

Existing Secure, Adult Detention Facility

Located on approximately 40 acres, the 464-bed Regional, State and Federal Support and Detention Facility is a secure, adult detention facility that is designed to be expandable. Public utilities are available and of the appropriate capacities to accommodate the detainees and facility staff.

This facility is approximately 92,273 square feet. The maximum height of the facility is approximately 28 feet. The facility is designed to comply with applicable local, state and national codes. The entire facility is monitored through closed circuit television and operable remotely through the use of a control panel located in the central control room.

The Support and Detention Facility Administrative Area is approximately 5,568 square feet and contains a waiting area, public restrooms, Warden's office, 5 additional offices, evidence room, staff toilets, records, staff lounge, conference room, training room, staff locker rooms, and supply rooms. The ceiling in the Administrative Area is acoustical ceiling tile, the partitions are either concrete masonry units or gypsum wall board. The floors in this area are carpet or vinyl composition tile.

The Police Department Administrative Area is approximately 1,742 square feet and contains lobby, reception area, men and women toilets, supply room and 6 offices.

The Secure Area is approximately 83,463 square feet and contains (36) separation cells, (12) single cells, (24) 2-person cells, (10) 8-person multi-occupancy cells and (12) 24-person dormitories. The Deputy Warden's office and 3 staff offices are located in the Secure Area. There are (2) multi-purpose rooms, (3) classrooms, (1) library, (2) counseling rooms, (1) special purpose room for video conferencing, (1) commissary and (2) vocational rooms. Both contact and non-contact visitation area provided for detainees and their visitors. The central control room is located in the secure area, along with a medical area, dental office, barber, commissary, and indoor recreational areas. The ceilings in the detainee area are detention grade concrete ceilings with high-impact security board; the dormitories are exposed to structure. The floors are sealed concrete and the walls are grouted, reinforced concrete masonry units and/concrete panels. All detainee plumbing fixtures are security-type stainless steel fixtures. The doors in the secure area are security hollow metal and the door hardware is detention grade hardware.

The kitchen is fully equipped with the appropriate kitchen equipment and food storage areas and is designed to accommodate food preparation for up to 500 detainees/staff and is expandable to approximately 1000 – 1,500 detainees/staff with the installation of complimentary pieces of kitchen equipment.

The intake area has ample detainee intake seating, intake counter, records, male and female holding cells, detainee clothing issue, detainee property storage, and release/transfer area. The ceilings in the intake area are detention grade concrete ceilings or high-impact security board. The floors are sealed concrete and the walls are grouted, reinforced concrete masonry units and concrete panels.

The vehicular sallyport is fully secured and accommodates a full size inter-city bus.

The 1,500 square foot Maintenance Building is located adjacent to the vehicular sallyport.
