Subject:

\$1.5 Billion

Comment:

Seeing the upcoming debate over what to do with this Money, we should look long-term for the future. Why not take a few hundred Million and place it into interest bearing accounts. You could then use this account to fund Good, Healthy School Meals for many years, maybe no one would ever have to worry about paying for their Kids meals. \$400 M at 5% would give you \$20 M a year to provide Meals possibly forever. If you haven't seen what schools feed the Kids we could really stand to improve, and give Parents one less thing to worry about and I think no one would object.
