This chart shows the **all funds growth** in total expenditures compared to **growth in inflation** and to the **growth in the economy** since fiscal year 2002.

HB 2 authority funds 72.3% of total expenditures. The HB 2 base budget has grown from \$127.1 million in the 2001 biennium to \$133.4 million in the 2021 biennium, an annual growth rate of less than 1.0% compared to a rate of inflation of 2.1% over the same period.

Decreases in expenditures in FY 2005 were due to reduced federal funding for abandoned mines. Increases in funding during FY 2009 through FY 2012 were due to federal funding through the American Recovery and Reinvestment Act.

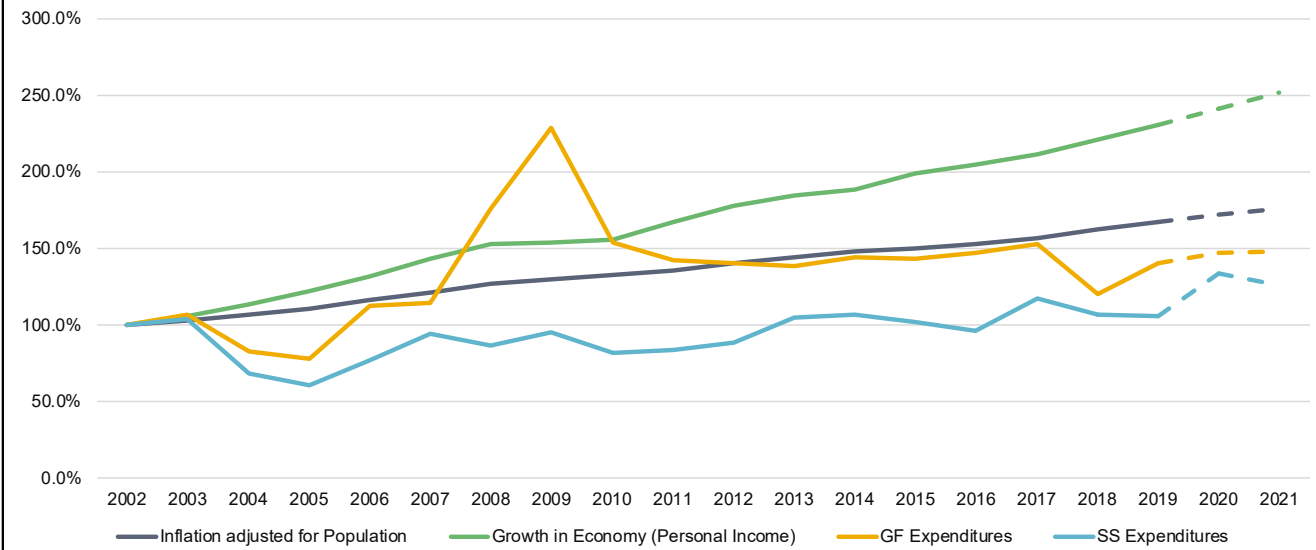

The table below shows the sources that account for 75% of expenditures from state special revenue accounts. Expenditures from the petroleum tank cleanup fund account for 20% of all expenditures from state sources.

This chart shows the **general fund growth** and **state special revenue growth** in total expenditures compared to **growth in inflation** and to the **growth in the economy** since fiscal year 2002.

Growth in the base budget is driven by increases in personal services which has more than doubled since the 2001 biennium. Funding of the base budget has shifted from state special revenue to general fund and federal sources. Increases in **general fund from FY 2008 through FY 2010** are related to one-time-only appropriations for IT projects and reclamation projects.
