Collections -Artifacts-Archeology

The Montana Heritage Commission has over 1 million Americana artifacts ranging from the 1860's to 1920's time period.

We upgraded our train operations to encompass two trains that can double occupancy while giving a historical tour of Montana's history from Virginia City to Nevada City, MT.

Our artifacts and location have been used by the Yellowstone TV series franchise.

Virginia and Nevada City are Montana's number one state owned tourist attraction with over one million tourists visiting from May through September each year.
