Subject: [EXTERNAL] Gallatin Canyon Water Sewer District Phase 1 Sewer Project Clarifications

Hello Becky and Renae,

I hope the following will help you clarify the commission's questions about service capacity for Gallatin Canyon Water Sewer District's (GCCWSD) Phase 1.2 Sewer Project:

Phase 1.2 is expected to be completed in 2026 and provide collection capacity for 480 household equivalents disposal capacity for 960 household equivalents.

With additional phases, the Canyon sewer's 20-year buildout is expected to provide collection capacity for approximately 960 household equivalents and disposal capacity for 1920 household equivalents. There is significant community momentum and buildout will likely be achieved sooner.

Please let me know if you have any further questions.

Thank you,

Michelle Pond, EI
Staff Engineer
