Written Statement: Montana's Conservation Districts have had a long relationship with FWP. For decades their Fisheries Biologists have attended monthly meetings in many Districts, year after year, providing information and guidance as we tackle water issues, especially the 310 permitting process. Our relationship with FWP has increased in recent years, as Districts are now managing in cooperation with FWP several AIS check stations, helping to protect our rivers and lakes and irrigators and electricity-producing dams. This program has gone well, and we see this as a win-win partnership. We support these programs.
