026	93.268	Immunization Cooperative Agreements	Allowable Costs/Cost Principles

Compliance with such requirements is necessary, in our opinion, for the state of Montana to comply with the requirements applicable to that program.

Qualified Opinion on Immunization Cooperative Agreements

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Immunization Cooperative Agreements* paragraph, the state of Montana complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Immunization Cooperative Agreements for the two fiscal years ended June 30, 2017.

Unmodified Opinion on Each of the Other Major Federal Programs

In our opinion, the state of Montana complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its other major federal programs identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs for the two fiscal years ended June 30, 2017.

Other Matters

The results of our auditing procedures disclosed other instances of noncompliance, which are required to be reported in accordance with the Uniform Guidance and which are described in the accompanying Schedule of Findings and Questioned Costs, as items 2017-011, 2017-025, 2017-027, 2017-029, and 2017-014 as it pertains to CFDA #93.667 and #93.767. Our opinion on each major federal program is not modified with respect to these matters.

The state of Montana's response to the noncompliance findings identified in our audit are described in the Schedule of Findings and Questioned Costs and the accompanying Corrective Action Plan. The state of Montana's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

Report on Internal Control Over Compliance

Management of the state of Montana is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the state of Montana's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the state of Montana's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be material weaknesses and significant deficiencies.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance

requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the deficiencies in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs, listed in the following table, to be material weaknesses.

Finding #	CFDA #	Program or Cluster Name	Compliance Requirement
2017-014	93.775, 93.777, 93.778	Medicaid Cluster	Allowable Costs/Cost Principles
2017-016 2017-019			Special Tests and Provisions
2017-028	20.205, 20.219	Highway Planning and Construction Cluster	Special Tests and Provisions
2017-014	93.558	TANF Cluster	Allowable Costs/Cost Principles
2017-015	93.575, 93.596	CCDF Cluster	Cash Management
2017-022			Special Tests and Provisions
2017-013	14.871	Housing Voucher Cluster	Procurement and suspension and debarment
2017-006	84.010	Title I Grants to Local Educational Agencies	Special Tests and Provisions
2017-015	93.568	Low-Income Home Energy Assistance	Cash Management
2017-015	93.658	Foster Care-Title IV-E	Cash Management
2017-014	10.557	Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)	Allowable Costs/Cost Principles
2017-020 2017-021			Special Tests and Provisions
2017-030	20.509	Formula Grants for Rural Areas	Reporting
2017-026	93.268	Immunization Cooperative Agreements	Allowable Costs/Cost Principles

A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiencies in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs, listed in the following table, to be significant deficiencies.

Finding #	CFDA #	Program or Cluster Name	Compliance Requirement
2017-002	93.775, 93.777, 93.778	Medicaid Cluster	Cash Management
2017-018			Reporting
2017-002	20.205, 20.219	Highway Planning and Construction Cluster	Cash Management
2017-007	84.007, 84.033, 84.038, 84.063, 84.268, 84.379, 93.264, 93.342, 93.364	Student Financial Assistance Cluster	Cash Management
2017-008			Special Tests and Provisions
2017-002 2017-005	10.553, 10.555, 10.556, 10.559	Child Nutrition Cluster	Cash Management
2017-002 2017-005	84.027, 84.173	Special Education Cluster (IDEA)	Cash Management
2017-002 2017-015	93.558	TANF Cluster	Cash Management
2017-001	10.665	Forest Service Schools and Roads Cluster	Subrecipient Monitoring
2017-002 2017-003	17.225	Unemployment Insurance	Cash Management
2017-002	14.871	Housing Voucher Cluster	Cash Management
2017-002 2017-005	84.010	Title I Grants to Local Educational Agencies	Cash Management
2017-002	93.568	Low-Income Home Energy Assistance	Cash Management
2017-002	10.557	Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)	Cash Management
2017-031	20.509	Formula Grants for Rural Areas	Procurement and suspension and debarment
2017-015	93.659	Adoption Assistance	Cash Management

The state of Montana's response to the internal control over compliance findings identified in our audit are described in the Schedule of Findings and Questioned Costs and the accompanying Corrective Action Plan. The state of Montana's response was not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the response.

The purpose of this Report on Internal Control Over Compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Respectfully submitted,

/s/ Cindy Jorgenson

\$20,249,014

Auditee qualified as low-risk Auditee?

No

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section II – Financial Statement Findings

Finding 2017-1: Various Federal Agencies
 CFDA #Various
 Grant #Not Applicable

Criteria: Article VIII, Section 15, of the Montana Constitution, requires public retirement systems to be funded on an actuarially sound basis. Section 19-2-409, Montana Code Annotated, requires each system to be funded on an actuarially sound basis. Actuarially sound basis means that contributions to each retirement plan must be sufficient to pay the full actuarial cost of the plan. For a defined benefit plan, the full actuarial cost includes both the normal cost of providing benefits as they accrue in the future and the cost of amortizing unfunded liabilities over a scheduled period of no more than 30 years. For the defined contribution plan, the full actuarial cost is the contribution defined by law that is payable to an account on behalf of the member.

Condition: As of June 30, 2016, actuarial valuations indicated that two defined benefit pension plans, as well as the Public Employees' Retirement System Defined Contribution Disability Other Post Employment Benefit Plan (OPEB), continue to be actuarially unsound because they do not amortize within the 30-year time period. The Sheriffs' Retirement System (SRS), the Game Wardens' and Peace Officers' Retirement System (GWPORS), and the OPEB do not amortize.

As of June 30, 2017, actuarial valuations indicated that two defined benefit pension plans are actuarially unsound because they do not amortize within the 30-year time period. The GWPORS has an unfunded liability that will amortize in 70 years and the Highway Patrol Officers' system (HPORS) has an unfunded liability that will amortize in 37 years. The valuations indicated that the SRS amortizes in 25 years and the OPEB amortizes in 19 years. During the 2017 Legislative Session, bills were passed for the SRS that increased the funding status of the plan and decreased the amortization period. For the OPEB, the board entered into a new investment contract in fiscal year 2016 to diversify their investment asset allocation into longer term asset classes, which improved the plan's funding status.

Questioned Costs: No questioned costs identified.

Context: The Montana Public Employee Retirement Administration (MPERA) administers eight defined benefit retirement systems, two defined contribution plans, and an OPEB. As of June 30, 2016, three of these systems were not actuarially sound. As of the June 30, 2017, two of these systems were not actuarially sound. The Unfunded Actuarial Liability (UAL) and amortization periods are summarized in the table below.

Retirement System	UAAL as of June 30, 2016	Amortization Period as of June 30, 2016
SRS	\$62.6 million	Does not amortize
GWPORS	\$30.5 million	Does not amortize
OPEB	\$473,000	Does not amortize

Retirement System	UAAL as of June 30, 2017	Amortization Period as of June 30, 2017
GWPORS	\$41.3 million	70 years
HPORS	\$78.2 million	37 years

The board continues to work with plan stakeholders and the Legislature to improve the funding status and decrease the amortization period for both systems that are not actuarially sound. Board officials have put forth effort to ensure all defined benefit plans are actuarially sound.

Effect: The retirement systems are not actuarially sound, which is not in compliance with Montana Constitution and state law.

Cause: Funding mechanisms in state law, as well as investment returns, have not been sufficient to achieve actuarial soundness for all retirement systems.

Repeat Finding: Over at least the last five audits, including this one, various systems have been reported as actuarially unsound. It has been reported as finding 2015-2 in the Single Audit report for the two fiscal years ended June 30, 2015, finding 2013-2 for the two fiscal years ended June 30, 2013, finding 1-1 for the two fiscal years ended June 30, 2011, finding 1-3 for the two fiscal years ended June 30, 2011, and finding 1-2 for the two fiscal years ended June 30, 2009.

Recommendation: We recommend the Public Employees' Retirement Board continue to take necessary actions to ensure actuarial soundness of the Sheriffs' Retirement System, Game Wardens' and Peace Officers' Retirement System, Highway Patrol Officers' Retirement System, and the Public Employees' Retirement System Defined Contribution Disability Other Post Employment Benefit plan.

Views of Responsible Officials and Corrective Action Plans: MPERA concurs with this recommendation. For additional information regarding MPERA's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section II – Financial Statement Findings

Finding 2017-2: Various Federal Agencies
 CFDA #Various
 Grant #Not Applicable

Criteria: Montana Operations Manual Policy, 302, in part, states, “State agencies are responsible for implementing internal control procedures to ensure all transactions necessary for compliance with generally accepted accounting principles (GAAP) are recorded in Statewide Accounting, Budgeting, and Human Resources System (SABHRS) before fiscal year-end.”

Montana Operations Manual Policy, 399, in part, defines internal control as a coordinated set of policies and procedures used by managers and line workers to ensure their agencies, programs, or functions operate efficiently and effectively in conformance with applicable laws and regulations, and that related transactions are accurate, properly recorded, and executed in accordance with management’s directives. Policy further requires management to establish and maintain internal controls, including internal controls over financial reporting, and indicates “agency management is responsible for the extent of the efficiency and effectiveness of internal controls, as well as any deficiencies.”

Condition: The Montana Board of Investments (board) administers the state’s Unified Investment Program (UIP), as well as the state’s Economic Development Bonds Act (EDB) and Municipal Finance Consolidation Act (MFC) programs. The EDB and MFC programs are collectively referred to by the board, and throughout this report section, as the Enterprise Fund Program. The board is required to prepare separate financial statements and related note disclosures for the UIP and Enterprise Fund Program, in accordance with generally accepted accounting principles (GAAP). Portions of that information is incorporated into the state’s basic financial statements. Additionally, as the administrator of the UIP, the board records transactions in the state’s investment trust fund, related to local government participation in the state’s investment pools.

Board staff made errors during the financial statement and note disclosure preparation process for the UIP and Enterprise Fund Program, as well as errors in recording local government participant purchases and sales activity on the accounting records for the investment trust fund. The board’s review procedures did not identify these errors.

Questioned Costs: No questioned costs identified.

Context: For the Enterprise Fund Program, the Statement of Cash Flows incorrectly reported cash flows associated with a Bond Anticipation Note (BAN). Under GAAP, the cash inflows of \$7.3 million and outflows of \$8.5 million associated with the BAN should have been reported as two separate line items within the Non-Capital Financing Activities section of the Statement of Cash Flows. Instead, the board reported the cash flows as a net outflow of \$1.2 million in the Investing Activities section. Additionally, under GAAP, the notes to the financial statements should have disclosed information about the BAN debt activity during the year, including a schedule outlining the beginning balance, increases, decreases, and ending balance of the debt. This note disclosure was not included in the notes provided as part of the audit. The Enterprise Fund Program at the board comprises all of the Economic Development Bonds major fund in the state's basic financial statements.

For the UIP, errors in financial reporting included a \$1.7 billion misclassification of assets between cash and cash equivalents, a \$362.3 million overstatement of realized gains, and incorrectly placing supplementary information within the financial statements. Additionally, participant purchase and sale activity was overstated by approximately \$326.1 million on the UIP financial statements; approximately \$48.6 million of this error was associated with local government participant purchases and sales activity the board incorrectly recorded on the accounting records for the investment trust fund. For the state's basic financial statements, the activity of the UIP is presented within the funds that own the investments. This presentation is based on transactions the board records on the state's primary accounting records for those funds. Our analysis only identified errors in the state's primary accounting records for local government participant purchases and sales in the investment trust fund.

Effect: There were errors in the financial statements and note disclosures for the Enterprise Fund Program for fiscal year 2017. While the board adjusted its financial presentation for these errors, the board's internal control procedures should be enhanced to allow management to prevent, or detect and correct, such errors. Additionally, there were errors in the underlying accounting records for the Investment Trust Fund, that could not be corrected, given the fiscal year 2017 accounting records were closed at the time the error was discovered.

Cause: For the Enterprise Fund Program, established financial reporting processes did not direct staff to consider GAAP requirements for new or unusual activity for the program. For the Investment Trust Fund, the recorded amounts were determined, in part, by analysis of transactions recorded on the state's accounting system. The board's analysis did not consider some intricacies of the transactions recorded throughout the year, including transactions that recorded activity in less detail than was necessary to prepare the financial statements and transactions recorded to correct prior errors.

Recommendation: We recommend the Montana Board of Investments:

- A. Update the procedures for preparing and reviewing the Unified Investment Program financial statements, to reflect the current pool structure and reporting format, and to include an independent review by staff knowledgeable with program operations and generally accepted accounting principles, and
- B. Update the procedures for preparing the Enterprise Fund Program financial statements, to include review of requirements in generally accepted accounting principles for new program activity.

Views of Responsible Officials and Corrective Action Plans: The board concurs with this recommendation. For additional information regarding the board's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-001: U.S. Department of Agriculture
CFDA #10.665, Schools and Roads – Grants to States
Grant #Not applicable

Criteria: Federal regulation, 2 CFR 200.303, requires the Department of Administration (department) to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal regulation, 2 CFR 200.331(b), requires the department to evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate sub-recipient monitoring.

Federal regulation, 2 CFR 200.331(d), require the department to monitor the activities of the subrecipient as necessary to ensure the subaward is used for authorized purposes.

Federal regulation, 2 CFR 200.331(f), requires the department to verify that subrecipients are audited in accordance with the requirements in Uniform Guidance Subpart F.

Federal regulation, 2 CFR 200.512(a), requires subrecipients to submit a Single Audit or Program Specific Audit within the earlier of 30 calendar days after receipt of the auditor's report(s), or nine months after the end of the audit period.

Federal regulation, 2 CFR 200.521(a), requires management decisions to clearly state whether or not the audit finding is sustained, the reasons for the decision, and the expected auditee action to repay disallowed costs, make financial adjustments, or take other action. If the auditee has not completed corrective action, a timetable for follow-up should be given.

Federal regulation, 2 CFR 200.521(d), requires pass-through entities to issue management decisions within six months of acceptance of the audit report.

State law, §17-3-213(5), Montana Code Annotated, requires counties to distribute the federal funds received for this program 66 2/3 percent to roads and 33 1/3 percent to schools.

Condition: In fiscal years 2016 and 2017, the department received and distributed \$15.9 million and \$2.2 million, respectively, of federal funds to counties for the Schools and Roads - Grants to States program. These funds (Title I, Title II, and Title III) are received from the harvest of timber on national forests within the boundaries of the state and distributed to counties in which the national forest lands are located. Title I funds must be used for public roads and public schools of the county or counties in which the national forest is situated. Title II funds are used for special projects on the federal land and on non-federal land where projects would benefit the resources on the federal land. Title III funds provide resources to homeowners in fire-sensitive ecosystems, reimbursing the participating county for county search and rescue and other emergency services performed on the federal land or to develop community wildfire protection plans.

Amounts payable to individual counties are calculated by the federal government. The department is considered a pass-through entity as it receives funds directly from the U.S. Department of Agriculture and provides the funds to a subrecipient to carry out part of a federal program. The counties are considered the subrecipients. Each county expending a total amount of federal awards equal to or in excess of a certain dollar amount are required to have a single audit or a program-specific audit. Due to the implementation of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, (Uniform Guidance) the threshold was increased from \$500,000 in fiscal year 2015 to \$750,000 in fiscal year 2016. We reviewed the department's subrecipient monitoring procedures for all counties. The following paragraphs summarize the results of our review.

Fiscal Year 2016

- ◆ *Counties Only Subject to During the Award Monitoring*

We noted the following instances of noncompliance with during the award monitoring for the counties that do not receive a single or program-specific audit.

- ◇ The department did not conduct during the award monitoring for any of these counties.
- ◇ The department did not have adequate controls in place to ensure the counties receiving Title III federal funds hold a 45-day public comment period before the use of funds.
- ◇ The department did not have adequate controls in place to ensure the counties submitted a certification that the funds were used for authorized expenditures, including a description of the amounts and their uses.

- ◆ *Counties With Single or Program-Specific Audits*

We noted instances of noncompliance with during the award monitoring for the counties that receive a single or program-specific audit. The department did not issue a management decision to the counties with deficiencies identified in their audits within the required six-month time frame. It was not clearly stated whether or not the audit findings were sustained or the reasons for the decision. Furthermore, the department did not provide a timetable for the auditee to follow-up on the management decisions.

- ◆ *All Counties*

In addition, the department did not evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring.

Fiscal Year 2017

- ◆ *All Counties*

We noted instances of noncompliance with during the award monitoring for all counties receiving these federal funds. The department did not conduct monitoring to provide reasonable assurance that the counties appropriately split the funds 66 2/3 percent to roads and 33 1/3 percent to schools as required. Furthermore, the department does not monitor the use of the federal awards.

- ◆ *Counties With Single or Program-Specific Audits*

We noted instances of noncompliance with during the award monitoring for the counties that receive a single or program-specific audit. The department did not have adequate controls in place to ensure that required single or program-specific audits were completed within nine months of the end of the subrecipient's audit period or to issue a management decision within the required six-month time frame.

Questioned Costs: No questioned costs identified.

Context: While all 34 counties receiving these federal funds are subject to during the award monitoring, only 18 meet the threshold requiring a single or program-specific audit in fiscal year 2016 and 19 in fiscal year 2017. The following paragraphs summarize the number of instances of noncompliance we identified.

Fiscal Year 2016

- ◆ *All Counties*

The department did not evaluate the subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring for all 34 counties receiving these federal funds.

- ◆ *Counties Only Subject to During the Award Monitoring*

We noted the instances of noncompliance with during the award monitoring for all 16 counties not receiving a single or program-specific audit.

- ◆ *Counties With Single or Program-Specific Audits*

The department did not issue a management decision to 2 of the counties within the required six-month time frame.

Fiscal Year 2017◆ *All Counties*

We noted 27 of the 34 counties did not appropriately split the funds as required by state law. Of the \$2.3 million distributed, \$483 was not allocated in accordance with state law. Furthermore, the department does not monitor the use of the federal awards.

◆ *Counties With Single or Program-Specific Audits*

We noted 4 of the 19 counties did not complete the required audit within nine months of the end of their audit period. Furthermore, the department did not issue a management decision to 2 of the counties within the required six-month time frame.

Effect: The department is not complying with the federal regulations stated above. Additionally, the subrecipients are not in compliance with the state law stated above, which may result in questioned costs for those entities.

Cause: Department staff stated they do not consider during the award monitoring or conducting risk assessments for the subrecipients to be cost beneficial. The department believes tracking the intended use and receiving the receipts of the Schools and Roads funds from the counties meets the monitoring requirement. In addition, the department stated they rely on county auditors to follow-up on audit recommendations, citing the lack of federal administrative funds for the award as the basis for their process.

Repeat Finding: This is a repeat finding, initially reported as finding 2015-001 in the Single Audit report for the two fiscal years ended June 30, 2015.

Recommendation: We recommend the Department of Administration implement internal controls and comply with federal regulations related to subrecipient monitoring for the Schools And Roads - Grants to States program to ensure:

- A. Risk assessments are conducted for purposes of determining the appropriate subrecipient monitoring procedures, and
- B. Subrecipients use federal Schools and Roads - Grants to States funds for allowable purposes by conducting during the award monitoring, issuing management decisions within the six-month time frame, with all required elements, and conducting follow-up on audit findings.

Views of Responsible Officials and Corrective Action Plans: As of November 29, 2016, the department concurs with the recommendation to conduct annual subrecipient risk assessments and will implement controls to ensure they are performed. However, the department only partially concurs with the remaining portions of the recommendation. The department does not consider during the award monitoring to be cost beneficial, and, instead performs pre- and post-award monitoring of all counties. Additionally, the department will periodically monitor audit submissions for findings

regarding this program and will implement controls so that management decisions are issued within six months with the correct information and that timely and appropriate corrective action is taken.

As of March 6, 2018, the department personnel indicated they prepared a comprehensive risk assessment of subrecipients to determine appropriate monitoring procedures. Through regular contact (telephone interviews), the department followed up with three high risk counties on processes and federal and state compliance with this program during fiscal year 2017 and will continue to follow up with an appropriate number of counties either through telephone interviews or site visits. The department considers the risk assessment process and regular contact with the subrecipient to be during the award monitoring. Prior to fiscal year 2017 the department required a certification from each county that the funds were “expended” in accordance with state and federal law. During fiscal year 2018, the department added line items for the amount expended for roads, and the amount expended for schools on its annual certification statement. Counties have reported this information. During fiscal year 2018, the department worked with Montana Association of Counties (MACo) and updated the template to the actual statutory split. The department instructed the counties to use the latest form that is on the MACo website.

For additional information regarding the department’s planned corrective action see Corrective Action Plan starting on page D-1.

 Grant #Not Applicable

CFDA #93.767, Children's Health Insurance Program
 Grant #Not Applicable

CFDA #93.775, 93.777, 93.778, Medicaid Cluster
 Grant #Not Applicable

Criteria: Federal regulation, 2 CFR 200.303, requires the Department of Administration (department) to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Condition: The United States Treasury and the state of Montana enter into an annual TSA in order to minimize the time between payment of expenditures and drawing funds from the federal government and to set disbursement patterns. The TSA defines the terms for the transfer of financial assistance funds between the federal government and the state of Montana as prescribed under the Cash Management Improvement Act of 1990 (CMIA). The funding techniques, clearance patterns, and methods of interest rates for federal programs that meet the threshold are outlined in the TSA. The specific CFDA #s included in the TSA for fiscal years 2016 and 2017 are: 10.551, 10.555, 10.557, 12.401, 14.195, 14.871, 15.611, 17.225F, 17.225S, 20.205, 84.010, 84.027, 93.558, 93.568, 93.767, and 93.778. An annual report must be submitted on the accounting for state and federal interest liabilities of the state's most recently completed fiscal year. After the TSA draft is submitted each year, the department creates a spreadsheet for each agency to determine state and federal interest liability based on federal

cash receipts and expenditures for each federal program that meets the threshold. The spreadsheets are adjusted to reflect work days, holidays and any changes made to the funding techniques per the new TSA. State accounting policy states the department will prepare CMIA program interest calculation spreadsheet templates for agencies by June 30 before the fiscal year begins. The agencies are responsible for inputting information into the spreadsheets, which calculates the interest liability used to create the annual report submitted to the federal government by the department. The department does not have adequate internal controls in place to ensure compliance with federal regulations and the Treasury State Agreement (TSA).

During fiscal year 2016, we noted the percentages used for the clearance pattern on the Unemployment Insurance program spreadsheet were incorrect. During fiscal year 2017, we identified several errors in the spreadsheets. The spreadsheet for the National Guard Military Operations and Maintenance (O&M) Projects program did not include the direct administrative costs and the average clearance days were incorrect for the O&M warrant payments. The spreadsheet for Title I Grants to Local Educational Agencies program (also see 2017-005) listed an incorrect clearance pattern. The spreadsheet for the Unemployment Insurance program (also see 2017-003) contained incorrect warrant clearance percentages from July 1, 2016, through February 1, 2017.

Questioned Costs: No questioned costs identified.

Context: 15 out of 348 federal programs administered by the state were included in the TSA for fiscal year 2016, and 17 out of 346 federal programs were included for fiscal year 2017. During the audit we reviewed the department's procedures for preparing the CMIA spreadsheets and annual report. Additionally, during fiscal year 2017, we completed a sample of five of the 17 spreadsheets and noted clearance pattern errors in three of them. This was not a statistically valid sample.

Effect: The department is not in compliance with federal regulations and is unable to ensure the reported interest is correct on the annual report. The incorrect spreadsheets resulted in the department calculating and submitting a \$50 overstatement in the amount of interest owed by the federal government on the fiscal year 2015 annual report; which was submitted during fiscal year 2016. However, as we did not review all spreadsheets used in the interest calculation, the potential exists for there to be a larger error in the calculated interest amount.

Cause: Department staff stated errors in the spreadsheet formulas were not caught and corrected until the annual report was compiled. In addition, the department stated they rely on the individual agencies to input the information correctly and there is only a high level review of the activity conducted as part of compiling the annual report.

Recommendation: We recommend the Department of Administration:

- A. Enhance internal controls to ensure the Cash Management Improvement Act spreadsheets are accurate, and

- B. Comply with the Cash Management Improvement Act by including accurate clearance pattern and percentage on the spreadsheets.

Views of Responsible Officials and Corrective Action Plans: As of November 29, 2016, the department concurs with this recommendation and will improve its internal control of the accuracy of the spreadsheets by reviewing templates used by agencies and by continuing to review the agency completed spreadsheets for consistency and reasonableness. However, the department does not believe it is their responsibility to audit all of the underlying data provided by the agencies. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-003: U.S. Department of Labor
CFDA #17.225, Unemployment Insurance
Grant #UI-279873-18-55-A-30 (2016), UI-298527-18-55-A-30 (2017)

Criteria: Federal regulation, 31 CFR 205.14, requires the Department of Labor and Industry to request cash for the benefit payments in compliance with the Treasury State Agreement (TSA) between the United States Treasury and the state of Montana. The agreement is intended to minimize the time between payment of expenditures by the state and receiving federal funds to ensure the draws are interest neutral for both the state and federal governments.

Federal regulation, 2 CFR 200.303, requires the department to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with statutes, regulations, and the terms and conditions of the federal award.

Condition: The Department of Administration administers the TSA and maintains a spreadsheet template specific to each federal program subject to the TSA. The Department of Labor and Industry (department) uses the Unemployment Insurance (UI) specific spreadsheet template which should result in compliance with a 20-day estimated clearance pattern based on history of when UI benefit warrants are cashed. For most of the audit period, the cash draws were in accordance with the spreadsheet, but the spreadsheet contained an incorrect estimated clearance pattern. The estimated clearance pattern shows the percentage of benefit payments that will be cashed over a 20-day period. The difference between the template percents and TSA percents is noted in the following table.

Estimated Clearance Pattern Differences			
	Spreadsheet Template %	TSA %	over(under) drawn
Day1	3.66%	14.16%	(10.50%)
Day2	22.80%	33.70%	(10.90%)
Day3	32.05%	22.22%	9.83%
Day4	17.96%	13.07%	4.89%
Day5	7.87%	5.97%	1.90%
Day6	3.76%	2.73%	1.03%
Day7	2.65%	1.81%	0.84%
Day8	2.21%	1.42%	0.79%
Day9	1.54%	0.97%	0.57%
Day10	1.24%	0.69%	0.55%
Day11	1.08%	0.53%	0.55%
Day12	0.61%	0.46%	0.15%
Day13	0.51%	0.38%	0.13%
Day14	0.41%	0.25%	0.16%
Day15	0.27%	0.24%	0.03%
Day16	0.17%	0.16%	0.01%
Day17	0.17%	0.14%	0.03%
Day18	0.17%	0.13%	0.04%
Day19	0.87%	0.97%	(0.10%)
Day20	0.00%	0.00%	0.00%

Source: Compiled by the Legislative Audit Division from department records.

Questioned Costs: No questioned costs were identified.

Context: While the total amount drawn over each 20 day period is correct, the amount drawn each day is incorrect. For fiscal year 2018, the department has already created new procedures to ensure that the UI spreadsheet received on an annual basis from the Department of Administration is correct and in accordance with the TSA.

Effect: The department is not in compliance with the TSA and federal regulations. The Department of Administration will complete a calculation to determine if the state owes any interest earned to the federal government. However, we completed a calculation for just the UI program which indicates the department will not owe interest.

Cause: The department did not have controls in place to verify the spreadsheet contained the clearance pattern in the approved TSA.

Recommendation: We recommend the Department of Labor and Industry:

- A. Comply with the Treasury State Agreement and federal regulations by drawing according to the approved clearance pattern in the Treasury State Agreement, and
- B. Implement developed procedures to ensure the spreadsheet provided by the Department of Administration contains the approved clearance pattern in the Treasury State Agreement.

Views of Responsible Officials and Planned Corrective Actions: The department concurs with this recommendation. As of July 2017, controls have been put in place to verify the accuracy of the holidays and that "state only" holidays are excluded from the spreadsheet. As of July 2017, the department implemented new procedures to ensure the Cash Management Improvement Act spreadsheet received annually from the Department of Administration is correct and in accordance with the TSA established by the Federal Government. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-004: U.S. Department of Labor
 CFDA #17.225, Unemployment Insurance
 Grant #UI-279873-18-55-A-30 (2016), UI-298527-18-55-A-30 (2017)

Criteria: The Unemployment Insurance Data Validation Handbook (ETA), May 2013, approved by the Office of Management and Budget requires the Department of Labor and Industry (department) to validate four sets of data used for the Overpayment Detection and Recovery Activities (ETA 227) report, an Unemployment Insurance report.

Condition: Since fiscal year 2010, the department has been unable to validate all required data for the ETA 227 report. Between fiscal years 2010 and 2012, new reporting elements were added to the ETA 227 report and the federal system had issues causing the environment to be unstable. After February of 2012, the department began working on programming changes to the Montana Integrated System to Improve Customer Service (MISTICS), the department's Unemployment Insurance (UI) benefit information system, which were necessary to validate all required data. The department made several unsuccessful attempts at validation. Department personnel noted the data in the department's computer system is accurate, the data issues are in how the data rolls up on the report, therefore requiring programming changes.

Questioned Costs: No questioned costs were identified.

Context: The report includes five sections, of which four must be validated. During the current audit covering fiscal years 2016 and 2017, the department validated one of the four required sections. Examples of issues remaining with the other three sections include the quarterly ending balance not carrying forward to the next quarter and the number of decimal places carried out in the data resulting in rounding differences.

Effect: The department is not in compliance with federal regulations. The data validation process is important to ensure systematic data errors do not exist in the data contained in the report.

Cause: The programming changes required were larger than anticipated causing the resolution date to move from March 31, 2017, to December 1, 2017. As of August 2017, the department indicated

they were able to successfully validate the first and second quarter 2017 reports. Since this occurred subsequent to our audit period, we were not able to review these submissions.

Repeat Finding: This is a repeat finding, initially reported as finding 2015-025 in the Single Audit report for the two fiscal years ended June 30, 2015.

Recommendation: We recommend the Department of Labor and Industry update the coding in MISTICS related to the compiling of the ETA 227 report data to ensure it is able to validate all sections of the report.

Views of Responsible Officials and Planned Corrective Action Plans: The department concurs with this finding, and was able to successfully update the ETA 227 report coding into MISTICS. The ETA 227 report was successfully updated as of August 2, 2017 for the 1st Quarter of 2017 and 2nd Quarter of 2017. The three populations requiring validation have been completed and passed both Report Validation and Sample Element Validation successfully. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-005: U.S. Department of Education
 CFDA #84.010, Title I Grants to Local Educational Agencies
 Grant #S010A140026, S010A150026, S010A160026
 CFDA #84.027, 84.173, Special Education Cluster (IDEA)
 Grant #H027A140096, H027A150096, H027A160096

U.S. Department of Agriculture
 CFDA #10.553, 10.555, 10.556, 10.559, Child Nutrition Cluster
 Grant #201616N109943, 201717N109943

Criteria: Federal regulation, 31 CFR 205, implements the Cash Management Improvement Act (CMIA). The CMIA provides requirements and procedures for the transfer of federal financial assistance from federal agencies to the states, and specifies the terms and conditions under which an interest liability would be incurred.

The Cash Management Improvement Act Treasury-State Agreement (TSA) for 2017, states “The State shall request funds weekly on Wednesdays such that they are deposited on the date of receipt from the appropriate federal agency. The amount of the request shall be based on the amount of actual program costs incurred during the prior week, Wednesday through Tuesday.” The TSA for 2016 required the office to complete “actual clearance” draws for benefits in the Title I (CFDA #84.010), Special Education (CFDA #84.027), and the Child Nutrition Cluster (CFDA #10.555).

Federal regulation, 2 CFR 200.303, requires the Office of Public Instruction (office) establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award

Condition: The Office was not in compliance with the TSA in either fiscal year 2016 or 2017. In fiscal year 2016, there was no evidence the office was requesting draws based on actual clearance. Although changes were made to the 2017 TSA, when we reviewed the office’s draws for fiscal year 2017 we noted there were times the office drew more often than once a week, contrary to the 2017 TSA.

Questioned Costs: No questioned costs identified.

Context: The office has three federal programs that are part of Montana's TSA: Title I, National School Lunch Program (NSLP), and IDEA B. The 2017 TSA was updated to reflect the office's general practice of requesting draws on Wednesdays. The weekly pattern is interest neutral. In the School Lunch program, there were 3 weeks with an extra cash draw. In the Title I program, there were 5 weeks with two draws in one week. In the Special Ed program, there were 11 weeks with more than 1 draw and 2 draws that were not in compliance with the TSA because they were early.

Effect: By intentionally conducting draws more than once per week, the office was not in compliance with the TSA for fiscal year 2017 or fiscal year 2016.

Cause: The TSA agreement had not yet been updated in fiscal year 2016. The office was drawing more than once a week to avoid negative cash balances in the federal fund as a whole for more than seven days, as required by state law.

Repeat Finding: This is a repeat finding, initially reported as finding 2015-027 in the Single Audit report for the two fiscal years ended June 30, 2015.

Recommendation: We recommend the Office of Public Instruction:

- A. Comply with the Treasury State Agreement as required by federal regulations, and
- B. Design and implement internal controls to ensure compliance with the Treasury State Agreement.

Views of Responsible Officials and Corrective Action Plans: The office partially concurred with the finding. They stated, "A. Since the TSA can only be updated July 1st of each year, the office was unable to update the TSA until fiscal year 2017. Due to this fact, the office concurs the draw pattern was in noncompliance for 2016. As stated in the report, the office did complete weekly draws as allowed in the 2017 TSA agreement. Since the TSA agreement does not specify that additional draws are unallowable, the office did not consider this activity to be noncompliance. Therefore, the office does not concur with the noncompliance finding for 2017. B. As stated in the audit report, the office has various internal controls in place to effectively manage federal cash activity and to ensure federal cash management compliance. The office contends the additional draws do not constitute a lack of internal controls over the office's compliance with the TSA. Therefore, the office does not concur with the finding for 2017." For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

Rebuttal of Views of Responsible Officials: The office's current practice is to draw more than once a week if needed but the technique in the TSA does not allow this practice. According to the TSA, "The State shall request funds weekly on Wednesdays such that they are deposited on the date of receipt

from the appropriate federal agency. The amount of the request shall be based on the amount of actual program costs incurred during the prior week, Wednesday through Tuesday.” In addition, the office’s response noted the TSA can only be updated on July 1st of each year but the TSA is required to be amended when changes in funding techniques occur. We maintain our position as reported.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-006: U.S. Department of Education
CFDA #84.010, Title I Grants to Local Education Agencies
Grant #S010A140026, S010A150026, S010A160026.

Criteria: Federal regulation, 2 CFR 200.303, requires the Office of Public Instruction (office) to establish and maintain effective internal control over federal Grants that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

The Elementary and Secondary Education Act, Section 111(b)(3)(C)(iii), requires the office to establish and maintain an assessment system which uses testing to provide data used to measure student achievement. Student testing must be valid, reliable, and consistent with relevant professional and technical standards. In order to ensure the tests are valid and reliable, the office must have policies and procedures in place to ensure local education agencies are maintaining test security.

Condition: During the audit, we noted the office's current procedures for ensuring local education agencies are maintaining test security were incomplete. Information regarding test security was distributed to Montana's K-12 schools. However, the office has not yet developed a plan to monitor school level implementation of security procedures. In addition, the office did not discuss the American College Testing (ACT), which is a required test in the security procedure.

Questioned Costs: No questioned costs identified.

Context: There are six required assessments in Montana including Smarter Balanced Assessment Test, Access for English Language Learners, the Science Criterion-Referenced Test, the Science Criterion-Referenced Test-Alternate, the Multi-State Alternate Assessment, and the ACT. The office's test security policy requires Montana's K-12 schools to electronically certify they are abiding by the office's policies. We tested schools' submissions. Eight out of 56 schools had not submitted their certifications at the time of our audit. The office had not reviewed any submissions prior to the audit process. Requirements to monitor test security are not new, but are new to the scope of our audit.

Effect: State assessments are important in securing federal funding like Title I. They also allow teachers and parents to identify needs for each individual student. Without oversight, there is the possibility of unfair testing or inaccurate data.

Cause: The process of how to monitor school implementation of the security agreement was not planned prior to the audit process.

Recommendation: We recommend the Office of Public Instruction's Title I Program:

- A. Update their assessment security procedure to include discussion of all required state assessments, including the American College Testing (ACT), as required by federal regulations, and
- B. Design and implement control procedures to monitor Montana's K-12 schools' implementation of the assessment security process.

Views of Responsible Officials and Corrective Action Plans: The office concurs with the recommendation and plans to develop and implement further procedures to monitor the assessment security process. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-007: U.S. Department of Education
CFDA #84.007, 84.033, 84.038, 84.063, 84.268, 84.379, 93.264, 93.342,
93.364, Student Financial Assistance Cluster
Grant #Not applicable

Criteria: Federal regulation, 2 CFR 200.303, requires the University of Montana-Missoula (university) to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal regulation, 34 CFR 668.166, defines excess cash to be any amount of title IV, HEA program funds, other than Federal Perkins Loan Program funds, that an institution does not disburse to students by the end of the third business day following the date the institution received those funds from the Secretary; or deposited or transferred to its Federal account previously disbursed title IV, HEA program funds, such as those resulting from award adjustments, recoveries, or cancellations. An institution may maintain for up to seven days an amount of excess cash that does not exceed one percent of the total amount of funds the institution drew down in the prior award year. The institution must return immediately to the Secretary any amount of excess cash over the one-percent tolerance and any amount remaining in its account after the seven-day tolerance period.

Condition: The University of Montana–Missoula (university) receives funding from the Department of Education (ED) for the Student Financial Assistance program (SFA) through various grants. The objective of this program is to provide financial assistance to students pursuing postsecondary education. The Direct Loan program makes interest subsidized or unsubsidized Stafford loans available to students, or PLUS loans to graduate or professional students or to parents of dependent students, to pay for the cost of attending postsecondary educational institutions. The Federal Pell Grant program provides grants to students enrolled in eligible undergraduate programs and certain eligible post-baccalaureate teacher certificate programs, and is intended to provide a foundation of financial aid. The ED provides funds to the university under the advance payment method, which allows institutions to draw down funds prior to disbursing funds to eligible students and parents. However, the university has chosen to distribute the funds to the students and then request reimbursement from ED. When a student withdraws from the university after accepting financial assistance, a portion of the assistance is considered “unearned” and must be returned to ED. The university calculates the amount to return

based on several factors, including attendance of classes and official withdrawal dates. Excess cash for any amount or time frame over that allowed in the tolerance provisions is noncompliance with the cash management requirements and can lead to the university reimbursing ED for any interest accrued in providing that excess cash. There were several instances where the university had excess cash.

Questioned Costs: No questioned costs identified.

Context: During the audit we reviewed the activity for fiscal year 2016 and 2017, which included 216 and 213 days of activity, respectively. We found six instances where the university held excess cash that exceeded the tolerance provision defined above for the Direct Loans and Pell Grants, as shown in the table below. These instances of excess cash could be the result of not returning funds timely or receiving reimbursements for amounts greater than needed. The table presents each day the university held excess cash for more than three days.

Noncompliance With SFA Cash Management Requirements		
SFA Program	Days Where Instances of Noncompliance Identified	Excess Cash*
FY2017 Direct Loan Program	July 11 and July 13	\$9,183
	September 20-23	\$1,523,014
FY2017 Pell Grant Program	July 12-14 and July 18-19	\$10,940
	December 6-9 and December 12-13	\$14,388
	January 3-4, January 6, January 9	\$98,504
FY2016 Pell Grant Program	May 17-19, May 24-26, and May 31	\$82,368
Source: Compiled by the Legislative Audit Division.		
* The excess cash in the table represents the highest amount of cash at a point in time within that consecutive span of noncompliance.		

Effect: The controls in place at the university do not allow the staff to ensure requesting reimbursement and returning funds to ED are completed timely and in compliance with cash management requirements.

Cause: University staff stated the excess cash balance primarily occurred because there is a timing difference in the process for returning funds due to when that information is entered into Banner, the university's accounting and information system. This delay allows reimbursement requests to occur which do not consider funds being returned.

Recommendation: We recommend the University of Montana-Missoula strengthen internal controls to ensure compliance with cash management requirements for reimbursement requests and return of funds to the Department of Education for the Direct Loan and Pell Grant programs.

Views of Responsible Officials and Corrective Action Plans: The university concurs with this recommendation. Effective early in 2017, the university's Business Services personnel refined their cash

monitoring procedures for Direct Loan and Pell Grant programs to ensure funds have been returned in a timely manner. For additional information regarding the university's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-008: U.S. Department of Education
CFDA #84.007, 84.033, 84.038, 84.063, 84.268, 84.379, 93.264, 93.342,
93.364, Student Financial Assistance Cluster
Grant #Not applicable

Criteria: Federal regulation, 2 CFR 200.303, require the University of Montana-Missoula (university) to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Condition: Banner is the university's accounting and information system. It is used to process essentially all financial transactions, determine eligibility for Student Financial Assistance (SFA), and process payroll transactions by using a series of tables and validation or rule forms. Banner is critical in supporting the university's operations, and as such, access to the system should be restricted to those individuals who have a business need. Access to Banner is based on classes or profiles and granted using an Electronic Banner Account Request Form, which allows for access to be initiated and approved electronically. The University of Montana–Missoula (university) has a security plan that outlines potential risks, incompatible duties and profiles by module for the Banner system. The university's internal control matrix documents the need for the security plan to be reviewed and updated annually, which includes a review of current users and their security profiles. The security plan was last updated in September 2015, and the last annual security review over access to Banner was performed in March 2015. During the audit we reviewed user access to tables that affect the financial activity and compliance with federal regulations over SFA activity and found inappropriate access to the system.

Questioned Costs: No questioned costs identified.

Context: We reviewed access to approximately 20 tables in Banner that effect the financial activity and compliance with federal regulations over SFA activity. We identified 4 individuals whose access allowed them to make changes or modify information in the system which was not necessary for their job responsibilities. The supervisors of these staff were unaware this access was given.

Effect: Although our audit did not identify any unauthorized transactions or inappropriate changes made by the individuals, in order to protect the system and data from unauthorized activity the university should review access in a timely manner. The controls in place at the university do not allow the staff to detect and prevent inappropriate access and modifications to Banner tables.

Cause: University staff stated the manual process utilized for this review in past years was labor intensive and cumbersome. In calendar year 2017, an automated process was developed and final testing will be completed at the end of July 2017. Staff further stated the inappropriate access has been removed and there were no inappropriate changes made by these staff.

Recommendation: We recommend the University of Montana-Missoula maintain internal controls, in accordance with federal regulations, to conduct annual security reviews in accordance with its internal control policy to ensure appropriate access is granted as documented in the security plan.

Views of Responsible Officials and Corrective Action Plans: The university concurs with this recommendation. The UM-Missoula management determined that the manual process utilized for this review had become too labor intensive and cumbersome. In FY 17, personnel developed an automated process. A review of access and transactions made in Banner by the individuals in question provided reasonable assurance that no unauthorized transactions have occurred. For additional information regarding the university's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-009: U.S. Department of Transportation
 CFDA #20.205, 20.219, Highway Planning and Construction Cluster
 Grant #NRT2015 and NRT 16 (001)

Criteria: Federal regulation, 31 CFR 205.33, requires the Department of Fish, Wildlife & Parks (department) to use a draw technique designed to minimize the time between funds leaving the state treasury to pay subrecipients and the time funds are received from the federal government.

Federal regulation, 2 CFR 200.303(a), requires the department to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Condition: The department administers the Recreational Trails Program (RTP) for CFDA #20.219, which is funded from the Federal Highway Trust Fund and overseen by the Federal Highway Administration (FHWA). This program provides grants to subrecipients throughout the state to develop and maintain recreational trails and trail-related facilities. Subrecipients can include federal, tribal, state, county or city agencies, private associations and clubs. During the audit period, the department issued approximately \$2.3 million in grants to 64 different subrecipients. The RTP is a reimbursement based program, which means subrecipients expend funds for projects outlined in grant agreements and then request reimbursement from the department. When a subrecipient requests reimbursement, department staff review and approve the reimbursement requests and then send the request to FHWA. Once the request is reviewed and approved by FHWA staff, the department records the expenditures on the state's accounting system and pays the subrecipient. Once the department has reimbursed subrecipients, the state can then request reimbursement from the federal government for that amount. Prior to January 2017, department staff requested reimbursement from FHWA each time they reimbursed a subrecipient. Beginning in January 2017, department staff requested reimbursement from FHWA monthly, based on the expenditures for subrecipient reimbursements recorded in the previous month. The department records the revenue on the state's accounting system at the time the request is made. The department does not consider the amount of cash on hand when calculating the amount of the federal reimbursement request.

Questioned Costs: No questioned costs identified.

Context: We reviewed the department's pattern of recording expenditures and revenues for the RTP to determine if it minimized the time between payments to subrecipients and reimbursements from the federal government. In our analysis, we considered the time between payments to subrecipients and reimbursements from the federal government to be minimized if the difference between expenditures and revenues recorded existed for no more than five days. The results of our analysis are summarized in Table 1 below:

Fiscal Year	Expenditures Exceeded Revenues				Revenues Exceeded Expenditures			
	Instances	Range of Days	Highest Amount	RTP Fund Average Cash Balance	Instances	Range of Days	Highest Amount	RTP Fund Average Cash Balance
2016	3	26 to 103	\$313,621	\$261,164	3	10 to 98	\$72,120	\$169,581
2017	2	24 to 211	\$358,724	(\$101,153)	3	8 to 27	\$86,832	(\$75,405)

Source: Compiled by the Legislative Audit Division from SABHRS records.

Effect: The department is not in compliance with federal regulations. Additionally, without considering cash balances when determining draws, the potential exists that the department is drawing more funds than necessary.

Cause: Department staff stated they use the expenditures that are processed to determine what needs to be drawn instead of the cash balance because they manage the cash balance by fund type, not individual funds during the year.

Recommendation: We recommend the Department of Fish, Wildlife & Parks:

- A. Strengthen internal controls to ensure compliance with federal cash management requirements for the Recreational Trails Program, and
- B. Minimize the time between cash requests and distributions for the Recreational Trails Program as required by federal regulations.

Views of Responsible Officials and Corrective Action Plans: The department concurs with these recommendations. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-010: U.S. Department of Transportation
 CFDA #20.205, 20.219, Highway Planning and Construction Cluster
 Grant #NRT2015 and NRT 16 (001)

Criteria: Federal regulation, 2 CFR 200.303, requires the Department of Fish, Wildlife & Parks (department) to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal regulations, 2 CFR 25.110 and Appendix A, require the department to collect subrecipients' Dun and Bradstreet Data Universal Numbering System (DUNS) number as part of its subaward application, or, if not, before the award.

Federal regulation, 2 CFR 200.331(a)(1), requires the department to identify the Federal Award information to subrecipients at the time of the subaward.

Federal regulations, 2 CFR 200.331(d) and (f) and OMB Circular A-133.400(d)(4)-(5), require the department to monitor subrecipients' audits, including following up on all deficiencies.

Federal regulations, 2 CFR 200.521 and OMB Circular A-133.405(a), require the department to issue management decisions for any deficiencies identified in subrecipients' audit reports within six months.

Federal regulation, 2 CFR 200.331(b), requires the department to evaluate each subrecipient's risk of noncompliance to determine the appropriate level of monitoring.

Condition: The department administers the Recreational Trails Program (RTP) for CFDA #20.219, which is funded from the Federal Highway Trust Fund and overseen by the Federal Highway Administration (FHWA). This program provides grants to subrecipients throughout the state to develop and maintain recreational trails and trail-related facilities. Subrecipients can include federal, tribal, state, county or city agencies, private associations and clubs. During the audit period, the department issued approximately \$2.3 million in grants to 64 different subrecipients. The department

is considered a pass-through entity as it provides federal funds to a subrecipient to carry out part of a federal program and the individual entities receiving RTP grants to develop and maintain recreational trails and trail-related facilities are considered the subrecipients. We reviewed the department's procedures to monitor subrecipients of RTP grants and identified several areas where the department did not meet its subrecipient monitoring responsibilities:

- ◆ *Determining Subrecipient Eligibility:* The department did not collect the DUNS number, or make sure the entity was registered in the System for Award Management, prior to awarding a project during calendar years 2016 and earlier. For projects awarded during calendar year 2017, the department obtained the DUNS numbers as part of the contract signing process.
- ◆ *Award Identification:* The department only provided the CFDA title to subrecipients for projects awarded during calendar years 2015 and earlier and for projects awarded during calendar years 2016 with contracts prepared and signed prior to September 2016. For projects awarded during calendar year 2016 with contracts prepared and signed beginning in September 2016 and for projects awarded during calendar year 2017, the department provided all of the specific award information to subrecipients using a standard contract cover form.
- ◆ *Subrecipient Audits:* The department does not have any controls in place to ensure subrecipients receive the required audit nor does it review the audit reports for subrecipients who do receive an audit.
- ◆ *Evaluate Risk:* For projects awarded during calendar year 2016, the department did not assess the risk of noncompliance for each subrecipient. For projects awarded during calendar year 2017, the department completed a subrecipient risk assessment to determine the extent of monitoring required before a contract was signed with each subrecipient. This risk assessment identifies each subrecipient as low, medium, or high risk. Per department staff, they will adjust the amount of monitoring each subrecipient receives based on the results of this risk assessment. We were unable to confirm whether the department adjusted the amount of monitoring based on the completed risk assessments as the projects awarded during calendar year 2017 had not reached the point where the department had completed monitoring during our audit.

Questioned Costs: No questioned costs identified.

Context: The department awarded 46 projects in calendar year 2016 and 54 projects in calendar year 2017 to various subrecipients. The department made payments of approximately \$2.3 million to 64 subrecipients during fiscal years 2016 and 2017.

Effect: The department is not in compliance with federal regulations.

Cause: Department staff stated there has historically not been enough staff to complete all of the federal subrecipient monitoring requirements for the RTP and they were not aware of all of the requirements.

Recommendation: We recommend the Department of Fish, Wildlife & Parks:

- A. Implement internal controls to ensure compliance with federal subrecipient monitoring requirements, and
- B. Comply with federal subrecipient monitoring requirements for the Recreational Trails Program.

Views of Responsible Officials and Corrective Action Plans: The department concurs with these recommendations. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-011: U.S. Department of Homeland Security
CFDA #97.042, Emergency Management Performance Grants
Grant #EMW2013SS00064, EMW2015SS00005,
EMW2014SS00019

CFDA #97.047, Pre-Disaster Mitigation
Grant #EMD-2014-PC-0001

CFDA #97.067, Homeland Security Grant Program
Grant #Various

Criteria: Federal regulation, 2 CFR 200.303, requires the Department of Military Affairs (department) to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with statutes, regulations, and the terms and conditions of the federal award.

Condition: The department internal control procedures do not ensure the costs it is approving for reimbursement are allowable per the agreement between the department and the subgrantees and the federal grant requirements.

Questioned Costs: We question \$12,213 and \$34,956 in grant reimbursement costs charged to CFDA #97.042 in fiscal year 2015 and 2016 and \$8,017 to CFDA #97.067 in fiscal year 2015. We estimate there are additional likely questioned costs to these grants as well as likely questioned costs in excess of \$25,000 for CFDA #97.047 in fiscal years 2015 and 2016.

Context: The department reimbursed \$11.3 million to subgrantees in 2016. We determined the department's procedures did not ensure reimbursements were made only for allowable costs. We reviewed a sample, which was not a statistically valid sample, of 32 grant reimbursements and identified the following issues:

- ◆ Four instances where there was no evidence of review of the reimbursement requests supporting documentation.

- ◆ Five instances where the reimbursement amount was not supported by documents submitted to the department by the subgrantees.
- ◆ One instance where the subgrantee's expenditures were incurred outside the subgrant agreement period but were still reimbursed by the department.

Effect: Because the department does not have adequate internal controls in place over the Disaster & Emergency Services Division grant reimbursement process, they are at increased risk of reimbursing subgrantees for unallowable costs. Known reimbursements made for unallowable costs are approximately \$20,200 and \$35,000 with a potential of up to \$734,400 and \$968,400 in fiscal years 2015 and 2016, respectively.

Cause: Department staff responsible for reviewing and approving reimbursement requests stated they were new to their positions during the audit period and because there are no written procedures for the grant reimbursement process, they independently developed their own processes for reviewing and approving the reimbursements.

Recommendation: We recommend the Department of Military Affairs improve controls over the grant reimbursement process in the Disaster & Emergency Services Division to ensure the expenditures are allowable under the grant awards.

Views of Responsible Officials and Corrective Action Plans: The department concurs with the recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-012: U.S. Department of Housing and Urban Development
CFDA #14.871, Housing Voucher Cluster
Grant #Various

Criteria: Federal regulation, 31 CFR 205, implements the Cash Management Improvement Act (CMIA). The CMIA requires the state to enter into agreements that prescribe specific methods of drawing down Federal funds, the details of which are included in the annual Treasury State Agreement (TSA) between the state and the Federal government.

The TSA in effect for fiscal year 2016 requires the Department of Commerce (department) to disburse funds to landlords by Electronic Fund Transfer so that the settlement date is the first business day of the month.

Condition: The department did not comply with the TSA during fiscal year 2016.

Questioned Costs: No questioned costs identified.

Context: We identified 54 instances, totaling \$713,386, where individual payments to landlords were made at times other than the first business day of the month, which does not comply with the TSA for fiscal year 2016. We tested compliance for fiscal year 2017 and determined the department was in compliance in fiscal year 2017 because the TSA was modified to reflect the department's business practices.

Effect: The department is not in compliance with federal cash management requirements in fiscal year 2016.

Cause: The department did seek an amendment to the 2016 TSA, but was informed that state initiated amendments only occur at the end of every fiscal year. The department continued with its established business practices which rendered it noncompliant with federal cash management regulations in fiscal year 2016.

Repeat Finding: This is a repeat finding, initially reported as finding 2015-020 in the Single Audit report for the two fiscal years ended June 30, 2015.

Recommendation: We recommend the Department of Commerce continue to monitor its business practices and amend the Treasury State Agreement as needed to ensure compliance with federal cash management regulations for the Section 8 Housing Choice Vouchers program.

Views of Responsible Officials and Corrective Action Plans: The department concurs. Department personnel contacted the Department of Administration as soon as they were aware of the noncompliance and were notified the TSA was amended once a year. The Department of Administration amended the TSA in June 2016. The department was not in compliance for fiscal year 2016 but was in compliance for fiscal year 2017. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-013: U.S. Department of Housing and Urban Development
CFDA #14.871, Housing Voucher Cluster
Grant #Various

Criteria: Federal regulation, 2 CFR 200.317, requires the Department of Commerce (department) to follow the same policies and procedures used for non-federal funds when procuring property and services under a federal award.

State law, §18-4-306, Montana Code Annotated, specifies that a contract may be awarded without competition if the department verifies in writing there is only one source for the service.

Federal regulation, 2 CFR 200.303, requires the department establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Condition: The department contracts annually with eleven organizations to perform administrative field services for operation of the Section 8 Housing Choice Vouchers program (program) for CFDA #14.871. The department considers these contracts sole source procurements, but it does not have documentation supporting a sole source designation.

Questioned Costs: We question \$1,291,564 and \$1,424,914 in procurement costs charged to CFDA #14.871 in federal fiscal years 2016 and 2017, respectively.

Context: The department negotiated eleven contracts in each fiscal year 2016 and 2017, for a total of 22 contracts during the audit period. None of the contracts have justification for a sole source procurement. The total amounts awarded were approximately \$1.85 million in each of the fiscal years 2016 and 2017.

Department personnel stated the Department of Administration had granted an exemption through the department's delegation agreement prior to 2007. The department no longer has the documentation for this exemption and has not documented a sole source justification since that time.

Effect: The department is not in compliance with federal procurement regulations for fiscal years 2016 and 2017, resulting in questioned costs.

Cause: Department personnel stated the department has not documented a sole source justification or solicited competition for field agent services since 2007.

Recommendation: We recommend the Department of Commerce implement internal controls to ensure sole source justification for its Section 8 Housing Choice Vouchers field service contracts is documented and approved in order to comply with federal procurement requirements.

Views of Responsible Officials and Corrective Action Plans: The department concurs. In fiscal year 2018, the department completed the sole source requirement and is now in compliance. The department has implemented new internal controls to verify the sole source status upon renewal of the contracts. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

- Finding 2017-014:** U.S. Department of Agriculture
CFDA #10.557, Special Supplemental Nutrition Program for Women, Infants,
and Children (WIC)
Grant #2015IW100643, 201616W1100643, 201717W100643
- U.S. Department of Health and Human Services
CFDA #93.558, TANF Cluster
Grant #1302MTTANF, 1402MTTANF, 1502MTTANF,
1601MTTANF, 1702MTTANF
- CFDA #93.667, Social Services Block Grant
Grant #G1601MTCWSS, G1701MTCWSS
- CFDA #93.767, Children’s Health Insurance Program (CHIP)
Grant #1505MT5021, 1605MT5021, 1705MT5021, 1705MT0301
- CFDA #93.775, 93.777, 93.778, Medicaid Cluster
Grant #1505MT5MAP, 1505MT5ADM, 1505MTHITA,
1605MT5MAP, 1605MT5ADM, 1605MTHITA, 1705MT5MAP,
1705MT5ADM, 1705MTHITA

Criteria: Federal regulation, 2 CFR 200.303, states that the non-federal entity must establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal regulation, 2 CFR 200 Appendix VI, in part, requires the state public assistance agency to develop, document, and implement a public assistance cost allocation plan in accordance with federal regulations.

Federal regulation, 2 CFR 200.416, in part, requires there to be a process whereby central service costs can be identified and assigned to benefitted activities on a reasonable and consistent basis.

Condition: We identified the following exceptions to compliance with the cost allocation plan, some of which led to questioned costs:

- ◆ Expenses for the *Business and Financial Services Division Administrator Indirect Cost Pool* were allocated equally to four programs, including approximately \$92,800 to Medicaid, while the cost allocation plan specified equal allocation to three programs, not including Medicaid.
- ◆ Costs for the *Communicable Disease Control Bureau Chief Indirect Cost Pool*, the *Disability Services Division Developmental Disability Formula IV Indirect Cost Pool* (DD Formula IV), and the *Chronic Disease and Health Promotions Bureau Chief Indirect Cost Pool* are each being allocated as separate indirect cost pools, but none are listed as a separate cost pool in the cost allocation plan. The DD Formula IV cost pool allocated approximately \$18,200 to the Medicaid program and approximately \$43,800 to the Social Services Block Grant program during the audit period.
- ◆ The cost allocation plan includes, as an indirect cost pool, the *Technology Services Division's Document Management System Indirect Cost Pool*. While the description discusses the Children's Health Insurance Program (CHIP) as a participant, the allocation methodology outlined in the plan does not include CHIP. The department allocated approximately \$6,300 to CHIP during the audit period.
- ◆ The cost allocation plan lists the *Senior Epidemiologist Direct Cost Pool*, but the department treated this cost pool as an indirect pool and allocated approximately \$5,000 monthly costs in this pool to 55 projects for the month tested. Individual monthly project allocations ranged from \$7 to \$565.
- ◆ Costs for *Business and Financial Services Division Cars Indirect Cost Pool* were allocated based on the use of four cars maintained in Helena, while the cost allocation plan specifies costs associated with this pool be allocated based on county office vehicle mileage reports.

Some of the allocation methods have been in use for a period of several years but those changes are not reflected in the cost allocation plan.

Questioned Costs: We question \$111,000 of costs for the Medicaid Cluster (CFDA #93.775, 93.777, 93.778); \$43,800 of costs for the SSBG program (CFDA #93.667); and \$6,300 for the CHIP program (CFDA #93.767). Questioned costs are reported in total for fiscal years 2016 and 2017.

Based on the number of discrepancies between the approved cost allocation plan and the department's allocation of indirect costs, additional discrepancies not identified in our sample likely exist. In addition, these discrepancies could include additional unallowable costs and could potentially impact all programs administered by the department.

Context: The current cost allocation plan includes over 100 indirect cost pools, each of which specify the costs included and the method for allocation to specific federal and state programs. Composition of each pool varies, but could include costs for salaries, fringe benefits, travel, and other operational costs. During the audit, we reviewed one month's allocation methodology for 24 indirect cost pools, and compared the allocation to the cost allocation plan. The sampling plan was not statistically valid.

The cost allocation process is a recurring monthly cycle. If procedures to allocate costs are established in a manner inconsistent with the approved cost allocation plan, unauthorized allocation is likely to recur for the following periods. Additionally, as the department makes organizational changes, if the cost allocation plan is not also changed timely, the various programs are over- or under-allocated costs from which the programs are benefitting from. Without explicit permission from the federal government to make changes to allocation methodologies, the department should apply only those methodologies in its most recently approved cost allocation plan.

Effect: The department is not in compliance with its federally approved cost allocation plan, resulting in questioned costs.

Cause: The department indicated their normal process is to make incremental changes to the cost allocation plan. When waiting for the most recently submitted cost allocation plan to be approved, the department continues to make business process changes that could also change the allocation of indirect costs. The department says changes to cost allocation methodologies are tracked and submitted with the next version of the cost allocation plan.

Department staff point to a variety of reasons for inconsistencies in applying the cost allocation plan requirements, including the complexity in the document and difficulty in keeping up with changes as the department staff responsibilities change.

Recommendation: We recommend the Department of Public Health and Human Services:

- A. Review all cost pools to ensure department procedures align with cost allocation plan requirements specified in federal grant award letters, and
- B. Allocate costs as specified in the cost allocation plan, as required by federal regulations.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

- Finding 2017-015:** U.S. Department of Health and Human Services
 CFDA #93.558, TANF Cluster
 Grant #1302MTTANF, 1402MTTANF, 1502MTTANF,
 1601MTTANF, 1702MTTANF
- CFDA #93.568, Low Income Housing Energy Assistance Program
 Grant #14B1MTLIEA LIEA14, 15BMTLIEA LIEA15, 16B1LIEA
 LIEA16, 17B1LIEA LIEA17
- CFDA #93.575 and 93.596, CCDF Cluster
 Grant #1401MTCCDF, 2015G999004, 2016G996004, 2016G996005,
 1501MTCCDF, 1601MTCCDF, 1701MTCCDF, 2017G996005
- CFDA #93.658, Foster Care—Title IV-E
 Grant #1501MTFOST, 1601MTFOST, 1701MTFOST
- CFDA #93.659, Adoption Assistance
 Grant #1501MTADPT, 1601MTADPT, 1701MTADPT

Criteria: Federal regulation, 2 CFR 200.303, states that the Department of Public Health and Human Services (department) entity must establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal regulation, 31 CFR 205, implements the Cash Management Improvement Act (CMIA). The CMIA provides requirements and procedures for the transfer of federal financial assistance from federal agencies to the states, and specifies the terms and conditions under which an interest liability would be incurred, the details of which are included in the annual Treasury State Agreement (TSA) between the state and the Federal government.

For federal awards not included in the TSA, federal regulation 31 CFR 205.33 specifies a state must minimize the time between the drawdown of federal funds and their subsequent disbursement for

Federal program purposes. For these awards, department policy is to seek reimbursement when the department has incurred \$20,000 in federal program costs, or at least quarterly.

Condition: The department has not complied with federal requirements to minimize the time between incurring expenditures and receiving federal reimbursement funds, including adhering to the requirements of the TSA. For purposes of this recommendation, Federal programs included in the TSA were LIHEAP and TANF (CFDA #93.558), while Federal programs subject to department policy were the Child Care and Development Block Grant (CCDF), Foster Care, and Adoption.

Specifically for the LIHEAP Federal award, the department used a four-day clearance pattern for warrants rather than the 5-day clearance pattern specified in the TSA.

During the audit period, the department did not complete reconciliations of spreadsheets to the state's accounting records. The spreadsheets are used to demonstrate compliance with the TSA for the LIHEAP or TANF programs. While a type of reconciliation was completed for TANF, it did not accomplish the purpose of the reconciliation.

Questioned Costs: No questioned costs identified.

Context: For the department's Federal programs included in the TSA, we sampled three cash draws from fiscal years 2016 and 2017, for a total of six cash draws per program. This was not a statistically valid sample.

The department's CCDF, Foster Care, and Adoption programs are subject to department policy for cash draws. For these programs, we performed a sample of non-TSA cash draws to determine whether the program's cash balance was considered, and whether the amount of the federal draw request was supported. We also analyzed daily cash balances for each of the programs and noted instances where federal draw requests resulted in excess cash on the state's accounting records for a period of time. In addition, we identified instances where the cash balance in the federal program account was negative \$20,000, but a reimbursement request was not executed by the department. For all instances where federal draws were not executed, we confirmed federal grant authority existed on the federal draw system indicating a timely cash draw could have occurred. The number of instances where the time between payment of expenditures and receipt of federal funds was not minimized for non-TSA awards is summarized in the table below:

Program	Excess Cash Draws			Insufficient Cash Draws		
	Instances of Excess Cash	Range of Days of Excess Cash	Highest Amount of Excess Cash Within Range	Instances of Expenditures in Excess of \$20,000 with no Cash Draw	Range of Days of Negative Cash	Highest Amount of Negative Cash Within Range
Adoption	3	6 to 19	\$110,820	1	12	\$77,310
Foster Care	2	30 to 31	\$345,400	3	6 to 13	\$1,485,070
CCDF	5	7 to 15	\$1,673,670	9	5 to 53	\$1,739,430

Source: Compiled by the Legislative Audit Division from department records.

For TSA awards, we also conducted reviews to determine whether the cash flow activity was properly recorded on spreadsheets provided by the Department of Administration to demonstrate statewide compliance with the TSA. For the LIHEAP program, we found most expenditure transactions were not recorded on the spreadsheets for the correct day. The department routinely recorded the expenditures on the day the revenue was received rather than when expenditures were incurred. Accurate completion of the spreadsheets is important because the spreadsheets are used to calculate whether the state or federal government is owed interest from their annual cash transactions.

Effect: Inconsistent and inaccurate application of the department's cash draw processes are evidence of a breakdown in internal controls for cash management. For non-TSA awards, if the department is unwilling or unable to minimize the time between the drawdown and disbursement of federal funds, the Federal government may require the affected program be subject to the TSA. For TSA awards, if a state repeatedly or deliberately fails to request funds in accordance with the procedures established for its funding techniques, the Federal government may deny the state payment or credit for the resulting Federal interest liability.

Cause: Department staff point to several reasons for the inconsistent and inaccurate application of their cash draw processes, including issues related to staff turnover and vacant positions. According to the department, the division in charge of these cash flow processes has experienced significant turnover during the past two years, including two employee retirements and four voluntary employment terminations or changes. Other than two staff with 8 years of experience, the remaining five staff each have 1.5 or less years of experience with the division.

Regarding TSA requirements for the LIHEAP Federal award, the staff were not aware of the requirements outlined in the TSA.

Recommendation: We recommend the Department of Public Health and Human Services:

- A. Establish procedures to ensure staff are properly cross-trained in order to execute cash reimbursement requests for its federal programs in a timely manner, as required by the Treasury State Agreement and federal regulations,
- B. Establish procedures to ensure staff are properly trained regarding the completion of Treasury State Agreement cash spreadsheets, and
- C. Comply with the Treasury State Agreement for the Low Income Home Energy Assistance Program, as required by federal regulations.

Views of Responsible Officials and Corrective Action Plans: The department concurs with the recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-016: U.S. Department of Health and Human Services
 CFDA #93.775, 93.777, 93.778, Medicaid Cluster
 Grant #1505MT5MAP, 1505MT5ADM, 1505MTHITA,
 1605MT5MAP, 1605MT5ADM, 1605MTHITA, 1705MT5MAP,
 1705MT5ADM, 1705MTHITA

Criteria: Federal regulation, 2 CFR 200.303, requires the Department of Public Health and Human Services (department) to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal regulation, 42 CFR 431.107, in part, requires the state Medicaid agency to have an agreement with each provider or organization furnishing services under the Medicaid state plan. As part of the agreement, the provider must disclose information about its ownership and control, business transactions, and persons convicted of crimes.

Condition: The department could not readily produce Medicaid provider agreements when initially requested. Improvements are needed in the department's internal controls to obtain agreements or disclosures required for providers or organizations furnishing Medicaid services.

Questioned Costs: No questioned costs identified.

Context: Using a statistically valid plan to determine whether the provider agreements existed and whether the required disclosures were included in the documents, a sample of twenty provider agreements were selected from a list of nearly 1,000 Medicaid providers. When support was requested in late June 2017, the department was not able to provide us with the agreements for twelve of the twenty Medicaid providers tested. In mid-August, we communicated these exceptions in writing, and in early October the department provided all but one of the Medicaid provider agreements. At that time, two other agreements did not contain the federally required disclosures. Just prior to the completion of the audit in October 2017, the final pieces of information were delivered.

Effect: Because the department could not readily produce the provider agreements, it is possible that the information required does not exist for all providers. This means there is risk that providers are improperly receiving payment for services provided under the Medicaid program.

Cause: The department's internal control procedures are not adequate to ensure that the provider agreements and required federal disclosures are maintained.

Recommendation: We recommend the Department of Public Health and Human Services enhance internal controls to ensure provider agreements are obtained and include disclosures regarding ownership and control, business transactions, and persons convicted of crimes, as required by federal regulations.

Views of Responsible Officials and Corrective Action Plans: The department concurs with the recommendation. The department stated that it will review and enhance internal controls to ensure compliance with federal regulations related to provider agreements and disclosures. For additional information regarding the department's planned corrective action see Corrective Action plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-017: U.S. Department of Health and Human Services
 CFDA #93.775, 93.777, 93.778, Medicaid Cluster
 Grant #1505MT5MAP, 1505MT5ADM, 1505MTHITA,
 1605MT5MAP, 1605MT5ADM, 1605MTHITA, 1705MT5MAP,
 1705MT5ADM, 1705MTHITA

Criteria: Federal regulations, 42 CFR 455.15 and 455.21, require the Department of Public Health and Human Services (department) to refer all cases of suspected provider fraud to Medicaid Fraud Control Unit (MFCU) if the findings of a preliminary investigation give the department reason to believe an incident of fraud or abuse by a Medicaid provider has occurred.

Federal regulation, 42 CFR 455.23, states that the department must suspend all Medicaid payments to a provider after the department determines there is a credible allegation of fraud.

The agreement between the department's Surveillance Utilization Review Section (SURS) unit and MFCU specifies referrals to the MFCU be in writing.

Condition: Cases of suspected fraud identified by SURS were not referred to the Medicaid Fraud Control Unit.

Questioned Costs: No questioned costs identified.

Context: When SURS identifies overpayments greater than \$5,000, the case is discussed by the department's Medicaid Review Committee. Overpayments could be due to either error or fraud. We obtained and reviewed the minutes of all Medicaid Review Committee meetings held during the audit period. Of the 37 cases discussed, 8 cases were questioned by meeting attendees for fraud and only 1 of these questioned cases was referred to MFCU. For the remaining cases that were questioned for fraud, the meeting minutes indicate they were not referred to MFCU because they determined there was no credible allegation of fraud. This is contrary to federal regulations which require referral to the MFCU when fraud is suspected.

There is a substantive difference between the threshold level of certainty or proof necessary to refer the suspected fraud to MFCU and a threshold for suspension of payments based on a determination of a credible allegation of fraud.

Effect: The department did not comply with federal regulations.

Cause: Department staff indicated the MFCU personnel participation in the Medicaid Review Committee meetings was verbal referral which met the federal requirements. However, there is no indication in the Medicaid Review Committee minutes that MFCU staff considered these discussions to be verbal referral. Rather, the August 2016 minutes specifically document MFCU staff saying referral was not taking place at this time.

Recommendation: We recommend the Department of Public Health and Human Services refer all suspected cases of Medicaid fraud to the Medicaid Fraud Control Unit, as required by federal regulations.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-018: U.S. Department of Health and Human Services
 CFDA #93.775, 93.777, 93.7778, Medicaid Cluster
 Grant #1505MT5MAP, 1505MT5ADM, 1505MTHITA,
 1605MT5MAP, 1605MT5ADM, 1605MTHITA, 1705MT5MAP,
 1705MT5ADM, 1705MTHITA

Criteria: Federal regulation, 2 CFR 200.303, states that the Department of Public Health and Human Services (department) must establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Condition: The department does not have adequate controls to ensure amounts reported for Medicaid are complete and accurate.

Questioned Costs: No questioned costs identified.

Context: We reviewed four of eight CMS-64 reports submitted for the Medicaid program during the audit period. Of these four reports, two were submitted timely, but were later resubmitted at a much later date due to significant errors identified by the federal government in their review. This was not a statistically valid sample. Errors in the CMS-64 are summarized in the following table:

Quarterly Report and Incorrect Elements	Original Submission	Corrected Submission	Difference
December 2015			
Total Medicaid Assistance Payments	\$55,895,910	\$270,297,146	\$214,401,236
Federal Share	\$38,354,496	\$182,790,166	\$144,435,670
September 2016			
Federal Share	\$262,580,380	\$234,792,059	\$27,788,321

Effect: If the data submitted in the CMS-64 reports is not reliable, the department risks noncompliance with federal regulations.

Cause: During the time that these reports were submitted, there was turnover in the staff responsible for the completion and submission. Additionally, complex modifications to standard department procedures used to compile expenditure data were necessary to implement reporting requirements for the Affordable Care Act population.

Repeat Finding: This is a repeat finding, initially reported as finding 2015-008 in the Single Audit report for the two fiscal years ended June 30, 2015.

Recommendation: We recommend the Department of Public Health and Human Services document internal control procedures to ensure accuracy of CMS-64 reporting for Medicaid.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-019: U.S. Department of Health and Human Services
 CFDA #93.775, 93.777, 93.778, Medicaid Cluster
 Grant #1505MT5MAP, 1605MT5MAP, 1705MT5MAP,
 1505MT5ADM, 1605MT5ADM, 1705MT5ADM, 1505MTHITA,
 1605MTHITA, 1705MTHITA

Criteria: Federal regulation, 2 CFR 200.303, states that the Department of Public Health and Human Services (department) must establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal regulation, 45 CFR 95.621(f)(3), in part, requires the department review the Automated Data Processing (ADP) system security of installations involved in administration of U.S. Department of Health and Human Services (HHS) programs on a biennial basis, including, at a minimum, an evaluation of physical and data security operating procedures and personnel practices.

Condition: A biennial review of Automated Data Processing (ADP) systems used to administer Medicaid and other federal programs was not completed, as required by Federal regulations.

Questioned Costs: No questioned costs identified.

Context: The department implemented a more formalized risk assessment process and identified over 100 ADP systems in use. Approximately 70 of those systems contain electronic public health information.

From the department's list of 70 completed ADP system reviews, we selected seven for testing. This was not a statistically valid sample. We found documentation was missing or incomplete for six of the reviews. Without documentation to confirm each element of the review was conducted, department staff were unable to demonstrate those portions of the ADP review were completed. In addition, we identified at least five systems used in the administration of HHS programs that did not receive an ADP review during the biennium.

Effect: The department did not comply with federal regulations. Additionally, the lack of review puts the department at risk of making inappropriate eligibility determinations or benefit calculations for a variety of federal programs.

Cause: Due to limited staff resources, department staff represented they focused on the 70 ADP systems which contain electronic public health information.

Repeat Finding: This is a repeat finding, initially reported as finding 2015-012 in the Single Audit report for the two fiscal years ended June 30, 2015. We consider the recommendation to be partially implemented.

Recommendation: We recommend the Department of Public Health and Human Services:

- A. Modify internal controls to ensure documentation supporting Automated Data Processing reviews contains all necessary information, and
- B. Comply with federal regulations by completing biennial reviews of all Automated Data Processing systems used in administering programs on behalf of the federal Department of Health and Human Services.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-020: U.S. Department of Agriculture
CFDA #10.557, Special Supplemental Nutrition Program for Women, Infants,
and Children (WIC)
Grant #201515W100643, 201616W1100643, 201717W100643

Criteria: According to the WIC state plan, voided program benefits will be rejected by the WIC bank. Federal regulation, 7 CFR 246.3, requires the state to follow its WIC state plan.

Federal regulation, 7 CFR 246.12(k)(1), requires, in part, the Department of Public Health and Human Services (department) design and implement a system to review food instruments and cash vouchers submitted by vendors for redemption to ensure compliance and to detect questionable food instruments, suspected vendor overcharges, and other errors.

Federal regulation, 7 CFR 246.12(q), in part, requires the department to account for the disposition of all food instruments and cash-value vouchers as either issued or voided.

Federal regulation, 2 CFR 200.303, requires the department to establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Condition: During the audit, we obtained a listing of all food instruments and cash-value vouchers (food instruments) issued between July 1, 2015, and April 10, 2017. We analyzed the data and identified 731 voided benefits not rejected by the WIC bank, totaling approximately \$20,000. Of these, over 500 food instruments were voided 8 days or more prior to being cashed. Assuming a steady rate of occurrence for the audit period, we project total voided, yet subsequently redeemed, benefits at approximately \$22,800 during the period under audit.

Questioned Costs: We question approximately \$22,800 in costs charged to CFDA #10.557 for the period of July 1, 2015 through April 10, 2017.

Context: The analysis we conducted was a comparison of the date voided and the date the food instrument was cashed. Our procedures included the entire population of food instruments issued between July 1, 2015 and April 10, 2017.

Effect: The department is not in compliance with federal regulations.

Cause: Program staff indicate they do not review WIC benefit data for these types of issues.

Recommendation: We recommend the Department of Public Health and Human Services:

- A. Develop internal controls to ensure voided benefits for the Special Supplemental Nutrition Program for Women, Infants, and Children are not subsequently paid by the WIC bank, as required by the state plan and federal regulations.
- B. Reimburse the WIC bank only for valid food instruments, as required by federal regulations.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-021: U.S. Department of Agriculture
 CFDA #10.557, Special Supplemental Nutrition Program for Women,
 Infants, and Children (WIC)
 Grant #201515W100643, 201616W1100643, 201717W100643

Criteria: Federal regulation, 2 CFR 200.303, states that the Department of Public Health and Human Services (department) must establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal regulation, 7 CFR 246.12(q), requires the department to account for the disposition of all food instruments and cash-value vouchers as either issued or voided, and as either redeemed or unredeemed. Further classification of redeemed food instruments and cash-value vouchers as validly issued, lost, stolen, expired, duplicate, or not matching valid enrollment and issuance records is also required.

Condition: The program does not determine and account for the ultimate disposition of WIC benefits.

Questioned Costs: No questioned costs identified.

Context: We analyzed all WIC food instruments and cash-value vouchers issued between July 1, 2015, and April 10, 2017. Lack of classification of the ultimate disposition of WIC benefits is a systemic issue for this time period.

Identifying the ultimate disposition of WIC benefits helps ensure that complete and accurate data is being reported, and also provides a mechanism to aid the department in identifying inappropriate or fraudulent benefit payments. Complete identification of food instrument disposition would also allow the department to identify patterns in the data, such as repeated requests for duplicate food instruments, which could be an indicator of fraudulent benefit payments.

Effect: The department is not in compliance with federal regulations. In addition, without procedures in place to identify and review the ultimate disposition of all food instruments, there is an increased risk that inappropriate or fraudulent benefit payments will not be detected by department staff. Also,

the department may be liable to the federal government for any claims against them for not accounting for the disposition of all redeemed food instruments.

Cause: Department staff were either unaware of the disposition classification requirements or determined the information would not be useful for program monitoring purposes because the expiration date would render the food instrument unredeemable. The department also pointed to limitations of their information system which is used to track food instruments, including the fact that the system does not have a field where status is recorded. WIC program personnel indicated the new electronic benefit transaction system, implemented September 2017, will change how redemption data is accounted for.

Recommendation: We recommend the Department of Public Health and Human Services:

- A. Develop internal controls to account for the disposition of all food instruments and cash-value vouchers as required by federal regulations.
- B. Account for the disposition of food instruments and cash-value vouchers as either issued or voided, redeemed or unredeemed, including applicable subclassifications, in accordance with federal regulations.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-022: U.S. Department of Health and Human Services
 CFDA #93.575, 93.596, CCDF Cluster
 Grant #1401MTCCDF, 2015G999004, 1501MTCCDF,
 2016G996005, 2016G999004, 1601MTCCDF, 2017G996005,
 1701MTCCDF

Criteria: Federal regulation, 2 CFR 200.303, states that the Department of Public Health and Human Services (department) must establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal regulation, 45 CFR 98.60(i) requires the department to recover child care payments that are the result of fraud.

Condition: During the audit period, CCDF staff identified a total of eight overpayments ranging from \$131 to \$2,292 resulting from fraud. The department did not follow their policy and did not seek recovery for all fraudulent child care overpayments identified.

Questioned Costs: We question \$2,669 and \$3,741 in program costs charged to CFDA #93.575 and #93.596 in state fiscal year 2016 and 2017, respectively.

Context: We considered the entire population of overpayments identified by the department. Of the eight overpayments identified by the department, we noted four instances where recovery was not sought.

Effect: The department is not in compliance with federal regulations.

Cause: Program personnel indicated their policy is to report all overpayments to the Business and Financial Services Division (BFSF). BFSF in turn applies its accounts receivable procedures to obtain repayment from the client. For the instances where recovery was not sought, the information was not reported to BFSF as required by department policy.

Recommendation: We recommend the Department of Public Health and Human Services comply with federal regulations by:

- A. Developing internal control procedures to ensure coordination between program and Business and Financial Services Division staffs for recovering Child Care Development Fund overpayments resulting from fraud, and
- B. Seek timely recovery for all identified fraudulent child care overpayments as required by federal regulations.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-023: U.S. Department of Health and Human Services
 CFDA #93.558, TANF Cluster
 Grant #1302MTTANF, 1402MTTANF, 1502MTTANF,
 1601MTTANF, 1702MTTANF

Criteria: Federal regulation, 45 CFR 205.56, requires the Department of Public Health and Human Services (department) use the information obtained under federal regulation, 45 CFR 205.55, in conjunction with other information, for determining individuals' eligibility for assistance under the State plan and determining the amount of assistance. In addition, the state agency must review and compare the information obtained from each data exchange against information contained in the case record to determine whether it affects the eligibility or assistance amount determinations.

Condition: The department obtains the required Internal Revenue Service (IRS) information through a download twice per year. However, the information is not subsequently used by the department in evaluating eligibility and assistance amounts.

Questioned Costs: No questioned costs identified.

Context: Current procedures are to download the IRS information onto a laptop computer which is then locked in a file cabinet until the information is destroyed without any review of the information.

During the audit period, the department disbursed over \$50 million in federal funds to the Temporary Assistance for Needy Families (TANF) recipients.

Effect: The department's failure to review and use the IRS income information resulted in noncompliance with federal regulations and increases the risk that improper eligibility assessments, as well as improper levels of assistance, occurred during fiscal years 2016 and 2017.

Cause: Department staff indicate the IRS informed them they were required to download the information but did not need to further utilize it. However, the TANF program is governed by the federal Administration for Children & Families, a division of the federal Health and Human Services agency, whose rules do require use of the IRS data. In addition, the department cited staff shortages as a reason they chose to follow the IRS advice.

Recommendation: We recommend the Department of Public Health and Human Services comply with federal regulations for the Temporary Assistance for Needy Families program by comparing income information obtained from the Internal Revenue Service to information contained in individual case records in order to determine the effect, if any, on individuals' eligibility or amount of assistance.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-024: U.S. Department of Health and Human Services
 CFDA #93.558, TANF Cluster
 Grant #1302MTTANF, 1402MTTANF, 1502MTTANF,
 1601MTTANF, 1702MTTANF

Criteria: Federal regulation, 2 CFR 200.317, requires the state to follow the same policies and procedures used for non-Federal funds when procuring property and services under a federal award.

Federal regulation, 2 CFR 75.329, further specifies the type of procurement methods the state must follow for its public welfare programs.

Federal regulation, 2 CFR 200.88, requires a competitive process for all procurements in excess of \$150,000.

The department is delegated certain purchasing authority from the Department of Administration's Procurement Bureau. Under the delegation agreement, the department may use the following purchasing methods:

- ◆ Small Purchases – for total contract value of \$5,000 or less, the department may choose a purchasing technique that best meets its needs.
- ◆ Limited Solicitations – for total contract value between \$5,001 and \$25,000, the department must obtain and document prices from a minimum of three viable sources.
- ◆ Formal Competition – for total contract value between \$25,001 and \$200,000, the department must use either an invitation for bid or request for proposal process.
- ◆ Sole Source – for total contract value up to \$200,000, the department determines whether a purchase qualifies as sole source.

Condition: As allowed by federal regulations, the department can use a portion of TANF funds to pay costs associated with children in Foster Care. During the audit period, the department did not follow federal regulations and state procurement policies when incurring approximately \$2.7 million in total costs from all funding sources for nonmedical services for the Foster Care program. We reviewed the service code documentation for the three vendors, and determined the services were for one-on-one supervision of youth, chemical dependency evaluations, urine analyses, and support services for a child in placement for the Foster Care program. Although there is a statutory exception for services

from health care providers, the costs incurred do not fall under the exception because the services are not provided by health care providers.

Questioned Costs: We identified unallowable federal costs for services without a contract totaling approximately \$274,300 for CFDA #93.558. However, for all 91 vendors paid without an underlying agreement, total expenses incurred by CFDA #93.558 were approximately \$640,900. Total questioned costs for CFDA #93.558 could be as high as \$640,900 if other vendors were compensated for services for which there is not an exclusion under state law.

Context: During the audit, department staff disclosed they had identified approximately \$2.7 million in payments from its Child and Family Services Division to 91 vendors without underlying service contracts. These costs were paid from the treasury using both state and federal funds. We requested and reviewed the information for the three top paid vendors which were individually paid between \$187,000 and \$505,000 during fiscal year 2017.

Effect: By not following applicable procurement procedures, payments to these vendors are not an allowable use of federal TANF funds.

Cause: Department staff are uncertain why these vendors were used to provide services without following the state's procurement laws and policies.

Recommendation: We recommend the Department of Public Health and Human Services comply with state law and federal regulations by following state procurement policies to obtain services for the Temporary Assistance for Needy Families and Foster Care programs.

Views of Responsible Officials and Corrective Action Plans: The department does not concur with the recommendation as they believe the services in question are exempt from procurement requirements based on state statute. For additional information regarding the department's planned corrective action see Corrective Action plan starting on page D-1.

Rebuttal for Views of Responsible Officials: The department's views do not contain any information not already considered during the audit. As such, we maintain our position as reported.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-025: U.S. Department of Education
 CFDA #84.126, Rehabilitation Services – Vocational Rehabilitation Grants to
 States
 Grant #FFY15-H126A150038, FFY16-H126A160038,
 FFY17-H126A170038

Criteria: Federal regulations, 2 CFR 200.403, specifies in order to be allowable, costs must be necessary and reasonable for the performance of the Federal award.

Federal regulations, 2 CFR 200.404, specifies costs to federal programs are reasonable if they do not exceed that which would be incurred by a prudent person under the circumstances prevailing at the time the decision was made to incur the cost.

Condition: In July 2017, two department staff were placed on paid administrative leave while the department conducted an investigation of the Vocational Rehabilitation program. From July to mid-October 2017, approximately \$58,270 in wages for these employees were charged to the federal Vocational Rehabilitation program because no changes were made to how the employees' payroll was processed. As of mid-October, there has been no change in employee status recorded in the state's accounting system, and the employees continue to be paid partially with federal funds.

Questioned Costs: We question an estimated \$58,270 in payments made for two employees placed on administrative leave charged to CFDA #84.126 in state fiscal year 2018 through October 2017. Questioned costs will continue to accumulate until salaries for these staff are no longer charged to the program.

Context: Department administration believe the Vocational Rehabilitation program was mismanaged because the department continued to record approximately \$4.6 million in expenditures in the federal special revenue fund when no further federal funds were available. By the end of fiscal year 2017, the department identified alternative funding authority and moved the \$4.6 million to the General Fund; this did not include the questioned costs identified above for fiscal year 2018.

There is no benefit to the Vocational Rehabilitation program for the staff who are on paid administrative leave because the department is paying other staff, effective July 2017, to administer the program. As such, we do not consider long-term administrative leave to be necessary for the program.

Effect: The costs associated with staff on administrative leave are not an allowable use of federal funds, resulting in questioned costs.

Cause: Department staff believe these administrative costs are a normal and reasonable charge, which the department says is a standard and regular occurrence for the agency.

Recommendation: We recommend the Department of Public Health and Human Services discontinue using federal Vocational Rehabilitation funds to pay the cost of wages associated with staff placed on administrative leave.

Views of Responsible Officials and Corrective Action Plans: The department does not concur with this recommendation. The department believes administrative leave is a normal and reasonable charge, and is a cost effective alternative to more complicated administrative processes that would also be charged to the federal program. For additional information regarding the department's planned corrective action see Corrective Action plan starting on page D-1.

Rebuttal of Views of Responsible Officials: The department's views do not contain any information not already considered during the audit. As such, we maintain our position as reported.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-026: U.S. Department of Health and Human Services
 CFDA #93.268, Immunization Cooperative Agreements
 Grant #NH23IP000755-05-02 (formerly 5H23IP000755-03)

Criteria: Federal regulation, 2 CFR 200.403(b) states, in part, except where otherwise authorized by statute, costs must conform to any limitations or exclusions set forth in the federal award.

The grant award letter for the Immunization Cooperative Agreements (Immunization) award for the period April 2017 to June 2018 specifies indirect costs for the Immunization program are limited to \$9,049.

Condition: Although program staff have been working to obtain modifications to the grant award letter, as of June 2017 authority for indirect costs remained limited. Between April and June 2017, as part of the regular cost allocation process, the department recorded \$76,011 in indirect costs to this Immunization grant.

Questioned Costs: We question \$66,962 in unallowable indirect costs charged to CFDA #93.268 between April 1, 2017, and June 30, 2017.

Context: Indirect costs are specifically limited in each the original and updated Immunization award for the period April 2017 to June 2018. Immunization award letters for previous years contained language allowing participation in the department's cost allocation process.

Effect: The department is not in compliance with federal grant award limitations for federal indirect costs as of June 2017, resulting in questioned costs. Although our audit only identified the limitation for the Immunization program, without specifically considering individual grant award letter content the department risks charging unallowable costs to all federal awards it administers.

Cause: After the initial award notification was received, the department began negotiations for higher indirect costs for the Immunization grant. As of the end of fiscal year 2017, the department had not successfully negotiated for indirect costs. While documented cost allocation procedures include monthly consideration of the newly identified limitations in individual grant award letters, the

limitation specified in the Immunization grant award letter was not put into place as part of the April, May, or June allocation processes.

Recommendation: We recommend the Department of Public Health and Human Services allocate costs as specified in the cost allocation plan and federal grant award letter restrictions, as required by federal regulations.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-027: U.S. Department of Transportation
 CFDA #20.205, 20.219 Highway Planning and Construction Cluster
 Grant #Not Applicable

Criteria: Federal law, 23 USC 112(1), requires construction for each project under CFDA #20.205 be performed by contract awarded by competitive bidding.

Federal regulations, 23 CFR 635.109, requires standard contract language be incorporated into each construction contract related to significant changes in the character of work, and contains standard contract language defining a significant change as occurring when one or more of the following circumstances occurs:

- ◆ When the character of work differs materially in kind or nature from that involved or included in the original proposed construction; or
- ◆ When a major item of work, as defined in the contract, is increased or decreased in excess of 25 percent of the one original quantity in the contract.

The Montana Department of Transportation's (department) Standard Specification for Road and Bridge Work (spec book), Section 104.02.3, defines a significant change as occurring when one or more of the following circumstances occurs:

- ◆ When the character of work differs materially in kind or nature from that involved or included in the original proposed construction; or
- ◆ When a major item of work, defined as an item of work comprising at least 5 percent of the initial bid on the contract, is increased or decreased in excess of 25 percent of the one original quantity in the contract; or
- ◆ When an item of work, not defined as a major, has a quantity change in excess of 50 percent.

Condition: The department's mechanism to amend a construction contract is to enter into a change order with the contractor. The department did not issue contract change orders in accordance with requirements in the spec book and federal regulations.

Questioned Costs: We question \$900,000 of direct, and associated indirect, costs inappropriately charged to CFDA #20.205 in state fiscal years 2016 and 2017.

Context: As part of our audit, we planned to perform a statistically valid sample of 30 projects from the 286 projects closed during the audit period, to determine whether the total quantities of items paid to the contractor were consistent with the contract and any associated change orders, based on the requirements in the spec book. While testing the third item in the sample, we identified a quantity change in excess of 50 percent for a non-major item of work, with no corresponding contract change order.

Through our follow-up on this sample item, we discovered the department's practices for issuing change orders were inconsistent with the spec book. Instead of completing the sample, we performed alternative procedures to quantify the impact of these inconsistencies. Through this work, we identified two types of situations in which change orders required under the spec book were not issued.

- ◆ **Changes in Quantities for Major Items of Work**

The department uses its project management system, SiteManager, to track the quantity of bid items paid to contractors. Consistent with federal regulations and the spec book, the department has programmed SiteManager to require a change order when a major item of work has a quantity change in excess of 25 percent. During the audit period, department staff overrode this change order requirement in SiteManager for 16 projects.

- ◆ **Changes in Quantities for Non-Major Items of Work**

The department has programmed SiteManager to require change orders for non-major items of work only after quantity changes exceed 999 percent. This is inconsistent with the spec book, which defines changes in excess of 50 percent as significant for these items. Additionally, during the audit period, department staff overrode SiteManager change order requirements for 12 projects with quantity overruns in excess of 999 percent for non-major items of work.

For these projects, the department did not document changes and additional costs through a formal change order, and paid the contractors for the quantity overruns. Because these costs were incurred without an amendment to the contract, they are considered unallowable uses of federal funds. Approximately half of the question costs outlined above were attributed to one project.

Effect: The costs paid without a change order were inappropriately charged to the federal program, resulting in questioned costs. The department may have an obligation to repay the Federal Highway Administration for these costs.

Cause: Documentation on file indicates staff overrode the change order requirements in SiteManager for most of the projects we reviewed because either: 1) the incremental quantity overruns in excess of what would require a change order were small; or 2) the cost to negotiate a bid item price reduction, which would have allowed the department to pay the actual quantities used within the original contract amount, would have exceeded the potential cost savings from negotiating a lower price on the bid item. However, federal regulations requiring contract adjustments do not establish exceptions for these types of situations.

Additionally, department management indicated they do not believe all quantity changes in excess of 25% for major items and 50% for non-major items result in an actual significant change in the kind or nature of the work being performed on a project. In cases where management does not believe a significant change in the kind or nature of work being performed has actually occurred as a result of a change in quantity, they do not obtain change orders. This is inconsistent with the spec book and federal regulations, which define a significant change within the context of either changes in quantities of goods used or changes in the kind or nature of work being performed.

Recommendation: We recommend the Montana Department of Transportation:

- A. Issue contract amendments for changes in contract quantities that are considered significant, as required by department policy and federal regulations governing the Highway Planning and Construction Program, and
- B. Analyze the current definition of significant change in the Standard Specifications for Road and Bridgework, as it relates to non-major items of work, and if considered appropriate, request approval from the Federal Highways Administration to modify the definition to more closely mirror federal regulations and department business practices.

Views of Responsible Officials and Corrective Action Plans: The department partially concurs with this recommendation. The department management interpret the federal regulations and spec book as a two-step process, where the first step is identifying if a significant change in quantities has occurred and the second step is determining whether significant changes in quantities cause a significant change in the character of work. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

Rebuttal of Views of Responsible Officials: As indicated in the finding, the department's two-step process is inconsistent with federal regulations and the spec book. The requirements of those regulations and department policy, as described in the finding, are accurate. We maintain our position as reported.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-028: U.S. Department of Transportation
CFDA #20.205, 20.219 Highway Planning and Construction Cluster
Grant #Not Applicable

Criteria: Federal regulations, 2 CFR 200.303(a), require the Montana Department of Transportation (department) establish and maintain effective internal control over the federal award that provides reasonable assurance that the non-federal entity is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Federal law, 40 USC 3142, requires contractors and subcontractors to pay prevailing wages to laborers and mechanics for work completed under federally-funded contracts in excess of \$2,000.

Federal regulation, 29 CFR 5.5, establishes contract language requiring contractors to submit payrolls to the department, along with a statement of compliance that all laborers and mechanics employed on the contract during the payroll period have been paid not less than the applicable wage rates for the classification of work performed, as specified in the applicable wage determination incorporated into the contract.

Federal regulation, 29 CFR 5.6, prohibits payment to contractors unless there is on file with the contracting agency, a certification by the contractor stating the contractor and its subcontractors have complied with the provisions of 29 CFR 5.5.

Condition: The department has assigned the responsibility for obtaining and reviewing certified payrolls to the Engineering Project Manager in the district who is responsible for the project. Staff in Helena also complete a final audit of the payrolls received in the district, in order to verify prevailing wages were paid to the contractor's or subcontractor's employees. These procedures did not ensure all certified payrolls were received for construction projects active during the audit period.

Questioned Costs: No questioned costs were identified.

Context: As part of our audit, we planned to perform a statistically valid sample of 30 projects from the 210 projects with active construction during the audit period, to determine whether the

department received the required certified weekly payrolls. After testing four projects in the sample, we identified two projects in different districts for which not all certified payrolls were obtained. Department staff in both Helena and the districts were unaware of the missing certified payrolls, and indicated the payrolls were likely overlooked because of the large size of the projects. The missing certified payrolls for these projects constitute noncompliance with federal regulations, and indicate the department's process to ensure all certified payrolls are remitted is not working as intended. The department has many active construction projects each year, and project managers may be assigned to multiple, concurrently-running projects at once. Given this, we believe there are likely other instances of noncompliance, and we did not test the remaining projects in our sample.

Effect: The department is not in compliance with federal regulations requiring the receipt of certified payrolls prior to issuing payments to contractors. There is also risk the department will not identify, through its final payroll audit or other monitoring procedures, instances where contractors or subcontractors do not pay their employees prevailing wages.

Cause: Department staff indicated they believe the contractor is ultimately responsible for ensuring all certified payrolls are submitted. The department is responsible for contract management and ensuring compliance with federal regulations, and as such, should have a process in place designed to ensure all payrolls are remitted.

Recommendation: We recommend the Montana Department of Transportation:

- A. Enhance internal controls to ensure the department receives all required certified payrolls, and
- B. Comply with requirements governing the Highway Planning and Construction Program by obtaining certified weekly payrolls from contractors and subcontractors for all active construction projects.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-029: U.S. Department of Transportation
CFDA #20.205, 20.219 Highway Planning and Construction Cluster
Grant #Not Applicable

Criteria: Federal regulations, 2 CFR 200.441, 421, and 467, consider costs incurred for fines, penalties, damages, and other settlements, as well as costs for advertising and public relations and selling and marketing, to be unallowed costs that are not eligible for federal reimbursement.

Condition: The Montana Department of Transportation (department) included unallowed costs in the calculation of the fiscal year 2016 federal indirect cost rate, resulting in over collection of indirect costs for CFDA #20.205.

Questioned Costs: We question approximately \$143,000 in indirect costs collected for CFDA #20.205 in state fiscal year 2016.

Context: Annually, the department negotiates an indirect cost rate with the Federal Highway Administration. The negotiated rate is applied to every dollar of direct Highway Planning and Construction Program expenditures incurred, and the department is federally reimbursed for these costs. The department calculates its indirect cost rate by dividing total indirect costs by direct program costs for the department as a whole.

The department included expenditures for separation allowances, settlement costs, and promotional aides, in its calculation of the indirect cost rate for fiscal year 2016. We consider these types of costs to fall under the exclusions in 2 CFR 200.441, 421, and 467. Because these costs were inappropriately included in the rate calculation, the resulting indirect cost rate was 0.04 percent higher than it should have been. Under this higher rate, the department charged approximately \$143,000 more in indirect costs to the Highway Planning and Construction Program than should have been charged.

We reviewed the rate calculation for fiscal year 2017 as part of the audit, and noted no ineligible costs included in the calculation. Additionally, department staff noted the rate calculation process includes

a step to account for over or under collections from prior years, so the error in the 2016 rate will self-correct in future years.

Effect: The department is not in compliance with federal requirements, resulting in questioned costs.

Cause: Department staff indicated the expenditures for these ineligible activities were inadvertently overlooked during the calculation process, and noted procedures were updated to identify and exclude these types of expenditures in future rate calculations.

Recommendation: We recommend the Montana Department of Transportation comply with federal regulations by including only allowable costs in its indirect cost rate calculation.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-030: U.S. Department of Transportation
CFDA #20.509, Formula Grants for Rural Areas
Grant #MT-18-X064, MT-2017-002

Criteria: Federal law, 49 USC 5311(b)(4), requires the Department of Transportation (department) to submit an annual report containing information on capital investment, operations, and services provided with funds received under section 5311, including total annual revenue, sources of revenue, total annual operating costs, total annual capital costs, fleet size and type, fleet related facilities, revenue vehicle miles, and ridership.

Federal regulations, 2 CFR 200.303(a), require the department establish and maintain effective internal control over federal awards that provide reasonable assurance that the department is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the federal award.

Condition: The department's internal controls did not ensure accurate federal reporting of recipient financial information for the Formula Grants for Rural Areas (5311) program. We identified three instances of inaccurate reporting during the audit period.

Questioned Costs: No questioned costs were identified.

Context: The department is responsible for submitting the annual report, via the National Transit Database (NTD) to the Federal Transit Administration (FTA) on behalf of the state and its subrecipients. Several line items of the NTD report contain critical information the FTA uses in administering the 5311 Program, including: total annual operating expenses, local operating assistance, annual capital costs, and vehicle trips.

Approximately 39 subrecipients received 5311 Program funds through the department each fiscal year. As part of our audit, we reviewed the amounts the department reported in NTD for 5311 Program activity, for critical line items for eight subrecipients, to determine whether the information submitted was complete and accurate. This is not a statistically valid sample. Our review covered the reporting completed during our audit period, which included financial data for fiscal years 2015 and 2016.

Of the eight subrecipients reviewed, we identified one subrecipient for which the department could not support the amount of reported annual capital costs. We expanded our testing, to review annual capital costs reported for three additional subrecipients, and identified two additional errors in reported amounts. See below for more information.

- ◆ Subrecipient 1 – The subrecipient had capital costs approximating \$92,000 for 5311 Program-funded vehicles delivered in fiscal year 2015. The department was unable to provide evidence that these capital costs were reported through NTD.
- ◆ Subrecipient 2 – The subrecipient had capital costs approximating \$78,000 for 5311 Program-funded vehicles delivered in fiscal year 2016 that were not reported through NTD. Additionally, the department incorrectly reported approximately \$142,000 of capital costs incurred for vehicles purchased with non-5311 Program FTA funds as 5311 Program capital costs for fiscal year 2016.
- ◆ Subrecipient 3 – The department incorrectly reported approximately \$111,000 of capital costs incurred for vehicles purchased with non-5311 Program FTA funds as 5311 Program capital costs for fiscal year 2016.

Effect: The department reported incorrect data.

Cause: Department staff stated fiscal year 2015 was the first year in which NTD reporting was done electronically, and noted the department and FTA both had issues in implementing the new electronic reporting system. Staff further explained training over the submission of NTD reports is not regularly available, and NTD reporting guidance from the FTA changed frequently during the audit period. While the department faced these challenges, it is still obligated to report accurate and complete data.

Recommendation: We recommend the Montana Department of Transportation:

- A. Implement internal controls to ensure the completeness and accuracy of information submitted to the National Transit Database for the Formula Grants for Rural Areas program, and
- B. Comply with federal regulations by reporting complete and accurate data for the Formula Grants for Rural Areas program in the National Transit Database report.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

State of Montana
Schedule of Findings and Questioned Costs
For the Two Fiscal Years Ended June 30, 2017

Section III – Federal Award Findings and Questioned Costs

Finding 2017-031: U.S. Department of Transportation
CFDA #20.509, Formula Grants for Rural Areas
Grant #MT-18-X064, MT-2017-002

Criteria: Federal regulations, 2 CFR 200.303(a), require the Department of Transportation (department) to establish and maintain effective internal control over federal awards that provide reasonable assurance that the department is managing the federal awards in compliance with federal statutes, regulations, and the terms and conditions of the federal awards.

Condition: The department's internal controls should be enhanced to ensure transit vehicles are procured from eligible manufacturers. The department's vehicle procurement process does not include a step to determine whether the manufacturer of the vehicles it purchases are transit vehicle manufacturers (TVMs) subject to U.S. Department of Transportation (DOT) Disadvantaged Business Enterprises (DBE) federal regulations. Additionally, the procurement process is not designed to confirm a TVM has been approved by the Federal Transit Administration (FTA), when the DBE regulations are applicable to the purchase.

Questioned Costs: No questioned costs were identified.

Context: Through the Formula Grants for Rural Areas (5311) Program, the department provides qualified organizations with grant funding for capital purchases, such as vehicles to be used in providing transit services to the organizations' clientele. The department purchases vehicles on behalf of grant recipients. During the audit period, the department issued and purchased 5311 Program-funded vehicles through six invitations for bids, for a total of 22 vehicles. The department purchased some of the vehicles directly from a factory dealership, while others were purchased by a third-party dealership in the transit industry.

Effect: Without effective internal controls over compliance, there is risk the department will purchase vehicles from ineligible manufactures. While we did not question any vehicle purchases during the audit period, federal regulations provide the FTA with authority to pursue formal enforcement action

or impose sanctions against the department for failure to comply with DBE requirements. For this reason, department verification of compliance is important.

Cause: Department staff indicated they rely on the knowledge and industry expertise of the staff at the non-factory dealership from which the vehicles are purchased, to know whether the DBE requirements are applicable and if so, whether the TVM is in compliance with those requirements. The department obtains a compliance certification from the dealership, which department staff consider to be a sufficient internal control. This certification is required under federal regulations, but is not sufficient to verify the applicability of DBE requirements and the TVM's compliance with them.

Recommendation: We recommend the Montana Department of Transportation enhance internal controls over compliance with transit vehicle procurement regulations by:

- A. Determining whether the manufacturers of the vehicles it purchases are subject to Disadvantaged Business Enterprises federal requirements.
- B. Confirming the vehicle manufacturers have been approved by the Federal Transit Administration, if applicable.

Views of Responsible Officials and Corrective Action Plans: The department concurs with this recommendation. For additional information regarding the department's planned corrective action see Corrective Action Plan starting on page D-1.

Re: Corrective Action Plan
Montana Single Audit Report #16-02
For the Two Fiscal Years Ended June 30, 2017

Dear Mr. Maciver:

In accordance with Uniform Guidance requirements, the state of Montana is responsible for follow-up and corrective action on all audit findings identified in the Montana Single Audit Report. As part of this responsibility, the state is required to prepare a corrective action plan to address each financial or federal audit finding included in this report. The Office of Budget and Program Planning compiles this information on behalf of the state and oversees the implementation status of these audit findings.

Attached is the State of Montana's Corrective Action Plan for the two fiscal years ended June 30, 2017. This summary document, which was prepared by each agency or university with a finding in this report, provides the name of the contact person responsible for the corrective action, the corrective action planned, and the anticipated completion date. As you can see from the attached summary, the corrective actions for most of the findings identified have either been already completed or will be finalized within the next few months. The exception is those findings requiring legislation or related to agency review processes that are updated on an annual basis.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Villa".

Dan Villa
Budget Director

cc: Sonia Powell, Single Audit Coordinator

STATE OF MONTANA CORRECTIVE ACTION PLAN FOR THE TWO FISCAL YEARS ENDED JUNE 30, 2017				
Finding #	CFDA #	CAP - Corrective Action Plan	Person Responsible for CAP	Target Date
2017-1	Various	<p>Amortization of Certain Retirement Systems - After working closely with plan stakeholders throughout the legislative interim, the Montana Public Employees' Retirement Administration (MPERA) introduced House Bill 136 during the 65th Legislative Session to increase the funding status and overall actuarial soundness of the Game Wardens' and Peace Officers' Retirement System (GWORS). The provisions of the bill would have increased contributions for GWORS employees by 44% and for HPORS employees by 2%. As noted in the fiscal note accompanying the bill, such an increase would have brought the amortization period of the system below 30 years. On March 30, 2017, the bill passed the House by a vote of 55 to 45 but was eventually voted down by the Senate Finance and Claims Committee on April 12, 2017 and failed to become law. As required by law, MPERA will continue to work with plan stakeholders during the legislative interim and will again be proposing a separate funding bill for GWORS during the 66th Legislature's 2019 Session. The purpose of this bill will be to increase the funding status of the GWORS system in order to improve the actuarial soundness of the plan and to decrease the plan's amortization period.</p> <p>Sheriffs' Retirement System - After working closely with plan stakeholders throughout the legislative interim, MPERA, with the support of plan stakeholders, introduced House Bill 383 during the 65th Legislative Session to increase the funding status and overall actuarial soundness of the Sheriffs' Retirement System (SRS). This bill was formally passed by the Montana Legislature on April 20, 2017 and was signed into law by Governor Bullock on May 4, 2017. With an effective date of July 1, 2017, the bill increased contributions for SRS employees by 1.25% and for SRS employers by 3%. As reflected in the June 30, 2017 actuarial valuation of SRS, due to the successful implementation of this legislation, the SRS system now amortizes in 25 years.</p> <p>DCRP Disability OPEB Funding - On April 4, 2016, the Public Employees' Retirement Board and the Montana Board of Investments entered into a separate contract with Blackrock Institutional Trust Company N.A. to manage and diversify the investment asset allocation of the DCRP Disability OPEB plan into longer-term asset classes with higher rates of return in order to get this plan under the 30 years of amortization. As reflected in the June 30, 2017 actuarial valuation, the number of years to amortize the unfunded actuarial liability decreased to 19 years from not amortizing at June 30, 2016. The funded status of the plan increased to 87.14% from 86.83% at June 30, 2017.</p>	Dore Schwinden, Executive Director Public Employees' Retirement Administration	Ongoing
		<p>Highway Patrol Officers' Retirement System - As required by Mont. Code Ann. § 19-2-405(5), MPERA's actuary, Cavanaugh Macdonald Consulting LLC, conducted an actuarial experience study for the six-year period ending June 30, 2016. On May 11, 2017, the Public Employees' Retirement Board adopted the actuarial assumption changes recommended in this experience study. These assumption changes, which included lowering the actuarial assumed rate of return for defined benefit systems, had the net result of increasing the actuarial accrued unfunded liability of the Highway Patrol Officers' Retirement System (HPORS), and in turn, the period necessary to amortize this liability from 28 to 37 years. Due to this funding status change, and as required by law, MPERA will be working with HPORS plan stakeholders during the legislative interim to propose a separate funding bill for HPORS during the 66th Legislature's 2019 Session. The purpose of this bill will be to increase the funding status of HPORS in order to improve the actuarial soundness of the plan and to decrease the plan's amortization period.</p>	David Ewer, Executive Director Montana Board of Investments	6/30/2018
2017-2	Various	<p>Financial Statement Reporting Errors - The Board of Investments will do the following: 1) Update existing procedures to comply with the latest accounting standards as established by the Governmental Accounting Standards Board where needed; 2) Where the board now uses a different presentation format from the previous year, the board will establish and document procedures in preparing and reviewing the Unified Investment Program financial statements; 3) The board will adhere to a specific work flow requirement to include an independent review by staff knowledgeable with program operations and generally accepted accounting practices; 4) At least annually, staff will update the board on quality control in preparing our financial statements and footnotes; and 5) No later than June 29, 2018, the board will submit a report to the Legislative Auditor addressing this matter.</p>		
2017-001	10.665	<p>Subrecipient Monitoring Procedures - The department has implemented internal controls so that an annual risk assessment is performed. In addition, the department has conducted during-the-award interviews with three counties chosen based on the annual risk assessment. The department has developed procedures to monitor county audit submissions and complete timely management decisions.</p>	Mark Bruno, Financial Manager Director's Office of Finance and Budget Department of Administration	Completed

**STATE OF MONTANA
CORRECTIVE ACTION PLAN
FOR THE TWO FISCAL YEARS ENDED JUNE 30, 2017**

		CAP - Corrective Action Plan		Person Responsible for CAP	Target Date
Finding #	CFDA #				
2017-002	Various	Cash Management Improvement Act - The department updated the template used by agencies for the interest calculation. Completed spreadsheets were submitted by agencies, and reviewed by the department, prior to completing the fiscal year 2017 Annual Report.		Cheryl Grey, Administrator State Financial Services Division Department of Administration	Completed
2017-003	17.225	Treasury State Agreement - As of July 2017, new procedures have been implemented by the Department of Labor and Industry to insure that the Cash Management Improvement Act spreadsheet received annually from the Department of Administration is correct and in accordance with the Treasury State Agreement established by the federal government.		Brenda Nordlund, Administrator Unemployment Insurance Division Department of Labor and Industry	Completed
2017-004	17.225	Overpayment Detection and Recovery Activities Report Validation - The Department of Labor and Industry was able to successfully update the Overpayment Detection and Recovery Activities report (ETA 227) coding into the Montana Integrated System to Improve Customer Service. The ETA 227 report was successfully updated as of 08/02/17.		Brenda Nordlund, Administrator Unemployment Insurance Division Department of Labor and Industry	Completed
2017-005	10.553 10.555 10.556 10.559 84.010 84.027 84.173	Treasury State Agreement - The Office of Public Instruction partially concurs with this recommendation. During the Treasury State Agreement (TSA) process in March 2018, the office will work with the Department of Administration to verify its understanding is accurate, and if not, language in the TSA will be updated as applicable.		Jay Phillips, Administrator Centralized Services Division Office of Public Instruction	3/30/2018
2017-006	84.010	State Assessments - The Office of Public Instruction will include all assessments, including the American College Testing, in the security procedures beginning with the spring 2018 assessment process. The office will also confer with the U.S. Department of Education to determine control procedures that would be acceptable with respect to fulfilling the state's responsibility to monitor the assessment security process. At that point, procedures will be developed and implemented.		Jessica Ellertson, State Assessment Director State Assessment Division Office of Public Instruction	12/31/2018
2017-007	84.007 84.033 84.038 84.063 84.268 84.379 93.264 93.342 93.364	Direct Loan and Pell Grant Programs - Effective early in fiscal year 2017, the University of Montana - Missoula's Business Services personnel refined their cash monitoring procedures for Direct Loan and Pell Grant programs to ensure funds were returned in a timely manner.		Tara Scott, Financial Manager Business Services University of Montana - Missoula	Completed
2017-008	84.007 84.033 84.038 84.063 84.268 84.379 93.264 93.342 93.364	Banner Security - The University of Montana - Missoula's management determined that the manual process utilized for their annual review had become too labor intensive and cumbersome. In fiscal year 2017, personnel developed an automated process, and final testing has been completed. The annual security audit occurs in the fall of the preceding fiscal year, so the fiscal year 2017 review was completed in fall 2017.		Karen Moore, Banner Coordinator University of Montana - Missoula	Completed
2017-009	20.205 20.219	Cash Management Improvement Act - During the period under audit, the Department of Fish, Wildlife & Parks' Recreational Trails Program endured several programmatic changes. One of these changes was related to cash management and draw techniques. Some of these duties were being performed within the Parks Division, rather than the Administration Division, which resulted in temporary discrepancies within the accounting records. The Administration Division took over these procedures in January 2017 and will continue to develop strong internal controls surrounding cash management. The division now reconciles and requests cash as needed in this fund monthly and will continue to improve the cash management process.		Jennifer Thompson, Accounting Bureau Chief Administration Division Department of Fish, Wildlife & Parks	Completed

CORRECTIVE ACTION PLAN
FOR THE TWO FISCAL YEARS ENDED JUNE 30, 2017**

Finding #		CFDA #	CAP - Corrective Action Plan	Person Responsible for CAP	Target Date
2017-010	20.205 20.219		Subrecipient Monitoring Procedures - As noted within the discussion of the finding, the Department of Fish, Wildlife & Parks identified the need to establish internal controls and adhere to compliance requirements surrounding subrecipient monitoring. In January 2017, the department hired a grants and contracts coordinator and has implemented procedures and internal controls to bring the department into compliance with the majority of the federal subrecipient monitoring requirements for the Recreational Trails Program going forward. The department will develop controls and documentation regarding the federal requirements associated with subrecipient audits.	Adam Brooks Federal Aid and Compliance Bureau Chief Administration Division Department of Fish, Wildlife & Parks	8/31/2018
2017-011	97.042 97.047 97.067		Subgrantee Reimbursements - The Department of Military Affairs improved internal controls over the grant reimbursement process in the Disaster and Emergency Services Division to ensure the expenditures are allowable under the grant awards.	Deilla Bruno DES Administrator Department of Military Affairs	Completed
2017-012	14.871		Treasury State Agreement - The Department of Commerce's Housing Division worked with the Department of Administration to amend the Treasury State Agreement.	Bruce Brensdal, Administrator Housing Division Montana Department of Commerce	Completed
2017-013	14.871		Sole Source Procurement - A formal sole source justification was completed by the Department of Commerce's Housing Division in fiscal year 2017. Going forward, on an annual basis, the division's Housing Bureau staff will verify and document that the current Section 8 Housing Choice Vouchers' field service contractors are the only available providers. At the end of each seven-year contract period, formal sole source justifications will be completed before entering into new contracts.	Bruce Brensdal, Administrator Housing Division Montana Department of Commerce	Completed
2017-014	10.557 93.558 93.667 93.767 93.775 93.777 93.778		Cost Allocation Plan - The department has reviewed all cost pools for alignment with the cost allocation plan and compliance with indirect cost limitations. Areas of the cost allocation plan that need to be updated to align with departmental procedures have been identified and will be submitted for approval. New procedures to ensure the cost allocation plan is reviewed regularly, and updated timely, have been implemented. The revised cost allocation plan is in the final review cycles and will be submitted by 03/30/2018 to the U.S. Department of Health and Human Services.	David Crowson, Administrator Business and Financial Services Division Department of Public Health and Human Services	3/31/2018
2017-015	93.558 93.568 93.575 93.596 93.658 93.659		Cash Management Improvement Act - The Department of Public Health and Human Services has updated procedures detailing the Cash Management Improvement Act (CMIA) cash spreadsheet and cash reimbursement requests and will ensure staff who prepare the CMIA reconciliations are properly trained. Training specific to CMIA cash management will be added, and any changes to CMIA requirements will be incorporated into ongoing training of existing staff. The department is currently complying with the Treasury State Agreement, as required by federal regulations, for the Low Income Home Energy Assistance Program.	David Crowson, Administrator Business and Financial Services Division Department of Public Health and Human Services	3/31/2018
2017-016	93.775 93.777 93.778		Provider Agreements and Disclosures - The Department of Public Health and Human Services is in compliance with federal regulations specific to provider agreements and disclosures.	Marie Matthews, Branch Manager Medicaid and Health Services Department of Public Health and Human Services	Completed
2017-017	93.775 93.777 93.778		Medicaid Fraud Control Unit Referrals - The Department of Public Health and Human Services has conferred with the Medicaid Fraud Control Unit (MFCU) and reviewed federal regulations. The department has revised the current agreement with MFCU, and current processes and documentation requirements, to ensure cases of suspected provider fraud are being referred and documented in accordance with the federal regulations.	Erica Johnston, Branch Manager Operations Services Department of Public Health and Human Services	Completed
2017-018	93.775 93.777 93.778		CMS-64 Reporting - The Department of Public Health and Human Services has implemented internal control procedures for the accurate reporting of the CMS-64 and has had several successful reporting cycles since implementation. Staff responsible for completing the CMS-64 will be cross-trained on all aspects of the report to ensure ongoing, timely, and accurate CMS-64 reporting.	David Crowson, Administrator Business and Financial Services Division Department of Public Health and Human Services	Completed
2017-019	93.775 93.777 93.778		Automated Data Processing Reviews - The Department of Public Health and Human Services will modify procedures and internal controls to ensure documentation supporting Automated Data P processing reviews contains all the necessary information. A revised quality assurance review process has been implemented to ensure security controls are completed. The revised bi-annual assessment list will be compiled and completed by December 31, 2017, as part of the 2018 security assessment work plan.	Stuart Fuller, Chief Information Officer Technology Services Division Department of Public Health and Human Services	6/30/2019

**STATE OF MONTANA
CORRECTIVE ACTION PLAN
FOR THE TWO FISCAL YEARS ENDED JUNE 30, 2017**

		CAP - Corrective Action Plan		Person Responsible for CAP	Target Date
Finding #	CFDA #				
2017-020	10.557	Food Instruments and Cash-Value Vouchers - The Special Supplemental Nutrition Program for Women, Infants, and Children's (WIC) electronic benefit transfer (EBT) has been implemented by the Department of Public Health and Human Services. The new EBT system will allow WIC to monitor and prevent the issues identified through the audit.		Todd Harwell, Administrator Public Health and Safety Division Department of Public Health and Human Services	Completed
2017-021	10.557	Disposition of WIC Benefits - The Special Supplemental Nutrition Program for Women, Infants, and Children's (WIC) electronic benefit transfer (EBT) has been implemented by the Department of Public Health and Human Services. The new EBT system will allow WIC to monitor and prevent the issues identified through the audit.		Todd Harwell, Administrator Public Health and Safety Division Department of Public Health and Human Services	Completed
2017-022	93.575 93.596	Child Care Overpayments - The Department of Public Health and Human Services has updated business processes to include coordination between programs. Additional training will occur for staff and eligibility contractors to inform them of business processes and standards to ensure referral of overpayments for timely recovery.		David Crowson, Administrator Business and Financial Services Division Department of Public Health and Human Services	Completed
2017-023	93.558	Income Information Comparison - The business process is in place at the Department of Public Health and Human Services to process the file from the Internal Revenue Service once received. The department process is to check in with the Technology Services Division to determine if any data has been received to date, and none has at this time from the Internal Revenue Service.		Jamie Palagi, Administrator Human and Community Services Division Department of Public Health and Human Services	Completed
2017-024	93.558	Health Care Provider Services - The Department of Public Health and Human Services does not concur with this recommendation. The department is following state procurement law with regard to the purchase of these services. The Montana Procurement Act specifically exempts the services of "health care providers," such as those whose services were obtained (Section 18-4-132(3)(f)(ii), MCA).		Erica Johnston, Branch Manager Operations Services Department of Public Health and Human Services	N/A
2017-025	84.126	Administrative Leave - The Department of Public Health and Human Services does not concur with this recommendation. Federal regulations allow for allocation of these costs, including periods of authorized absences from the job, such as for annual leave, family-related leave, sick leave, holidays, court leave, military leave, and administrative leave. The department contends that administrative leave is a normal and reasonable charge, and that these questioned costs are appropriately recorded and allocated through the Public Assistance Cost Allocation Plan. While other departmental staff has been assigned the responsibility and oversight formerly provided by the two staff in question, the federal grant is not being dually charged for this temporary reassignment of duties.		Erica Johnston, Branch Manager Operations Services Department of Public Health and Human Services	N/A
2017-026	93.268	Federal Indirect Costs - The Department of Public Health and Human Services has reviewed all cost pools for alignment with the cost allocation plan and compliance with indirect cost limitations. Areas of the cost allocation plan that need to be updated to align with departmental procedures have been identified and will be submitted for approval. New procedures to ensure the cost allocation plan is reviewed regularly, and updated timely, have been implemented. The revised cost allocation plan is in the final review cycles and will be submitted by 03/30/2018 to the U.S. Department of Health and Human Services.		David Crowson, Administrator Business and Financial Services Division Department of Public Health and Human Services	3/31/2018

STATE OF MONTANA
CORRECTIVE ACTION PLAN
FOR THE TWO FISCAL YEARS ENDED JUNE 30, 2017

Finding #	CFDA #	CAP - Corrective Action Plan	Person Responsible for CAP	Target Date
2017-027	20.205 20.219	<p>Construction Contract Amendments - The Montana Department of Transportation (MDT) partially concurs with this audit recommendation. MDT does not concur with part A of the recommendation due to the fact that we adjust the contract in accordance with 23 CFR 635.109 and MDT standard specification 109.03 to document the actual incorporated quantities accepted on the project. 23 CFR 635.109 (3) (ii) states, "If the alterations or changes in quantities significantly change the character of work under the contract... an adjustment will be made to the contract." Based on the department's interpretation, we believe the federal regulations and the MDT spec book do not require an amendment to the contract for the adjusted quantities.</p> <p>MDT interprets the specification as a two-step process. The first step is identifying if a significant change in quantities has occurred. When a significant change in quantities has occurred (as defined by the specification, 25% change for major items and 50% change for non-major items), then the second step is to determine if there has been a significant change in the character of work. The term "character of work" refers to the contractor's means and methods for completing the activity. If the character of work significantly changes from the original bid plan, then they are due a price adjustment (which can be positive or negative). If it is determined that the character of work has been changed due to the increased/decreased quantities, a change order is initiated and the unit price is adjusted for the quantity greater than 25% (major item) or 50% (non-major item) or the entire quantity if it has decreased by the appropriate percentage.</p> <p>The audit finding reference to the federal regulations and MDT's spec book is not accurate, as both only reference "significant change" and do not include the wording "in the character of work."</p> <p>MDT is recognizing the potential for other interpretations of the specification and will work with MDT Legal, the Federal Highway Administration, and the Montana Contractors' Association to look at potential revisions to the specification.</p>	Dwane Kailey, Administrator, Highways and Engineering Division Montana Department of Transportation	12/31/2018
2017-028	20.205 20.219	<p>Certified Payrolls - It is the responsibility of the contractors to submit certified weekly payrolls to the department when working on a Montana Department of Transportation (MDT) construction project. The department's internal control is that the Engineering Project Managers (EPMs) ensure certified payrolls are received each week for their contracts. The EPMS then submit the payrolls to the contractor compliance specialist for compliance testing. MDT will increase its education of this requirement to contractors, as well as enhance our training to EPMS. Additionally, MDT is in the process of implementing a new module for Site Manager that will allow the contractors to submit the certified payrolls electronically. This will assist in improving compliance. Finally, MDT Audit Services will add a step to review this process as part of their annual Construction Project Audits.</p>	Dwane Kailey, Administrator, Highways and Engineering Division Montana Department of Transportation Vickie Murphy, Audit Manager Audit Services Montana Department of Transportation	12/31/2018
2017-029	20.205 20.219	<p>Federal Indirect Costs - The Montana Department of Transportation agrees that some costs that were unallowable were inadvertently left in the calculation of the fiscal year 2016 indirect cost rate. As mentioned in the audit finding, the indirect cost worksheet used to calculate the rate was updated to ensure these costs would be eliminated from future rate calculations.</p> <p>The associated questioned costs are being repaid to the federal government through the carryforward (over/under recovery) amount factored into the fiscal year 2018 indirect cost rate. Per 2 CFR 200, the department is required to compare estimated costs to actual costs once these amounts become known. If the actual costs are greater than estimated, this under-recovery is added to the next rate. If actual costs are less than estimated, this over-recovery is subtracted from the next rate. The department under-recovered indirect costs of approximately \$58,000 in fiscal year 2016.</p> <p>The department will ensure only allowable costs, as defined in 2 CFR 200, are included in its indirect cost rate calculation.</p>	Larry Flynn, Administrator Administration Division Montana Department of Transportation	Completed

CORRECTIVE ACTION PLAN
FOR THE TWO FISCAL YEARS ENDED JUNE 30, 2017**

CAP - Corrective Action Plan			
Finding #	CFDA #	CAP - Corrective Action Plan	Target Date
2017-030	20.509	<p>National Transit Database Report - Enhanced internal controls have been implemented by the Montana Department of Transportation (MDT). As of March 2018, MDT Transit has enhanced its internal controls through development of a spreadsheet for tracking vehicles as they are delivered to ensure they are entered into the National Transit Database (NTD) in the appropriate year. In addition, during fiscal year 2016, MDT implemented a new internal process for reporting that identifies the required data on a single spreadsheet, which is pulled from the current grant application system, to ensure complete and accurate data reporting. At this time, capital purchases are being reported accurately in NTD.</p>	Completed
2017-031	20.509	<p>Transit Vehicle Manufacturer Approval - The Montana Department of Transportation will add a step to its procurement process to confirm a Transit Vehicle Manufacturer (TVM) has been approved by the Federal Transit Authority (FTA). The department will adopt the process outlined in the FTA's Best Practices Procurement Manual, and prior to contract award, will confirm a TVM's certification by checking the list published on the FTA's website. If the TVM is not listed online, the department will contact the FTA for confirmation of the TVM's eligibility. The department will withhold award until confirmation is received and will document this confirmation step.</p>	6/30/2018

Re: Summary Schedule of Prior Audit Findings
Montana Single Audit Report #16-02
For the Two Fiscal Years Ended June 30, 2017

Dear Mr. Maciver:

In accordance with Uniform Guidance requirements, the state of Montana is responsible for follow-up and corrective action on all audit findings identified in the Montana Single Audit Report. As part of this responsibility, the state is required to prepare a summary schedule reporting the status of all audit findings included in the prior audit's schedule of findings and questioned costs relative to federal awards. The Office of Budget and Program Planning compiles this information on behalf of the state and oversees the implementation status of these audit findings.

Attached is the State of Montana's Summary Schedule of Prior Audit Findings for the two fiscal years ended June 30, 2017. This summary identifies the implementation status of all prior audit findings, except for those findings that have been fully corrected, are no longer valid, or do not warrant further action on the part of the state.

Sincerely,

A handwritten signature in black ink, appearing to read "Dan Villa".

Dan Villa
Budget Director

cc: Sonia Powell, Single Audit Coordinator

STATE OF MONTANA
SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS
FOR THE TWO FISCAL YEARS ENDED JUNE 30, 2017

CFDA #	Federal Program Name	Finding #	Prior Audit Finding	Questioned Costs	Corrective Action	Initial Year of Finding	Comments

- 2 - Finding has not been corrected or partially corrected.
- 3 - Corrective action taken is significantly different than reported.
- 4 - Finding is no longer valid.

STATE OF MONTANA
SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS
FOR THE TWO FISCAL YEARS ENDED JUNE 30, 2017

CFDA #	Federal Program Name	Finding #	Prior Audit Finding	Questioned Costs	Corrective Action	Initial Year of Finding	Comments
93.775 93.777 93.778 93.767	Medicaid Cluster Children's Health Insurance Program	2015-008	Insufficient controls over completeness and accuracy of CMS-64 reports.	None	2	2014-15	Discussed as part of Finding 2017-018.
93.775 93.777 93.778 93.767	Medicaid Cluster Children's Health Insurance Program	2015-009	Noncompliance with federal Cash Management Improvement Act procedures.	None	1	2014-15	This prior audit finding was fully implemented.
93.775 93.777 93.778	Medicaid Cluster	2015-012	Noncompliance with federal risk analyses and Automated Data Processing systems reviews.	None	2	2014-15	Discussed as part of Finding 2017-019.
93.568 93.575 93.596 93.658 93.959	Low-Income Home Energy Assistance CCDF Cluster Foster Care - Title IV-E Block Grants for Prevention and Treatment of Substance Abuse	2015-013	Noncompliance with Federal Funding Accountability and Transparency Act requirements.	None	1	2014-15	This prior audit finding was fully implemented.
93.658	Foster Care - Title VI-E	2015-014	Noncompliance with federal subrecipient monitoring requirements.	None	2	2014-15	This prior audit finding was partially implemented. Because the department intends to include the required subrecipient language in their fiscal year 2018 agreements, no further recommendation is being made at this time.
93.859	Biomedical Research and Training	2015-016	Unallowable equipment purchase.	\$48,997	1	2014-15	This prior audit finding was fully implemented.

Category of Corrective Action Taken

- 1 - Finding has been fully corrected.
- 2 - Finding has not been corrected or partially corrected.
- 3 - Corrective action taken is significantly different than reported.
- 4 - Finding is no longer valid.

STATE OF MONTANA
SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS
FOR THE TWO FISCAL YEARS ENDED JUNE 30, 2017

CFDA #	Federal Program Name	Finding #	Prior Audit Finding	Questioned Costs	Corrective Action	Initial Year of Finding	Comments
93.558	Temporary Assistance for Needy Families	2015-026	Improvements needed in department's Combined Healthcare Information and Montana Eligibility System's - Enterprise Architecture to ensure accuracy of eligibility determinations and benefit payments.	None	2	2014-15	This prior audit finding was partially implemented. Because the department continues to make improvements, no further recommendation is being made at this time.
U.S. Department of Housing and Urban Development							
14.871	Section 8 Housing Choice Vouchers	2015-019	Payments made to ineligible recipients.	\$63,664	1	2014-15	This prior audit finding was fully implemented.
14.871	Section 8 Housing Choice Vouchers	2015-020	Noncompliance with federal Cash Management Improvement Act requirements.	None	2	2014-15	Discussed as part of Finding 2017-012.
U.S. Department of Labor							
17.225	Unemployment Insurance	2015-025	Noncompliance with federal data validation requirements for Overpayment Detection and Recovery Activities report.	None	2	2014-15	Discussed as part of Finding 2017-004.
U.S. Department of Transportation							
20.205 20.509	Highway Planning and Construction Formula Grants for Rural Areas	2015-021	Noncompliance with Federal Funding Accountability and Transparency Act reporting requirements.	None	2	2014-15	This prior audit finding was partially implemented. Because the department has implemented procedures, and reported timely, in fiscal year 2018, no further recommendation is being made at this time.
20.509	Formula Grants for Rural Areas	2015-022	Noncompliance with federal equipment sale proceeds requirements.	None	1	2014-15	This prior audit finding was fully implemented.

Category of Corrective Action Taken
